HW-8 QRP transceiver, with manual copy. About 2 watts on 80m, 40m, 20m, and 15m. Average condition cosmetically, works fine, receives submicrovolt signals on all bands. A nice little QRP rig. $140 plus shipping.

Rob, KL7NA/W7

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Asking $3400 U.S. plus shipping. Condition warrants price.

I have a HTX-404 with all original accessories plus a rapid charger and two hi-cap batteries for same.

Am looking to trade for a VHF HT-600 (preferrably 6 channel).

Let me know.

Hello, all!
I would like to buy an FT-154 shock mount assembly for a BC-348.
Will be used as part of my ongoing assembly of a working WWII
aircraft radio display. Let me know if you have one to sell. Many
thanks!

Hi folks,

Family time is more important than ham radio time. I'm cleaning the shack and down sizing some equipment that I wont be using. Please email with questions. Terms are check or money order. Prices dont include shipping. I can ship by what ever means you like. Net references available.

1. Kenwood TH75A SOLD

2. Kenwood TR2600 SOLD

3. Kenwood TR-7850 2M mobile rig. SOLD

4. Heathkit Coax Switch (unbuilt, new in box) SOLD

5. Icom HF solid-state transceiver station including:
   Icom 701, PS701 and SM-8 desk microphone. This is a 100W DIGITAL all solid state HF rig covering 160 thru 10 meters (excludes WARC bands). Radio covers USB/LSB/CW/CW-N/RTTY and red LED digital frequency readout.
   Has speech compressor, cw-narrow filter, vox capability. Microphone is a condenser "gooseneck" type with PTT button on the base. Power supply matches the radio cosmetically. It is a 13.8V at 20 amps. Power supply also has big speaker in it, to be used as external station speaker. Entire setup is very clean--a few minor scratches, but front panel is perfect. I have the original manual too. This would make a great setup from Tech plus thru Extra. The rig works great on SSB with the speech compression, as well as on CW with the narrow CW filter. The bands are coming back NOW.
   Dont miss the action, especially on 10M and 15M!
   Entire station (wont split) $425 + 1/2 shipping.

6. Regency CB converted to 10M SSB. Radio runs 15W output PEP and covers AM and USB. Freq coverage is 28.5-28.8 Mhz, the phone portion of 10M. Great for mobile/backpacking. Good condition. Includes manual, sams photofact, mic, power cord, and radio. $65 + shipping

7. ECI Fleet Courier 30B 10M/6M AM transceiver.
   Cosmetically a beauty.
   Electrically a beauty. This is a classic early 1960's tube "mobile/base" AM HF transceiver. Six crystal-controlled channels.
   Chromed cabinet. Blue front panel with white lettering.
   Good cabinet and front panel. Output is 15 watts AM.
   Includes microphone, AC power cord, and DC-DC convertor.

This is a classic
in very nice condition. Thought it was sold before, but buye
never sent payment. Includes 1 set of
crystals (26.1, I think) Asking $45 + shipping.

8. Kenwood AT-120 mobile antenna tuner. Matches the Kenwood TS-50 in size. Originally for use with Kenwood TS-120 HF transceiver.
Covers 80 thru 10 meters. Includes lighted VSWR meter, as well as tuner bypass position. Single coax in and coax out connections.
Very clean -- works well. Also very close in size to Icom 706 and Alinco DX70 mini HF transceivers. $100 + shipping

9. Heathkit SB102 SOLD

10. Vibroplex #6 "lightning bug" key -- late 1930's vintage with Japanned base (no gold trim). Keyer is fully functional but is missing both the original dit arm weight and the vibroplex name plate. Homebrew dit arm is included. This is a nice bug -- took it in on trade, but decided that I like the auto-keyer since I get "glass arm" sending with a bug. This one is probably not collector quality, but works great with my S-line and gold dust twins. $80 + shipping

11. Collins Winged PM-2 mobile power supply -- CCA good condition. Works with KWM2/KWM2A. Tested and works fine. Paint a little rough, but not terrible. S/N 11XXX. $130 + shipping

11b. Collins Winged KWM-2A S/N 325. CCA good condition or better. This is one of the earlier KWM2A's. All original except cabinet paint, and the mic jack was changed from PJ068 plug to a standard 1/4 inch phono plug. Works fine -- clean chassis. Case has been repained -- a close match to the original St. James Grey color. Trim ring is primed -- but not yet painted white.
$420 + shipping

Will sell both the KWM2A and the PM2 mobile supply for $500 plus shipping if someone is interested in both. Price is firm.

12. Alinco DR-110T 2 meter SOLD

13. Desk amplified Microphones SOLD

14. ICOM UHF handheld transceiver covering 430-440 Mhz (note the band, this is for use in Asia, Central, South America, and Europe. Does "minus 5 megahertz" repeater split and automatically transmits the 88.5Hz tone burst to open repeaters (as in Japan). Good cosmetics, good electrical. 3 batteries, radio, antenna, and wall charger. $99 + shipping

15. JC Penney 981-6247 SSB/AM CB radio -- AC/DC, 40 channel, and

ready to convert to 10 meters. Will include converstion instructions (only requires a change in the oscillator crystal). Will also include SAMS photofact. Rig works fine. Just no time to convert it. Would be great for new novice or tech plus to try voice on 10M for an inexpensive price. Works AC and DC (has built in power supply for 120VAC). Includes hand mic, and AC power cord. Wood grain cabinet. Smaller size, does not take up much room. Has vol, sql, clarifier, tone, dim, vswr calibrate, mode switch, pa switch, nb, anl, etc. Again, excellent for 10M SSB conversion -- currently on CB band. $ 80 + shipping.

16. Regency INFORMANT 1 police radio mobile scanner. Preprogrammed scanner covering VHF LO and HI bands -- designed for monitoring state / county police. Simply dial up your state, and the preprogrammed scanner does the rest....Designed for 13.8VDC and includes both radio and cig lighter power cord.
$25 + shipping

17. Home brew boat anchor power supply -- designed for use with all HEATHKITS. Much heavier duty than the HP23 supply. Could also be used with the COLLINS S-line and KWM2 transmitter/transceiver with simple re-wire of the octal power plug. No schematic, heavy (about 40 LBS), works fine.
$45 + shipping

I'm located in Portland, Oregon.
No LIDS, No KIDS, No SPACE CADETS. NO BAD NEWS either.
Happy to discuss details via email or can call you. Net references available on items that I've already sold.

Mailto:K7JOE@yahoo.com
thanks,
Joe

There are ways to munge your address and still make it easy to reply.  I'm using
one way.
And it REALLY DOES cut WAY down on spam.  I was getting 10 spams a day.  Since I

changed my address and started spamproofing, I'm getting 1-2 a week after six
months.

If you don't have a mouse to click or are using an obsolete newsreader, or don't
bother
to read the sigfile or the reply address,  or are just plain stubborn, that's
not MY fault.

miker, the spam-free moron

Wanted:

(1) Bendix/King LPI 5142 portable radio (covers 136-160 MHz). Will consider trading LPH 5142 (covers 148-174 MHz) in excellent condition for LPI model in similar condition. Am also interested in any information about downbanding an LPH to cover the 2-meter band.

(2) Bendix/King desktop charger, either model LAA 310 rapid charger or model LAA 300 trickle charger.

Please respond via e-mail to: rdierks@owt.com

Thx es 73,

Richard, KC7DYK

AT LAST !!! Gary and I agree on SOMETHING !!!

If your time is SOOOO valuable that you can't delete a few junk email messages, then mine is SOOOOO much MORE valuable, that I don't have time to fix your NOSPAM.CLAM email address to try and help you with something.

But as one last chance to get you normal, I'll offer you a solution to your junk email problems:

1. Go to Deja News and sign up for an account.
2. Change your email address in your newsreader software to

whatever-you-signed-up-with@deja-news.com

3. Go back to Deja News once a week, and read any personal mail you have. Delete the one or two junk email messages that make it thru Deja New's junk mail filter.

Usually, anybody you want to get email from knows your email address anyway....

And for you more parnoid types, I just read that the lastest email address bots are running around looking thru HTML code on web pages looking for email addresses too, so if your ham club club has your email address listed on the club web page, you are in big trouble....

73, Jim KH2D

Gary,

Your postings are always informative and thorough, so I appreciate your activity in this newsgroup. I would, however, like to lobby for a different response to spam - both from you, and from the rest of the newsgroup's readers.

While it may only take a few moments to delete the spam you receive, the current level of spam activity on the 'net is only the tip of the impending iceberg. These people are technically capable of sending tens or even hundreds of thousands of messages with a click of a button. If spammers are tolerated instead of eliminated, we can look forward to seeing a 1000:1 ratio of spam to desirable email. I, for one, use my email for business and for pleasure, and its utility would be entirely trashed by such a future.

You might feel that (a) you are an insignificant person on the net, (b) you do not have the time to deal with spam, or (c) you don't have the expertise to do anything but hit the delete. These are the responses the spammers love. If they send out 10,000 emails that are tolerated, and receive only one positive response, they've made money! They clicked a button, and you paid to download their refuse. And no, there is no long-term safety in filters, or in impending legislation. These panaceas will work only if spammers find it unprofitable to circumvent them.

So - what should you do? Take the time to send out some complaints. Never respond to the spammer's email - it only verifies your address. Complain to the spammer's ISP, and if they fail to act, complain to the ISP's ISP. Send out as many complaints as time allows, even if it's just one every week or two. Don't just complacently delete spam.

I recommend that everyone spend a little time reading a few anti-spam sites on the net. This is not just another conspiracy paranoia subject. It deserves your time and just a bit of your effort. Please see:

http://spam.abuse.net

Broaden your search from there. This site and others will explain how to effectively complain about spam.

Now, as to the subject of the original posting, whether you use anti-spam measures in your email address is your own

choice. I hope people are tolerant of those who choose to
do so. They are justifiably angry about spam.

Please forgive the tirade, and the off-topic post.

Seem to be a few issues going on in this thread:

1. Newsgroup postings requesting a personal/email reply.
Although we all recognize the benefit of public postings adding to the base of knowledge, there are legitimate reasons for requesting an email repply. As someone pointed out, people may not tune in regularly to that newsgroup. I believe that the method I use may satisfy everyone. My newsreader can reply to the group, the email, or BOTH. If a person requests an email response and I feel it is of general interest, I reply to BOTH. Really simple. If on the other hand, the question isn't worth replying to, then just don't reply. But no need to taake offense.

2. Anti-Spam munging.
The world is not homogeneous. Some people are more offended by spam than others. People who use a work account (like me) may be particularly sensitive to getting flooded by X-rated messages. What is my secretary or coworker going to think when she checks my email account for me when I'm out of town? And geeze guys, how long does it really take to erase a few characters in an address (as long as the need to do so is prominently pointed out)!

3. Munged (private) emails.
People who munge their reply addresses when they send *email* just need to be reminded that it doesn't help. Also, perhaps it was a mistake. I recently sent a couple emails to people in this group about an antenna question. Unfortunately, I had inadvertantly left my email address munged after doing a few news postings, and forgot to "unmunge" it. Bob graciously replied and reminded me of my error. Gary on the other hand apparently took offense and didn't bother to reply (last names deleted to protect the innocent). Such is life.

BTW........

DO NOT AUTOREPLY
REMOVE "ZZZ" FROM EMAIL ADDRESS.

Ten-Tec Argonaut 505 QRP SSB/CW transceiver. Nice QSK, 5 watts input, about 6 lbs. Draws less than 100 mA on receive. There were only about 2000 of these produced. This one is very good looking, a 9.5 out of 10 cosmetically, and operationally perfect. It has the newer spinner VFO knob with the 1 KHz markings and the dial operates as smooth as silk. Comes with a copy of the manual. Great for camping, or just QRP operating.

Reason for selling: I have an Argonaut 505 already. I thought I was getting an Argonaut 509 when I bought this one. I wanted an Argonaut 509 for nastalgic reasons because I used to have one in my younger days. If you would like to look at some data, including a scanned QST advertisement, see: http://asd.state.va.us/tentec/tttrans.htm

$288 plus shipping or trade for a more common Argonaut 509.

I remember paying $288 for one of these in 1972. I got it out to the car, hooked it to a pair of AA lantern batteries (while in the car) and got it going out in the radio shop's parking lot. Took it to Barbados and made QSOs as 8P6FS. Etc. etc. etc. etc. much fun radio!

My first time use one, or to see one for that matter, was field day '80-'81. If I could slip another by my wife I'd buy it. Super little radio.

Hi All,

I realize this is a long shot, but here goes....

I'm looking for the Ten-Tec Argonaut 509, serial number 509-4580. It had green LEDs replacing the dial lights and a couple of diodes back to back tacked on the SSB generator board to provide some RF clipping. Back in my freshman year in college, my dad gave me that rig. I had a lot of fun with it, but then in my lean grad school years I traded it at TNT Radio in Minnesota for a shiney new Icom IC-735. If you have any info on this perticular radio, please send me a note!

73,

Rob, KL7NA/W7

For Sale: One (1) Kenwood TS-440S/AT.

The radio has had the TX anywhere modification done to it, has original manual, is in very good condition, and has spent most of its life in the original box.

A couple of pictures of the radio can be seen at:

http://www.bcfmca.bc.ca/ts440.html

We are asking $600US or best offer, buyer pays shipping and prepays with an International Money Order if outside of Canada (unless you can find someone to do COD across the border).

Contact us via email at bcfmca@'killspam.'bcfmca.bc.ca if you have any questions (remove the killspam portion please :)).

I have for sale one (1) Icom IC-3SAT 220 MHz Transceiver. Unit comes with original antenna, box, AC wall adapter, and a BP-83 battery. The radio also has the CTCSS encode/decode board inside.

A picture of the radio can be seen at:

http://www.psychonet.net/~ve7fet/3sat.html

I am asking $200US or best offer for the package, buyer pays shipping and prepays with an International Money Order if outside of Canada.

You can contact me via email at ve7fet@'killspam.'psychonet.net if you have any questions (remove the stuff in quotes, thanks :)).

For sale:

Icom R71A general coverage 'shortwave' receiver. Includes longwave, mediumwave (AM broadcast) and shortwave (amateur, international broadcast, etc) coverage. Excellent condition except some scratches on top of case. Just gone through (tuned) by Icom dealer, everything works great.

Asking $500 firm. Payment by postal money order only, I pay your choice of UPS or USPS shipping. Sorry, contiguous US sales only. Please Email if interested. Thanks...

Tom, N0YGT

ditto on the argonaut. I still regret the day I got rid of mine. Best rcvr I have ever
come across and that was back in the mid 70's........shit time flies, QCWA is just around
the corner and I'm only 31. Has someone figured out how to get those lost years back

yeat?!

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Will sell for $3400 U.S. plus shipping. Condition warrants price.

Dave,

Fun is sure the word. In 1974 I was living in an apartment in the Philadelphia area had a 505 and a run of #28 wire about 150 feet from my bedroom window to the top of a tree. No RF interfearence with this setup and it was very stealthy as you could not really notice the antenna.

I was listening to the 75 meter big guns from New England and Long Island on the lower end of the phone band working into Europe one evening and broke in and asked if they could relay me through to one of the Great Britian stations I was hearing but whom I never thought would hear me... more of an SWL report than anything. This station from Long Island asked everyone to standby and let the QRP station try to cross the pond with 5 watts SSB. I received a 5/5 report from several G stations and it was one of my biggest thrills in ham radio.

Newsgroups: rec.radio.swap,rec.radio.amateur.equipment,alt.ham-radio.marketplace,rec.radio.amateur.swap

Hi folks,
Family time is more important than ham radio time. I'm cleaning the shack and down sizing some equipment that I wont be using. Please email with questions. Terms are check or money order. Prices dont include shipping.   I can ship by what ever means you like. Net references available.

5. Icom HF solid-state transceiver station including:
   Icom 701, PS701 and SM-8 desk microphone.   This is a 100W DIGITAL all solid state HF rig covering 160 thru 10 meters (excludes WARC bands).   Radio covers USB/LSB/CW/CW-N/RTTY and red LED digital frequency readout.
   Has speech compressor, cw-narrow filter,
   vox capability.   Microphone is a condenser "gooseneck" type

with PTT button on the base. Power supply matches the radio cosmetically. It is a 13.8V at 20 amps. Power supply also has big speaker in it, to be used as external station speaker. Entire setup is very clean--a few minor scratches, but front panel is perfect. I have the original manual too. This would make a great setup from Tech plus thru Extra. The rig works great on SSB with the speech compression, as well as on CW with the narrow CW filter. The bands are coming back NOW.
Dont miss the action, especially on 10M and 15M!
Entire station (wont split) $425 + 1/2 shipping. (sale pending)

6. Regency CB converted to 10M SSB. Radio runs 15W output PEP and covers AM and USB. Freq coverage is 28.5-28.8 Mhz in 23 channel increments. Has VFO slider for both TX and RX, to cover all the in-between and gap frequencies.
Can be easily moved up
or down the band with just a couple $5 crystals (available from JAN Crystal). Nice SSB tx audio from hand microphone. Great for mobile/backpacking. Nice cosmetic condition too. Includes manual, sams photofact, mic, power cord, and radio. $65 + shipping

7. ECI Fleet Courier 30B 10M/6M AM transceiver.
Cosmetically a beauty.
Electrically a beauty. This is a classic early 1960's tube "mobile/base" AM HF transceiver. Six crystal-controlled channels.
Chromed cabinet. Blue front panel with white lettering.
Good cabinet and front panel. Output is 15 watts AM.
Includes microphone, AC power cord, and DC-DC convertor.
This is a classic in very nice condition. Includes 1 set of crystals (26.1, I think) Asking $45 + shipping.

8. Kenwood AT-120 mobile antenna tuner. Matches the Kenwood TS-50 in size. Originally for use with Kenwood TS-120 HF transceiver. Covers 80 thru 10 meters. Includes lighted VSWR meter, as well as tuner bypass position. Simple coax in and coax out connections.
Very clean -- works well. Also very close in size to Icom 706 and Alinco DX70 mini HF transceivers making a nice compact ham station. $80 + shipping (reduced price)

10. Vibroplex #6 "lightning bug" key -- late 1930's vintage with Japanned base (no gold trim). Keyer is fully functional but is missing both the original dit arm weight and the vibroplex name plate. Homebrew dit arm is included. This is a nice bug -- took it in on trade, but decided that I like the auto-keyer since I get "glass arm" sending with a bug. This one is probably not collector quality, but works great with my S-line and gold dust twins. $70 + shipping (reduced price)

11. Collins Winged PM-2 mobile power supply -- CCA good condition. Works with KWM2/KWM2A. Tested and works fine. Paint a little

rough, but not terrible. S/N 11XXX. $130 + shipping

14. ICOM IC3N UHF handheld transceiver covering 430-440 Mhz (note the band, this is for use in Asia, Central, South America, and Europe. Does "minus 5 megahertz" repeater split and automatically transmits the 88.5Hz tone burst to open repeaters (as in Japan). Good cosmetics, good electrical. 3 batteries, radio, antenna, and wall charger. $99 + shipping

15. JC Penney 981-6247 SSB/AM CB radio -- AC/DC, 40 channel, and ready to convert to 10 meters. Will include converstion instructions (only requires a change in the oscillator crystal). Will also include SAMS photofact. Rig works fine. Just no time to convert it. Would be great for new novice or tech plus to try voice on 10M for an inexpensive price. Works AC and DC (has built in power supply for 120VAC). Includes hand mic, and AC power cord. Wood grain cabinet. Smaller size, does not take up much room. Has vol, sql, clarifier, tone, dim, vswr calibrate, mode switch, pa switch, nb, anl, etc. Again, excellent for 10M SSB conversion --will include conversion plans -- simple 2 crystal change and receiver tweak. Currently still on CB band, but slider in place.
$ 70 + shipping. (price reduced)

16. Regency INFORMANT 1 police radio mobile scanner. Preprogrammed scanner covering VHF LO and HI bands -- designed for monitoring state / county police. Simply dial up your state, and the preprogrammed scanner does the rest....Designed for 13.8VDC and includes both radio and cig lighter power cord.
$20 + shipping (reduced)

17. Home brew boat anchor power supply -- designed for use with all HEATHKITS. Much heavier duty than the HP23 supply. Could also be used with the COLLINS S-line and KWM2 transmitter/transceiver with simple re-wire of the octal power plug. No schematic, heavy (about 40 LBS), works fine.
$45 + shipping

18. Heathkit MicroMatic CW keyer -- one of the last kits made by heathkit in 1981. This is the iambic CW paddle and keyer combo with capacitive cw paddle (keys by hand capacitance, not mechanical). Keys both boat anchor and modern rigs. Lots of features: memories and adjustable speed/weighting. This keyer/paddle combo also has auto-cw practice (great for upgrading your cw speed and practicing). Includes wall power supply. Model is SA-5010. Condition is very good. Works well. $50 + shipping

19. Radio Shack 2M 30 watt amplifier with preamp. Model 19-1122. 0.5-5w input will give 30 watts out. Nice helical front end and GaAs FET preamplifier cuts down on intermod. In box, brand new, never opened, never used, tape seal still in place. Everything included: box, manual, packing material, etc. Paid $99 new from Radio Shack. 1/2 price - $50 + shipping.

20. Icom HT rapid charger, model BM-82U. Found this in the closet
and dont recall what radio this charged. Does not fit
Icom 2AT/3AT/4AT or 02AT series. Maybe works with
the xSAT series rigs or commercial equivalent ??
$40 + shipping

21. Yaesu touch tone, up/down hand microphone. Model YM-48.
This is a 600 ohm condenser microphone. Has 16-digit
touchtone pad, up/down buttons, and 8 pin mic connector.
In perfect condition -- unused. Think it was an accessory
for the Yaesu FT-726R or FT-736R - not sure though.
sale pending....

I'm located in Portland, Oregon.
No LIDS, No KIDS, No SPACE CADETS. NO BAD NEWS either.
Happy to discuss details via email or can call you. Net
references available on items that I've already sold.

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Will sell for $3400 U.S. plus shipping. Condition warrants price.

HI I just got an EICO 753 and need to know what the tube number is that
sits next to the 5.2xx xtal on the left side of the radio as you face it.
It is a nine pin tube. I am also looking for a manual for the 753 and 751
P.S. If anyone wants to dispose of one please let me know. Thanks Larry

Hello,
Who was the gentleman from Arizona who purchased the Kenwood TH75A
handheld and batteries from me?   I inadvertently forgot to pack the
instruction manual and the second battery wall charger when I tested the
radio prior to shipping it to you. They both turned up yesterday after

cleaning the kitchen table (grin). PLEASE contact me so I can forward the items that are rightfully yours -- I need your address. My hard drive crashed and I lost the relevant information.

thanks,
Joe

I have a TM-733A Dualbander (2m/70cm) for sale. The unit is in excellent condition, it's about two years old. This is the model that was recently replaced by the TM-V7A. Includes the following:

Radio w/detachable face
DTMF/Backlit Mic
MARS/CAP Modification
Original box and manuals
Fedex COD 2-day shipping included

Price: $375

Reason for selling: moving from Blazer to small car, I don't have room anymore. Please email me directly if interested.

Matt Platts
Arlington, TX

What quantity do you need? 1 or 1000?

If you have an old Cromemco Z-1 or Z-2 or something close to it and you are interested in digging it out of the corner, let me know. I'd like to buy one or the other and we could work out an incentive for you to go dig it out. You can email me at chipsndips@snet.net.

Alan

Please if you are the person who sent me two books. Wire antennas and Quad
antennas. Please drop me a note with your address . I lost when my mailbox
crashed AND hard drive had to be reformatted. Talk about a double whammy.
Back in April it was anyway.
I want to send the money along.
Thank to all...still trying..

Whoever you are cgoin@ime.net

The nature of your reply was uncalled for and your bad language is no
excuse for not
knowing the answer. Were it not for the fact that you are an insipid
little troll I would be
angry but must, instead, consider the source and wish you all the best
in your endeavors to
impress someone else. And, by the by, you left out the "U", "C","I:",
and "G". A loud filthy
mouth that cannot spell is a sad sound indeed. I am posting this here so
that everyone can see what kind of person you really are.

sad indeed..

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Will sell for $3400 U.S. plus shipping. Condition warrants price.

I have recently purchased a used Kenwood TS 520 S. The rig appears to be in good condition and seems to work quite fine. However, when using CW the manula tells me to limit the plate current to 200mA; when I do this the resultiong output is only ~2 watts. I am wondering what is going on here because my power meter shows that I am putting out ~80 watts when I switch to SSB, so my finals are resonating properly. If I adjust my carrier level upward my CW power does go up to ~80 watts but the plate current well in excess of 350mA (meter max.).

I would also like to know if anyone has any information about building or purchasing an external digital readout unit for this rig. The analg dial is quite accurate compared to what I'm used to (Heathkit HW-101 w/ 5kHz intervals), but a digital readout would be nice. For anyone not familiar with the rig there are outputs at the back of the rig for a Kenwood EXT digital readout labelled VFO, HET, and CAR (I'm assuming VFO freq., Heterodyne Oscillator freq, and Carrier freq respectively). Myself and a friend of mine are quite capable of building a display if necessary and anyone can provide the necessary info.

Please reply via e-mail as I do not read the newsgroups very often.

Thanks in advance
73

I would also like to know where I can find a service manual for the TS 520 S.

Thanks again

Have about 50 used 6 and 7AH 12 VDC gel cells for sale. All load tested good. PERFECT for QRP rigs
and portable operation. I have sold hundreds of these to the QRP boy's on the QRP mailing list and all have been very satisfied. Had a few damaged in shipping and one came back DOA which I replaced for the fellow free of charge but that's it. I am the service manager for an alarm company and we change our customers batteries every 3 years as preventive maintenance. These used cells should provide another 2 to 3 and probably longer service if used and recharged properly. Cells come fully charged and are ready to go. They can be recharged with a simple wall wart charger available at Radio Shack or a 1 amp automotive charger. I guarantee against DOA.
Brands are Yuasa, Interstate, Radionics and Portalac.

4 ah cells are $8 shipped CONUS   (SOLD OUT)
6ah cells are $10 shipped CONUS
7ah cells are $12 shipped CONUS

Images of the cells can be seen at:

August 6, 1998

Alan,

Nice to know somebody remembers Cromemco. Microcomputers have advanced and matured fast in the last thirty years so that a "sci.antique.microcomputers" dealing in everything about "antique" microcomputers should be a good outgrowth out of interest in electronics.

>If you have an old Cromemco Z-1 or Z-2 or something close to it and
>you are interested in digging it out of the corner, let me know. I'd
>like to buy one or the other and we could work out an incentive for
>you to go dig it out out.

The Z-1, Z-2 looks and weighs in like a 'boatanchor'. You must be into collecting. Good luck. I saw once a complete set of the series in one of those fund raising used-stuff stores for something like twenty bucks. Discouraging prices reflecting the demand for the stuff but it disappeared overnight. I didn't need it, I still had my own still sitting in the computer room much like an old vacuum tube set. Takes up too much space anyway to get another one, even for collecting. One day, I'll fire mine up again just for the 'll of it to stare at the cursor. :). The thing was like the Collins in its heyday. It cost a lot more though. And the software choices were very limited. Cromemco disappeared as part of another company. The S-100 bus design microcomputers were overcome by IBM, shrinking demand, and plain economics.

If you don't mind a reproduction you can get one from W7FG vintage manuals. (www.w7fg.com). I also have a TS-520S and got a complete set of manuals there.

Larsen on-glass dualband antenna

Good condition, clean, has all parts and includes a mounting kit.

$60 or best offer
Price includes shipping

MFJ on-glass dualband

New, has all parts, includes a larsen mounting kit as well (better than MFJ)

$35 or best offer
Price includes shipping

I have for sale one (1) Icom IC-3SAT 220 MHz Transceiver. Unit comes with original antenna, box, AC wall adapter, and a BP-83 battery. The radio also has the CTCSS encode/decode board inside.

A picture of the radio can be seen at:

http://www.psychonet.net/~ve7fet/3sat.html

I am asking $220US or best offer for the package, buyer pays shipping and prepays with an International Money Order if outside of Canada.

You can contact me via email at ve7fet@'killspam.'psychonet.net if you have any questions (remove the stuff in quotes, thanks :)).

For Sale: One (1) Kenwood TS-440S/AT.

The radio has not been modified, has original manual, is in very good condition, and has spent most of its life in the original box.

A couple of pictures of the radio can be seen at:

http://www.bcfmca.bc.ca/ts440.html

We are asking $600US or best offer, buyer pays shipping and prepays with an International Money Order if outside of Canada (unless you can find someone to do COD across the border).

Contact us via email at bcfmca@'killspam.'bcfmca.bc.ca if you have any questions (remove the killspam portion please :)).

Well, I just spend the last 8 hours updating the page...

Need to build a RIB or programming cables?
Need to add more channels to your Motorola 2-way?
Need to program your Motorola 2-way out of its normal bandsplit?

Find the answers to these questions and many other tips on the Batwing Laboratories site, just follow this link:

http://www.psychonet.net/~batlabs

For Sale:

80' self-supporting galvanized steel tower in NW Illinois.

This a very heavy-duty, 24" face, straight leg tower consisting of 4 - 20' sections. Total weight of sections about 2300 lbs. Uses solid round bar legs ranging from 1" diameter in the top section to 1 7/8" diameter in the bottom and 5/8" solid round bar braces.

Tower is disassembled and ready for pickup. Price includes loading sections on your trailer (sections will transport very nicely on a 16' tandem axle car-hauler type trailer).

I have a fifty or seventy five amp transformer that I would be willing to get rid of. It's new except for being used to burn a few traces off a circuit board. If it's not too heavy for you, I'll look and see if I can find it.

Hi, I have a kenwood UHF mobile radio as listed (tk805d) for sale.
Radio has 16ch. & seems to go from infinity and beyond, but guessing
410-490ish.... FIELD PROGRAMMABLE thru ptt and front buttons/channel
selector!!!
Will program to suit and include copy of software for same!!
Sorry, no programming cable, but hey, It does have the factory hangup clip!
:) This radio is in LIKE NEW condition, as it's only about a year or two
old. Includes radio, s/w, new style mic/hangup clip and mounting bracket.
no cut cords, either! no docs. Asking $250 shipping included CONUS. email
please and no trades!
thanks,
Randy, KC8CPK

Have about 40 used 6 and 7AH 12 VDC gel cells for sale.
All load tested good. PERFECT for QRP rigs
and portable operation. I have sold hundreds of these to the QRP boy's on the QRP mailing list and all have been very satisfied. Had a few damaged in shipping and one came back DOA which I replaced for the fellow free of charge but that's it. I am the service manager for an alarm company and we change our customers batteries every 3-4 years as preventive maintenance. These used cells should provide another 2 to 3 and probably longer service if used and recharged properly. Cells come fully charged and are ready to go. They can be recharged with a simple wall wart charger available at Radio Shack or a 1 amp automotive charger. I guarantee against DOA.
Brands are Yuasa, Interstate, Radionics and Portalac.

6ah cells are $10 shipped CONUS
7ah cells are $12 shipped CONUS

Images of the cells can be seen at:

I would like to sell two solid state HF amp boards, labeled: Technicare 600 watt amp. They have been tested by the fellow I acquired them from at 450 watts (each board) key down for a few moments (they need much larger heat sinls and a couple of resistors upgraded before they may sustain that sort of power).
I have gathered information as to sources of splitter-combiners and output filters which will work if one chose to combine two of these for a full power+ HF amp. I also have a full set of replacement finals (Acrian S200-50).

Asking $325. shipped conus for the pair of boards and the four replacement finals. -- 73, DavidC AA1FA E-mail or call 603-894-1174

I have the following for sale. Tube prices include shipping, other gear/materials do not include shipping. Tubes are used unless indicated. All tubes test good on Hickok 539C. Units for sale until 06/23/98.

Thanks,
Matt Warren

Tubes:
EL34:
3- "Siemens" EL34, all labeled Groove Tubes. These are the dimple top tubes made in E. Germany at a time when there was an E. Germany. New.
1- Mullard EL34. Welded plate, single ring getter.
2- Mullard EL34. NOS. Mullards have holes in guide keys, date codes at base of glass. The real deal.
$110 for all of them shipped.

6L6GC:
6- Sylvania. Two with broken plastic guide key. One is NOS. All test good.
2- GE. Real nice condition.
1- RCA Black Plate.
$120 shipped.

12AX7:
10 Tele 12AX7. Mixture of Tele label and Fisher label. All diamond bottom! $120 shipped.

6DJ8:
1- Mullard.
5- Bugle Boy
$30 shipped.

EF86:
2 Valvo
1 Mullard
$24 shipped.

Vintage Speakers:

University 312. 8 Ohm with built in horn tweeter. Excellent. See pics
at http://www.ccinet.com/~phineasgage/temp/univ312a.jpg and
http://www.ccinet.com/~phineasgage/temp/univ312b.jpg
$115 + shipping.

Altec 12". 8 Ohm. 4178c. Excellent. See pics at
http://www.ccinet.com/~phineasgage/temp/altec1.jpg and
http://www.ccinet.com/~phineasgage/temp/altec2.jpg
$80 + shipping.

Books:

Package of radio related books:

Have about 50 used 6 and 7AH 12 VDC gel cells for sale. Also have about 3 4AH 12 VDC cells. All load tested good. PERFECT for QRP rigs and portable operation. I have sold hundreds of these to the QRP boy's on the QRP mailing list and all have been very satisfied. Had a few damaged in shipping and one came back DOA which I replaced for the fellow free of charge but that's it. I am the service manager for an alarm company and we change our customers batteries every 3 years as preventive maintenance. These used cells should provide another 2 to 3 and probably longer service if used and recharged properly. Cells come fully charged and are ready to go. They can be recharged with a simple wall wart charger available at Radio Shack or a 1 amp automotive charger. I guarantee against DOA.
Brands are Yuasa, Interstate, Radionics and Portalac.

4 ah cells are $8 shipped CONUS
6ah cells are $10 shipped CONUS
7ah cells are $12 shipped CONUS

Images of the cells can be seen at:

Looking for an all mode 2 meter rig such as an older Kenwood TS-700A
or Yaesu FT-221R. Physical condition not all that important as long as
it works well. Please advise what you have and your asking price.

Looking for a three, four or five 6 meter beam or quad and a small
rotor and control box to spin it with. If you have any any of these
items I'd like to hear from you. Please state what you have and your
asking price when replying. Thanks.

Actually Rudy, I learn a lot from replies to other people's questions
and I'm sure others do also. Public replies to individual questions
is a good way to spread knowledge over netnews.

It is your choice if you want all the SPAM that comes your way when you use these newsgroups. I do not have the time to weed out all the junk, although my system is getting better at doing it for me.

Personal replies are nice, but I think we all learn more from group posts

```
anyway.

I have stopped replying personally to morons who think they're avoiding spam
with that nonsense. I mean, do they really believe that spamming software
doesn't know how to automatically remove that stuff anyway?

Oh, please! As you can imagine, with the volume of posting I do, I get plenty of spam. But it only takes 15 to 30 seconds a day of pushing the delete key to get rid of it (you don't actually *read* that crap do you?). If you don't have that much time, what are you doing posting to net news?

What *really* peeves me is people who munge their reply addresses when they send me *email*. (I get 30-40 a day.) There's no possible way that a valid address sent in private email can generate spam. I will *not* try to unmunge your address. If a reply bounces, it bounces, and you won't get the benefit of an answer to your query.

In the newsgroups, I generally reply to a post with a follow-up post. So I don't care if the poster's email address is munged. But if you send me private email and expect a reply, you'd better have a valid reply address in the header.

And while on the subject of pet peeves, will you people *please* quit posting messages containing HTML junk in them. They are virtually unreadable, and I will not take the time to try to ferret out the text amongst all that crap. Remember, newsgroup postings should contain *only* plain monospaced ASCII text. Reserve that HTML crap for your webpage.

For sale in Northwest Illinois:

80' galvanized steel self-supporting tower. 24" face, straight legged. Consists of 4 - 20' sections. Constructed of solid round bar (no hollow members). Very heavy-duty tower; approximately 2300 lbs for all 4 sections. $1000.00 includes loading on your truck or trailer. Will travel nicely on 16' car-hauler type trailer.

There are occasions where a person jumps in a newsgroup for the very first time, and asks a question. And they ask us to please email the reply, because they aren't going to be around...

I find that practice acceptable for honest questions. Not everyone has the time to subscribe to all newsgroups of interest.

But when that same person uses an alias or a "no-spam" alteration of their email address, I tend to move one ot the next post.

I have been online for over twenty years. I have never used an alias. I have never logged on with another acocunt. I have never initiated an anti-spam filter on my end. And life's OK...

- Clint Bradford

Me too. I used to try to respond both to the news group and directly but so many of the direct replys get bounced I normally don't do it any longer. I set filters on the subject so that e-mail with "XXX", "money" and such go directly to the trash can - I never see them. Gets rid of a lot of the spam since most of what I get is either X rated or how to make a million bucks in a week.

It would be a very boring newsgroup that had only posts from people sucking up information by asking questions only and demanding email replies.

I don't read newsgroups to read people's questions, I read newsgroups to see what other people have to say. Since I'm already here, then I might as well add to the newsgroup by answering questions when I can.

My replies hopefully to appeal to some. Perhaps they wanted to ask a similar question, but were hesitant for any number of reasons. Or perhaps they've never thought of asking such a question, but seeing the answer in some way is helpful. By answering questions, I (and others) help to keep those people reading the newsgroup, so at some time in the future when there's a question they can answer, they will be here to answer. Or maybe at some time in the future, someone else will ask a question that's already been answered by myself or someone else, and the people reading the messages today will be able to answer the question tomorrow because the question and answer has been here already.

And don't forget the whole point of FAQ's are to collect frequently asked questions, and answer them, in an attempt to avoid the repetition in the future. But by keeping things off in email, someone who's good at cataloging won't have access to the answers, so they'll be unable to get involved and create a FAQ for the newsgroup.

One of the things that annoys me is when I respond to someone's question in the newsgroup, many times there will be a followup from the original poster, but via email. Often, I never get around to answering them, because I either have to look something up or because I just don't feel like it. SOmehow, if you answer a question in the newsgroup, you become an expert or maybe it's just that you are perceived as someone who will be helpful. But when the poster does a followup in email, they lose the potential of the collective mind of the newsgroup to respond.

i have a pair of down east microwave 903mhz 'loopers'
for sale....only been used in a few hilltop vhf contest set-ups
back 1988-1990...in storage (indoors) since.
want to sell them as pickup only, i am located in
Croswell, Michigan....about 20miles from Port Huron, MI

also included is down east microwave 903mhz power
divider...the loopers are the model 3333LY 12' boom
18.5dBi gain each 33 elements each. the lot originally

cost about $250.....all yours now for $ 75. OBO

e-mail me   n8lmt@usa.net

Hi.

I have a Drake MN-75 tuner for sale. It is in very good condition with just few minor scratches. The previous owner engraved some letters on the back of it. The front is very clean without any scratch.

I am selling this because I got a new Drake MN-2000 to match to my C-line.
Its electrical condition is perfect. It handles upto 300W.

The price is $85 plus shipping. The only shipping method I use is regular mail with insurance which will cost you only $10 or less. I will pack it firmly to prevent any possible damage in transit. I don't have a manual or box, though.

If interested, please e-mail me.

Thanks and 73.

Hello all,

I currently have a Yaesu FT-980, which is a 110/220vac only HF rig, very nice radio. I've loved it for quite some time, but a recent move is making me move my HF station and antennas, to my vehicle, due to antenna restrictions..

I'd like to get a good mobile rig for my truck. I've looked at the Kenwood TS-450S/AT and the ICOM IC-706, and found these both to be ideal. If you have one of these rigs your looking to part with, let me know. I am not looking to purchase immediatly, but will in the near future.

The FT-980 is still somewhat attached to me, so I would prefer to outright buy a new rig for the truck, but if you're looking for a good base-only HF rig that's almost as nice as the FT-1000, let me know also :)

Thanks!
Nate

I'm moving soon, and I don't want to move my collection of a few years' worth of QSTs. I also don't want to throw them out if someone out there wants them. So they're yours, free.

The catch? You've got to come pick them up at my apartment in Brooklyn.

Let me know via email if you want them and to arrange a pick-up time.

Have about 40 used 6 and 7AH 12 VDC gel cells for sale. Also have about 10 4AH 12 VDC cells. All load tested good. PERFECT for QRP rigs and portable operation. I have sold hundreds of these to the QRP boy's on the QRP mailing list and all have been very satisfied. Had a few damaged in shipping and one came back DOA which I replaced for the fellow free of charge but that's it. I am the service manager for an alarm company and we change our customers batteries every 3 years as preventive maintenance. These used cells should provide another 2 to 3 and probably longer service if used and recharged properly. Cells come fully charged and are ready to go. They can be recharged with a simple wall wart charger available at Radio Shack or a 1 amp automotive charger. I guarantee against DOA.
Brands are Yuasa, Interstate, Radionics and Portalac.

4 ah cells are $8 shipped CONUS
6ah cells are $10 shipped CONUS
7ah cells are $12 shipped CONUS

If you buy 2 of the same I will knock $3.00 off the total price.
Images of the cells can be seen at:

My department is considering purchasing a Rapid bank charger for the Motorola MTX8000 radio. I have been asked to look into it. I request bids for the above charger, I prefer to get new, but I will look at all bids, but the charger must work perfectly, and be in New condition. I request you send bids to me at my e-mail account, If I need then on letter head, I'll e-mail you back.

Also, Out Police Auxiliary may be getting several more MTX8000 B5 models, and have normally gotten them from the local moto shop, if you have some, send a bid to me here at this e-mail, and I'll pass it along,

Thanks in advance

Dave

I'm looking for an inexpensive Argonaut (505, 509 or 515). The condition is not important.

If you are interested in a trade, I've got several items you might want to consider, a Drake T-4XC, AC-4, spare finals, manuals, Electrovoice 644 mic, Drake SC-2 converter, manual, Heathkit HR-1680 receiver with speaker and manual, and a bunch of other stuff.

Send me a note if you have one sitting on the shelf you'd like to get rid of.

73,

Rob, KL7NA/W7

I have a crystal Scanner, 16 channel capacity by Tenelec. It is called
a Tennetrac IV. Has conrrols for volume, squelch,scanrate, tone, scan
/ delay and local / distant rockers. Serial #1335678. Condition is
bout 8 out of 10. I know it works as I had one crystal for my local
department and it picked them up fine. It has the original antennas
(seperate vhf & uhf). I aquired this unit and although it is nice
I am limiting my crystal units to Bearcat III's and right now, i have
a couple two many of those. I believe there are followers of this type
unit out there as it is frankly a pretty nice radio.
I would like to make an even trade for a realistic HTX-202 or HTX-404
with all original accessories (charger / ni-cad pak / AA pak / Duckie
antenna. Manual and box/packing items would be nice but not required.
Radio should be in an 8 out of 10 condition in cosmetics and
operation.

Or what have you?????????write and lets talk.

Have a nice day.

Hello out there,

I had an earlier post looking for somebody who has or does silk screening for a Hammarlund HQ-180A. Well, looks like the silk screen is a fat chance. So since that is the case, does anybody out there have a junker HQ-180A with a decent front panel. If the price is right I will be glad to take it off your hands (grin). Just got finished painting the cabinet (it was a very ugly gold color). Now I am looking to do the rest of the radio (the face is gold too, YUCK)!!!! Please email me at bierbier@bellsouth.net.

Thanks and 73's

Gary

Well since I can't find a reasonably priced IC-551D I figured I would
try for a Swan 250 again... :)

Looking for a good working Swan 250 or 250C with matching power supply
and mic. Cosmetic condition not all that important but prefer the rig
to be in good working condition with full power output. Wanting to get
back into 6 meters on a budget but with more than 8 or 10 watts.
Please email what you have and your asking price.
Thanks !

It has come to my attention that Stu Greene, WA2MOE has posted e-mail and otherwise made reference to me as "Hitler". I find his implication to be disgusting and absolutely disclaim any such racist views.

I had heard of this a few years ago from another Arizona amateur and I confronted Mr. Greene about it. At that time I insisted that he stop these unfounded references and left it at that. It was my understanding that he had stopped this practice.

I hope that no one takes his comments to be true and if anyone has been offended by what he implies to be my views, I apologize and would like the opportunity to further explain my status if felt necessary.

I have been an active amateur for 42 years and have enjoyed conversing with hams in virtually every country of the world. I have met hams of all ethnic and racial backgrounds and have never even considered race or religion to be a factor in any of my dealings, either amateur radio or professional.

As an attorney who specializes in criminal defense, I represent clients of all ethnic backgrounds. In doing so, my character MUST not be questioned. My clients deserve to be represented by an attorney that will be totally unbiased. To have my character cast otherwise is, at best, reprehensible.

I have sent an e-mail to Mr. Greene requesting an apology and that he explain himself to the person to whom he made the remark. I have heard nothing back and can only believe that he chooses not to correct his position.

I have known Mr. Greene for approximately 7 years and during this time I have spent hundreds of hours assisting him with computer problems as well as legal and other matters. To have him attack me in this manner is simply devastating. I can only speculate as to what would prompt him to attack me this way and trust that whatever pleasure he derives from this scurrilous lie is worth it.

:
If it hasn't been modified to bad (the jacks are original), the Mic plug
is a standard stereo 1/4" plug. Tip is prob mic audio hot, the ring is
ground to transmit (ptt) and the sleeve is ground. Try to use a high
impedance mic cartidge like an un-powered D-104 or any similar crystal
cartridge.

I used to service 1011's all the time, they are a fine batch of radios if
kept up properly.

If you have specific questions about them, email me direct at the address
below my name.

cheers

Have for my neighbor:

For trade: Icom IC229H 2m mobile unit, mostly base use.
45watt, 22ch, wideband mods done, looks and works great.

Looking for: Would like to trade for an ht, Relm whs150 (must include accys), or FT10, or GP68 (he has taken a liking to my gp68.... nice radio, btw.) Anyway, need keypad programming radio, commercial or ham similar in type and vintage or whatever as listed above!
Please email!
thanks,
Randy

Just more lies from pig vomit. This guy is a convicted felon. The Judge
said that he needed mental attention in the criminal case against him.
He also has some civil cases against him for libel and slander. The amp
is fine and working if you want to here it I'm on 3.901 most every
eveing. I have never ripped anyone off! I have never played music on ham
radio much less through the Clipperton L. If you go and look and the
posts this lier puts out in other news groups you would see why he has
the problems that he does. pig vomit is a lier and a loser.

  Ask Darrel Beard about the broken equipment Orifice used to pass off to the
Chicken Banders in Daniellsville,Georgia.Word finally got out and now Psycho
Orifice is peddling his abused trash in the newsgroups.

More lies from covert62? Well here is the story on the amp that Darrel Beards stole from me. I was kind enough to give him some work when he was wining about needing more busisness. He was supposed to put new parrasidic choke to the single 3-500G and he was supposed to replace the oil filled cap in the power supply. Well Mr Beards did the work and when I went to get my amp back he wouldn't give it back. He is useing it on the CB band. Birds of a fether flock together. So their is your Darrell Beards story. The police will get him now. Its illeagal for CBers to run amps and the local police can get them now! So that amp was stolen from me by Darrel Breards AKA Ace electronics. I have never ripped anyone off in any of my trades on the internet. So this is just more lies produced by the slime ball convicted felon drug using Jimmy Obrian OOPS pig vomit
The amp I have up for trade is in clean fine working order. The tubes in the amp did come from RF parts so that will let you know how much the slimy lieing pig vomit knows. He is a loser so he can't stand to see anyone else have anything. So remeber James Obrian is a convicted felon so where is the truth there. He has also sold 3 or 4 burned up antenna tunners and a weak 2950 it needed to have the finals replaced. Then when the people asked him about getting their money back he accused them of burning the equipment up. byer beware James Obrian is a drug using theif
! He lies about everything!

Looking for reasonably priced 6 meter ssb/cw rig. The key word here is

reasonable ! Please email what you have and your asking price.
Thanks !

I have an NCR 12 volt 70 amp power supply I wish to trade straight up for a working older 386 or 486 laptop computer preferably with at least a 14,400 modem in it. Supply is a monster but works wonderfully. Has adjustable over voltage. over current protection. I believe also the voltage can be adjusted up to 24 VDC but would have to check on that to be sure. Let me know what you have.

I have a Motorola model N1275A UHF amplifier for sale. It was designed
for HT use, and puts out 40W+ with 2W in. It has been centered in the
UHF ham band, but is broadbanded enough to easily cover the commercial
band as well. It is in perfect condition, and comes with a power cord
that currently has a cigarette lighter plug on the end.
I will ship ConUS for $80.
If interested reply via direct email.

For Sale:

80' self-supporting galvanized steel tower in NW Illinois.

This a very heavy-duty, 24" face, straight leg tower consisting of 4 - 20' sections. Total weight of sections about 2300 lbs. Uses solid round bar legs ranging from 1" diameter in the top section to 1 7/8" diameter in the bottom and 5/8" solid round bar braces.

Tower is disassembled and ready for pickup. Price includes loading sections on your trailer (sections will transport very nicely on a 16' tandem axle car-hauler type trailer).

$ 1000.00

Jim Pepper, W9PX

Can some one help me find answers to following queries.

How to select type of radio communication equipment ?. For what application
SSB(HF) / VHF / UHF transceiver is used ?

How to select a antenna ?

Regards,

Shiv Prakash Khemka

Dear Friend Shiv,

You are asking many VERY BIG questions all at the same time..

Try to get to a public library and look on the shelves for small Amateur Radio Operating books. There may be Amateur Radio Antenna books. Also radio propagation books. Also books for radio learners. You may also find such books in the bigger book shops.

There are English language handbooks with all the answers, obtainable from
-

American Radio Relay League, ARRL HQs in Newington, Connecticut, USA,

Also from Radio Society of Great Britain, RSGB Hqs in Potters Bar, London.

Hello!
I have Yupiteru MVT-7000(made in japan).
MVT-7000 is popular scanner in Japan.
It is exc.-mint. condition.

For sale or trade.
I hope trade, Sony radio ICF-2010 or SW77.

Best regards,
akio fujikawa

The HTX-404 is currently closing out at RS for $80 and the 212 closed out at $160. What makes these so special that you charge more than new price???? $300 would be a good package deal. Just some good advice.

Hello!
I am looking for SONY radios.
CRF-1,CRF-320(K),ICF-6800W(A)
I hope working and cosmetics are great.

I wait your good information.

Best regards
akio fujikawa

Kenwood TS-180.
This is the all solid state 10 - 160 ham band only tranciever with
provisions (but not included) for any 2 of the WARC bands.
Runs 100 watts and has been a great radio for me the last 4 years.
Has the 250~ cw filter installed. With both Operator and Service Manuals

```
Also included is the:  PS-180  matching power supply
                       SP-180  matching speaker
                       AT-180  matching tuner
                       MC-50   mic.
```

All in good condx.   Will ship anywhere in lower 48 ....
$500

SSB(HF) has the ability to convey speech over long distances, far over the horizon, sometimes to the other side of the Earth. This uses frequencies at which the inside of our ionosphere acts like a reflector. The effectiveness of these reflections varies with time of day, time of year, and with an 11 year cycle of sunspot activity (solar radiation and particles are what makes the upper atmosphere ionised and hence reflective) Links are not particularly reliable on any particular frequency, so the usual ploy is to have a variety of frequencies available, and to try them until one that works over the wanted path is found. Computer programmes exist to model and predict route/frequency availability. Even for short range use, suitable frequencies have to be chosen, you can get the effect of a transmitter being receivable in one place thousands of miles away, with no discernible signal 30 miles away!

VHF transcievers are available with SSB modulation, but the majority are FM.   VHF signals are at frequencies where ionospheric long-range coverage is rare. There are some other propagation modes that can give surprisingly long ranges, sometimes for several days per year. These things are unpredictable in the extreme. If you are wanting fun, pursuing and exploiting them can be great fun. If you are interested in communications just as a reliable tool for some other interest or task, then VHF radio is really best thought of as having little more than line-of-sight range.

UHF is pretty similar to VHF in these respects, with even lower likelihood of ionospheric reflection. There are other longer range propagation modes that occur occasionally. Think of reliable communication to the horizon (with dead spots caused by terrain in hilly areas), along with great flurries of activity when interesting weather effects or meteor showers open up a long distance path.

Both VHF and UHF (and microwaves), by penetrating not reflecting at the ionosphere, are used to link with satellites, and can also be bounced off of the face of the moon, in this way very great ranges can be achieved whenever artificial satellites or the moon is in a suitable place. This is predictable!

Antennae? selection depends on what frequency, what purpose, whether fixed/mobile/portable, how much space you have, what climate they have to survive (chiefly wind velocities), how much money is available, and often construction/planning permissions from whatever government bodies are involved. Clearly there are so many variables, that you either have to be very specific about your interests, or you need a small library of books.

I hope this helps

Looking for someone or someplace that has a FM-747 FM unit for my
FT-840 rig. Anyone know of any dealers that has them on closeout ? I
don't want to pay $99 for one ! I know there was a few places closing
them out for $25 or so. Any help greatly appreciated.

Have about 40 used 6 and 7AH 12 VDC gel cells for sale. Also have about 10 4AH 12 VDC cells. All load tested good. PERFECT for QRP rigs and portable operation. I have sold hundreds of these to the QRP boy's on the QRP mailing list and all have been very satisfied. Had a few damaged in shipping and one came back DOA which I replaced for the fellow free of charge but that's it. I am the service manager for an alarm company and we change our customers batteries every 3 years as preventive maintenance. These used cells should provide another 2 to 3 and probably longer service if used and recharged properly. Cells come fully charged and are ready to go. They can be recharged with a simple wall wart charger available at Radio Shack or a 1 amp automotive charger. I guarantee against DOA.
Brands are Yuasa, Interstate, Radionics and Portalac.

4 ah cells are $8 shipped CONUS
6ah cells are $10 shipped CONUS
7ah cells are $12 shipped CONUS

If you buy 2 of the same I will knock $3.00 off the total price.
Images of the cells can be seen at:

Hi.

I have a Drake MN-75 tuner for sale. It is in very good condition with just few minor scratches. The previous owner engraved some letters on the back of it. The front is very clean without any scratch.

I am selling this because I got a new Drake MN-2000 to match to my C-line. Its electrical condition is perfect. It handles upto 300W.

The price is $100 plus shipping. The only shipping method I use is regular mail with insurance which will cost you only $10 or less. I will pack it firmly to prevent any possible damage in transit. I don't have a manual or box, though.

If interested, please e-mail me.
Thanks and 73.

Time to clear out some more space in the basement.

I have a large 60 drawer cabinet filled with IC.s A little over 800 chips in total. About 700 74xx series chips. Ranging from 7400 to 74521's Various subtypes, some L,LS, XLS. Most are new/unused chips. Some are socket pulls. NO soldered pulls. Also have about 150 27xxx Eproms. 2716 through 271000. Most are socket pulls with a few new, no soldered pulls.

Looks to sell outright or consider trades. I am looking for the following items. Make an offer to buy or to sell..

VHF Marine Handheld
GPS (handheld or mounted).
VHF/CB marine atenna.
FRS radios.
GMRS radios.
Commerical UHF radio's (front panel programmable). ICOM U-16 or similar
Commerical UHF radio's with software to program it...
Dual Band ham VHF/UHF with detachable faceplate
HF radio
Mobile HF radio
Mobile antenna tuner with meter.
QRP antenna tunrer with meter.
Yeasu ft77,707 or similar radio
Manpack HF radio's ft70, prc-xx
Other military radio's
Mobile HF antenna system
SWL radio (portable)
SWL radio
15" or larger SVGA color monitors
solar panels
interesting computer or radio items.
Camping equipment (good frame backpack, sleeping bags,etc)

Hi,
I have a 2M kenwood mobile radio, model TR-7850 for sale.
Vintage is early 1980's.
This is a heavy duty rig.
Covers 143.9-148.995
Does standard and odd repeater splits.
40 watts output.
Includes original owners manual, mic, power cord, mobile
mounting bracket, and radio.

Electrically, works fine.
Cosmetically looks good.
It's a bit big for the car, but as a fixed station rig it
is excellent -- big buttons, LED readout, 15 memories,
scan, etc.

Asking $150 + shipping from zip 97123
email if interested.

Thanks,

Joe

HELP : I need an original Operation, Servicing and Tube Conditions manuals
for the following Hickok cardmatic tube testers.
123A and
AN/USM-118A or B (Military versions)

I also need Hickok Cardmatic factory punched cards for the following tubes
: 6CA7,
(6KX8 (ECC808)), 6BQ5, EMM801, 7199, 8417, ELL80, 12AT7 I could use two
each
if you have them.

Do you have any nuvistor adapters for the 123A and AN/USM-118A/B.

Folks,

does anyone have a spare audio amplifier for the RCA ET-4336 transmitter for sale? This amplifier is a self-contained, 7-valve unit - mains powered, 110V or 220V AC depending on version. Part nos are MI-11220 or MI-11209.

A friend (not on email or ng) is looking for one of these to complete his ET-4336 installation, and will consider shipping it from anywhere (he is located in the UK), provided it is working, complete and unmodified.

John,

Any of the current rigs (from 1980 on) should work fine for Pactor. I've used a Yaesu 101, Icom 730 and Icom 735 with excellent results. Nice thing about the Icoms is their auxiliary audio jacks in back so you're not always having to unplug your mike.

You should be able to run any TNC with Linux as long as you have a standard terminal communications program. I don't know if the proprietary software, designed for TNCs, will work with it though.

Good Luck.

Radio Randy

Frequency-wise, it should be fine, but I recall that the upper power range for the thermistor bridge sensors was 10mW. I'm really more familiar with the later 432 model. You'll need some attenuators to extend operation to higher powers, but given good attanuators the thing is capable of very high accuracy.

It isn't a throughline instrument, like the Bird 43. Think of it as a VHF to microwave QRPpp dummy load with super accurate power metering.

Cheers
David GM4ZNX

Greetings,

I am a blind ham with the Yaesu FT470 HT. It has been awhile since I have programmed the radio, and I have moved. I seriously need to find a manual for this radio in computer readable format. Any help will be extremely appreciated. Thanks.

I have a PRO-2001 for sale. I really don't know what the value is, but I'll know it when I see it. Can anyone here help me out with a price? it's about an 8+ out of ten, and needs to be tuned, but it DOES work, and cosmetically, it's about what you would expect for a radio it's age.

Thanx
DrPepper@iwvisp.com

I need to get my ICOM IC-3210 going again.
Want to buy non-working but mostly complete radio for parts.
If you have one to sell, email price and condition.

thanks,
Mike

Organization: Primenet (602)416-7000
Summary:
Keywords:

I have the following electronic and math books for sale:

1. -----, "MOTOROLA SILICON RECTIFIER HANDBOOK, 2nd ed.," Motorola, 1973, pbk, G with little wear. Nice reference with chapters on electrical characteristics, thermal properties, and numerous applications.
$7.50

2. -----, "SILICON ZENER DIODE AND RECTIFIER HANDBOOK, 2nd ed.," Motorola, 1961, G, pbk with plastic spiral binding. Chapters on electrical characteristics, temperature characteristics and compensation, and applications of Zener diodes.
$7.50

3. -----, "SINGLE SIDEBAND FOR THE RADIO AMATEUR," 4th edition, ARRL, 1965, pbk, G- with some wear, spine reinforced (not repaired) with tape.
$10.00

4. Beyer, William H. (ed), "Standard Mathematical Tables, 24th ed.," CRC Press, 1973, hbk, G/G+ with owner's names inside front cover.
$10.00

5. Bucher, Elmer E., "THE WIRELESS EXPERIMENTERS MANUAL," Wireless Press, 1920, hbk, G- with no markings but

moisture damage to rear cover and ffep, spine faded. One of the very early books on experimental wireless and amateur radio.
$15.00

6. Churchill, R.V., "MODERN OPERATIONAL MATHEMATICS IN ENGINEERING," McGraw-Hill, 1944, hbk, G/G+ with very slight wear and no markings on pages. Good early work on the LaPlace transform and it's applications.
$12.50

7. Cooke, Nelson M., "MATHEMATICS FOR ELECTRICIANS AND RADIOMEN," 1st edition, 1st printing, McGraw-Hill, 1942, hbk, G- with little wear. No markings on pages.
$10.00

8. Cowles, L.G., "TRANSISTOR CIRCUITS AND APPLICATIONS," Prentice-Hall, 1968, VG+ with G- DJ. No wear or markings on book, DJ torn at spine top and shelf wear on spine bottom. Good basic book on transistor fundamentals and applications.
$15.00

9. Dewitt, David and Arthur L. Rossoff, "TRANSISTOR ELECTRONICS," McGraw-Hill, 1957, hbk, G+ with no markings on pages but some tape residue inside front and back covers. Interesting book on early transistor theory and circuit design.
$12.50

10. Doll, Dixon R., "DATA COMMUNICATIONS: FACILITIES, NETWORKS, and SYSTEMS DESIGN," Wiley, 1978, hbk, G with G DJ. Slight wearall along spine, owner's name inside FC, markings on pages throughout.
$10.00

11. Fich, Sylvan and James L. Potter, "THEORY OF A-C CIRCUITS," Prentice-Hall, 1959, hbk, G/G+ with some pencil markings.
$7.50

12. Fink, Donald G., "PRINCIPLES OF TELEVISION ENGINEERING," 1st edition, 12th printing, McGraw-Hill, 1940, hbk, G- with little wear but markings throughout
$10.00

13. Gardner, M.F. and J.L. Barnes, "TRANSIENTS IN LINEAR SYSTEMS STUDIED BY THE LAPLACE TRANSFORM METHOD, vol. 1," Wiley, 1942, hbk, G with slight wear and no markings throughout. I have never seen a volume 2 of this book, and don't think that there is one, either.
$12.50

14. Hamilton, Donald R., Julian K. Knipp, and J.B. Horner Kuper,

"KLYSTRONS AND MICROWAVE TRIODES," Dover, 1966, pbk, G+ with no markings on pages, some slight peeling of cover plastic. This is the Dover paperback reprint of volume #7 of the MIT Radiation Laboratory series.
$15.00

15. Jones, F.D., "DIE DESIGN AND DIEMAKING PRACTICE, 2nd ed.," Industrial Press, 1941, 956 pages, G with slight wear on spine ends and cover corners. No markings on pages, owner's name(s) inside FC.
$20.00

16. Kerr, Donald E., "PROPAGATION OF SHORT RADIO WAVES," Dover, 1966, pbk, G+ with no markings on pages. This is the Dover paperback reprint of volume #13 of the MIT Radiation Laboratory series.
$15.00

17. Knowlton, Archer E. (ed), "STANDARD HANDBOOK FOR ELECTRICAL ENGINEERS," 7th edition, 7th printing, McGraw-Hill, 1941, hbk, G-/G with slight wear on cover and spine.
$15.00

18. Kuh, Ernest H. and Donald O. Pederson, "PRINCIPLES OF CIRCUIT SYNTHESIS," McGraw-Hill, 1959, hbk, Except for the top 1/4" of the spine missing, this book is in VG- condition with no markings on pages.
$17.50

19. Langford-Smith, F., "THE RADIOTRON DESIGNER'S HANDBOOK, 3rd ed.," WIreless Press, 1940, hbk, G+ with very slight wear and no markings throughout.
$17.50

20. Lo, A.W., R.O. Endres, J. Zawels, F.D. Waldhauer, and C-C. Chang, "TRANSISTOR ELECTRONICS," Prentice-Hall, 1955, hbk, G with slight wear to top and bottom of spine, very few markings on pages. Good early book on semiconductor theory and applications.
$12.50

21. Melsa, James L. and Donald G. Schultz, "LINEAR CONTROL SYSTEMS," McGraw-Hill, 1969, hbk, G+/VG with no wear.
$15.00

22. Middlebrook, R.D., "DIFFERENTIAL AMPLIFIERS: THEIR ANALYSIS AND THEIR APPLICATIONS IN TRANSISTOR D-C AMPLIFIERS," Wiley, 1963, G+/XLIB with no markings on pages, library stamps inside covers, and library pockets remainder inside back cover. Very nice book on differential amplifiers.
$15.00

23. Milne-Thompson, L.M., "JACOBIAN ELLIPTIC FUNCTION TABLES," Dover, 1950, pbk, G
$7.50

24. Peterson, A.P.G. and E.E. Gross, "HANDBOOK OF NOISE MEASUREMENT, 7th ed.," General Radio, 1972, hbk, G+ with very slight wear and no markings throughout. One of the essential texts on acoustic and vibration noise measurement.
$15.00

25. Seely, Samuel, "ELECTRON-TUBE CIRCUITS," 1st edition, McGraw-Hill, 1950, hbk, G- with some wear to covers, worn through slightly at corners. Excellent book on elementary vacuum tube theory and applications.
$15.00

26. Sevin, Leonce J., "FIELD-EFFECT TRANSISTORS," McGraw-Hill, 1965, hbk, G+ with slight wear on DJ. A good reference on the theory and basic applications of junction field-effect transistors.
$15.00

27. Skilling, H.H., "ELECTRICAL ENGINEERING CIRCUITS," Wiley, 1957, hbk, G-/G with slight to moderate wear, covers worn through on outer corners, but no markings other than owner's name inside FC. Good basic electrcal network, transient response, LaPlace transform, and image parameter text.
$12.50

28. Staib, J.H., "AN INTRODUCTION TO MATRICES AND LINEAR TRANSFORMATIONS," Addison-Wesley, 1969, hbk, G with very slight wear, no markings on pages, owner's name inside FC, and faded lettering on spine.
$12.50

29. Terman, F.E., "Radio Engineer's Handbook, 1st ed," McGraw-Hill, 1943, first printing, G with moderate wear to bottom of spine. Front cover is peeled away from backsheet, but is easily repairable. Otherwise intact with no markings on pages. Price reflects front cover condition.
$15.00

30. Van Der Ziel, A., "SOLID-STATE PHYSICAL ELECTRONICS," Prentice-Hall, 1957, hbk, G-/G with slight wear and occasional markings on pages. Early work on diodes, transistors, masers, photoemission, ferroelectricity, ferromagnetism, etc.
$15.00

31. Westman, H.P. (ed), "Reference Data for Radio Engineers,

4th ed.," ITT, 1956, hbk, G- with numerous notes on backsheets and both hinges torn through paper but not separated. No markings on pages.
$12.50

Prices are exclusive of shipping costs. For US, add $3.50 for first book, and $1.50 for each additional. Canada and foreign dependent on actual cost. Payment in US$ in advance by cheque or money order. Books will be held for 14 days after confirmation.

Hello All,

I just thought I'd share a little story with you, being that the JERK over at the Amateur radio WEB RING Delated MY ENTRY!!!!

This is what happened!

I submitted my entry to his "SO called" web ring... but I wasn't to wild on the idea of adding his GRAPHICS to MY website... But I figured, I'd try and get along with the Ham Radio community and So, I did it... and I send him a ICQ message saying I'd done all his little petty commands, and then I get a ICQ message saying HE DELEATED MY ENTRY BECAUSE MY FUCKING E_MAIL ADDERESS DIDN'T MATCH THE ONE IN THE GODDAMN QUEUE!?!?!?! What in the Name of God is WRONG with the HAM RADIO Community today?!?!?! YOu ever heard of FUCKING MULTI-EMAIL ADDRESSES, ASSHOLE!?!?!?!?! EVER HEARD OF E_MAIL FORWARDING SEERVICES?!?!?! Why is it that everytime, I attempted to get along with the self-serving bastards, they always try and make it hard for me to do so???? I know what it is!!! it's becuase, just maybe, he's using his website for a drug cartal... or maybe is becuase I didn't grace his little hand with money, like his buddies UP THERE at A.R.R.L!!!! Another JOKE if I ever saw one...

The point is, If the HAM RADIO people want to make it in the internet scene, they'd better get wise to alot of the stuff on the internet, or they'll be sent laughing back to they're 1200 baud packet stations!!!!

Hi,
I have a new in box, unbuilt HEATHKIT COAX SWITCH.
Yes. it has never been assembled.

I just opened the box to ensure all parts are in there.
They are...in nice sealed little baggies. Condition of
all kit components are excellent.

The manual is copyright 1973, but the kit is probably from
about 1978 or so.

This is a 6 position, 1KW+ antenna switch box.

$70 + shipping from zip 97123

email if interested

Amazing.....
Chuck you do more damage to any reputation you may have than the whole ng could do combined.
I really think you need to start taking those pills again....and be happy.

I have for sale one (1) Icom IC-3SAT 220 MHz Transceiver. Unit comes
with original antenna, box, AC wall adapter, and a
BP-83 battery. The radio also has the CTCSS encode/decode board
inside.

A picture of the radio can be seen at:

http://www.psychonet.net/~ve7fet/3sat.html

I am asking $220US for the package, buyer pays shipping and prepays
with an International Money Order if outside of
Canada.

You can contact me via email at ve7fet@'killspam.'psychonet.net if you
have any questions (remove the stuff in quotes, thanks :)).

I have a Yaesu VX-1R complete with original box, antenna, manual, and charger. I also have 'The Clip', a Comet SMA-501 and a Comet SMA-503 antenna for this radio. This unit has the Freeband Mod and receives everything. This radio is less than a year old and is in very good condition. I haven't had any problems with it, but I live in an area where I need more Watts to work the local repeaters.

I would like to swap/trade for a Kenwood TH-79A(D) in equal condition. Please reply via EMAIL ONLY to randyz@telusplanet.net.

I am looking for either a 1M, 2M or 4M memory expansion for a WIN
Notebook Computer, This unit is a 386 SX/16 and Has 1M Onboard

Manufacturer: Win
Model: Notebook
Model #: win386sxnb-16b

I have a 1M Module now that does not work, Its Part # is NR1-23

So I would Assume a 2M is a NR2-23 and a 4 would be a NR4-23???

Anyway , if anyone can help please E-mail @

ve9gln@nbnet.spamless.nb.ca

Please remove the spamless for proper E-Mail address

Boat Anchors for Sale

1. Heathkit Stuff $200.00:
SB-301 in good working order.................15.lbs
SB-401 final amps (61146) blown..............25.lbs
D 1410 keyer..................................4.lbs
Turner 454C Microphone........................2.lbs
Heathkit Manuals 2.lbs
Packing......................................10 lbs
Shipping weight..............................57 lbs

2. Gonset Stuff $125.00:
G66a Receiver with Power supply..............16 lbs
G-77 Transmitter with modulator/pwer supply..30 lbs
Gonset Manuals and cables.....................1 lbs.
Packing......................................10 lbs
Shipping Weight..............................57 lbs
Receiver and transmitter works.
No microphone

3. Siltronix 1011D Comanche 150.00..........22 lbs
Manual (from "Manuals Plus")................0 lbs
packing.......................................7 lbs
Shipping Weight..............................29 lbs
Needs mike and re-alignment. Was de-tuned down to
Novice portion of ten meter band

4. National NCX-3 Tranceiver $75.00.........19 lbs
External Power Supply/Speaker................25 lbs
National Manual...............................1 lbs
Packing......................................10 lbs
Shipping Weight..............................55 lbs
SSB AM CW on 20,40,80. Needs work

5. Heathkit "Seneca" 6 M Transmitter..$75.00......50 lbs
Heathkit Manual....................................1 lbs
Packing...10 lbs
Shipping weight...................................61 lbs.
Loads up into dummy antenna.

I would prefer you pick up. If I ship you must pay postage. These are heavy and will be shipped from zipcode 95822. I've included the weights of the items as well as the weight of packaging materials. All for-sale-items weighed by placing the items on the Pelouze Model Y50 Postage Scale.

If interested contact me by email gwilljo@cwo.com.

I have for sale two new, in the box, Pioneer Magnetics switching supplies:

1) Model PM2500A-1 switching power supply. Rated at 24V at 40 Amps - $60 + shipping

2) Model PM2496A-1 switching power supply. Rated at 24V (adj 19-28V) at 16 amps - $45 + shipping

These supplies would make wonderful heavy duty supplies for a Ham radio project or commercial application.

Even though these units are new and unused, they have been in storage since factory burn in (the Test acceptance data is supplied with the unit). These supplies are being sold AS-IS, with the buyer paying shipping. Money Order or Certified check only, please.

Thank you..... Jim Flanagan WB5KYE

Hello ...

I have 3, used, heavy duty thermal wire strippers for sale. These units were made by IDEAL Industries under the brand name of 'Thermo-Strip', model #45-133B. Two of the three units work very well, the other unit has an electrical problem in the power unit. All three units are complete and are being sold as-is for a package deal of $70 + shipping. Money Order or Certified check only, please. Thank you..

I have the following equipment that I am wanting to part with:

Quant 1-HP model 7470 2-pen bed plotter(RS232 ver). Good Condition, with manuals $35 + shipping

Quant 2-Radio Shack pen plotters (circa TRS80 days) (RS232, made by Houston Instruments).
Not tested, with manual $25 + shipping

Quant 1- Fluke 1911A counter (250Mhz) Works well, except leading zeros do not blank for some reason.
Otherwise seems to work just fine. No manual $50 + shipping

Quant 1 - Heathkit handheld freq counter IM2400 - 500Mhz , excellent physical condition
No nicads, with manual $75 + shipping

Quant 1 - Heathkit model HW101 with power supply, no speaker. with manual $100 + shipping

I have an HP430 power meter with WORKING thermistor mount bolometer.
This is an excellent device for measuring milli-watt level power in test
circuits. These are commonly seen at hamfests for $20 but do not have
the bolometer and are worthless without it.
This unit has a HP 477B bolometer. $85 plus shipping. N4LTA

Pat,

I am interested in your wattmeter, but I am unfamiliar with the
specifications of this model. I need to be able to measure from 10 mw
to 30 watts in the 2 and 6 meter bands. I have used Bird equipment in
the past, but I no longer have access to it. From the description of my
needs, does it sound as if your HP430 would fit the bill?

I am looking for a small, no frills 2 meter antenna tuner.
Need 25watt capability. Prefer set screw tuning control vs large knobs but
will consider either.

What is totally amazing is the membership of NCI allows things like
what you show on your web page to happen in their organization. I guess
that is what you get when a bunch of people trade their morality for a
free HF handout.

No MD that is what you get when you allow an idiot with a grudge to post heavily edited and out of context excerpts from the newsgroup. I noticed he didn't include any of his pearls of wisdom posted on the newsgroup in his website.

The sad part of it is you joined this charade and are trying to bump up his hits.

"Heavily edited"? "Out of context"? Maybe you'd like to post some examples,
Dave.

>I noticed he didn't include any of his pearls of wisdom posted on the
>newsgroup in his website.

Why should he? Isn't that what the web page is for?

>The sad part of it is you joined this charade and are trying to bump up his

I visited. I found much of what he says to be "right on" target.

I realize that you probably feel betrayed, learning now for the first
time that you were duped into joining an organization which exists now

solely to profit the leader(s), all of whom are self-appointed-for-life dictators. But, that's what you get when you fall for the old class-warfare line.

MD

Here I thought rec.radio.amateur.policy was created for discussion
of the morse code issue..... so why am I seeing this garbage in
rec.radio.amateur.digital.misc? We have enough arguments
(such as the LL Lid issue) without you loonies cross-posting
your nonsense over here.

I used to read rec.radio.amateur.policy but gave up after I realized
that the same people have been carrying on the same argument
for YEARS. You guys really need to get a life!

I'm not impressed... it just looks like some lunatic went out of his way to start another procode/nocode controversey. He is definitely correct that the page is all about opinions. I couldn't find a fact anywhere...... I think that if I were on the side of the procode debate, I'd ignore his presence in my own camp.

Actually MD I have no problem with being a member of NCI and I have actively recruited several new members recently and they are well pleased with the organization. Steves' website is probably a good place to refer potential members too as an example of what kind of prestigious is out there regarding the new Amateurs entering the ARS today and why NCI is working hard to be representative of all Amateurs in the ARS today and not just a few license classes. Do I worry about my membership in NCI, no I don't because too many people like you and Steve seem to be doing the worrying for me.

Mike ... NOTHING of what Jim shows (in most cases, COMPLETELY
out of context) "happened within NCI" ...

Your (and Jim's and Steve's) lame attempts to "connect" my personal
arguments with rabid procoders such as yourself to NCI are absurd
and totally baseless and you know it ...

You are simsply playing the old political game of muck-raking
in hopes that some can be duped by your tactics, plain and simple.

> I guess
> that is what you get when a bunch of people trade their morality for
a
> free HF handout.

Your characterization of the members of NCI in the sentence above is
SURE to enamour you to them ... keep up the good work.

I have a CCA VGC, winged, KWM-2, S/N in high 11,000's.  (Front panel /
cabinet appearance is more like CCA Excellent.)  Very few,
almost-undetectable marks on cabinet and front panel.  Chassis is very
clean.  Crystal codes are mostly 6-62.

The radio was professionally serviced/aligned in May (at cost of $155).
Several weak tubes, several caps and other minor parts were replaced, and it
was thoroughly aligned and tuned.

Previous owner replaced the original RCA antenna plug with a BNC.  That has
now been returned to the original ceramic RCA.  The rear panel, immediately
beside that plug shows some scuffing.  Wired-in relay has also been changed.
The radio works perfectly on all bands with
full output.  PTO tracks great end-to-end.

Power supply NOT included.  Best offer over $550 this week.  Add $20 for UPS
surface shipping/insurance.  Please reply by email.

Hi,

I have a four month old Kenwood TH-79AD for sale. I'm selling it as a package with two High Power (5w) battery packs and a two battery desk rapid charger. The radio also has the out of band mod on 2m and 440. I paid $560 four months ago, I'll sell the package for $400.00 shipped continental US. This radio is in excellent condition with very few hours use.

I have the manual but I'm not sure if I kept the box.

Please respond via E-Mail to peaster@connors.cc.ok.us

Thanks and 73's

Check out the NWSS web site. I don't remember who it was, but one of
the listings was for one of the MFJ-259's that cover 1.8 to 200MHz.

Hope it helps,

Ron, N7TAW

Hi Everyone,

I am starting a collection of ALL SONY World Band "Shortwave" Radios ever made, old & new.

I have about a dozen so far and I need everyone's help to find these original radios in "mint" condition with original accessories and box for collecting.

My question is: Is there anyone out there started such a thing? (...or maybe I am nuts??!!) Where to start looking for older model SONY Shortwave World Band

```
radios?  Is there a Radio LIST of all the SONY "CRF","ICF SW" & "SW" models on
the net somewhere?

If you have ANY SONY World Band Radio in mint shape, please email me with your
model number and best price for a "CRAZY" collector!!  :=)

Thanks in advance and any response will be appreciated!

E. Zaydan

Have an Astron RS-20A power supply that is surplus to me. Would like
to trade it straight up for something I could use such as:

Memory Keyer
HF Transmatch
Drake W4 wattmeter
25W synthesized 2m rig (older models that will tune current splits)
Video Capture card for my PC that I can plug a cam corder into
Stack of blank CD-R's
10" Table Saw

or let me know what you have. I am NOT interested in any converted
commercial uhf/vhf FM stuff, have no use for it.

Looking for good used solid state HF rig WITH WARC bands and a CW
filter. Internal tuner a plus but not mandatory. Please advise what
you have and what accessories are included and a price via email.
Thanks in advance.

I need to get my ICOM IC-3210 going again.
Want to buy non-working but mostly complete radio for parts.
If you have one to sell email price and condition.

thanks,
Mike

What did you wind up with?

I am looking for a used HF rig to get into Pactor
with.... but I've been out of ham radio so long I
know nothing abt the equip out there. What should
I look for for Pactor with a Kam Plus tnc?

Also..... do any of the tnc's work with the Linux
OS?

Note to all the people posting swap pages.  Check the link above for an
example of an
easy to read page.

Most pages have stuff all jumbled together so you have to go looking for
the item in
the pile of text.  This page is VERY EASY to read....

Good Job Tom.

Have about 40 used 6 and 7AH 12 VDC gel cells for sale. Also have about 10 4AH 12 VDC cells. All load tested good. PERFECT for QRP rigs and portable operation. I have sold hundreds of these to the QRP boy's on the QRP mailing list and all have been very satisfied. Had a few damaged in shipping and one came back DOA which I replaced for the fellow free of charge but that's it. I am the service manager for an alarm company and we change our customers batteries every 3 years as preventive maintenance. These used cells should provide another 2 to 3

and probably longer service if used and recharged properly. Cells come fully charged and are ready to go. They can be recharged with a simple wall wart charger available at Radio Shack or a 1 amp automotive charger. I guarantee against DOA.
Brands are Yuasa, Interstate, Radionics and Portalac.

4 ah cells are $8 shipped CONUS
6ah cells are $10 shipped CONUS
7ah cells are $12 shipped CONUS

If you buy 2 of the same I will knock $3.00 off the total price.
Images of the cells can be seen at:

http://www.usol.com/~tje/yuasa6.jpg   Yuasa 6ah
http://www.usol.com/~tje/yuasa7.jpg   Yuasa 7ah

Hello!
I am looking for trouble shooting tool for HF-8050(851S-1).
1) Cable retractor
2) Card extender

Used...OK
As same ...OK

If you have information,please send e-mail.

Best regards,
73
akio fujikawa

I know I have seen an a MOD to change a normal SWR/Power meter to a peak reading meter .

I have looked around the net but cant find it. Does anyone have the info for this or know were I can find it ??

Thx

I have the following for sale. The prices in parenthesis are current NEW item prices from the latest HRO catalog. You won't find a package like this closer to new condition than these are. My total price for the lot is $400 plus shipping. I am only interested in selling in the continental U.S. and payment will be by money order in advance. If you want to you can look me up in any callbook, I have had the same call for about 20 years and my address had been the same for the last 10 or so, and before that, 6 blocks away, for 23 years. Everything is in EXCELLENT condition as I don't think I have actually transmitted on this radio more than twice. I decided that I prefer my older and larger Icom Z1A so I am selling the Yaesu. Feel free to make offers for individual parts but I am going to wait a little and hopefully sell it all as a unit.

FT-50R	Dual band HT	($350)
FNB-41	9.6V 600Ma Battery	(Included in basic package)
NC-60B	Overnight AC charger	(Included in basic package)
	Soft Case	(Included in basic package)
FBA-15	AA battery case	($20)
FNB-V47	7.2V 1200Ma Battery	($56)
MH-34	Speaker Mic	($31)
MH-37	Earphone Mic	($31)
LT-30	Mic Adaptor	($11)
E-DC-5B	Car DC Adaptor	($27)
ADMS-10	Programming Software	($40)

Rubber Shell	($8)
Total Price (if bought new today)	($574)

PS. For all the self appointed price police out there. I don't really care if Mannys Discount Barn is selling these radios for $5 a dozen. If you don't like my price feel free not to buy the radio. I personally think that this is a fair price but do have a little leeway for haggling. If I don't sell at this price I may lower the price, or I may just keep the radio, I don't need to sell it.

I have been unsuccessful in finding out who I bought this interface from, lost the instructions, can't do SSTV 'till I find out which wire is which...if you recognize this or your company made it please let me know where to put the red, green, yellow and black wires.

See at http://www2.netdoor.com/~butchkay/index.html and scroll down page to SSTV interface. You can look around my site while your there, it needs updating desperatly but you might find a new site or two.

Thanks

I have a good working Astron RS-20 power supply that I am not using

```
anymore that I would like to trade for a basic memory keyer AND iambic
paddle. A keyer with just 100 character memory would do me fine. Will
also sell the RS-20 for cash price of $65 plus UPS shipping from 48449
in Michigan. Please email me if any interest.

Take a look through your search engine for Hi-Reas Communications.  They
offer a small kit for converting meters.  I have one, and it works well.
Cheers,
Lee Smith

Well, I lot of help I was!!
Not only did I not supply the URL, but I even managed to mis-spell the name
of the company. Hopefully, this will be better:
http://www.rust.net/~hires/
Cheers!
Lee Smith

For Sale: One (1) Kenwood TS-440S/AT.

The radio has not been modified, has original manual, is in very good
condition, and has spent most of its life in the original box.

A couple of pictures of the radio can be seen at:

http://www.bcfmca.bc.ca/ts440.html

We are asking $600US or best offer, buyer pays shipping and prepays
with an International Money Order if outside of
Canada (unless you can find someone to do COD across the border).

Contact us via email at bcfmca@'killspam.'bcfmca.bc.ca if you have any
questions (remove the killspam portion please :)).

I have for sale one (1) Icom IC-3SAT 220 MHz Transceiver. Unit comes
with original antenna, box, AC wall adapter, and a
BP-83 battery. The radio also has the CTCSS encode/decode board
inside.

A picture of the radio can be seen at:

http://www.psychonet.net/~ve7fet/3sat.html

I am asking $220US for the package, buyer pays shipping and prepays
with an International Money Order if outside of
Canada.

You can contact me via email at ve7fet@'killspam.'psychonet.net if you
have any questions (remove the stuff in quotes, thanks :)).

Looking for a Kenwood TH-42AT in good condition. prefer it with a TSU-8 installed.

Also looking for a seperate TSU-8 for my TH-22AT.

Please e-mail ghopper@eskimo.com with offers for sale.

Just a note...
I have one of these and the swr never gets above 2 at any point. There a good all band antenna.
I have worked all over on it QRP and at the limit too.

I have a very nice, CCA VGC, winged, KWM-2, S/N in high 11,000's. (Front panel / cabinet appearance is more like CCA Excellent.) Very few, almost-undetectable marks on cabinet and front panel. Chassis is very clean. Crystal codes are mostly 6-62.

The radio was just gone over thoroughly by Bud Whitney, K7MRT. He replaced several weak tubes, several caps and other minor parts, and thoroughly aligned and tuned it. When I bought it, the original RCA antenna plug had been replaced with a BNC. Bud exchanged that for an original ceramic RCA. The rear panel, immediately beside that plug shows some scuffing. Wired-in relay has also been changed. The radio works perfectly on all bands with full output. PTO tracks great end-to-end.

I'm asking $650, which is a bit less than I have in it, but will entertain reasonable offers. Add $20 for UPS surface shipping. Please reply by email.

Hello,

Are you driving between cities and searching for a Repeater in the Western States? The Travel Repeater Directory and Maps contained in this 29 paged book will make it simple. Whether you're out for a drive or on vacation, locate the nearest city or highway to you on the map and

the closest repeater will be listed.

We encourage you to visit our site and take a look at this new book, and any feedback you can provide will be greatly appreciated.

Hello all loyal followers of the Batwing Laboratories site!

Just thought we'd let you know that effective June 5 we now have a mailing address.

Feel free to send donations of all shapes and sizes (and denominations if you see fit :)) to the following address:

Batwing Laboratories
Suite 141-347
6200 McKay Avenue
Burnaby, BC V5H 4M9
CANADA

PS We've been way too busy updating the page lately, so come by and check things out at:

http://www.psychonet.net/~batlabs

for all your Motorola 2-way hacking/modification tips and tricks.

If you want to email us, reply by removing the usual from the address...

Bat

Looking for inexpensive memory keyer and set of Iambic paddles. Keyer need only have 100 character memory and physical condition not

important as long as it works good. Also looking for inexpensive set
of iambic paddles, old Hamkey or beat up Bencher would be fine, again
physical appearance not important as long as they work ok. Please
email me with what you have and your asking price.

I am the original owner (still have the shipping box). It's a WP-738-1.
The cavity is currently tuned to pass 146.000 and reject 145.700 with 32 dB
rejection and .5 dB loss. Wacom can supply retunning instructions. I no
longer use it and don't want to look at it anymore. I'm asking $75 (less
then half of what I paid for it about 2 years ago) buyer paying shipping.
Yes it can be shipped UPS.

Thanks
Michael

I am looking for a Radio Shack HX-100 10 Meter radio or
other 10 Meter mobile radio.
Will consider radio with bad finals/no output if the receiver is working
good.
I am setting up a mobile RS-12 station and need the radio for downlink.
Send info/price to email address below.
Thanks!

For Sale: One (1) Kenwood TS-440S/AT.

The radio has not been modified, has original manual, is in very good condition, and has spent most of its life in the original box.

A couple of pictures of the radio can be seen at:

http://www.bcfmca.bc.ca/ts440.html

We are asking $600US or best offer, buyer pays shipping and prepays
with an International Money Order if outside of
Canada (unless you can find someone to do COD across the border).

Contact us via email at bcfmca@'killspam.'bcfmca.bc.ca if you have any questions (remove the killspam portion please :)).

I have two items that might be of interest to a collector. The first
is an I TT Mackay Marine Type 401-A portable lifeboat emergency
transmitter with all spares, mounting bracket and lifeboat antenna.
Unit is in mint condix. You pickup. Weight about 40 lbs.
The second in an original Instructograph code practice maschine with
all paper tapes. Circa 1947. Mint condix.
I have no further use for them and they are taking up space.
Please replt by e-mail to tstrong@acadia.net

Well you can shop here now, just as we have been for some years now,

for rigs and pcs too! Why did you know a buncha rigs are actually

controlled by pcs? Can't run digital modes without 'em dumb shit!

Incredible concept, huh?

>If we are going to resort to name calling, hey dumbass, "re-tarrd" is >spelled retard.

You are correct sir for individuals with normal IQs!

Traditionally, the number of Rs placed in retard indicates just how

badly retarded one is, it should have been spelled retarrrrd!

>Using your logic of advertising a computer in a radio newsgroup, why >not advertise a cellular phone for sale in video equipment for sale >because "you can use a cellular to order video equipment parts" or in >sports equipment for sale since most professional athletes have >cellular phones. Hey I'm selling my car, well advertise it in a realty >ad because you park a car at a house.

I don't have a problem wit dat! Did you notice the guy selling the

7000.00 truck for 4000.00? Right here in good 'ol rec.radio.swap, know

why? You can put a transceiver in them suckers! Somebody here might

have a rig and no fuckin' truck. Whats he sposed to do? God your dense

Bubba.

You find out what your real name and call is yet?

Love, Butch Magee, KF5DE

FS: Midland 13-510A 25 watt 2 meter mobile. The "A" version
covers 143 to 149.995 MHz with three power levels (1, 5, 25).
The radio has NO memories (uses cerebral cortex memory).
Standard +-600khz repeater splits are supported.
I have installed a Comm Spec TS-64 CTCSS encode/ decode
module ($70) and changed the analog s/rf meter to a 10 segment
led bar (looks good!). Included is the standard microphone, power
cable and owner / service manual. I can provide a picture.
I have owned and used this radio as a base station for the last 5 years. I'm
asking $100 plus shipping

Thanks for reading this post

Michael

I am selling my Yeasu FT-2500M. It has FULL TX/rx coverage from 140 to 174
MHz, 38 memories, 3 power levels (5,25 and 50watts), DTMF
microphone, alpha numeric display, comes with the original box, manual and
mounting bracket. Asking price is $200 plus shipping.

Thanks for reading this post.

Less than 1 year old Yaesu FT-840 with FM-747 board for 10 meters, and 500Hz CW filter. 10-160 meter and general coverage receive too. This rig is in excellent condition and includes original box and owners manual. Have upgraded to FT-1000. Non-smoker. If interested email me at n1zni@maine.rr.com $625 firm includes UPS ground shipping to lower. This rig with these options would go for $1032 +shipping at AES today.

I have for sale the following items:

1. Novex FC-7300 HF converter. Allows users of the Yaesu FRG-9600 and Icom R-7000 all mode HF reception. Converts HF and VHF-LO bands to 100-160 MHz range on either of the above radios. Will also work with any scanner (limited to the available modes on the radio). Example: to receive the BBC world service on 5975 KHz, the user tunes his scanner or receiver to 105.9750 MHz, AM mode. The converter is switchable and has N connector jack for VHF antenna passthru. Radio is also fed with N connector jack. SO-239 jack for HF antenna. Unit is in fairly good condition. Has two holes drilled in top of plastic cabinet which facilitated mounting underneath a shelf. Requires 12volt DC supply which is not included. Was $249.00 new approx 5 years ago. Will sell for $100.00. Works great!

2. Kantronics KPC-3 Amateur Packet Radio TNC. Has 128K mailbox. Includes cable to interface with older Icom HT's such as the 2GAT. Also has two holes drilled in top of cabinet. In otherwise excellent condition. Will run on 9 volt battery for portable use. Requires 9-12 volt supply, not included. Will sell for $90.00

Will ship above items COD cash/money order only. If interested, please reply to e-mail address below, do not post reply in newsgroup!

To Mr.John Andrews

Hello!
Thank you e-mail.

I am not interested in MAC PC. I'm sorry.
I have used PC-AT.

JRC-245 is very good condition.
So you have NRD-535D, I know it have$B!!(J good design,performer.
Noise level is better than NRD-535D.
Because it does not have display noise.

If you can get it, you will like it.
My JST-245 is mint condition.

Best regards,
73

This one covers all sorts of communication systems -- not
just the data communications like the one above. $ 15

An Introduction to Fiber Optics by Shotwell
Not in great depth, but an easy to understand book $ 15

Introduction to Electronics and Electronic Shop Practices
by Worden - Mainly a "Shop Techniques" book, with lots
of reference charts, etc., but some theory included $ 18

Digital Electronics by Uffenbeck - Technician Level text
Covers from number systems to shift registers to Programmable
devices to interfacing $ 25

Electricity - Principles and Applications by Fowler
Part of McGraw Hill's "Basic Skills in Electricity and Electronics"
group of texts. Mainly theory, in easy to understand
explanations. $ 20

Electrical Measurements by Smith & Wiedenbeck
Classical measurements book - Engineer level $ 15

Principles of Electronic Communications by Mandl
Includes modulation, amplifiers, noise, transmission lines,
antennas, etc. $ 18

I also have

Exploring Handbook - 1958 - close to new condition $ 20

Handbook for Patrol Leaders - 1950 copyright - 1959 printing $ 18

1986 American Red Cross "Expect the Unexpected" $ 2

If you would like more information about any book, please e-mail to
W8EK@usa.net. All books are in good shape.

Prices do not include shipping from NE Ohio.

Hi

I have 4 Items for sale. I originally had these items posted as for pickup in the MD area. I changed my mind and am willing to ship these items.

Note: The price for the 830 does not include shipping. I am not sure how much it will cost to ship the 830 but if anybody is interested, I can find out

Here are the items I have left:

Kenwood TS-830S HF Transceiver with Shure Desk Microphone- $500
Ameco Preamplifier for HF through 6 Meters- $75
Kantronics VHF1-60 2 Meter Amplifier- $150
MFJ-1276 TNC- $75

For more information, EMAIL me at keithc@mail.com or call me at (410) 682-3594. If you are in the MD area, I can demonstrate the 830 or anything else to show you that it works.

Thanks,

Keith Calligan

Lets see:

 6 of them you have
for  $50 each?

but all of them for $40

wow!

Sounds like volume discount in a non-linear equation

$200 (I have seen them for over $400 used)
 Handheld (Smaller than a TH-G71A) 100 Khz - 1300 Mhz continuous.
AM/FM/WFM, 100 channels with 10 programmable freq edge-scans.
with VHF/UHF Ducky antenna, manual, and DC lighter plug, works on
6-16Vdc)
has priority watch, and tuning steps of .5, 5, 8, 10, 12.5, 15, 20, 25,
30, and 50 Khz.

will trade for dual-band Amp (45/35W) or older dualband mobile unit.

Looking for several J.W. Miller coils and a couple of Dyna transformers see below for details, also I need a Fisher 400-CX preamp in any condition

J.W. Miller coils needed

1351 / 1351-PC	low pass filter
1352 / 1352-PC	band pass filter series element
1353 / 1353-PC	band pass filter shunt element
1354 / 1354-PC	locked oscillator 19 Kc.
1355 / 1355-PC	output transformer 38 Kc.
1356	19 Kc. amplifier coil
1357	38 Kc. output transformer
1358	67 Kc. low pass filter

Dynaco transformers needed.

PA-015 or
PC-706 or
464023 or
464017   Power Transformers   410-0-55-410, 400ma.; 5 volt 6 amp.; 6.3 volt 8 amp.

C-492 or
423355   Chokes   400ma.

any or all please send price each and quantity.

Please respond via email and remove "NO" and "SPAM" from my email address.

Thanks,

John

I have two of these and would like to sell one. Price is 350.00 firm and I pay shipping. Condition is excellent. Non-smoker. Need some cash for a tower project.

Comes with the antenna and operating manual.

Ummm... so folks could get an idea of the total value of the deal, and how it
adds up :)

r.antenna;
```

We will be moving soon, and unless a ham buys the house, will have a variety of antennas and towers for sale.

All are located in NE Ohio, with pickup being preferred.

The following are available.

Hy-Gain "Hy-Tower" Vertical - This is the full size vertical that is about 55 feet tall, with about 25 feet of actual tower on a tilt over base. $150

Cushcraft A-147-22 two meter beam - pair of stacked 11 element antennas with phasing harness, etc. $ 100

65 feet of very heavy duty Riverview tower. This tower is rated to hold 14 square feet of antenna, with no guying required. Obviously, it will hold much more if guyed. $ 450

You can also get all of these antennas, and much more, by buying the entire house, located on one of the highest locations in Stark County. E-Mail to W8EK@usa.net, or call (330) 499-7388, for more details.

73,

Ken, W8EK

Our radio club needs a good working repeater replacement for 444.100/449.100 MHz.
Prefer screw type tunable Duplexer.
I have a good controller and PS
I need rx/tx set and Duplexer

Mike

Radio Shach unable to help.
Recently purchased a HTX-202 on the net and it came with a beautiful box, but not the original (I believe they utilized stiff cardboard) packing insert where the radio, antenna, ni-cadd pak and AA pak and manual would have been secured for shipping. As a collector, I do

enjoy having my items kept in their proper containers when not in use
for extended uses.
Anyone, out here have what I need? I would be willing to purchase the
box as well if required. I feel everything could be properly flattened
and sent in a large manilla envelope of the 8.5" X 11" variety, then
re-assembled once here.
I would pay a reasonable price to anyone who has these items, in near
mint to mint condition who is not interested in the packing material
and so forth. Please, write with full condition, price and any other
details I may need to contact you.
Thanks
Ray Miller   N2NJK

I have a SW8 I purchased early this year, and would like to trade it for a
used desktop.
NRD 515, NRD 525, R8 or a R71A I have seen most of these sell for 475 to
525 and that is about what I see the newer SW8's go for.
Prefer Local but Can Ship via UPS with no problem.

I have the following items for sale or for trade:

Drake SPR-4	$175 + shipping
Uniden HR-2600	$125 + shipping

Would be interested in trades for 2 meter mobil gear.

I have pictures in jpeg format of each if interested please e-mail me for more details.

Thanks
Barry

I have for sale a IC-706. Includes items below:

IC-706 MKI
FL-100 CW filter 500Hz
OPC-581 11.5' separation cable
MB-63 Mounting bracket for control panel
Icom service manual (this is from icom)
All boxes and manuals

This radio was only mobile once for a road trip. Was used as a base by a non-smoker. I would like $850.00 for everything. I will pay shipping lower 48 states. I can be reached by E-mail or my phone number is 216-741-4717.

Mike

I have one of the early TH-79A's which has been modified for extended
Tx/Rx, and which covers up to 512Mhz on UHF. These are fairly rare, as

the Microprocessor was changed in subsequent production runs, to only allow UHF operation up to 470Mhz. This is a problem for those having public service activities above 470Mhz, where they are forced to listen to an image.
My TH-79A will cover this range , both Rx and Tx, directly.
It comes with all standard accessories, manual, boxes, and includes the KSC-14 dual compartment, drop-in charger. I am also including 3 battery packs. They are all 6V, 2.5W packs, with capacities of 600, 900, and 1200 mahr. The 900 mahr pack is a new NiMH pack, and the other 2 are NiCD with new inserts.
The radio and all accessories are in excellent condition, both cosmetically, and operationally. and I will ship all for $315, ConUS.
If interested, please reply by direct email.

Does anyone have a schematic of the Heathkit
IG-102 100khz to 110mhz rf generator. Mine died
after many good years. I can only guess that a tube
has gone on to better worlds. My problem is that
only one tube has ID numbers on it (12AT7) the
other tube is a 6A??A. If I can't get a schematic
can someone out there tell me what the 6 volt
tube's number is supposed to be??

Thanks
73
Michael

Hi
Will this ht do digital pl? I think they are nifty radios, butni would need
it to do dpl so I could use it forthe fire department.
Thanks,
Bill

CD Quality Cable Stereo Receiver
         - and -
50-150mHz RF Communications Electronics Bonanza

StudioLine COMPANDING FM RECEIVERS (See Photo) with
up to 90db audio s/n ratio for Cable
(and other RF Distributed) consumer and professional Audio.

Complete specs functional descriptions of electronic modules
```

and many images of handsome enclosure and circuit boards
is on display at:

http://www.lasermotion.com/DEALS.html

WHAT THEY ARE: Three RF receivers in one box with "F" connector input,
and RCA phono outputs for two channels of audio.
Two receivers are FM audio channels, can be tuned (VCO Circuit) 50-150mHz
and the third receiver (at 50.675MHz with 10.7MHz IF) is dedicated to
optional control and programming functions.
The audio section includes the 3:1 "expander" section of a companding system.

(Original (OEM) Large Quantity Manufacturing Cost in Japan = $321 /each)

THE STORY: StudioLine technology for economically distributing truly
studio-quality audio programming over existing Cable & Wireless broadcast
systems was originally developed by FM Systems, Inc.., Santa Ana, CA. with
funding provided by The Chronicle broadcasting company in San Francisco,
CA. We acquired the equipment and rights. Pricing is very affordable.
Head End transmitters are available inexpensively from
FM Systems, Inc., Santa Ana, CA.

The units are unused and in original manufacturer's packing.
Schematics and technical info is included.

Shipping weight: 7.5 lbs.
You pay UPS ground shipping. We pack it for you.
Thanks

em at lasermotion dotcom

don't have a cable, but you may not need one. I modified on of the
"commercial" versions of the ft23, slightly different number, the fth-2006,
to be programmed from the keyboard, making it a freely progammable ft23 with
complete 140-200 mhz tx-coverage! yaesu has the missing keys of the ft-23
keypad hidden under a peace of plastic.
Just soldering one jumper #9, and some mechanical stuff to reveal the hidden
keypad keys did the trick!
If you want more information, let me know.

Fellow Hams,
The time for action is at hand. There is only a short time to act on
this.
It appears to me that they gave us less than a month to reply so that

this would not have time to be published in the ham magazines, so we must use other methods to get the word out quickly. Please read thru the info below, I got it from a remailer that I am on at home but I wanted to share this with all the hams I know. Each one of us must act or lose one of our most popular ham bands.
All you need to do is write a short note saying that you oppose RM 9267.
Send it to -
Secretary, FCC, Washington DC, 20554.
and do it by June 1st. Be sure to sign it with your name and address and callsign.
73, Dave KD5FX

Greetings:

I know that this subject has been broached in the remailer. But here's some more info which was just brought to my attention.

First one from the ARRL, the second from WA6ITF & Company.

Newington CT May 7, 1998
To all radio amateurs

SB QST ARL ARLB030
ARLB030 LMCC petition opposed

The ARRL is organizing opposition to a new threat to the 70-cm Amateur Radio band. The Land Mobile Communications Council (LMCC) has asked the FCC to immediately reallocate 420 to 430 MHz and 440 to 450 MHz from the federal government to the Private Mobile Radio Service (PMRS) on a primary basis. Amateur Radio now enjoys the use of 420 to 450 MHz on a secondary basis, and the 430 to 440 MHz segment is an international allocation. The 70-cm band is the second most popular of the hobby's VHF/UHF allocations, with substantial FM repeater and other operation in the 440 to 450 MHz segment and a variety of uses in the 420 to 430 MHz segment.

The LMCC request, based on ''additional spectrum needs of the PMRS community,'' acknowledges Amateur Radio's use of 420 to 430 and 440 to 450 MHz, and suggests that ham radio applications can remain secondary to PMRS in those segments, but offers no explanation of how sharing could be accomplished. The LMCC says it believes the 430 to 440 MHz subband ''is more important to the amateurs for use in emerging technologies such as links with spacecraft and amateur television applications.''

The petition also suggests that equipment availability and technology resulting from an expanded PMRS presence on 70 cm would benefit hams ''pursuing such applications as compressed video television in the 430-440 MHz band.'' The LMCC concedes, however, that its ''most urgent need'' for PMRS is voice and low-speed data applications, not advanced technologies which might come later on.

The petition also notes that PMRS already uses 420 to 430 MHz in three Canadian border cities (Buffalo, Cleveland and Detroit) and a ''reduction in military use of this band is foreseen.''

The LMCC also seeks allocations at 1390 to 1400 MHz, 1427-1432 MHz, and 1670 to 1675 MHz as well as 85 MHz at 960 to 1215 MHz by 2010.

Comments are due on the LMCC's Petition for Rulemaking, RM-9267, by June 1. Reply comments are due by June 15.

Subject: [rpt] Newsline Version - 420 MHz threat: RM-9267 from LMCC
Date: Fri, 8 May 1998 14:07:50 EDT

Here is our Newsline version of the story. Unlike every elses, it gives info on how to protest and where to send that protest -- aka -- commentary.

I'll add -- do not look to the ARRL, W5YI, the FCC or anyone else for salvation on this one. ONLY YOU can save our ham bands. Do not wait for some 'annointing power' from Newington, Dallas or Washington to tell you what you already know. These are you bands. You and only you can protect them.

Learn to be your own leader instead of playng 'follow the leader.'

de Bill Pasternak, WA6ITF / Newsline

LMCC DEMANDS 70 CM HAM BAND FOR COMMERCIAL USE

The Land Mobile Communications Council has issued a demand to the FCC that it immediately reallocate of most of the 70 centimeter Amateur band over to private mobile operations with private land mobile designated as the primary user.

Technically the document is nothing more than a formal rule making request to the FCC that has been designated RM 9267. In reality it is more a demand by the LMCC for the FCC to immediately reallocate 420 to 430 MHz and 440 to 450 MHz away from the federal government and over to the Private Mobile Radio Service on a primary basis. The Land Mobile Communications Council is also asking for news allocations at 1390 to 1400 MHz, 1427-1432 MHz, and 1670 to 1675 MHz. It is also demanding a walloping 85 MHz at 960 to 1215 MHz and it wants all of this turned over to the Private Mobile Radio Service no later than 2010.

But LMCC is not willing to wait until 2010 to take over the 70 centimeter band even though this is the second most popular of the Amateur radio services' VHF and UHF allocations. Amateur Radio is a secondary user of 420 to 450 MHz. There are thousands of FM repeaters operating from 440 to 450 MHz and a variety of modes on the air every day in the 420 to 430 MHz segment. While the Land Mobile Communications Council petition indicates that it is willing to permit Amateur Radio to retain some sort of secondary status, this would be only on a non-interfereing basis with the new commercial interests.

Experts say that the best way to kill RM 9267 is though a massive letter writing campaign to the FCC. A campaign that outlines the specific use of the band by Amateur Radio Interests -- informational filings that detail how every hertz of 420 to 430 and 440 to 450 MHz is utilized on a day to day basis by hams.

The commentary cutoff date on RM 9267 is June 1st. This leaves precious little time for radio amateurs around the nation to react. Those responding must be certain to reference RM 9267 at the top of your letter. Send comments to the Secretary, FCC, Washington DC, 20554.

Again, that June 1st as the commentary cutoff date on RM 9267. Comments go to the Secretary, FCC, Washington DC, 20554.

EDITORIAL:

This is actually an end run by the LMCC to get spectrum for free. Others in the same business have had to BUY the spectrum at auction. This is only the first in the pressures to get spectrum for free when others have pay for it. There main argument will be that their spectrum loading studies indicate that these frequencies are used very little by Amateurs and a secondary use basis is adequate for the Amateur needs. Just think of it folks, all those phantom repeaters that are on the coordination books that have been blocking the real use of these frequencies will be our undoing. The other ugly fact is that the LMCC members contribute to congressional re-election campaign fund and the Amateurs do not.

These are the facts. The spectrum alligator is biting off chunks all the time. 902-928MHZ has become useless will the addition of many other users. We are about to lose 1240-1260MHZ. Every year we will see more chunks bitten off our spectrum. The argument that Amateurs push forward technology just isn't true today. The only thing we support is technology that is 30 to 50 years old. The commercial market has pushed technology and we have resisted. As far as the Amateur is concerned 1200 baud is good enough. Try that one on any 14 year old today and they will laugh at you. Ask most Amateurs what TDMA or CDMA is and you will get a blank stare. Our amateur community has insisted that the rules OUTLAW any technological progress. The last change was when SSB came in the 50's. The digital technology we support is from the 30's. Today we have to justify our usage. We can bicker all we want, others will only view this with amusement.

I think we agree on all points here. One suggestion I have for everyone here:

> Crosslink! Take your 52, 220, 440, 1.2 pairs and link them, FULL TIME, to the busy 2m repeaters in town. That will at least get some voices into our under used spectrum. If people bitch, tell them to go talk on another repeater.

I'm sure all of these groups going for spectrum have spectrum analizers in storage mode across all bands. Where they see quiet, they demand, and I think rightfully so, to use it for more productive uses. We've sat on our butts for years moaning about HF (which NO ONE wants) and contests (getting points for adding to congestion?) and CW (there's a bright idea, insist that people use the most narrow bandwidth to justify more spectrum).

Time to get the projects off the bench and on the air. I'm guilty too... I have a couple repeaters to install. Let's let this be our motivation.

Don't think about writing to your congressman or the FCC until you can honestly say you're helping the service. If you're on the same bands and the same modes as you were 10 years ago, YOU are the one that caused this situation.

I'm very interested. I won't be able to set up all of the fancy features that the cable will let me do, but I'll at least be able to set the freqs and tones.
If anyone has any info on this, please e-mail me.

I have a trap dipole antenna with balun in good shape that I would like to trade for a desk mike. I have a Yaesu w/ an 8 pin connector but if yours is different no biggie. Balun and traps are made by Spiro, antenna is trapped for 10,15, and 20 meters and untrapped for 40 meters. Too big for my current house and yard. Notice the spam trap on my email address!

This power supply is the 12V version of the AN/GRC-? which is a radio set from the 1950's which was used by the military. There was also a 24 version of this power supply. There were two versions of the transceiver using this supply, one covering from 27-38.9MHz and the other from about 38 to 54MHz.   My particular experience with is was in the mid 50's while an ET in the US Navy. We used this radio in the LCVP landing craft. I understand that the army also used in in tank and other vehicle applications.
I used to repair them. They did have an internal schematic which was printed on silk as I recall.

Less than 1 year old Yaesu FT-840 with FM-747 board for 10 meters, and 500Hz CW filter. 10-160 meter and general coverage receive too. This rig is in excellent condition and includes original box and owners manual. Have upgraded to FT-1000. Wish I could keep the 840 for mobile but can't afford both right now (and divorce is too expensive!) If interested email me at n1zni@maine.rr.com first $675 takes it (will pay shipping to lower 48 at $675).

Today I opened a package that my father had wrapped when I was a child. The paper crumbled in my hands as I removed the twine around it. The power cord and plug looked like the rubber had melted away with age. I did not plug it in to see if it was working. The radio has three knobs in front, one is the on-off-volume , the second is the band control and the last is for tunning. The tunning dial is divided into two sections, Foreign and American. The wood case is in very good condition even with a water mark left by a glass on top. Is this model considered rare or collectable?

R.W.Schlachter.

Hello listers:
I don't have a service manual for my IC2340H Dual bander. Can
someone who has one please tell me the value of L8 on the two meter
side of the radio?

On the advice of my local radio store, I replaced the high power module
but this may be the problem.

Any help will be greatly appreciated!

Larry N0XB

Didn't we see this the other day? What does a pyramid scheme like this have to do with CB radios or any kind of radio at all? Why post this to all of the newsgroups? Don't they have a newsgroup called rua.sucker.yet? That is the only type of person who will respond to this kind of ad.

I am going to buy the new Yaesu rig so my Icom IC-820H is going up for sale. I will have the rig at Dayton spaces 3364 and 3365 Friday and Saturday only.

Asking only $800 for a quick sale.

Rig is in excellent condition. I do not have the box but have manual.

73,

Lee, KJ4BF

Since I often butt heads with the ARRL and they will tell you that and since they have to convince me that they are there to do the best they can for all Amateur Operators and since they lately proved it by removing Burt from the VE rolls, I have decided to become a life member.

The radio , if aligned and operating properly, will shut down to 30
watts out at an SWR of 3-1 on 20m. That is the alignment criteria.

If you care about how these groups are going, you had better pay attention

to a SMALL group that want to have it their way. I am tired of these people trying to tell us what we should or should not say in a message or group.
IF YOU DON'T LIKE WHAT'S IN THE GROUP.....YOU DON'T HAVE TO READ IT.

If you want moderated groups....then bring them into existance and be done with it.

All readers.....be prepared to let people you don't even know tell you what you should and should not be able to do in these groups.

Forewarned is forearmed.

I started getting the RFP and quickly unsubscribed.....what a waste of time to try and read it. Only one day and over 20 messages from the same individual......I love these "For your own good." attempts.

I guess i dont understand your comment. If i want to read about Ham gear
I would go to a Ham news group, if I want to see smut I would go to a
porne news group. Whats rong with commenting on whats posted hear or
there....after all you do!!

Hi Pat,
I don't know. When I go into a ham radio equipment newsgroup I sort of expect to talk about radio equipment and not Scientology.

Likewise I don't go into a ham club meeting and expect to be able to start telling everyone about the virtues of basket weaving. Wrong place, wrong topic.....

You might note that COM2: and COM4: use the same IRQ -- that often
causes

```
problems with other communications software...  I suggest removing the
MODEM
for a test, that is the only way to quickly tell if the rig, software
and
cable are OK.

I suspect the cable, rig and software are OK, just a bit touchy!

You will also want to upgrade the software, V1.03 has bugs download the
patch
from RT's site: http://www.rtsars.com

I just purchased the software and cable ... after some start up
problems, and
the bugs in the version 1.03, I finally have it up and running.

Tom must not have check Tandy parts before opening his mouth!
I would have liked to pay $5 for the thing. It cost me $23 shipped
from national parts.
If anyone wishes to dispute the price call Tandy's National parts
line at 1-800-843-7422 and ask them the price for part number
MS1901101 (Manual Service catalog #190-1101.

I have been given some E.F. Johnson mobile radios that appear to be 8 channel. The only identifiying numbers I can find on them is an FCC ID: ATH90F24260656/8. Does anybody have any info on this junk? uh, I mean radios?

Please e-mail me directly

Thanks!

Charlie.....

Charlie;
I recall back in the late 50's and through the 1960's E.F. Johnson
produced a CB model which had 6 or 8 Xtal controlled "slots." the
model I owned was called a "Viking," and it was a decent little rig -
as CB's went at the time ... I was in the USN at the time, and recall
hooking it into a linear amp of some sort (military), patching it into
one of "my" large antenna systems in the Caribbean ... and blasting hell
out of the fishing fleets at the time ...

I know. He says it's a service manual, yet the manual number he gave is for
the owner's manual.

I want to buy an Icom IC-3210 that is not working for parts.
If you have one of these VHF/UHF Dual band rigs at a "for parts"
price that is fairly complete, please email price and condition to me.

Remove 3210 from email address

Mike

VE7SEZ de AF4K

Have you thought about placing a free ad for your crystal needs on
the "CRYSTAL SWAPPING PAGE" where amateurs buy and sell crystals a lot?

It's at:

http://www.mnsinc.com/bry/xtalpage.htm

Recently, "VE7SEZ" <nospampoustie@concentric.net> wrote:

Looking for components to complete station, esp. external speaker, and

For Sale, Henry 2K-2 Amplifier

I have a Henry 2K-2 floor console Amp for sale. It is in very good condition. It runs a pair of 3-400Z tubes that have full output 1400+ watts output. It works on 10 through 80 meters. Has tuned inputs. It uses forced air cooling with chimneys on each tube. It will run eater 3-400Z or 3-500Z tubes. Very clean inside and out. With book.

$700.00 or Trade for HF Rig ??

Will not ship, but would meet within 200 miles of Eureka Ca.

440 was owned by a heavy smoker and is full of tar. The VOX circuit does
not work.I heard orifice say this on the air as he worked on the
goo-covered,broken mess. Buyer Beware!

I believe that I still have some am xtal filters as well as some
cw filters for the 101's. I also have some aftermarket boards to
ehance the rcvr gain and agc circuits in these as well. I probably
have a few other things like all the card extenders for this and

other Yaesu's. I have several extra service manuals for the 101's
too. At this time I think I have the 11 meter xtals but not 100+ACU-
sure.

Bob C.

I am looking for a very good condition HTX-202 2mtr Handheld. It must have the original antenna, ni-cad pack, AA pack, manual and carry strap. It should be in exellent physical condition and needless to say, in likewise exellent operational condition. I have for trade a n extremely nice Pro-51 Scanner. If not that, tell me what you are looking for in dollars or other radio items. Perhaps we can strike a deal. Please write me with complete details. Thanks

For Sale: QRP station

S&S Engineering ARK4 transceiver (all options except keyer, assembled and tested)
Van Gorden 40m dipole
NYE Viking straight key
50' Belden RG58au coax
Lodestar swr-3p SWR meter

All equipment is in like new condition - the antenna was never erected.

I'd like $215 for all of it, shipping included.

Please remove NOSPAM from my address to reply (I apologize for the inconvenience)

I have for sale a IC-706. Includes items below:

IC-706 MKI
FL-100 CW filter 500Hz
OPC-581 11.5' separation cable
MB-63 Mounting bracket for control panel
Icom service manual (this is from icom)
All boxes and manuals

This radio was only mobile once for a road trip. Was used as a base by a non-smoker. I would like $850.00 for everything. I will pay shipping lower 48 states. I can be reached by E-mail or my phone number is 216-741-4717.

Due to a change in hobbies I have the following for sale:

AOR AR7030, exc. cond. with latest ver. CPU; 400 memories; 2 Kiwa Premium Filter Modules and Kiwa CLF-D2K filter (measured bandwidths in the receiver are 2.1, 2.8, 3.5, 4.4, 6.5, and 9.0); Kiwa audio mod; Kiwa highpass filter mod (better IP3); optical encoder for main tuning (same main tuning encoder as AR7030+ model); remote controller; AC adapter; manual; thick notebook of AR7030 reviews, tech. data, correspondence with AOR, synch alignment, etc.; connecting cables with DIN plugs for PC control & audio output, and custom padded travel case. I also have the original shipping carton if it's wanted. Total new cost for the receiver and accessories was $1650. Sale price: $975 US. plus shipping/insurance.

Detailed information on this receiver may be found in my online review at this URL:

http://espresso.ts.uvic.ca/aor1.htm

a followup article (updater) is at:

http://espresso.ts.uvic.ca/7030up.htm

If interested in this receiver, please contact me by email at:

For Sale.....

Radio Shack HTX-212 2M FM Mobile.

Has a problem!!! No Transmit Power Output.

I can hear the "low level" transmit signal in my

scanner or my HT, so it is on frequency ok,

and modulation is ok, But no Power output on the

antenna jack at all. (selling as-is).

Receives fine, excellent sensitivity etc....I have the

DTMF microphone for it, original manual and box.

$75.00 plus $5. to ship it usa/48

New web site is now up and running. List your used scanners here for
the most exposure.

Because this is a new site the first 15 posts will be free of charge.
Regular charge is $5 for 4 weeks.

Why post on this web site? Your ad will be viewed by more people and
be available to all all day long for 4 weeks. Plus the site is for
used scanners, so people looking can compare pricMike
mawood@net-link.net

Try the site, it just might work for you.

Golly Gee!
Are you a real live auctioneer?

I seem to get a bad attitude about EBAY shoved in my face!
I guess I could be the only one that feels that way?
Whats that word they use when they trash someone's http site?

Jack

Hi,

I'm looking for the manual for an older KLM 170W 2m amp model #
PA10-170BL. (copies welcome) I'm also seeking any technical data or
schematics for this amp. I'd be happy to re-imburse any costs
encountered. Thanks.

Hi Jeff,

I'm not sure what a PA10-170BL is I have the manual that covers the PA2-70BL,PA10-80BL,PA10-40BL,PA10-70BL,PA10-140BL,PA30-140BL and PA10-160BL models if this would be of use to you. If you want a copy of my manual send me a snail mail address via private email and it shall come to you.

Jerry

I have a ts-140S and for some reason the radio shuts down if the SWR reaches a particular level. I have tested on various levels from 2.2 - 1.5 and it seems to shut down somewhere around the 2.0 level. So here are my questions:

o Does the radio have a Sweet spot of where it shuts down? I do not have the issues as much on voice unless you throw a real high pitch.
o Is there a way to increase the sweet spot so to speak?

Any ideas or information would be helpful. Just does not seem right that the radio would shut down with a SWR of 2.0, but I could be wrong.

THANKS 73's Tom - N1ZPC

Looking for an LC-66 carry case and a service manual for
an Icom 24AT Dual Band HT. Even Icom is sold out of the carry
cases for this unit. Anyone have one? Or know where either
of these can be found? Please email me if you can help!

Hello
I have a Kenwood TS 680 I would like to sale. I'm asking $650.00. This price includes shipping. The radio is in good shape. The radio has no mods. It covers 160, 80, 40, 30, 20, 17, 15, 12, 10, and 6 meters. The rig comes with hand held mic, DC power cord, and instuction manual. The rig is pretty good shape. If you are interested drop me a email.

I have forsale or trade the following.

DX375 shortwave radio. 50.00 plus shipping.
B&W Folded Dipole (new) 150.00 plus shipping. (Model BWD)

I am looking for Bird 43 elements particularly the 250 or 500 watt HF Slug.
(250H or 500H)

I purchased the antenna and put it up, my wife then decided I could get a tower....(I put it right outside the picture window <g>).

What is a CRF-1? I have a CRF 5080 that I bought in 1975 and like very much. I have not been able to find any information about these older radios on the web.

I've owned a IC-2000H for more than a year and have had no real intermod problems. The only complaint is the internal speaker needs to be replaced. If you turn the volume to a comfortabe listening level the speaker distorts and or vibrates.

I bought a HTX-100 at a hamfest and found out that EVERY
SINGLE COIL had its ferrite slug damaged or pushed to the
bottom. I'd like to find someone who has a HTX-100 that's
dead because of semiconductor faults. I have contacted
Tandy and found that they stopped restocking the replacement
parts for this thing a couple of years ago. If you have a radio
that may fit the bill please email me with your price.

I have looked into removing the coils and unscrewing them from the
bottom. Some can be done others actually have a bottom that
prevents ANY access. To make matters worse the wingnut that
messed this radio up didn't stop at just breaking the ferrites. He
went so far as to drill out the broken ferrites and totally trash the VCO
coil as well as a few others.
The point has been made that the HR 2510 was also made by Uniden
and probably has the same coils. Well that's true but in my case the coils
that are trashed aren't used in the 2510.
I thought of buying both service manuals and comparing parts but
at a cost of >$50 for a radio that is only worth $80 I thought again.

I'm looking to find a service manual for the RCA TAC-300
series of UHF LMR. I'm trying to do a 440 conversion.
If anyone can help please email.

Thanks
Michael

Throw the HTX- 100 in the trash and write it off as a lesson learned
the hard way.You will spend too much time and energy trying to fix the
thing and you will wish you had never gotten the junk in the first
place. Don't let the thing tear your nerves up. Trash it! 73's DanOn

The really BAD coils in this HTX-100 are:

FT-2 (triple coil set in the upper right corner, going front to back)
L317 (VCO coil on the PLL/micro baby board)
L1,7,8,12,13 and L26 the rest don't look great but I hope they are
still intact and just need a new slug.

If anyone has a chassis that they want to part with I'm still looking.

I have for sale a IC-706. Includes items below:

IC-706 MKI
FL-100 CW filter 500Hz
OPC-581 11.5' separation cable
MB-63 Mounting bracket for control panel
Icom service manual (this is from icom)
All boxes and manuals

This radio was only mobile once for a road trip. Was used as a base by a non-smoker. I would like $825.00 for everything. I will pay shipping lower 48 states. I can be reached by E-mail or my phone number is 216-741-4717.

Mike

Well, I thought the GP68 was the european version of the ht1000.... maybe that's the gp900. (So whoever I said that to- I'm wrong!) I don't know anymore.... :) It's getting too darn hard to keep up with!! So, could someone please fill me in on the GP68 and why they are selling at FRS prices??
thanks!

Mike,

I'm interested in your AT-180 tuner if you split up the radio.
Please advise as to price. Thanks and 73   Ed K2SNK

Euro-spook radio. Not for sale, legaly, in the USA. It is a keppad
programable radio like the JT-1000, but again not type accepted in the
USA. VHF is 136-172 MHz, UHF is 438-470. Uses GP-300 Mic. They are longer,
and narrower than a GP-300. Thats what I know.   BiLL

Hello All:

Thankyou for reading this item. I am asking for $115.00 plus a few dollars for shipping and insurance depending upon shiping mode and location.

I am selling a new Radio Shack Power Amplifier. Perfect for mobile and stationary use. Catl. No. 19-1122. Some Features:

o 30 watts output
o Low Noise GaAs Field Effect Transister (FET) pre-amp
o Accepts 0.5-5 watts input
o Double Tuned Helical Band Pass Filter cuts intermodulation
    distortion - This is a must
o 13.8 Volts Direct Current

Originally, I purchased 2 amplifiers for 2 cars and only used one. This one is brand new, Never Used.

I have a like-new Motorola MaxTrac mobile trunked radio, model HUF1069A
and am interested in trading for a wide coverage scanner or good SW
radio. Would also consider a talkabout unit, such as the Motorola VISAR.

Regards,
Dominic Dambro

I would be more than happy to trade you a Talkabout, but a VISAR
is not a talkabout. Talkabouts are Family Radio Service radios,
a Visar is a portable radio for Public Safety and Commercial use.

I have a full set of Hustler 1KW resonators to sell.

10-75 (excluding WARC bands)
Fold-over mast
Quick Disconnect
Spring

Well over $200 at retail. Will ship.

$150

Well, la-de-da. A talkabout is whatever you want to make it. What a nitpicker, whew! I'll bet you're a real joy to be around all day. "Hey, hand me the HT."   " I beg your pardon, that is a portable radio for Public Safety and Commercial use."

Thanks for your reply.

The post was a copy of an email sent to various WIARC club members, as such the general location needed not be specified, however this will be corrected in future postings

As for the date, there were no hamfests scheduled during that weekend when WIARC picked its date. It was only later that we were informed that the Hosstraders were having their hamfest in NH that same weekend. Nevertheless it is fairly distant from the Montreal area and takes place during 2 days so we hope this will not greatly affect the number of hams coming to our hamfest.

We're glad you are enjoying the return of the auction to the WIARC fleamarket, and hope that if this auction is successful and gains enough support that it will remain a part of fleamarkets for years to come.

WIARC

Michael Crestohl wrote:

> Hello:
>
> You might want to mention that the WIARC auction is in the Montreal Quebec area otherwise people won't know if it's close to them. Also your choice of the date was poor - its the same day as the Hosstraders in Rochester NH which draws many of the more serious flea market players from Quebec.
>
> Anyways, glad to see that the auction is back. For years I never missed one of the West Island club's auctions and many of the fine items in my shack were obtained there.

I have a Ranger 2950 and a 250watt 10/11 meter amplifier.
Ranger has wideband mod done. Includes radio,mic,power cord, moble bracket
and amp. No docs or box. Radio is in good working condition,
Asking $325 plus shipping. Consider trader or offers.

>Public Safety and Commercial use."
>

Just a note, maybe this will help you to post to me, without
showing ignorance of the facts. .

The Talkabout, is a Motorola Radio, called the "talkabout". It
is manufactured in two versions, in a variety of colors.

Now, if he had said a portable radio, a HT, a Handi-talkie, a
Brick, handheld, or any of the other variety, I would have
approached it differently.

But, no, he said a specific product name, a "talkabout".

Now, I explained that, is a very polite manner, and you saw
fit to start flaming. Why was that? Did you have a
bad day today?

A little further education for you, might be obtained at

WWW.mot.com

The home page has a "Talkabout" radio prominently
shown, and includes a link to learn more about it.

Have a nice day, and if I can help you in understanding Motorola
radio products better, please don't hesitate to ask!

Well I wonder if our American friends think we are dumb. Well I was

```
surprised that when I decided to send out a followup usenet message, I
was asked if I want to send it to all 9, yes all 9 usenet groups that
the original message was sent to..

You'd think that these people would work out that USENET has groups to
place relative information and you don't have to SPAM 18,000 groups to
get a message across.

If I wanted a flaming RADIO FROM THE US, I would check out the REC
radio newsgroups.  YANKS, don't treat the world like idiots because we
can search usenet ourselves and we do appreciate that you just don't
want us to miss such an incredible offer !

I am looking for a version of the MT1000 software that is a pirate version that The tech at Motorola use:
I got another radio software from them that allows out of badsplit reception and Transmission, and
allows actual full VHF Transmision. I need this bad, and if anyone knows how to dump and or reset
the CPU in one that would be helpful also. I tried to program one and the radio locked up while
loading to the prom, I can still use my other MT1000, read/write, so it is no the rib. anyways
it is locked up and says 88 on the lcd. ANY IDEAS?

Thanks

M. Storm

I have an Operating Instruction Manual for the MT 1000. It's new. I haven't even opened it. Interested?

Louis

```

I have seen alot of Internet chatter about the Icom IC-2000H not living up to Icom's advertising with respect to intermod. Icon claims this unit to be the "Intermod Fighter!". If the IC-2000H is such a failure and hams are disappointed with the unit, why don't we see more of these units for sale in the newsgroups? Are the people that are buying the units genuinely disappointed? If so, are they throwing their rigs in the garbage and not reselling them? Perhaps all the bad "Internet Press" is only personal opinion from sadistic amateur operators who like to torture themselves buy buying the wrong radio and then feel sorry for themselves in a public kind of way, or, perhaps the units are not that bad after all and the people posting these messages just like to watch themselves type.

I read all of the performance reports for this rig posted by many Hams on the Internet and have read all of Icom's advertising, I imagine this radio to be in the class of the Kenwood TM-261A or the Alinco DR-140T but, without a test rig, I can't form an opinion to post to fellow hams. I did swap a scanner (cell capable, no less) for a IC-2000H that wasn't working (Hmmmm, don't know what happened, just quit workin one day, duh...) and thought I might repair the thing and try it out for myself. Unfortunately, the guy didn't tell me that the unit had been struck by lightning and that all the components 'crumbled to the touch'.

I've tested the Kenwood TM-261A and think that the scan-speed it "too slow", the display is "too glossy" (tough 'read' on a bright day... sunny day?... forget it!). I haven't been able to FIND let alone touch an Alinco DR-140T to form an opinion on this rig yet, but, based on my success with my Icom IC-229H, I will probably buy the IC-2000H as my next rig. So, all you disappointed IC-2000H owners, sell me your unit cheap if you are embarrassed to admit you own one. I will even give you a few bucks for your 2000 if it is not working (this should get those opinionated people typing.... eh?).

Greetings Banff, the heart of the Rocky Mountains!

>

Your looking for the Lab version.
I'm not shure if it would help you.
Your not supposed to power down / interrupt the radio when loading
a codeplug. You might need to copy the PROM from the other radio.

I have an IC 200H myself and have been very happy with it. While I have to admit that it is not quite totaly intermod free, it is in fact better than any other radio I have owned.

VE6RJZ - R. Zaleschuk <**randyz@telusplanet.com> wrote in article
<01bd69d6$28c726e0$ab5522cf@randyz>...
I have seen alot of Internet chatter about the Icom IC-2000H not living up to Icom's advertising with respect to intermod. Icon claims this unit to be the "Intermod Fighter!". If the IC-2000H is such a failure and hams are disappointed with the unit, why don't we see more of these units for sale in the newsgroups? Are the people that are buying the units genuinely disappointed? If so, are they throwing their rigs in the garbage and not reselling them? Perhaps all the bad "Internet Press" is only personal

opinion from sadistic amateur operators who like to torture themselves buy buying the wrong radio and then feel sorry for themselves in a public kind of way, or, perhaps the units are not that bad after all and the people posting these messages just like to watch themselves type.

I read all of the performance reports for this rig posted by many Hams on the Internet and have read all of Icom's advertising, I imagine this radio to be in the class of the Kenwood TM-261A or the Alinco DR-140T but, without a test rig, I can't form an opinion to post to fellow hams. I did swap a scanner (cell capable, no less) for a IC-2000H that wasn't working (Hmmmm, don't know what happened, just quit workin one day, duh...) and thought I might repair the thing and try it out for myself. Unfortunately, the guy didn't tell me that the unit had been struck by lightning and that all the components 'crumbled to the touch'.

I've tested the Kenwood TM-261A and think that the scan-speed it "too slow", the display is "too glossy" (tough 'read' on a bright day... sunny day?... forget it!). I haven't been able to FIND let alone touch an Alinco DR-140T to form an opinion on this rig yet, but, based on my success with my Icom IC-229H, I will probably buy the IC-2000H as my next rig. So, all you disappointed IC-2000H owners, sell me your unit cheap if you are embarrassed to admit you own one. I will even give you a few bucks for your 2000 if it is not working (this should get those opinionated people typing.... eh?).

Greetings Banff, the heart of the Rocky Mountains!

I've got way too many radios.
Very nice Yaesu VX-1R for sale. I think this is the smallest
Dualband 2m/440 handheld that you can buy. It's about the size
of a pager.
Very wide range receive including am/fm broadcast up thru 800mhz.
Follow the link below to the forsales page.

I have a Kenwood TM-733a Dual Band Mobile For-Sale.
Complete unit with built in duplexer, removable face place,
2 mics, and docs. Also have extended mounting cable kit for remote
mounting.

Comes with 2 mics. The backlight mic with DTMF has a intermittent
problem with the PTT switch but can easily be fixed. The other mic is
standard mic (with no dtmf) and works great.

Complete unit and accessories for $375.00 including shipping.

If interested, please e-mail sproctor@microline.org or
sproctor@calweb.com

Thanks

Woops, I take that back, the regular mic that comes with this DOES have DTMF
on it!!! So both mics have a DTMF pad! Makes the deal even better :)

Obviously I don't use this much as you can tell!!

problem with the PTT switch but can easily be fixed.

I've had to repair
all 3 of my Kenwoods microphone PTT switches.

Kenwood repaired the first
one, under warranty, I did the other two.
Their the newer style back light
DTMF, I found a replacement from Digi-Key.
Digi-Key Part number SW408-ND,
this is 150g force.
If you like a lighter feel, then I would go with ...

Digi-Key Part number SW407-ND, this is 100g force.
These are made by
Omron, minimum life is 300,000 cycles,
Should last a little while,
cost...45cents. They do have a minimum order
Digi-Key # 800-344-4539
I
hope this helps,
KF6ATH

Not sure if I posted this already, but... I have 2 MC-50 desk mics for sale at $50/both. One mic is in great condition, works great, other mic looks rough, base is great, works ok but has hum... inside base is evidence of many rewirings, and I believe the audio leads being reversed is the only problem. Please email if interested! Buyer ships COD/CONUS or prepay.
thanks,
Randy

Had the same problem, company called Digi-Key makes a replacement part to
fix that runs about 2-3 dollars by the time you ship it, by the way this is
the first realistically priced 733 on the group in a while!!!!

800-344-4539 is the company's number, at least that is what my scrawling in
the manual looks like!

Looking to buy some test equipment
signal generator, solid state
TEK plug-ins
Sampling stuff
Prefer non-working, cheap
If it has a tube in it, except maybe a CRT, I'm probably not interested.

Check out the list of things I want by following
the link below to the want page.
http://www.hevanet.com/nm7u
Here's your chance to sell the broken stuff that
nobody else wants.
Please be very specific about what you have, it's problem

and how much you want. Also need to know where you are to
estimate shipping costs.
tnx, miker

I have a Ranger 2950 and a 250watt 10/11 meter amplifier.
Ranger has wideband mod done. Includes radio,mic,power cord, moble bracket
and amp. No docs or box. Radio is in good working condition,
Asking $350 plus shipping. Consider trader or offers.

I am looking for the following in trade/partial trade.

I am looking for the following items. (trades for my items full/partial)

VHF Marine Handheld
FRS radios. (pairs)
GMRS radios. (pairs)
Commerical UHF radio's (front panel programmable). ICOM U-16 or similar
Commerical UHF radio's with software to program it...
StarTac portable cellphone
Dual Band ham VHF/UHF with detachable faceplate
HF radio
Mobile HF radio
Mobile antenna tuner with meter.
QRP antenna tunrer with meter.
Yeasu ft77,707 or similar radio

Manpack HF radio's ft70, prc-xx
Mobile HF antenna system
SWL radio (portable)
SWL radio
15" or larger SVGA color monitors
solar panels
interesting computer or radio items.
Camping equipment (good frame backpack, sleeping bags,etc)

Bought for emergency cache and never used...

7 RELM RSP-400 HT's
(Not average RELM stuff, much more serious.)
420-482 MHz (+/-)
PL/DPL/INV.DPL
20 Channel
4 Watt/1 Watt
Scan, Priority, Power Level edited in field.
Instant Priority button

11 Batteries
mixed 600maH and 1000maH

3 DTMF Pads

1 installed, can install others for you

6 Leather holsters
swivel type

PM 4500 Field Programmer + optional PC Software (very nice)
(qualified buyers only, talk to me)
Also programs:
RSP-500,
DRV/DRU/RU4501 Repeaters
DBV/DBU Desktop Bases
LMV 2548 Transceiver
Mini-Com Plus SM, SL, and PT series Transceivers
RELM Plus RM Series Tranceivers

Complete set is in excellent condition. Seen very light duty once.
Pictures and other info at http://www.gothic.net/~dcrisis

Local to San Francisco? Call me and I'll show you the equipment, you'll
see the quality of these radios. They're equivalent to Moto MT-1000's
with a few more features.

ASKING $2000.00 for everything. Mailto:4701@opg.org

I have for sale two Kenwood all-mode mobile transceivers. A TM-255 2 meter rig and a matching TM-455A 440 rig. Both rigs come with separation kits, mikes, mounting brackets, power cables, manuals, and original boxes. The TM-255 is a 55 watt rig, the TM-455A is a 45 watt rig. Both are in excellent physical and electrical condition, a 9+.

I am asking $500.00 for the TM-255 and $400.00 for the TM-455A. If you buy them both you can have them for $850.00 and I'll throw in the factory service manuals too.

Prices are US Dollars, and do not include shipping costs.

Thanks and 73,

Dino Kitsios, KF6ECO

I have a Ranger 2950 and a 250watt amplifier.
Ranger has wideband mod done. Includes radio,mic,power cord, moble bracket
and amp. No docs or box. Radio is in good working condition,
Asking $325 plus shipping. Consider trader or offers.

I am looking for the following items. (trades for my items full/partial)

VHF Marine Handheld
FRS radios. (pairs)
GMRS radios. (pairs)
Commerical UHF radio's (front panel programmable). ICOM U-16 or similar
Commerical UHF radio's with software to program it...
StarTac portable cellphone
Dual Band ham VHF/UHF with detachable faceplate
HF radio
Mobile HF radio
Mobile antenna tuner with meter.
QRP antenna tunrer with meter.
Yeasu ft77,707 or similar radio
Manpack HF radio's ft70, prc-xx
Mobile HF antenna system
SWL radio (portable)
SWL radio
15" or larger SVGA color monitors
solar panels

interesting computer or radio items.
Camping equipment (good frame backpack, sleeping bags,etc)

Organization: OneNet
Newsgroups: rec.radio.amateur.swap,rec.radio.swap

I have a Mint Icom IC-738 HF rig for sale. The rig has very few hours use on it. I bought it a little over a year ago, just haven't had the time for radio in a while. The radio is a 9.99 out of 10, non smoker, never mobile, unmodified, etc. I have the manuals with the original box and shipping carton. The rig also has the optional narrow CW filter.

The IC-738 is an HF all band, all mode, 100 Watt radio with an internal automatic tuner.

I'll sell it with a chrome iambic keyer and Astron PS-35M for $1000, OR, If your not interested in the power supply and keyer, I'll sell the radio by itself for $800 firm, shipped and insured in the continental US.

I will ship upon receipt of a cashiers check or a money order.

Please reply via E-Mail to peaster@connors.cc.ok.us
Thanks & 73's
Mike Peaster

I have for sale a IC-706 and AT-180. Includes items below:

IC-706 MKI
AT-180 (auto tuner HF+6M)
FL-101 CW filter 250Hz
OPC-581 11.5' separation cable
Icom service manual (this is from icom)
All boxes and manuals

This radio was only mobile once for a road trip. Was used as a base by a non-smoker. I would like $1200.00 for everything. I will pay shipping lower 48 states. For another $150.00 I will include a Timewave DSP 59+ (latest software). Unless it is sold first. I can be reached by E-mail or my phone number is 216-741-4717.

I bought a HTX-100 at a hamfest and found out that EVERY SINGLE COIL had its ferrite slug damaged or pushed to the bottom. I'd like to find someone who has a HTX-100 that's dead because of semiconductor faults. I have contacted Tandy and found that they stopped restocking the replacement parts for this thing a couple of years ago. If you have a radio that may fit the bill please email me with your price.

Thanks
Michael

I'm real new to ham radio and I see lots of different radio models advertised for sale but it is hard for me to see the relationships between the models. For example, was a TS430 made before or after a TS530? When did the TS430 first hit the market?

I'm wondering if anyone knows of a WEB site that might help lend order to these various models of radios?

Thanks in advance. Dean Wooldridge <meds@onramp.net>

Try this: disassemble radio and remove the coil cans in question, one by
one, dont mix em up!. Use a solder sucker iron or you will destroy them! The
"screwdriver" slot is also on the bottom side, which IS accessible on those
coil cans! Simply unscrew them, throw away any crumbly bits, and reinstall
them upside down. (The cores, that is). Realign the set and your'e back in
business. Almost every one in my HTX'es is very near, or at, the top of the
metal housing, so that is where you should probably set them when starting
the alignment.

Tim, VE7SEZ

Hi Dean ...a simple fact here the 5 and 8 series were made togethet the
4 and 9 series also the only 8 series out of place is/was he 850/80
series... the TS-430 ame out in about 1982-83  I would say... 73 de
Jordan...

I have for sale a IC-706 and AT-180. Includes items below:

IC-706 MKI
FL-101 CW filter 250Hz
OPC-581 11.5' separation cable
MB-63 Mounting bracket for control panel
Icom service manual (this is from icom)
All boxes and manuals

AT-180 (auto tuner HF+6M)

This radio was only mobile once for a road trip. Was used as a base by a non-smoker. I would like $1150.00 for everything. I will pay shipping lower 48 states. For another $150.00 I will include a Timewave DSP 59+ (latest software). Unless it is sold first. I can be reached by E-mail or my phone number is 216-741-4717.

I will think about spliting up the 706 and the tuner.
Mike

Dak Mark X, am/ssb, also has expo expander kit installed, covers 26.645 to 28.025, works excellent, on scale 1-10, it is a 9, will take $325.00 + shipping, would consider trade for Varmit 350 or 450 in good condition.

||||||||||||||||||||||||||||||||||||| FOR SALE
||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||||
||||||||||||||||||||||||||||||||||||||||||
```

AOR 8000 with cell mod's and Opto Scout Model 40. AOR 8000 also has the
mod's for the scout so it can "reaction tune" the frequency that the Scout
catches. also novex mod's done also.
Also included is the Optoelectronics DC 440 Tone decoder and the
Optoelectronics "CI-V~ CX12" and AOR RS232 computer interface for the
Scout, DC440 and the AOR 8000. And two opto DB32 mini antenna's
Everything was bought and kept just as the day it arrived all boxes,
chargers, cable's, paperwork, invoice and accessories and all equipment
have Nicad batteries.
All Equipment was bought from EEB and mod's were done there as well.

The total price I paid for all equipment with everything was $1451.00 and the first $1095.00 takes it all. Anyone interested or need any more info can email me at   gene@surfsouth.com

I have a scanned .bmp of the invoice if anyone would like to see it.

I have for sale the following:

1. Heathkit SB-104A
    - Operation manual
    - Assembly Manual
    - Noise blanker manual
    - Schematic
    - Turner 350 Hi-Z ceramic microphone

2. Heathkit SB-604
    - Accessory speaker assembly manual
    - HP-1144 AC power supply assembly manual

3. Heathkit HD-19 hybrid phone patch
    - Assembly manual

4. MFJ-949 Deluxe Versa Tuner II
    - Owner manual

All equipment, with the exception of the Versa Tuner, is known to be working well, the condition of the Versa Tuner is unknown. I would like to sell this as a package, but I am flexible. I am asking $400 OBO, you pay shipping. I will also consider trading for a 2m/70cm mobile.

We are in need of the DVR (Digital Voice Recorder) that was made by ACC for the RC-850 Repeater Controller. We prefer the 2 or 3 channel model.

Additionally, we are looking for any spare RC-850 controllers for a backup or parts for our existing controllers.

Please email to: gkitto@pobox.com

I have a HTX-100 that is excess to my needs. This radio is in excellent

electrical condition. I would class it about an 8 physically it shows
it is used. It has the Book, Mike and Power Cord. I am sorry I do
not have a mobile mounting bracketfor it. I will take $100.00 plus
$5.00 for shipping in the lower 48 States. If interested email to
the following address:
w4ue@pobox.com
Thanks for reading.

I have a new Mirage A-1015G for sale. This was a Christmas gift, but I am now upgrading my 6 meter radio and don't need the amp. As new condition in box. Non-smoker. Amp has been hooked up and tested. Asking $300 plus shipping.

Please rely to: lbarnett@claimsware.com

Raymond,

I may be interested in your Barber colman Micropositioners, but I can't
identify them.  Do you have URL where I could find photos or other
descriptive information?  Where were these used, and what is the range
of positioning?

Thank you, Larry Carr

Thanks for reading my message.

Here is what I have -

Kenwood TS-570D *NEW* Bought March 07, 1998 No extra's just a wonderful radio!

ICOM IC-T21A, 2 meter ht, 440 RECEIVE, Excellent condition, manual, wall wart charger, complete history documented on the radio including original bill of sale.

Alinco DR-110 2 meter mobile, extended receive/transmit, even receives 300mhz and 800mhz (cellular included!) Includes mounting bracket, manual.

What I am looking to TRADE FOR, WILL CONSIDER adding a few $$ to trade.

ICOM IC-756
Kenwood TS-870S

Will of course consider CASH OFFERS, all items are in excellent condition.

Looking to buy some kind of 2 meter antenna that will allow me to avoid the trauma of punching a hole in the roof of my vehicle.

I have both a 1/4 wave and 5/8 wave whips, so I really only need a mag mount to put them to use.

I might be able to use an on-glass antenna, but my rear window has a screened on defroster.   I don't know if there will be any interaction or not. It's possible that I could mount it on the windshield. In this case, I will want to buy the whole rig.

Suggestions appreciated.

Who is Jose Muldoon and why is he such an asshole??
The problem with the internet is you can't just bash a guy in the face when you want to.
This jack ass has taken to leaving remarks about someone he doesn't even know-me
The only thing I can attribute this to was my remark about homosexuals oh well can't please em all.

Oh dearie me, I presume our Mr. Muldoon made the mistake of thinking you a homophobic bigot. Quite right you're annoyed about it - you were just generally being bigoted, the derogatory reference to people as "fags" seemed to pass you by entirely.

Let's get one thing straight (no pun intended), this is a newsgroup for articles on VALVES. Remember those? Little glowing glass things? Try one of the macho groups if you want to be the all-American dumb bigoted jock, not in this one, matey! If you want to try any more anti-gay remarks, go to a gay newsgroup and try it there. Being torn to shreds by leslie-beans isn't one of the worst ways to go.

With fond regards,

Russ Sadd

PS: Please brush up on your grammar - a little punctuation goes a long way.
So does humility - I can't say getting to know you better sounds like a fun
thing to me. Was that subtle enough?

Talked to this guy 2 weeks ago on the phone about an add on 304TL's-referred me to a friend in Salt Lake who sells em for $65 each used. Now he sees my post, doesn't know its me, and emails me that he gets them all the time for $25 NOS from "his ham buddies", then puts up his posts. wow some people will do anything to cut down the competition!

I have an Icom IC-730 HF rig for sale. This is a solid state older unit and is in good condition. It has 80-10 meters with the WARC bands. There is some minor scratching on the sides but the front is cosmetically beautiful. Functionally it works flawlessly and comes with the origional microphone and manuals. This unit has the quad-conversion reciever so you KNOW that it will be SENSITIVE!! I will also include with the radio a Radio Shack dsp filter! I am asking $375 for the set.. Please send e-mail to the address listed below if you have any questions.

First off, your concern/gripe seems poorly founded. The
impropriety you seem to be whining about is at worst an
indescretion hardly worthy of note, and could've been quite
simply a mistake or miscommunication.

Secondly, judging by the ISP, path, newsreader, use of language,
subject content of post, and grouping of usenet groups posted
to (this is not as obscure as you might think- have a look),
"watcher" <wakanisay@owell.com>)
is in fact
"MK" <MKAUDIO@prodigy.net>.

"wow some people will do anything to cut down the competition!"

How true! How much lower will this guy sink? For another example of
how low he's gotten, see his "Why I hate whiny fags" post and ensuing
thread in rec.audio.tubes 1998/03/10. What might the future hold?

Ethan

I have for sale a Mirage D15N 420-450 Amp
It has 15 W out with an input of 0.1-2 Watts in
(actually, can get 18+ watts for more than
2 Watts in with intermittant duty)

Can be used for FM, SSB, Cw and ATV

Used on Packet for 9600 Baud for a short
time.

Hello,

Thanks for reading our "Press Release". We are excited to announce the Release of "The Original Southern California Repeater Location Guide". This exciting and most up to date guide available is now on the Net. With the most complete listings of all Open and Closed repeaters for 2-meters, 220 MHz, 440 MHz, 1.2 GHz, 6 & 10 Meters in Southern California, you will see why this guide is one of the most sought after directory available. Find out more at...

Looking to Buy/Trade for Autopatch setup that will work with a Radioshack HTX-202 Handheld (at first) and later can be hooked up to a standard Moble Rig (adi-146 50 watt moble rig)

Have Sony Playstation Modification Chips (3 which sell for 10-30 dollars each) and a CD-R which I can burn your favorite Library of information onto (got a favorite webserver? or Dir on cdrom.com?)

and can also pay cash (but extremely broke, thats why I hope to trade something)

Let me know!!

Brad

I am restoring a set of Army Field Telephones and require two rubber covered , three wire cords. It would be nice to get the original replacement with black, white and red leads and lugs attached. Is there anyone out there that has a stock of these or knows where I can find them.

R.W.Schlachter.

I just received a sportsman's catalog (I don't recall the firm's actual name), but I remember they were selling surplus army field telephones AND spools of wire to interconnect them. As I recall, the spools were about 2000' long. I'm not sure if I still have the catalog, but if I do, I'll repost tomorrow with the info.

Here's a long shot for you to try
Surplus Sales of Nebraska
402-346-4750 is the phone number I've got ... but it's from an older
catalog. I heard that they are "on" the internet, so try a search
engine?? Might get lucky!

Hi Again Raymond,
I found that catalog, The Sportsman's Guide. They are selling 2600ft of
New Military Phone Wire for $49.67. It is listed as 2-strand, 16gauge wire.
This wire is for interconnecting two phones, hence the large spool size.
Were you looking for the cord which connects the handset to the phone? If
so, the cord from an old (i.e. 1940ish) black desk telephone handset
might be a reasonable facsimile, and it will probably have spade lugs
attached. Colors might not be exactly what you were looking for, however.

Sportsman's Guide has a website: http://www.sportsmansguide.com

Good Luck,
Brian, N6IIY

I have forsale a Mirage 440 MHz amp (1 watt in 15 Watts out).
Mirage asks $185 for these, and AES wants $169.

Here's some of the features
Special for ATV Service as well as SSB and FM
All Solid State - No Relays
No Remote Outlet
Excellent for H/T's
Has N-type connectors
Specifications:
RF Power In
250 mW to 2 W

```
                        RF Power Out
                                    2 W In 20 W Out
                        Current
                                   3 Amps nominal
                        Size
                                   7�" x 3�" x 2"
                         Weight
                                   1.5 lbs.

Used for about a month on 9600 baud packet.  Still in great shape.

I have a AR8000 for sale. It is in great condition except for a scratch on the display. The scratch could probably be buffed out, but I haven't tried yet. It includes all factory accessories: wall charger, antenna, ni-cad batteries, manual, and box.

I am asking $450. (I pay shipping)

Please email me if interested,

Matt Platts

I am looking for the computer control interface kit (IC-10) for the Kenwood
R-5000 receiver.

Also looking for the command set description in case I can't locate the
interface kit and have to brew my own.

Hi all,

I have for a friend the following radios:

You may email me or call him at (304) 855-4678.

Ten-Tec Omni A HF rig with matching external VFO, Vintage hand mic :) and operators manual for each item. Radio is solid state with analog dial (NO TUBES!!) Sent to Factory in 1990 for a checkup and tune-up (have documentation on that) Radio was purchased new in 1979 and has worked like a champ. 160-10 meters, 3 cw filters, ssb filter, full break-in QSK. VFO allows rx of 2 freqs. simultaneously, tx/rx from radio or vfo or vice/versa. Also in vfo are 4 crystal slots for fixed channels. runs 100 watts on 12vdc using 16amps for full output! Radio is a 9 out of 10..
PRICE IS $400 SHIPPING INCLUDED.
Will trade for the following:
Prefer solid state radio!!
Yaesu 757GX
Kenwood TS820/TS830/TS530, or similar. (looking for something with DIGITAL DISPLAY, IF SHIFT and NOISE BLANKER) with vfo or speaker or whatever... let me know what u have (excellent condition, please!!)
thanks,
Randy

Hi again,
Have for sale for a friend the following radio:

IC-W21AT handheld dualbander. Includes speaker/mic, veh. power cord, hi and low cap. batteries. HAS INTERMITTENT TX AUDIO PROBLEM.. it transmits fine, but no audio sometimes. Audio cuts out with no rhyme or reason, but we suspect the speaker/mic jack as the culprit. this is the radio with the 'telephone' whisper mode so u can hold radio like handheld cellular phone. it has a mic in the radio and another mic in the battery pack for this purpose. the radio works great with dual in-band rx, cross band retransmit and rx, lots-o-features for Mr. Fix-it. PRICE IS $125 INCLUDING SHIPPING

Will also use this as 'boot' for the other radio trade (see ten tec ad) will also trade for a 1kw (rated at more than 600 watts) antenna tuner, prefer roller inductor tuner like a MFJ tuner or a Dentron Supertuner.
Wish list: prefer Drake Model MN-2700 tuner.
please email me or call Slade Sowers at (304) 855-4678
thanks,
Randy

I have a mint IC-738 for sale. The unit has very few hours on it and is in outstanding condition. I bought the radio a little over a year ago and I haven't had much free time since to devote to radio. The radio will come with an optional narrow CW filter, a chrome Iambic paddle, and an astron

RS-35M power supply. All components are absolutely perfect. The radio will be shipped in its original shipping carton with the original box and manuals.

The IC-738 is an HF all band, all mode, 100 Watt radio with an internal automatic tuner.

I am asking $1,400 shipped continental US.

I will ship upon receipt of a cashiers check or money order.

Please reply via E-Mail.

Thanks for reading.

Due to overabundance of projects I am selling the following items:

Kenwood R-2000. This BC-30MHz shortwave receiver is in excellent condition. Comes with manual. $300 plus shipping.

Bearcat BC760XLT, pre-ban model. This scanner radio is in excellent condition. Comes with antenna, charger, and copy of manual. $125 plus shipping.

* Hallicrafters SX-104. This 30-50MHz boatanchor receiver is in excellent cosmetic condition and good working condition. $75 plus shipping.

* Hallicrafters SX-105. This 152-173 MHz boatanchor receiver is also in excellent cosmetic condition and good working condition. $75 plus shipping.

* Special deal - take the pair for $125 plus shipping. (Sale pending)

Realistic DX-75. This GC boatanchor receiver is in very good-excellent cosmetic condition and good working condition. Includes an original (NOT a reproduction) instruction book. This is when Radio Shack was still Radio Shack, and not a Tandy division. $50 plus shipping. (Sale pending)

DenTron MT-2000A Antenna Tuner. 3kW PEP antenna tuner. This unit is in good cosmetic and working condition. $125 plus shipping.

Cobra 148GTL-DX CB transceiver. Excellent condition, including all original documentation and box. $250 plus shipping.

Marko 10-40M mobile linear. 75W, AM/SSB. Condition unknown. Take a chance? $25 plus shipping.

I need to get out of the radio business, so I would prefer outright sale to trades. Delivery possible in north Texas, eastern Oklahoma, or northwest Arkansas. If interested, or for more information, email me at twhite@cyberramp.net. Thank you.

Note: Corrected text - the software is Host Master II + rather than Hamtronics. It is on both 5 1/4 and 3.5 disks.

The deal fell thru, so my Kam Plus v6.1 which includes Pactor is again available. It is in very nice shape and includes the complete manual set, the Host Master II + software and complete manual, cable(s), original box. Asking $175. plus shipping.

Or, will sell my AEA PK-88, also nice, with manual and cable(s). Asking $75. plus shipping.

I have a TS520 hf rig I would like to sell or trade for a good HT... would
like an older dual-band, but will take newer 2m. An MT1000 would be perfect
as well (VHF, complete).
  the 520 works great, face in good cond., case fair (cosmetic, no dents)
Will sell outright for $200.
email for details or phone number!
thanks,
Randy

I have several 8877's that I have come by in a trade. They are good full
power medical pulls. The going price for good pulls is $250. and that is
what I am asking. I expect to be getting a near-nos 8877 (older stock
tube, out of the box only to test, then right back in the box), asking
$500. for that one. Asking prices are plus shipping. -- 73, DavidC AA1FA

Randy OM,

That is an EXCELLENT price on your TS520. Those rigs are well built and can last a lifetime. Perfect rig for anyone to get started on HF.

I have been cleaning out the estate of ham friend and ran across a new pair of Eimac Y-427 tubes with Hewlett-Packard part number stickers on the boxes (1921-0046). They are a "lighthgouse" type device, looking like a small 2C39. I suspect they were used in UHF or microwave test equipment.

Does anyone know what piece of HP gear this went into? Can anyone use them? If so, make an offer. I know how hard it is to get exotic tubes for some of the old test equipment so would like to see them used.

Hello all,
I bought a Uniden "Force" Uhf 2way and it didn't come with any
info (real cheap price for a real cheap radio).
Can anyone tell me if a normal eprom programmer will work with
the 2716 prom? Is there any special "program" that needs to be
run to actually program the thing?
I noticed a jumper wire on the eprom board what's it for?
I'm interested in taking the radio to 440 can I??
The two freqs in it now are 463.xx and 461.xx.

Thanks
Michael

What is the model number? Some of the Unidens are PC programmable through the mic jack, while older ones require a propriatory prom burner from Uniden. (The PC programmable variety needs a propriatory interface box from the seriel port to mic jack)

From what I can recall, the PC software will not allow freqs below 450, and the prom burner is band selectable to START at 450 (Never tried programming a lower frequency.)

We see these Unidens from time to time in the shop I work in. Let me know the model number of the radio and I'll provide you with more info.

Organization: OneNet
Newsgroups: rec.radio.swap,rec.radio.amateur.swap

I have a Mint Icom IC-738 HF rig for sale. The rig has very few hours use on it. I bought it a little over a year ago, just haven't had the time for radio in a while. The radio is a 9.99 out of 10, non smoker, never mobile, unmodified, etc. I have the manuals with the original box and shipping carton. The rig also has the optional narrow CW filter.

The IC-738 is an HF all band, all mode, 100 Watt radio with an internal automatic tuner.

I'll sell it with a chrome iambic keyer and Astron PS-35M for $1200 firm, shipped and insured in the continental US.

If your not interested in the power supply and keyer, I'll sell the radio by itself for $1000 firm, shipped and insured in the continental US.

I'll consider a possible trade of a dual band all-mode or a nice vhf all-mode for the radio alone.

Please reply via E-Mail to peaster@connors.cc.ok.us

Thanks & 73's
Mike Peaster

I have a Kenwood TM-733a for sale that includes the following:

Backlit Mic
Antanna Combiner? (combines 2m and 440 outputs for use with one antenna)
Box and original manuals

The unit is in very good condition (no scratches, no dents), only one owner. It has a detachable face-plate, a very good looking and functioning radio. It is approximately 2 years old. I am asking $575 US which includes UPS or FedEx 3-day shipping in US. I can post pictures to a web page soon if you like. Please email me directly if interested.

Thanks

Yes that's right the forbidden radio. I have a friend that has a few
of these BRAND NEW IN THE BOX for $150.
I'M LOOKING FOR THE MODIFICATION that caused Tandy to pull them from the
shelves before the radio even made it into the catalog.
I can put anyone interested in purchasing one in touch with my friend.

Thanks
Michael

I have for sale an AEA PK-96 9600/1200 Baud TNC. This TNC contains
AX.25 levels 1&2, Host and KISS modes, an 18K mailbox, Node operations,
true DCD state machine for open squelch operation, and many other
options.

Real good TNC. I used it for a good while running a personal BBS
without
problem.

I have a near perfect TS-940S/AT for sale. Includes hand mic, manuals & original boxes (inner & outer). Also included is the SP-940 Speaker, And PC-1A Phone Patch. This radio is a 9.8 on appearance and 10 on performance. I've got 'new radio' fever but I don't 'HAVE' to sell this radio so PLEASE don't waste either of our time with low-ball offers. $1350 (and worth it!). Prefer local sale so I can demo the radio but will ship at your expense.

E-mail if interested

Here is additional info on this unit:

DSP-232 Dual Switchable Port DSP Multi-Mode Data Controller

The plug and play DSP-232 is Timewave's new state-of-the-art multi-mode data controller designed around a high-speed, digital signal processor which provides the ultimate in signal filtering, modem performance, and flexibility. Timewave is known for excellent filtering systems. Digital signal processing combined with memory ARQ, true DCD, and hardware HDLC provide the best filtering available, and Timewave/AEA has been building DSP multi-mode controllers longer than anyone (since 1991 with the DSP1232/2232). Once you see the features, the upgrade capability, and the affordability, your view of multi-mode controllers will be changed forever.

Modes
All proven modes are included. Send and Receive: packet VHF (9600 and 1200 bps) HF (300 bps), PACTOR, AMTOR (ARQ & FEC), RTTY (Baudot & ASCII), and Morse. Receive: TDM and NAVTEX. Also includes: Output Calibration, Signal Identification (SIAM�), & 16 software selectable modems.

Upgradable
The firmware upgrade capability for new modes like PACTOR II and new modems, such as for satellites, make this the premier multi-mode platform for the future. Timewave has a reputation of providing customers with frequent upgrades as technology advances, so your equipment will always be on the cutting edge. We've designed the DSP-232 to be a platform to which you can add features as technology changes.

Full MailDrop Facilities
There is 18K (32K RAM) of mailbox space standard which is expandable to a whopping 242K (256K RAM)-you will always have the message space you need. The MailDrop accepts messages in packet, PACTOR, and AMTOR. The internal battery holds the messages when the unit is turned off. The mail LED on the front panel display will alert you to new PACTOR, AMTOR, and packet mail. MailDrop also controls 3rd party traffic and receives, forwards, and reverse forwards messages. You have complete control of the MailDrop with Timewave/AEA's advanced commands. CFROM and DFROM let you select who may or may not connect and leave a message. MHeard lists the 18 most recently heard stations. Leave your DSP-232 on all the time, it will continue to receive/route mail and serve as a node, like all other Timewave data controllers.

Gateway as a Node

The Gateway firmware lets you "node-hop" to reach distant stations instead of digipeating; thereby reducing channel traffic and increasing data throughput. As with MailDrop, you have control of who uses your Gateway. Gateway also allows identification of TheNet, TCP/IP, and NETROM. There are two heard lists included with Gateway: one for stations heard and one for nodes.

Signal Identification (SIAM�)

AEA developed Signal Identification & Acquisition Mode to automatically detect incoming Baudot, ASCII, AMTOR/SITOR, PACTOR, and TDM signals, and with a few keystrokes switch to the recognized mode and start displaying data.

WeFax Reception

The DSP-232 includes a Zero-Crossing Detector for gray scale terrestrial fax reception with the optional Timewave FAX III 900 WeFax receiving program. This program allows you to receive WeFax images, colorize them with 256 color, then export them to .PCX or .GIF files for use in other applications. Also compatible with Timewave's WeFax 256 for Windows.

Power Filtering with DSP

The DSP-232 continues the Timewave tradition of quality signal filtering technology. Incoming signals are digitized by a high speed, analog-to-digital converter. The digitized data is then digitally filtered and analyzed by the on-board digital signal processor. The processed demodulated signals are then passed to a second processor for protocol conversion. The reverse procedure takes place when you transmit. DSP gives the DSP-232 a better shape-factor than analog filters. In addition to the DSP, we've included PACTOR memory ARQ for reduced errors. All this makes the DSP-232 the data controller of choice for those who want to connect in poor HF conditions.

Packet Power

Run 9600 or 1200 bps VHF and 300 bps HF packet. This is a true DCD state machine for hearing signals with an open squelch when operating 9600 and 1200 bps packet. Full-duplex packet capability lets you speed up communications by sending and receiving simultaneously. KISS mode provides compatibility with the TCP/IP protocol. There are even special GPS capabilities which allow mapping and tracking in packet.

Packet Satellites

You can use the ultimate nodes, the BBSs in the sky-the satellites! Use 9600 bps, 1200 bps PSK PACSATs, and 400 bps telemetry. Take advantage of the satellite's store-and-forward capability. The satellites are up there, use them with the DSP-232.

Control Software

Timewave offers a whole line of state-of-the-art control software programs. Microsoft Windows� users can use the powerful PC PakRatt for Windows. DOS-based users will appreciate PC PakRatt II for DOS.

Global Positioning System

A GPS-specific command set is included in the DSP-232. These commands allow the controller to be used in Stand Alone Tracking, where you take the unit mobile and transmit your position to other packet operators using Automatic Packet Reporting System software. Remote programming allows you to set and change vital GPS commands from a remote location. You can also use Timewave's optional APRS adapter cable to connect a GPS receiver and a DSP-232 to a single COM port on your computer. The DSP-232 is GPS, Loran, and ARNAV compatible. It is even ULTIMETER-II compatible which allows you to set up a weather net or to hear weather nets.

Connect with the DSP-232

The DSP-232 has a rear panel connections for direct-FSK/Auxiliary to take advantage of your tone generating radio and AFSK port one and two. Timewave gives you both the direct FSK and the AFSK options for optimum flexibility. There are two radio connections (one for each radio port), two receive audio connections (one for each radio port), plus an RS-232 computer interface. There is even an 'option' slot for future advancements-we mean it when we say this is the digital platform for the future!

Specifications

Modem Analog Devices 2105 Digital Signal Processor running at 12.3 MHz in conjunction with Analog Devices 28msp02 audio CODEC

Modulator output level 5-100 mV RMS rear panel adjustable controls for each audio port

Processor system Hitachi 68340 running at 16.7 MHz

RAM Battery-backed 32K standard, expandable to 256K

ROM 128K standard, expandable to 256K

Hardware HDLC Zilog Z8530 SCC

Power Requirements +12 to +16 Vdc @ 1.1 A

Input/Output Connections

Radio interference One 5-pin DIN connector, one 8-pin connector

Direct FSK outputs Normal/Reverse

Terminal Interface RS-232C DB-9S connector with hardware/software handshakes

Terminal data rates Autobaud setting at 300, 600, 1200, 2400, 4800, 9600 bps; and 19,200 bps

RX Audio Port 1 and Port 2

TX Level Port 1, Port 2, and 9600

Other Station ground connector and external reset button

Physical

Dimensions 9.35" (237 mm)W x 7.9" (201 mm)D x 2.3" (58 mm)H

Weight 3 lbs. (1.36 kg)

Features

Fast digital signal processor

9600 & 1200 bps Packet

All standard HF & VHF modes

Mailbox expandable to 242K

Full MailDrop facility for Packet, PACTOR, and AMTOR

Two switchable radio ports with rear-panel AFSK adjustments and another adjustment for 9600 bps

GPS firmware which is compatible with GPS, Loran, ARNAV, and ULTIMETER II weather stations

GPS commands are remotely programmable
Gateway firmware which works as a node for faster throughput
SIAMTM signal identification
Memory ARQ
Identify TCP/IP, TheNet & NetRom

For Pickup in Vicksburg, Mississippi Only
I will not attempt to ship these antennas

Cushcraft A4S - Used in good condition $300

These Hygain Antennas have never been installed, but stored outside,
partly assembled (can carry in a pickup).

Hygain 105BA-S   5 El. 10 Meter Beam on 24 ft. Boom $170

Hygain 155BA-S 5 El. 15 Meter Beam on 28 ft. Boom $200

Hygain 205BA-S 5 El. 20 Meter Beam on 34 ft. Boom $350

Hygain 7-3 3 El. 40 Meter Beam on 35 ft. Boom $550
(Missing one element tip, easily replaced from Hygain)

I have the manuals for all of these.

If you intend to use it with OS/2 as a WIN-OS2 operation, while you are digging for things be sure you get a copy of the OSTSR time slice release utility. This one is free ware. At least install it with your setup, otherwise PPWIN will clobber your CPU load.

The best utility for bringing it under control in OS/2, to my experience, is the TAME320 utility, but that one will cost you a few bucks to register. It is more versatile than OSTSR and has let me do some things I needed that OSTSR wouldn't do...

Hi,

I am trying to obtain two Communique HX507 hand held two way radio's, I have a complete system (ie base stn, chargers, batteries etc) apart from two bodies and would like to make use of them. I am told these units are about 7yrs old and are no longer made. If anyone has any for sale or could point me in the right direction I would be most grateful.

Regards,
Andy Daws

Organization: Primenet (602)416-7000
Summary:
Keywords:

I have the following electronic and math books for sale:

1. -----, "Single Sideband for the Radio Amateur,5th ed.,"
ARRL, 1970, pbk, G+ with very slight wear overall.
$7.50

2. Beyer, William H. (ed), "Standard Mathematical Tables, 24th ed.," CRC Press, 1973, hbk, G/G+ with owner's names inside front cover.
$10.00

3. Burghhardt, H.D., "MACHINE TOOL OPERATION," McGraw Hill, hbk. This is a two-volume set of 1930-1940 high school texts on machine shop practices. The two volumes are:
Vol. 1 - "Lathe, Bench, Forge," 1941, F+. Cover and spine are worn through on edges, top, and bottom, numerous student pencil markings throughout. Some moisture damage, but not immersion.
Vol. 2 - "Dilling, Planing, Milling, Grinding," 1937, G/G+ with slight to moderate wear all over, no markings on pages.
Sold as a set. Very good book on machine shop practices, little of which has changed over the years. These were used as a high school or apprentice instruction manual, and are a good aide for the machining hobbyist.
$15.00

4. Churchill, R.V., "MODERN OPERATIONAL MATHEMATICS IN ENGINEERING," McGraw-Hill, 1944, hbk, G/G+ with very slight wear and no markings on pages. Good early work on the LaPlace transform and it's applications.
$12.50

5. Cooke, Nelson M., "MATHEMATICS FOR ELECTRICIANS AND RADIOMEN," 1st edition, 3rd printing, McGraw-Hill, 1942, hbk, G- with little wear but damage to bottom of spine. No markings on pages.
$10.00

6. Everitt, W.L., "COMMUNICATION ENGINEERING, 2nd ed.," McGraw-Hill, 1937, 6th printing, hbk, G+ with very slight shelf wear and no markings on pages. One of the first comprehensive texts on telephony and radio communications with chapters on filters, impedance transformation, bridge circuits, modulation/demodulation, oscillators, vacuum-tube power amplifiers, etc.
$25.00

7. Fich, Sylvan and James L. Potter, "THEORY OF A-C CIRCUITS," Prentice-Hall, 1959, hbk, G/G+ with some pencil markings.
$7.50

8. Forsythe, G.E., M.A. Malcolm, and C.B. Moler, "COMPUTER NETHODS FOR MATHEMATICAL COMPUTATIONS," Prentice-Hall, 1977, hbk, G-/G with slight damage to top of spine and upper cover corners, very slight markings on pages. Good book on numerical analysis techniques for integration, differential equations, optimization, interpolation, etc.

$12.50

9. Gardner, M.F. and J.L. Barnes, "TRANSIENTS IN LINEAR SYSTEMS STUDIED BY THE LAPLACE TRANSFORM METHOD, vol. 1," Wiley, 1942, hbk, G with slight wear and no markings on pages, owners name inside FC. I have never seen a volume 2 of this book, and don't think that there is one, either.
$12.50

10. Hicks, G., P.E., (ed.), "STANDARD HANDBOOK OF ENGINEERING CALCULATIONS," McGraw-Hill, 1972, hbk, G/G+ with very slight wear. Massive work on the fundamental mathematics of virtually all engineering disciplines from civil to nuclear.
$30.00

11. Hund, A., "HIGH-FREQUENCY MEASUREMENTS," McGraw-Hill, 1933, hbk, G with small ink stain on front cover, some slight wear all over, no markings on pages. Otherwise a G+ copy. Very thorough chapters on determining and measuring voltage, frequency, capacitance, self-inductance, mutual inductance, resistance, etc.
$15.00

12. Hurley, R.B., "JUNCTION TRANSISTOR ELECTRONICS," Wiley, 1958, hbk, G with slight shelf wear and no markings on pages. Early work on juction transistor theory and applications, including noise, biasing, power amplifiers, high-frequency models, video amplifiers, etc.
$10.00

13. Johnson, W.C., "TRANSMISSION LINES AND NETWORKS," McGraw-Hill, 1950, hbk, F+. Book has VG cover, but pencil, pen, and highlighter marks throughout. First 9 pages torn in half by previous owner. If not for that, this would be a G copy. Poor way to treat an otherwise valuable book on power transmission, telephone, and telegraph lines with chapters on filters and ladder filters. Usable copy.
$5.00

14. Knowlton, Archer E. (ed), "STANDARD HANDBOOK FOR ELECTRICAL ENGINEERS," 7th edition, 7th printing, McGraw-Hill, 1941, hbk, G-/G with slight wear on cover and spine.
$15.00

15. Krauss, John D., "Electromagnetics," McGraw-Hill, 1953, hbk, G with very slight shelf wear and occasional pen markings on pages. An excellent reference on electromagnetic theory.
$15.00

16. LePage, W.R., "COMPLEX VARIABLES AND THE LAPLACE TRANSFORM FOR ENGNIEERS," McGraw-Hill, 1961, hbk, G-/G with

slight shelf wear, covers won through on bottom outer corners, owners name and book store markings inside FC, some highlighting, FP torn at hinge but not separated. Veryngood text on the LaPlace transform and it's applications.
$12.50

17. Lo, A.W., R.O. Endres, J. Zawels, F.D. Waldhauer, and C-C. Cheng, "TRANSISTOR ELECTRONICS," Prentice-Hall, 1955, hbk, G-/G with slight wear overall, small 1/2" tear at top of spine, some underlining and markings on pages, FP clipped on top corner. Good early book on semiconductor theory and applications.
$12.50

18. Melsa, James L. and Donald G. Schultz, "LINEAR CONTROL SYSTEMS," McGraw-Hill, 1969, hbk, G+/VG with no wear.
$15.00

19. Milne-Thompson, L.M., "JACOBIAN ELLIPTIC FUNCTION TABLES," Dover, 1950, pbk, G
$7.50

20. Mulvey, J., "SEMICONDUCTOR DEVICE MEASUREMENTS," Tektronix, 1969, pbk, G/G+ with very little wear. Very good book on the measurement of bipolar transistor, FET, UJT, thyristor, signal diode, zener diode, and tunnel diode parameter measurements.
$15.00

21. Scanlan, J.O., "ANALYSIS AND SYNTHESIS OF TUNNEL DIODE CIRCUITS," Wiley, 1966, hbk, G/G+ with G DJ and very little shelf wear.
$15.00

22. Schwartz, M., "INFORMATION TRANSMISSION, MODULATION, AND NOISE, 1st ed.," McGraw-Hill, 1959, G+/VG with G DJ. Good basic book on AM/SSB/DSB/FM and PCM modulation theory, as well as the effects of noise on detection and demodulation. Now in it's 3rd edition.
$17.50

23. Seely, S., "RADIO ELECTRONICS," McGraw-Hill, 1956, hbk, G- with very slight shelf wear but considerable pencil underlining throughout. Excellent book on vacuum-tube amplifier, modulator, and demodulator theory and design techniques.
$12.50

24. Sevin, Leonce J., "FIELD-EFFECT TRANSISTORS," McGraw-Hill, 1965, hbk, G+ with slight wear on DJ. A good reference on the theory and basic applications of junction field-effect transistors.

$15.00

25. Skilling, H.H., "ELECTRICAL ENGINEERING CIRCUITS," Wiley, 1957, hbk, G-/G with slight to moderate wear, covers worn through on outer corners, but no markings other than owner's name inside FC. Good basic electrcal network, transient response, LaPlace transform, and image parameter text.
    $12.50

26. Stout, M.B., "Basic Electrical Measurements," Prentice-Hall, 1950, hbk, G-/G with slight to moderate wear on cover edges and spine ends, 1/2" tear on front top hinge. Good reference for measurements practices using meters, bridges, galvanometers, ballistic galvanometers, etc.
    $15.00

27. Terman, F.E., "Radio Engineering, 3rd ed.," McGraw-Hill, 1947, 3rd printing, hbk, G-/G with slight to moderate shelf wear and no markings on pages. This is a better than average copy of a radio classic.
    $22.50

28. Terman, F.E., "Radio Engineer's Handbook, 1st ed," McGraw-Hill, 1943, first printing, G with moderate wear to bottom of spine. Front cover is peeled away from backsheet, but is easily repairable. Otherwise intact with no markings on pages. Price reflects front cover condition.
    $15.00

29. Van Der Ziel, A., "SOLID-STATE PHYSICAL ELECTRONICS," Prentice-Hall, 1957, hbk, G-/G with slight wear and occasional markings on pages. Early work on diodes, transistors, masers, photoemission, ferroelectricity, ferromagnetism, etc.
    $15.00

30. Westman, H.P. (ed), "Reference Data for Radio Engineers, 4th ed.," ITT, 1956, hbk, G- with numerous notes on backsheets and both hinges torn through paper but not separated. No markings on pages.
    $12.50

Prices are exclusive of shipping costs. For US, add $3.50 for first book, and $1.50 for each additional. Canada and foreign dependent on actual cost. Payment in US$ in advance by cheque or money order. Books will be held for 14 days after confirmation.

Greetings,

I have for sale a Yaesu FRG-100 general coverage table-model shortwave receiver. Radio covers 50 KHz - 30 MHz in AM, USB, LSB, CW. Will also receive HF FM signals with optional FM board (not included).

Radio was purchased new by me approx 2 years ago. It is in excellent condition with no scratches or blemishes. It has seen minimal usage. Radio can be computer controlled with Yaesu CAT interface (not included in this sale).

Comes with original box, manual, 12 VDC power supply, and schematics.

Asking $475.00 plus COD shipping, cash or money order. If interested, please respond to my E-mail address only. Thanks for reading.

You can now find the mods for the Kenwood TH-G71A HT, On my site,
http://www.angelfire.com/ca/ke6gwf/
Note; Currently I only have the wide band Receive mods. If any of you have, or know were I can find, the full Transmit mods, please let me know.
I will post them, as well pictures that I took with the radio apart, as soon as I get them.
Thank you, Ben (KE6GWF)

P.S. I did the receive mods on mine last night, and everything seems to be working all right.
After mod Rx capability.

Hello,

I wanted to know what you might recommend about mobile antennas. My radio covers 25.165MHz to 28.775Mhz and I'm trying to figure out what the best solution is to get optimum performance regarding SWR. Will 1 antenna do it all? Should I buy a few antennas and tune them individually for low and high band? Is one mobile antenna better than another?

Any help that you can offer will be great !!!

Sincerely,

Roger Kinney

For Sale: World Radio TV Handbook set, 1981-1995

I'm not a WRTH collector at heart, so these 15 volumes are taking up needed space. I am selling the entire set as a whole; condition on all books is good.

$75 U.S., plus shipping. Please email if interested.

Greetings,

I have for sale a Yaesu FRG-100 general coverage table-model shortwave receiver. Radio covers 50 KHz - 30 MHz in AM, USB, LSB, CW. Will also receive HF FM signals with optional FM board (not included).

Radio was purchased new by me approx 2 years ago. It is in excellent condition with no scratches or blemishes. It has seen minimal usage. Radio can be computer controlled with Yaesu CAT interface (not included in this sale).

Comes with original box, manual, 12 VDC power supply, and schematics.

Asking $475.00 plus COD shipping, cash or money order. If interested, please respond to my E-mail address only. Thanks for reading.

I have a like-new Kenwood TH-78A with all original equipment (box, manual, antenna, wrist strap, charger, and battery in excellent condition), and the following accessories:

ME-1	200-memory expansion chip (total of 250 memories)
SMC-34	Remote-control programmable speaker/mic with volume control.
SC-35	Soft case for standard batteries
SC-36	Soft case for large batteries
KLF-3	Filtered cigarette lighter power cord.

The radio is opened up for full tx/rx capabilities and crossband repeat. It has seen only minor use, and works superbly. It is the most full-featured dualband ht available, and will give you good service. I have all of the original packaging and documentation for the accessories
as well.

Price is $350. Reply here or email me at one of these addresses, after removing NOSPAM-:

NOSPAM-wd4sgu@juno.com
NOSPAM-wd4sgu@prodigy.net

Thanks.

Mike - WD4SGU

I have one IC-2350 dual band mobile in excellent condition complete with
manuals and box. This unit has been used as a base mounted to a power
supply, it has never seen mobile use. I'm asking $350 shipped and insured to
the lower 48, shipped upon receipt of money order or cashiers check. Please
reply via E-Mail to peaster@connors.cc.ok.us

Thanks & 73's
Mike Peaster

I have the following items for sale. I plan to take them to the Charlotte, NC hamfest if not sold before.

Mirage A-1015G 6 meter amp. Christmas gift this year. Upgrading to 100 watt 6 meter rig so I don't need the amp. New condition in box. Asking $325.

Kenwood TR-751A 2 meter all mode radio. 25 watts out. Comes with mobile mounting bracket, mic, manual and origional box. I am origional owner and I am a non-smoker. Asking $400.

Kenpro KR-5400 az/el rotor system. Similar to Yaesu KR-5400B but no computer interface. The elevation works fine but the azimath rotor is frozen up. Both rotors and dual control box. Asking $175.

AEA AT-300 antenna tuner. As new condition but I can't find the origional box. Asking $125.

Please reply to: lbarnett@claimsware.com

Icom 761-- General coverage HF transceiver. All the bells and whistles. If you know the model you can appreciate what it is even more. A jewel of a transceiver. Works and looks like new. I am upgrading otherwise this would be mine til? A few features - VOX, electronic keyer, auto antenna tuner, AM-FM-RTTY-CW,SSB, compressor and more and more. Manual and schematics. -------- Winner pays shipping and insurance. ---
This radio is a one owner and non-smoker.

The following is a repost:

The following COLLINS equipment is for sale. Equipment has been securely stored for the past several years and was operational when stored. All equipment is sold with a 7 day refund policy, less 2-way packing, shipping and insurance charges. Send email requests for JPEG scanned image of all 4 pieces.

Offers in US dollars will be received on these lots until 12:00 noon CST on Sunday, February 15, 1998. All equipment subject to prior sale. Highest or any offer may not be accepted.

Buyer is responsible for pre-payment by money order or bank draft in US dollars of purchase price plus packing, shipping and insurance. Equipment is located in Western Canada, approximately 300 miles North of the Montana/North Dakota/Canada-US border. Shipment by UPS or TBA.

PLEASE PHONE OR EMAIL FOR ADDITIONAL INFORMATION.

Lot #1: KWM-2 Winged
Serial Number: 12535
Spinner Knob
No scratches on panels
No rub marks on panels
Includes Collins manual
Includes 516F-2 AC power supply

Lot #2: 75S3-C Meatball Complete with Collins CW Mechanical Filter for 75S Receivers (Filter: F455PA FA05 6735 (526 9494 00)
Serial Number: 13572
Spinner Knob
No scratches on panels
Minor rub marks on front panel
New original equipment dial front has been installed (old one also supplied)
Two screws on dial front may not be original
No extra crystals installed
Recently gone over by technician
S-meter appears erratic in operation
Includes Collins Manual

Lot #3: KWM-1 Winged
Serial Number: 791
Rub marks on knobs
Includes 516F-1 AC power supply (Missing 4 side panel retaining screws for

PS case and one small extra hole (1/4") has been drilled in the top of PS case)
Includes tubular lo-pass filter mounted on back of KWM-1
Includes Xerox copy of manual

Lot #4: KWM-2 Winged
Serial Number: 331
Non-Spinner Knob
No scratches on panels
No rub marks on panels
Zero set does not work (dial cord slipped off)
Includes Collins manual
Includes 516F-2 AC power supply

The Dallas ARC was given these goodies to auction at our Ham Radio Auction, which is set for next Saturday, Feb 21 in Dallas, Texas. Many of these items are better served to be sold to those who appreciate them. Please stop by these two pages and look around at the photos. Let me know if you'd like to make an offer. Thanks and 73,

Glen

Looking to buy Icom AH-20 receiver antenna for Icom IC-2sra.
Also interested in other accessories.

Please respond via email to rca@saber.net

Thank you.

Organization: Primenet (602)416-7000
Summary:
Keywords:

I have the following electronic and math books for sale:

1. -----, "Single Sideband for the Radio Amateur,5th ed.,"
ARRL, 1970, pbk, G+ with very slight wear overall.
$7.50

2. Beyer, William H. (ed), "Standard Mathematical Tables,
24th ed.," CRC Press, 1973, hbk, G/G+ with owner's
names inside front cover.
$10.00

3. Brainerd, J.G. (ed), G. Koehler, H.J. Reich, and
I.F. Woodruff, "Ultra-High-Frequency Techniques,"
Van Nostrand, 1942, G-/G with moderate wear but no
markings on pages. Text is typewriter-written. A
very good text on WWII microwave and radar development.
$17.50

4. Bucher, Elmer E., "PRACTICAL WIRELESS TELEGRAPHY,"

Wireless Press, 1918, hbk, G- with faded spine, moderate wear on spince ends and cover edges, owners name inside front cover. A collector's item.
$25.00

5. Chance, B., V. Hughes, E.F. MacNichol, D. Sayre, and F.C. Williams, "Waveforms," McGraw-Hill/MIT, 1949, hbk, G/G+ with slight wear and no markings throughout. \this is volume 19 of the MIT Radiation Laboratory Series, and is a first edition.
$30.00

6. Cockrell, W.D., "INDUSTRIAL ELECTRONIC CONTROL," McGraw-Hill, 1944, G- with slight moisture damage not immersion). Interesting work on vacuum tube power control circuitry.
$10.00

7. Cooke, Nelson M., "MATHEMATICS FOR ELECTRICIANS AND RADIOMEN," 1st edition, 3rd printing, McGraw-Hill, 1942, hbk, G- with little wear but damage to bottom of spine. No markings on pages.
$10.00

8. Fich, Sylvan and James L. Potter, "THEORY OF A-C CIRCUITS," Prentice-Hall, 1959, hbk, G/G+ with some pencil markings.
$7.50

9. Fink, Donald G., "PRINCIPLES OF TELEVISION ENGINEERING," 1st edition, 12th printing, McGraw-Hill, 1940, hbk, G- with little wear but markings throughout.
$10.00

10. Hardy, J., "High Frequency Circuit Design," Reston, 1979, hbk, G+/VG with virtually no shelf wear and occasional highliter markings. Excellent book on RF design techniques with discrete bipolar and FET devices.
$25.00

11. Hunter, L.P., "Handbook of Semiconductor Electronics, 2nd ed," McGraw-Hill, 1962, hbk, G+/VG with virtually no shelf wear and no markings throughout. Excellent early semiconductor reference on theory and applications.
$25.00

12. Jasik, Henry, "Antenna Engineering Handbook, 1st ed," McGraw-Hill, 1961, hbk, G/G+ with slight shelf wear and wear along hinges. No markings on pages throughout. A very valuable reference on antenna theory.
$22.50

13. Knowlton, Archer E. (ed), "STANDARD HANDBOOK FOR ELECTRICAL

ENGINEERS," 7th edition, 7th printing, McGraw-Hill, 1941, hbk, G-/G with slight wear on cover and spine.
$15.00

14. Krauss, John D., "Electromagnetics," McGraw-Hill, 1953, hbk, G with very slight shelf wear and occasional pen markings on pages. An excellent reference on electromagnetic theory.
$15.00

15. Lenk, John D., "Handbook of Electronic Test Equipment," Prentice-Hall, 1971, hbk, G+/VG book with G DJ. Small tears on DJ but no markings throughout. Part of Lenk's series of handbooks.
$17.50

16. Lenk, John D., "Handbook of Simplified Solid-State Circuit Design," Prentice-Hall, 1971, hbk, G/G+ with slight shelf wear and no markings throughout. Excellent book on discrete transistor circuit design.
$17.50

17. Martin, Thomas L., "ELECTRONIC CIRCUITS," Prentice-Hall, 1956, hbk, G-/G with small tear at top of spine, small piece cut out from FP, slight shelf wear, some student pencil markings. Nice text on introductory vacuum tube circuit theory.
$15.00

18. Martin, Thomas L., "ULTRAHIGH FREQUENCY ENGINEERING," Prentice-Hall, 1961, hbk, G with slight shelf wear, library stampings on page ends and inside cover. Interesting text on waveguides, klystrons, magnetrons, and transmission line theory.
$15.00

19. Melsa, James L. and Donald G. Schultz, "LINEAR CONTROL SYSTEMS," McGraw-Hill, 1969, hbk, G+/VG with no wear.
$15.00

20. Milne-Thompson, L.M., "JACOBIAN ELLIPTIC FUNCTION TABLES," Dover, 1950, pbk, G
$7.50

21. Reich, H.J., P.E. Ordung, H.L. Krauss, and J.G. Skalnik, "Microwave Theory and Techniques," Van Nostrand, 1953, hbk, G with no noticable shelf wear, library mark on bottom of spine and FP. Excellent post-war book on waveguid, antennas, klystrons, magnetrons, etc.
$25.00

22. Scanlan, J.O., "ANALYSIS AND SYNTHESIS OF TUNNEL DIODE CIRCUITS," Wiley, 1966, hbk, G/G+ with G DJ and very

little shelf wear.
$15.00

23. Sevin, Leonce J., "FIELD-EFFECT TRANSISTORS," McGraw-Hill, 1965, hbk, G+ with slight wear on DJ. A good reference on the theory and basic applications of junction field-effect transistors.
$15.00

24. Terman, F.E., "Radio Engineer's Handbook, 1st ed," McGraw-Hill, 1943, first printing, G with moderate wear to bottom of spine. Front cover is peeled away from backsheet, but is easily repairable. Otherwise intact with no markings on pages. Price reflects front cover condition.
$15.00

25. Terman, F.E., "Radio Engineering, 3rd ed," McGraw-Hill, 1947, 5th printing, hbk (red), G- with moderate shelf wear along spine, hinges, and cover edges, worn through on bottom spine/front cover. Owner's name inside FC, otherwise no markings.
$15.00

26. Valley, G.E. and H. Wallman, "Vacuum Tube Amplifiers," McGraw-Hill/MIT, 1948, hbk, G/X-LIB with slight shelf wear but no markings on pages. Library markings inside FC and on spine plus card pocket. This is volume 18 of the MIT Radiation Laboratory Series and is a first edition.
$35.00

27. Westman, H.P. (ed), "Reference Data for Radio Engineers, 4th ed.," ITT, 1956, hbk, G- with numerous notes on backsheets and both hinges torn through paper but not separated. No markings on pages.
$12.50

Prices are exclusive of shipping costs. For US, add $3.50 for first book, and $1.50 for each additional. Canada and foreign dependent on actual cost. Payment in US$ in advance by cheque or money order. Books will be held for 14 days after confirmation.

I am looking for a good single band 222 Mhz xcvr in the
$200-$300 range for our RACES group. No crystal rigs or
HT's please.

If you have one for sale message me at the BBS given.
Note how much you want for it a complete description of
the gear,your phone number, call and what state you are in.

Thanks. Jerry

I just purchased an ICOM 706 MK II, and I need to sell it.
Mobile HF rig with 6 & 2 Meter
It will include the DSP when it arrives along with the seperation cable,
that ICOM is offering.
As NEW condition never xmit with it.
925.00 shipped to 48 ! (And inc.)

I have just acquired an Alinco DR-610T dualband mobile, and need the
operators manual and an EJ-24U Tone Decode module.
If anyone has either of these for sale, please reply via direct email.
TIA, Don

Is there any way to get Packratt for Windows now?
Program for AEA PK232 MBX
I just bought one and was told it had this software but it only had Pakratt II
the Windows version has a Signal Analysis Module and a few other nice
things for my use which is Rx only

Tkx

Bandpass Cavity Filter. Tuneable 136-174 Mhz.
Presently tuned in 2m band. Cavity is 7" diameter by
2 feet tall, (overall height is 30"). N type
connecters. Manufactured by Sinclair Radio Labs.

It has 1db insertion loss and signals 2Mhz
away from the tuned frequency are down 18db,
signals 5Mhz away are down 26db.

I can also tune it to your freq.

$ 75. + shipping (about $10.)

*** FOR SALE: Fine Tuning's "Proceedings", complete set 1988-1995 ***

I've recently acquired a fresh set of Proceedings editions, so I have no need for these. The physical condition of the volumes range from fair to excellent. ("Fair" ones have worn covers.) This set includes the six editions that have been published to date:

```
     1988       1991
     1989       1992-93
     1990       1994-95
```

(the 1989 ed. is 3-hole punched for binder; all others are the original perfect binding)

This is a good opportunity for a radio hobbyist interested in the acclaimed "Proceedings" books, but put off by the $120+ original price.

The set represents over 1200 pages of receiver reviews, radio history articles, antenna designs, radio propagation articles, SWL/DX accessory reviews & construction projects, etc.

$65.00 US, shipped in continental USA.

Please e-mail if interested.

Greetings,
I have for sale a Cherokee AH-50 6 mtr HT. It is less then 6 months old. Box and manual. Also leather case. I was using it as a base. Mostly listening. I have since bought a Yaesu all mode, and I do not use the HT anymore. I am a non smoker. I am asking $190.00 OBO. I will pay for the "UPS" shipping. Thanks in advance. 73, Stuart KB8VIY

I have to agree.... investing in this set was the absolute BEST
investment I ever made for shortwave and receiver information.

The information contained in these reprints is timeless & priceless.

No, I am not a "shill" for Mr. Atkins, just an enthusiastic supporter!
Since the price includes postasge in the continental U.S., it is quite
a deal! I wasn't so lucky, I had to get mine new like most people!

Steve

For Sale:
           Ten-Tec model #238 Tuner.
This tuner is in absolutly like new condition, I sold
this tuner back in 1991 when I was a TenTec dealer to an
older fellow, and he never did get around to using it. He's
asked me to sell it for him.

With original Box, Manual. $275 + $7. shipping.

I can Email you some specs and a photo if your
not familier with the #238. This is also still a
currently availible model and you might be
able to find out more it at.....
http://www.tentec.com/

The following is posted for a friend without internet access. PLEASE CONTACT NIGEL DIRECTLY...thanks!

==

The following Racal communications equipment for sale:

MA 168 Diversity Unit (no manual) $100

TA99 1 KW Linear (no power supply), 1.5 to 25 MHz, with Distortion Unit and VSWR unit, with all technical manuals. $700

TA349C 1 KW Linear, 1.5 to 30 MHz, servo tuned, with power unit, all interconnecting cables, set of technical manuals. $1600

The following three Racal transmitters are extremely rare. As regards prices, I am open to cash offers:

(1) Racal TA127 Transmitter (Royal Navy Type 632S). 1 KW, 1.5 to 25 MHz. All in very good to mint condition, in working order, original cabinet and wiring, with set of technical manuals and many spares.

(2) Racal TA83 H.F. Transmitter, 500W, in UN-USED condition with all Racal supplied tools, technical manual.

(3) Racal TTA371C Transmitting Terminal (Ex-RAF). 1 KW, 1.5 to 30 MHz. All in very good to mint condition, in working order, original cabinet and wiring, with set of technical manuals and many spares.

All items can be packed and shipped at cost from Georgia.

Please contact Nigel Boyd, K4UGD

I have the following items for sale or for trade. I'm interested in HT equipment, mics, batteries, etc. I'd perfer to sell for cash. Make me an offer on what I have.

� 99 call Caller ID box. Shows time, date, caller's name, and caller's number all simultaneously. And, when not in use, shows current time and date. Comes in origional box and with batteries.

� Two 14.4 external fax modems. Both are in working condition and come with the needed powersupply. One is a USRobotics Courier with manual, and the other is a Motorola Fastalk without the manual.

� Red security telephones. These are the wall hanging phones used in airports and larger hotels. they have no means of dialing out, but are otherwise fully functional. they'd be great for use in the garage so you don't have to run through the house to answer a call, or in the kids room. I have two of them.

� Fone Flasher 2. This is RS's origional. Has a strobe light that flashes when the phone rings, and a built in ringer. You can have one of the two, or both simultaneously when the phone rings. Great out in the shack for when you don't want to be disturbed by additional sounds.

� Composite computer monitor. This is a left over from the days of the apple IIc computer. It's monochrome green and has no internal speaker. It would be great for an on-site display for video work, amateur video applications, and for video editing.

� 12v 2Ah Sealed Lead Battery. GE Part number 1CVA156.

� Helium neon laser tube and power supply. 1 milliwatt output. mostly a fun little toy, great for parties.

� Compaq 286/LTE laptop. Backlight display, 1.44meg floppy drive, internal 2400 modem, modified to run off of ni-cad C batteries instead of proprietary battery pack, and fully MS-DOS 6.22 compatible. Batteries not included.

� 82mb 3.5" IDE Hard Drives. Tested and none have bad spots. I have two Maxtor, and one Western Digital.

� 125mb 3.5" IDE Maxtor Hard Drive. Tested and has no bad spots. These hard drives would be great for adding space to an existing system, or keeping the kids' homework and games on a separate drive.

� As a side-note, yes, everything works.

I have the following items for sale or for trade. I'm interested in HT equipment, mics, batteries, etc. I'm also interested in radio scanners. Anyone got a Pro-42? I'd perfer to sell this stuff for cash. Make me an offer on what I have.

� 99 call Caller ID box. Shows time, date, caller's name, and caller's number all simultaneously. And, when not in use, shows current time and date. Comes in origional box and with batteries.

� Two 14.4 external fax modems. Both are in working condition and come with the needed powersupply. One is a USRobotics Courier with manual, and the other is a Motorola Fastalk without the manual.

� Red security telephones. These are the wall hanging phones used in airports and larger hotels. they have no means of dialing out, but are otherwise fully functional. they'd be great for use in the garage so you don't have to run through the house to answer a call, or in the kids room. I have two of them.

� Fone Flasher 2. This is RS's origional. Has a strobe light that flashes when the phone rings, and a built in ringer. You can have one of the two, or both simultaneously when the phone rings. Great out in the shack for when you don't want to be disturbed by additional sounds.

� Composite computer monitor. This is a left over from the days of the apple IIc computer. It's monochrome green and has no internal speaker. It would be great for an on-site display for video work, amateur video applications, and for video editing.

� 12v 2Ah Sealed Lead Battery. GE Part number 1CVA156.

� Helium neon laser tube and power supply. 1 milliwatt output. mostly a fun little toy, great for parties.

� Compaq 286/LTE laptop. Backlight display, 1.44meg floppy drive, internal 2400 modem, modified to run off of ni-cad C batteries instead of proprietary battery pack, and fully MS-DOS 6.22 compatible. Batteries not included.

� 82mb 3.5" IDE Hard Drives. Tested and none have bad spots. I have two Maxtor, and one Western Digital.

� 125mb 3.5" IDE Maxtor Hard Drive. Tested and has no bad spots. These hard drives would be great for adding space to an existing system, or keeping the kids' homework and games on a separate drive.

� As a side-note, yes, everything works.

Hello Everyone,

Does someone out there have any documentation for the following
receivers:

1) Watkins Johnson model 977 30-300 MHz Receiver
2) Communications Electronics Inc. (Became WJ) model 775-3
    300-1000 MHz Receiver
3) Racal model RA9217E (I think) 1-30 MHz Receiver

I am willing to pay top dollar for original schematics, operators manuals, etc. Good quality copies also acceptable. Thanks.

Newsgroups: dfw.forsale,rec.radio.amateur.swap,rec.radio.amateur.boatanchors

Due to overabundance of projects I am selling the following items:

Hallicrafters SX-28. This GC boatanchor receiver is in very good cosmetic condition, and should be in good working condition. The radio worked great the last time I tried it (I put it in storage several years ago and haven't touched it since). There are a few knobs missing and the meter is broken, but the housing is intact and I have a meter that may work as a relacement movement. No tabletop case. This was used at a VA hospital, I believe, based on what is painted inside the top cover. 110/220 transformer. Includes an original (NOT a reproduction) instruction book. $150 plus shipping.

Hallicrafters SX-104. This 30-50MHz boatanchor receiver is in excellent cosmetic condition and good working condition. $75 plus shipping.

Hallicrafters SX-105. This 152-173 MHz boatanchor receiver is also in excellent cosmetic condition and good working condition. $75 plus shipping.

Realistic DX-75. This GC boatanchor receiver is in very good-excellent cosmetic condition and good working condition. Includes an original (NOT a reproduction) instruction book. This is when Radio Shack was still Radio Shack, and not a Tandy division. $50 plus shipping.

Speical deal: Take all four of the above radios for $300, or buy all three Hallicrafters and get the Realistic for free!

DenTron MT-2000A Antenna Tuner. 3kW PEP antenna tuner. This unit is in good cosmetic and working condition. $150 plus shipping.

These radios are currently located in the D/FW area.

I need to get out of the radio business, so I would prefer outright sale to trades. Delivery possible in north Texas, eastern Oklahoma, or northwest Arkansas. If interested, or for more information, email me at twhite@cyberramp.net. Thank you.

Unfortunately Mark, these will never stop, as never will the force-feeding here of the porno ads. They are all part of mass-mailings, they never see your/our comments of dislike, etc, and am sure they could care less! You do have the ultimate power of control though, throw the power switch! ;-)

GO TO THE SEARCH ENGINES, YELLOW PAGES, OR TRY ASKING A HAM IN PERSON.
most of the people who post on n/g are just bored with no knowlege of of anything asked.

case in point. i asked for opinions on the ft-8100r. bert was the only email i got that stated the experience he and his friends had. the other 27 emails said either
"a piece of S%^t " or " dont have one but i like the &*^^%$ i have"

so that means 2 in 29 people have a brain.
And considering this i think me and bert have better things to do.

P.S. what happened to AMOR.

To no one who wanted an answer...

One of the oddest things we do on news groups is expect a straight answer.

Go here to a n.g., ask a question, and an reply will be forthcoming with the absolute best answer to the question we asked.

Great if it were true.

No one owes anyone a straight answer. Never have. Western civilization then has been declining since the ancient Greeks.

What's the best rig? What's the best antenna? - just tell me so I don't have to waste my time like the people who's experience, effort and money spent I'm relying upon, to tell me what's right from wrong.

All the answers start with the coil of a 1934 Ford model A. And some wire.

[Flame me! I love it! Make me write bad checks! Ooooh, I can hardly wait because I'll be blamed for not solving your problems!].

OK, I'm sorry, spend all of your money on a FT-1000D and a 200' tower, and move to a salt marsh, and win the lottery, and, really serious, Floss! damn it, every single day!

73,
N1XNC

PS - I built a Vertical out of floss and W.A.S. back in 1962. But then they floridated the water... :-(I blame the ARRL for this and the sun spot cycle.

So what's with the FT-920? I think it's worth a try now. Everything after the August [7H] serial # seems to be cool.

I have for sale a 2m HT. It's an Icom IC-2ia.

RX 138-175 MHz, Tx 144-148 MHz

It has 100 memory channels available, and is fairly
easily programmed.
It has 4 power settings at 13.8 volts, 5W, 2.5W, 500 mW, and 20 mW

Has a clock, dtmf functions, power-on timer, power-off timer, auto
power-off,
priority watch, and easy and multi-function modes.

Includes a wall charger, and BP-121 7.2v/ 400mAH battery pack.

Very enjoyable little rig.

$100

Hi All,

I have two Maxtracs UHF for sale.
First one is a 2ch 25 watt.  Second is a 32ch 25 watt w/signalling.
Includes mic and cable for each radio.

$150 o.b.o. for the 2ch
$275 o.b.o. for the 32ch

Email if interested.

I love mine, but, it has been in the shop twice in 6 months. Speaker rattle and a 'known' but not much explained problem with UHF to VHF Cross-band Audio. (Oh yeah, the FSK22 decode kit doesn't quite fit the way they say it does, but if you have some tape to keep it from shorting out, it works) Although, It seems that since I got it back from Yeasu America, the fan sounds like it is on its last legs......ah Rod, the 1 year is up in August, right ----<grin>

I have an FT-8100R and did not see your post. It has or has had 4 problems:

1) Speaker rattle (even a new one did little to help)
2) The FSK-22 Decode kit requires a shoe horn and lots of insulation tape to install (It really doesn't fit where it says it should the way it says it should, but, you can make it work if you can keep it from shorting out (use the tape). (Yeasu reps know and admit to this problem)
3) The UHF to VHF cross band audio was non-existent and it had to go back to Yeasu America for repair (Seems that it is a known problem, also, so check it if you can before you buy a particular unit.) Works GREAT after the fix, though.
4) Fan is on its last legs after only 6 months.

Now for the gripes:
You cannot use the DTMF keypad to program frequencies (the way you can the FT-51R).
The print for the button function ID is impossible to read while driving (gee, after all it is a mobile rig)
As is normal for a massive function radio without a keypad, keep the manual VERY handy.
The DTMF does not have an xmit hold function so you have to manually hold the ptt while dialing (two handed in the car is DANGEROUS.)
There is a mod to help this wandering around.
Dialling from memory is a multi-step operation that is not obvious (again you cannot use the DTMF keypad to select memory #1 as you can with the FT-51R HT)

PLUSes;
Has lots of creature features (but then I haven't used most of them - like smart band scanning/programming when in a new city)
Works great with both one-way and two-way crossband (once the audo is fixed)
Hmmmm   Other than that I guess I just like it, for no good reason.
Yes, I would buy it again.
The ADMS-2D software is GREAT (purchased separately) and it even takes the import data directly from the ADMS-1C and D if you have an FT-x1R, or FT-x0 series. (x=1, 4, or 5)

Untrue...
I have found that (in most cases) you get the answer you deserve..
Ask a dumb question - you get (lots) of dumb(er) answers.

There is only one "dumb" question, the one that
does not get asked.  Don't believe me?  Ask any
"good" teacher.

Hello, I have the following parts forsale. They have been sitting in my basement for a long time now, so I do not know if they work -- so I am selling everything ASIS. Buyer pays the ups shipping COD from ny. Prices are not negotiable. Voice: 607-777-7453 or email bg20300@binghamton.edu
-Andrew Sitzer

1) Pentium Motherboard w/ 256K cache. 3 PCI and 4ISA slots. 4 72pin simm sockets. Jumper settings printed right on it. $35
2) 486 dx2/66 Motherboard & cpu. has 8 32pin simm sockets & 2 72pin sockets. 8 ISA slots (with 3 VLB extensions). 256K cache. Also incl cpu cooling fan and 8 1mb simms. Works well. $70
2) Windows 95 CD. $45
3) Digital thinwire singleport repeater 150. AUI/BNC. excellent condition -- tested and works. $150.
4) HP Laserjet I. selftests fine, but didnt try hooking it up. has one toner that appears about half-full. heavy. $150
5) IBM Proprinter. dotmatrix. parralel. $40
6) IBM X24 printer. dotmatrix. parralel. $40

7) IBM Graphics printer. dotmatrix. parralel. tested. Works. $40
8) IBM X24E printer. dotmatrix. dotmatrix. parralel. $40
9) HP Ruggedwriter. selftests fine, but didnt hook it up. serial. $100
10) Epson FX1050 printers. dotmatrix. I have 3 of em. These have been tested and work. $50ea all for $130.
11) Epson LQ2500 printer. dotmatrix. $45
12) Epson LQ1070 printer. dotmatrix. $45
13) HP Deskwriter inkjet printer for macs. $100
14) Brother dynax dx-15 daisy wheel printer. takes standard casette ribbons. $15
15) VT131 Terminal. $35
16) Hitachi 19" BNC cga monitor. Has seperate R,G,B and external sync connections. $150 but its heavy so shipping will be alot (>$35)
17) Kenmore Air-conditioner. Model 2539750551. 5500 BTU. Good cond. $145
18) Interdyne external 6025 Tape backup unit. db37 connector. $12
19) Commodore 64 Computer w/ diskdrive & powersupply & software. $50
20) Commodore 1525 Dotmatrix printer. $30
21) Hero-I Robot #1. Fully built. Has worked in the past, but the charger is currently broken and the batteries are drained, so I dont know how much of it works or doesnt work. All the boards are installed and it looks okay. Includes original schematics and user manual. $1200
22) Hero-I Robot #2. Alot like the one above, but this one does not have a couple of the circuit boards (about 3 missing) and is missing the arm. No charger. Batteries are probably dead. But this one does have a remote control, which is neat. Great for parts. $625.

Looking for IC-575A or comparable six meter transceiver.

Required:

Digital readout
All mode (AM, CW, FM, SSB)
10-25 watts output
Good appearance (normal wear ok, but no holes or other abuse)
All functions working or easily repairable (noisy potentiometer or burned out lamp ok, etc)

73, Bill W7TI

What I am looking for now is a 2 meter ht. Would perfer ht with accessories and in good working and cosmetic condition. Here is what I have for trade.

What I do have for trade is the following
items...

NEW * Only used 1 month Connectix COLOR Camera w/software - Hooks up to your printer port.

NEW * Less than 3 months old - CCT Color Security Camera - value over $350
i can send a digital picture
of camera if interested)

NEW * Only used 2 months - Color TV Computer Card, works perfectly, used
either for cable tv or your outside tv antenna * Comes with Win 3.1 and Win
95 Disk .. Cost me $250

If you would be interested in a trade, please contact via email at
KC4OXP@QSL.NET

Looking to trade for a Uniden 235XLT.... I have a 2 gig Seagate ST12400N fast
SCSI 2 hard drive. I also have MANY brand new unopened Sony 4mm 120m
(4gig) dat tapes. These tapes seel for over $20.00 each in Computer Shopper.
I am also willing to do a partial trade/cash deal as well (say $100.00 plus ???).

I alos have a bunch of other things as well (I.E. Panasonic 2x PCMCIA portable
CD Rom, Some 1 gig fast SCSI 2 hard drives, a 6x external NEC CD Rom player
with digital audio output connector........) Please see below on how to reply
for
more info... Thanks!!

I have just aquired a FT-50R Dualbander HT. The radio is in EXCELLENT condition and includes a 5 watt battery also included is The FBA-15 (3 AA size Batterys). This radio DOES NOT HAVE THE DIGITAL VOICE RECORDER OPTION! However it still is a excellent rig and you can purchase the option if needed/wanted.

If interested email me at kc4oxp@flash.net

Price -$325 plus shipping
Things that I would consider for trade -

Dual Band mobile -
Complete weather station -
Plain Paper fax machine -
Other ham gear, tell me what you have..
HF gear -

Still looking for a db 224 or db228 in the 2 meter band, for a repeater antenna.

Please e-mail responses.....oh, and if you want to sell one, but don't want to help arrange shipping, don't respond! I had several responses before like "its at the location, don't know how you would get it to a shipper"!!

I have a near perfect TS-940S/AT for sale. Includes hand mic, manuals & original boxes (inner & outer). Also included is the SP-940 Speaker, And PC-1A Phone Patch. This radio is a 9.8 on appearance and 10 on performance. I've got 'new radio' fever but I don't 'HAVE' to sell this radio so PLEASE don't waste either of our time with low-ball offers. $1350 (and worth it!). Prefer local sale so I can demo the radio but will ship at your expense. Also I have just aquired a FT-50R Dualbander HT. The radio is in EXCELLENT condition and includes a 5 watt battery also included is The FBA-15 (3 AA size Batterys). This radio DOES NOT HAVE THE DIGITAL VOICE RECORDER OPTION! However it still is a excellent rig and you can purchase the option if needed/wanted. $325 obo Will consider trades for the Yaesu FT-50R looking for the following items Complete weather station Plain Paper fax machine

Dual Band mobile Other ham gear, tell me what you have.. HF gear -

Email if interested in the above items

I must sell my Kenwood TS-140 immediately! (I found out that I'm not getting a tax refund this year and that I accually have to pay in.) The first $395 takes it! It's in excellent shape and comes with all manuals, cables, stock mike and original boxes.

Have NIB (New in Box) Siltronix model 90-5 VFO. It is intended for use

with the Cheetah, Simba, Courier Gladiator, Cobra 138 and 139, Midland

13-893, and any CB radio having an 11.1 Mhz crystal for tuning. It is
designed to tune from 26.925 to 27.830 Mhz and can be powered with 110
Volts AC or 12 Volts DC (use it base or mobile). This unit is still in
the original box with the original instructions and was never used.
Asking $200 or best offer plus shipping from Burnsville, MN 55337.
Contact Frank at ki0gd@spacestar.net (that's a zero following the "i"
in the email address).

Would anyone advise me on the pin out of a GE master 2 control cable
plug<at the radio>. I don't have a cable and need to know where i need
to put positive and negative connections to the front of the radio as i
am using an internal repeater controller <nhrc-3 mii-90> and have
deleted the control head.

I realize the two large pins are + and -, but the smaller pins must have
a pos and neg. pin in there somewhere.

Thanks for any help!!
please e-mail responses....

For Sale:
            Drake 2A Reciever and 2AQ Q-Multiplier/
Speaker. Both are excellent condition, everthing
is original, no mods. 2AQ is cosmetically perfect.
The 2A has one small paint scratch on right side
at the rear, everything else including all knobs,
switchs, front panel lettering, is perfect. There
is some dust inside, I've never had the cabinet off.
Everthing works fine, except the senisitivy on
15m -10m is kinda low. This set has optional crystals
for coverage of all of the 10m band and 26.9 - 27.5 Mhz.
Includes original manual. 2A s/n is 816. It also has
the 2AC xtal calibrator.
I also have a new boxed 6BZ6 and 6BE6, that I never got

around to trying in the set (to bring up 10m sensitivity.)

$165. for the set, plus $10. shipping usa/48

Does anyone know someone who has a broadband receiver tube or otherwise for between $50 -$75 that works. Doesn't have to look pretty just work.
THX.

I would like to acquire a basic phone patch to allow me to couple my SW receivers to the phone line. I would prefer to buy one here in Canada to make the shipping easier, but will entertain offers from the US, as well.

Thanks,
Walt

Posting for a friend who doesn't have net access. This is a rackmount
monitor, apparently used to monitor signals from two receivers used in
diversity mode. 3" CRT display and many controls. The unit is in fair
cosmetic condition, and had apparently had several mods made at one time or

another. Untested. US$125 OBO + shipping.

I have a pair of Radio Shack PRS-101 GMRS transceivers for trade. The radio are hardly used. They are ten channel, switchable 0.9 and 2 watts, complete with battery chargers for each. Jack for speaker mic or headset. New, they were $179.00 each. I would like to trade them for either:

1) a 9600 baud TNC or
2) a Yaesu VX-1R or
3) a Ranger 2950 or
4) a 6M mobile, especially interested in the Yaesu FT-690 or
5) an Index Labs QRP+ transceiver

If you have one of the above items and are interested in a trade, please contact me via e-mail. Thanks.

Hi, I have a UHF Motorola Visar with a dead front cover. (Hit by lawn mower. Case and board broke.) The RF section is fine as well as the battery.   I need a visar with a dead RF section and a working front cover. Or if you upgraded to a TT front I would like your non TT front. TT or non TT is fine...

Just want my radio back.

Please let me know if you can help.

73,
Scott

Daniel,
I hate to burst your bubble but what you have is worthless. I suggest you check
out some on line motherboard suppliers and you'll see you can get a motherboard
for around $80.00 but unfortunately because what you have is a coimpaq they
made special connector and such. Its just not supportable.

tony

I was just given a Yaesu FT-209RH 2 meter portable, without the manual
naturally, and I'm hoping
someone out there can either post (email, actually) instructions on how
to do the basic programming,
or maybe a couple of pages from the manual. Anybody help? Thanks.

I have for sale a Kenwood TS-530 HF Rig with the optional YK-88-CN CW filter installed. The frequency range is 100-10 meters sideband and CW. It uses a pair of 6146Bs for finals for an output of 220W PEP sideband and 180W CW.

Only other tube is the driver tube, and the rest is solid state.
It has a digital readout, and features RIT/XIT, IF shift, Noise
Blanker and VOX. Will include an MFJ 300W tuner.

Also for sale is a Vibroplex Brass Racer keyer $50 (excellent condition)

NEW Only 5 days old -

Reason for selling? I'm NOT close enough to the repeaters for reliable communications for the low wattage output of the radio. Radio HAS NOT been modified!

I HAVE sent in the warranty card! However I will take care of the purchaser for 1 year providing the buyer sends me the radio and pays for shipping should the need arise.

Purchased for $119.00

Sell for $90 plus $10 for shipping
I have purchased a Carrying Bag/Camera Bag for radio cost me $25 sell for additional $15 if interested.

1998 Winter Carnival Special Event Station
Using the Special Event 1x1 callsign W8C
****

Operating on or near:
3.984 7.246 14.256 21.336

Thursday, 29 January 1998 11:00 UTC
Through
Saturday, 31 January 1998 11:00 UTC

The Husky Amateur Radio Club, at Michigan Technological University, will be operating the annual Winter Carnival special event station from Thursday, Jan. 29 until Saturday, Jan. 31.

The Husky Amateur Radio Club, W8YY has attained a special event callsign of W8C for the Winter Carnival special event.

Certificates will be issued.

Hope to see you in the logbook!

For more info on the Husky Amateur Radio Club, visit the website at
http://w8yy.resnet.mtu.edu

or, for more information on Winter Carnival at Michigan Tech., stop by the MTU homepage at http://www.mtu.edu

E-mail: w8yy@mtu.edu for questions/comments

I sold the FL-7000 amp and now I've reduced the price on these other 2 cherry units which were hardly used since purchased new.

IC-761 HF built in Tuner, Passband, Notch, SSB Filter - can't tell from new - only thing it needs is a new platic thumb grommet for the removable little "window" metal panel. Original box. Sacrifice $900.

IC-271H 2 meter all mode 100W radio with built-in PS35 power supply, original box $450 takes.

Both for $1300 if you wish, otherwise prices firm.

Pick up in San Diego or you pay shipping. Howard Groveman KD6UU

I have the following electronic and math books for sale:

1.   -----, "SINGLE SIDEBAND FOR THE RADIO AMATEUR," 5th

edition, ARRL, 1970, pbk, G+ with very slight wear.
$10.00

2. Beyer, William H. (ed), "Standard Mathematical Tables, 24th ed.," CRC Press, 1973, hbk, G/G+ with owner's names inside front cover.
$10.00

3. Cockrell, W.D., "INDUSTRIAL ELECTRONIC CONTROL," McGraw-Hill, 1944, G- with slight moisture damage not immersion). Interesting work on vacuum tube power control circuitry.
$10.00

4. Cooke, Nelson M., "MATHEMATICS FOR ELECTRICIANS AND RADIOMEN," 1st edition, 3rd printing, McGraw-Hill, 1942, hbk, G- with little wear but damage to bottom of spine. No markings on pages.
$10.00

5. Crawford, Robert H., "MOSFET IN CIRCUIT DESIGN," McGraw-Hill, 1967, hbk, G+ with intact dust jacket and no markings on pages.
$15.00

6. Fich, Sylvan and James L. Potter, "THEORY OF A-C CIRCUITS," Prentice-Hall, 1959, hbk, G/G+ with some pencil markings.
$7.50

7. Fink, Donald G., "PRINCIPLES OF TELEVISION ENGINEERING," 1st edition, 12th printing, McGraw-Hill, 1940, hbk, G- with little wear but markings throughout.
$10.00

8. Glasgow, R.S., "PRINCIPLES OF RADIO ENGINEERING," McGraw-Hill, 1936, hbk, G-/G with little shelf wear and owner's name and notes inside front cover.
$15.00

9. Henney, Keith, "THE RADIO ENGINEERING HANDBOOK," 3rd edition, 4th printing, McGraw-Hill, 1941, hpk, F+/G- with moderate wear on covers and hinges, but heavy wear on spine with 1/2" tear on top. No markings on pages.
$10.00

10. Henney, Keith and Glen A. Richardson, "PRINCIPLES OF RADIO," 6th edition, Wiley, 1952, hbk, G with little wear and some pencil marks throughout.
$12.50

11. Knowlton, Archer E. (ed), "STANDARD HANDBOOK FOR ELECTRICAL ENGINEERS," 7th edition, 7th printing, McGraw-Hill, 1941, hbk, G-/G with slight wear on cover and spine.

$15.00

12. Krauss, Herbert L., Charles W. Bostian, and Frederick H. Raab, "SOLID STATE RADIO ENGINEERING," Wiley, 1980, hbk, G with some shelf wear, owner's name on page edges, and some minor markings on pages. Sells new for $70.00
$40.00

13. Melsa, James L. and Donald G. Schultz, "LINEAR CONTROL SYSTEMS," McGraw-Hill, 1969, hbk, G+/VG with no wear.
$15.00

14. Milne-Thompson, L.M., "JACOBIAN ELLIPTIC FUNCTION TABLES," Dover, 1950, pbk, G
$7.50

15. Orr, William I., "THE RADIO HANDBOOK, 16th ed.," Editors and Engineers, 1962, hbk, G/G+ with little shelf wear and rubbing in spine top and bottom.
$20.00

16. Scanlan, J.O., "ANALYSIS AND SYNTHESIS OF TUNNEL DIODE CIRCUITS," Wiley, 1966, hbk, G/G+ with G DJ and very little shelf wear.
$15.00

17. Sevin, Leonce J., "FIELD-EFFECT TRANSISTORS," McGraw-Hill, 1965, hbk, G+ with slight wear on DJ. A good reference on the theory and basic applications of junction field-effect transistors.
$15.00

Prices are exclusive of shipping costs. For US, add $3.50 for first book, and $1.50 for each additional. Canada and foreign dependent on actual cost. Payment in US$ in advance by cheque or money order. Books will be held for 14 days after confirmation.

```

I have acquired a large (24" by 24" by 24") box stuffed with Centralab (Now Electroswitch) ceramic rotary switches, index assemblies, and switch sections. The bottom of this box was 1" deep in nuts, washers, and spacers. I am offering them here for sale at prices well below their current market value. Prices DO NOT include shipping.

Centralab is one of the oldest names in the electronics industry, so old that they reportedly supplied the stone that the original ten commandments were written on. Their ceramic rotary switches have long been an industry standard for quality.

Get 'em while they last.

INDEX ASSEMBLIES

All index assemblies are 30-degree spacing, ceramic insulation, and are supplied with the shaft nut, shaft washer, stop washer, (2) wafer screws, (2) fiber washers, (2) lock washers, and (2) nuts. Ceramic spacers are sold separately.

Model#	Description	List Price	Your Cost

PA-300	1-3 sections, 2" shaft	$17.72	$6.00
PA-302	7-9 sections, 6" shaft	$37.72	$12.50
PA-552	7-9 sections, 6" shaft		$12.50

CERAMIC SPACERS

These are the spacers needed tp separate the switch sections when assembling the switch sections below with the index assemblies above.

1/8"	$0.10
3/16"	$0.15
1/4"	$0.20
1/2"	$0.40
1"	$0.80

SWITCH SECTIONS

All switch sections are ceramic (steatite) insulation

Model#	Description	List Price	Your Cost
PA0	1 pole, 1-12 position, shorting	$22.03	$5.50
PA1	1 pole, 1-12 position, non-shorting	$22.03	$5.50
PA2	2 pole, 2-6 position, shorting	$23.07	$5.50
PA4	3 pole, 2-5 position, shorting	$22.35	$5.50
PA5	3 pole, 2-5 position, non-shorting	$22.35	$5.50
PA6	5 pole, 2-3 position, shorting	$23.94	$5.50
PA7	5 pole, 2-3 position, non-shorting	$23.94	$5.50
PA8	6 pole, 2 position,	$25.14	$5.50

	shorting		
PA9	6 pole, 2 position, non-shorting	$25.14	$5.50
PA10	1 pole, 2-5 position, shorting		$3.50
PA11	1 pole, 2-11 position, non-shorting, plus special shorting		$3.50
PA12	1 pole, 10 position, progressive shorting	$11.17	$3.50
PA19	1 pole, 2-5 position, non-shorting	$11.59	$3.50

ASSEMBLED ROTARY SWITCHES

All assembled rotary switches are ceramic (steatite) insulation and 30-degree indexing unless otherwise noted.

Model#	Description	List Price	Your Cost
PA2011	4 pole, 2-6 position, non-shorting	$44.96	$15.00
PA2013	4 pole, 2-12 position, non-shorting	$71.51	$25.00
PA2017	5 pole, 2-12 position, non-shorting	$85.96	$28.00
PA2040	18 pole, 2 position, shorting (shaft cut to 1/2")	$51.77	$12.50
PA4003	2 pole, 2-23 position, 15-degree indexing, phenolic insulation, non-shorting	$42.73	$12.50
PA5003	2 pole, 2-6 position, diallyl phinalate insulation, non-shorting		$17.50
PA5007	3 pole, 2-5 position, diallyl phinalate insulation, non-shorting		$20.00

Greetings,

I have an ICOM IC-251A that has be tuned up ICOM. Comes with the manual, new desk microphone, and an IC-SM-5 desk microphone. Only $485 Shipped.

KENWOOD TS-520SE with hand microphone,original manual and carton. Excellent shape. Covers 10-160 meters minus WARC. Only $350 shipped.

KENWOOD TH-77A 2/440 Dual-Band Hand Held. Checked by Kenwood recently. Modified for extended transmit and recieve, aircraft/2m/440/800mhz. Includes KSC-7 Desk Charger, BT-6 Battery Case, Rechargeable Battery, orginial manual, container, and modification sheets. Shipped to your door for $295.

VHF ENGINEERING PA140/10 2 meter VHF Amplifier. Large heat sinks. No manual, obtained in a trade. Only FM mode. Shipped for $125.

KANTRONICS KAM PLUS, with Host Master II+ software, only $275 Shipped. This is my second KAM and very little use.   MINT condition.

Radio Shack DSP-40 Digital Signal Processor, New in Box, Shipped for $60. One opened, used in excellent condition for $45.

TUCKER T-1000 300 watt Antenna Tuner, (same as Vectronics VC-300DLP), shipped at $120.

Looking for an HF AMP for 10-160 to include WARC/MARS. Will trade towards and depends on the model and age, include $$$ for the difference. Will consider 80A/B and Alpha amps -

Also looking for ICOM IC-706 radio with or without separation kit.

73
Walt

Just heard from Kenny at KAC Website Design and he has restored the Ham Swap Page from an older backup and all is well again! (Just in case you thought he might have just shut it down, not so.)

http://www.kacweb.com/swaps/radio/index.html

I have no connection to Kenny or the site other than to read and post there from time to time. In fact I just posted there to test the site, working fine!

```

Long before oscilloscopes had built in voltage calibration and dual traces, there was the basic scope. In order to quantify the input signal, a voltage reference was required. To generate two traces,an electronic switch was used. It was basically a square wave generator that used the top and the bottom of the square wave as traces #1 and #2.

For collectors of Heathkits or just early electronic equipment, the following items should be of value:

1   Heathkit Voltage Calibrator Model VC-2, with manual,used in mint condition.

1   Heathkit Electronic Switch Model S-2, with manual, used in mint condition.

If you have any interest in the above, let me know. JPG pictures are available for your viewing.

R.W.Schlachter.

KENWOOD TS-520SE with hand microphone,original manual and carton. Excellent shape. Covers 10-160 meters minus WARC. Only $350 shipped.

KENWOOD TH-77A 2/440 Dual-Band Hand Held. Checked by Kenwood recently. Modified for extended transmit and recieve, aircraft/2m/440/800mhz. Includes KSC-7 Desk Charger, BT-6 Battery Case, Rechargeable Battery, orginial manual, container, and modification sheets. Shipped to your door for $295.

VHF ENGINEERING PA140/10 2 meter VHF Amplifier. Large heat sinks. No manual, obtained in a trade. Only FM mode. Shipped for $125.

KANTRONICS KAM PLUS, with Host Master II+ software, only $275 Shipped.
This is my second KAM and very little use. MINT condition.

Radio Shack DSP-40 Digital Signal Processor, New in Box, Shipped for $60. One opened, used in excellent condition for $45.

TUCKER T-1000 300 watt Antenna Tuner, (same as Vectronics VC-300DLP), shipped at $120.

Looking for an HF AMP for 10-160 to include WARC/MARS. Will trade towards and depends on the model and age, include $$$ for the difference. Will consider 80A/B and Alpha amps -

Also looking for ICOM IC-706 radio with or without separation kit.

I have the opportunity to buy a near mint Alpha 76PA (3 tube, standard transformer) at a good price. I understand the replacement tubes are expensive and hard to get? The tubes in this amp have hardly been used and show no discoloration and the rubberized chimneys are just like new but I wonder what the average lifespan of them is? Are there any special problems with this amp? Any info would be appreciated as I have to make up my mind in a couple of days.

Thanks

Ed Scissons VE5VX

Kenwood TR-7850 2 Meter Mobile rig for sale:
- 15 memory channels
- Priority channel (one button access)
- Priority channel alert scan
- Memory scan
- DTMF pad
- 7" W x 2.5" H x 9" D
- 45 watt high power (about 5 on low)
- original manual, hand-mic, mount and box.

This rig also has the "standard" type of functions,
one VFO (separate from memories), reverse button,
bargraph S and power meter...
would also make a good packet radio base station.
It is in excellent shape, very clean. $160
plus $5 shipping.

Ed,

The tubes are getting hard to get and new cost about $300 - $400 USD. Svetlana has started making them but they are in the same price range.

These tubes are not know for their long life. They were short-lived in commercial practice because of this. They have a short (by amateur standards) life when used at rated output (less than 2000 hours). Most hams run them far beyond rated out with the resultant VERY short life. They are only rated for 500 watts each in PEP service. That says for the 76 PA 1500 watts max. Alot of hams run these amps at 2000+ out, of course they buy new tubes every year or so...

The 76PA is a very good amplifier. Folks are now converting them to a pair of 3CX800A7s which have a much longer life span. Check out Dick Byrd's web page at http://n4uq.home.mindspring.com Lot's of info on Alpha upgrades here.

Hope this helps.

If you treat the 8874's carefully and run them with minimal grid
current,
and avoid overdriving, they will last you indefinitely. I had an Alpha
78 that I purchased from the original owner that was about 20 years old
and was running the original set of tubes, with full power out.

Although you can get over legal limit p.o.with the 76PA, it was not
designed for running this type of power. Keeping it to 1200-1300 W out,
or less, with <50-75 ma total grid current should keep those tubes going
for many, many years. One tip - go inside about once every 6 months
(sooner if you operate it heavily) and blow out the dust that
accumulates in the plate fins. They're very close spaced and tend to get
blocked up with dust, and lead to overheating. The thing that kills
these tubes are excessive grid current and overheating. And yes, they've
gotten expensive since I think Eimac is not producing large quantities
anymore due to the popularity of the 3CX800A7. I suspect eventually that
the whole 8873/74/75 line will be discontinued since they are not used
much commercially anymore, if at all. As stated, Svetlana is making the
8874, but they've priced it about the same as the Eimac. - Bob, K3AC

I'm considering Heathkit SB1000 for my first HF Amp. I've been looking and
still not sure what to purchase. I'm looking for an AMP that will do 10-160 /
WARC / MARS / SHARES frequencies. Don't have a lot of $$$.

What is your recommendation on the Heathkit SB1000 HF Amp. Other Amps I should consider? Price around $550 since this is the cost of the Heathkit SB1000.

Thank you for your help and assistance.

Happy New Year.

-----For Sale-----
Kenwood TS-830S 160-10m HF Transceiver,
later series with gold nameplate,
s/n 4090058. This radio is very clean,
only a few light paint scratches
on the top and sides keep this radio
from being "mint"...the front panel,
knobs, digital display, meter, etc, are
all flawless. I do not have the optional
CW filter in it, it has of course a
built-in AC power Supply, all WARC bands,
100+ watts output, etc...i have the manual,
and the original box.. **** $ 440. ****
I'll go 50/50 on the shipping to 48 states.
I'm willing to give you an on-the-air demo
too, on 160-40m.. or 10m if your local...
I am located in Croswell, Michigan.

FOR SALE: Wilson Mark IV VHF Handheld Transceiver ($30 + shipping)

This is an older VHF (2 meter) ham radio (see attached picture below). Would make an excellent portable backup, emergency or packet radio. The radio is in working condition, however, I do not have the antenna, charger or owner's manual. It features:

+ 6 channels (crystal controlled -- see frequencies below)
+ Tone squelch decode
+ DTMF keypad (touch tone dialer)
+ HI/LO power switch
+ External Mic/Speaker
+ 11v, 500ma NICAD battery (last replaced 9/14/91)

Crytals included: 146.520, 146.670, 147.285, 147.165, 146.625 and 147.060 MHz

$30 plus shipping

If you're interested, please send e-mail to kc4vnu@nospamjuno.com (just remove the "nospam" from the reply address to send e-mail to me).

Hello, I have the following for sale.

Eico Model 720 Transmitter. good condition cabinet could use repainting, complete and everything lights thats supposed to but I never put it to an antenna.
$50.00 plus shipping.

Modulator, push pull 6L6 output. Collins modulation transformer. I don't know if this was home built but is complete. Components mounted on a U shaped chassis 13"X6" . $40.00 plus shipping (has power supply built on board so its heavy for the size, 20lb).

Home built 80 meter VFO. whoever built this new what they were doing. Looks good, works great. Very stable. Tunes across most of the 80 meter band. Has pl259 connector as RF output with coax terminated with gutted FT243 crystal case. Just plug into your crystal connector and tune.
$25.00 plus shipping

Galaxy III Transeiver. Good condition, (I have a photo of this radio on my web page) cabinet has been repainted. About 180watts PEP output.
S meter deflects on only strong signals but receiver works fine.
This is a 80,40, 20 meter SSB transeiver.
$50.00 plus shipping.

Lafayette HE35 6 meter transeiver. This little radio has been modified with extra switches and meter installed in the front panel. does work though. With microphone.
Needs crystal for transmit (8mhz) but receiver has built in VFO.
$15.00 plus shipping

Palomar mobile HFamplifier. about 300 watts PEP, Solid state. Front panel has selector knob for 80-10 meters. This amp had a receiver preamp but previous owner had removed it.
$50.00 plus shipping

Henry Electronics 2 meter amp
12 volt mobile
5 to 20 watts in has 80 watts out.
Does not have correct power cord.
$45.00 plus shipping

Mikes:
ElectroVoice 630 microphone, I don't think this mike was ever used.
With new amphenol connector.

Shure model 55S microphone with connector, in Shure Microphone
drawstring bag.

ElectroVoice 719 good condition.
I honestly don't know what these are worth so make (fair) offer.

Bud Codemaster oscillator .
good condition and works. Front panel has Pitch and Volume knobs.
2 tube oscillator in metal case.
$15.00 plus shipping

TUBES:
2 ea. 235 globe 4.00 ea.
4 ea. 24A ST 4.50 ea
5 ea. 27 ST 2.00 ea.
1 ea. 280 ST 10.00
2 ea. 35 ST 2.00 ea.
These are used and test good.

If you need any info on these items please email me. My zip is 70058
Thanks, Jake KK5HY

I HAVE A ALPHA 76A , WHICH I AM THE SECOND OWNER, AND THE AMP IS
ABOUT 12 YRS OLD, WITH THE ORIGINAL TUBES INTACT, IT STILL PUTS OUT
FULL POWER, AND THE ORIGINAL OWNER HAVE , "WORKED THEM ALL"
AWARD FROM ARRL, USING THIS AMP. YES THE TUBES ARE VERY PRICEY,
AND NOT EASY TO FIND AT HAMFESTS, BUT THEY CAN BE FOUND. THIS IS ALL THE
ADVICE I CAN GIVE YOU EXCEPT BUYER BE WARE,
PS. I HAVE BEEN USING THE AMP FOR THE LAST 5 YEARS WITH FAULTLESS
SERVICE.   BILL  KE3A

I have for sale a nice FT-2400 rig (2 meters) $200 US + shipping

It has 31 memories, alphabetic labelling on each memory, tone encode,
standard yaesu backlit mic, and 3 power levels (5,25, and 50 Watts).

Am original owner and have original packing materials.

Am looking for a repeater controller.Would need to have voice synthesizer
and autopatch is not a necessary thing. Would be willing to buy if it is
under 250.00 or above that price mark I would be interested in trading some
gear.

Available gear:
ic 727??  i don't remember the mod # but believ that's it. it's hf + 6m
hasonly been used for maybe 20 bours at one field day about 3 years ago.

Also have dualband ht's available:
ic-w2a
standard c-528a
Both have batts, and some other misc accessories.

also have dualband commercial mobile.
alinco ald-24t
single band rx at one time. comes with tt mic.

anything interest you????     let me know.    de RodEkholm Jr.

I am trying to repair a Regency HR-2A 2m crystal rig. Want to peak the TX
and RX and try to 'pull' a couple of the crystal pairs to a local Repeater.
 I'm going to keep it in the car for a
bang-around-don't-care-if-someone-steals-it-occasional-use-rig ... though
once they look at it they'll not be interested! :-)

Thanks for any help!

Subject: FS: Three 5V 200A power supplies
Date: 1998/01/07
Message-ID: <01bd1b21$01cfaca0$098a92d0@bitnet.bit-net.com>#1/1
X-Deja-AN: 313626674
Organization: BIT-NET
Newsgroups: rec.radio.amateur.homebrew,rec.radio.amateur.swap

I have three 5V 200A power supplies (amazingly small, about 12" deep x 5" wide x 8" high, though very solid and heavy). They weigh approx. 15 pounds each.

```
They are JETA Power Systems, Inc.  Model G1001-1
Label says Input:  3 phase 208v 3.5a 47-400hz,
                               OR 230v 9.6a 47-60hz
                  Output: 5v 200a
```

Each unit has its own built in fan, massive plated connection posts, etc.

(Several of the wonderful Hams here on the newsgroups have provided wonderful info. as to how I might tie them together for a massive 12v 200 amp supply - thanks again! I'm not going to do that project, but someone else can - I'll include your suggestions with the supplies!)

I have arranged to acquire a supply that is designed to provide 12v at all of the current I could ever want, so I am selling these. I am told that many people are now discovering that these (screwdriver) adjustable 5v supplies with high amperage are very valuable to have (or to use via the tied-together-for-a-massive-12vdc-supply-thing).

I may keep one, just in case I discover a need down the road! :-)

I'm asking $75. plus actual shipping for each.

Hello I have a complete 440 repeater system for sale duplexers included and ant. and your off and running. system is less than a year

old and still under warrenty. it is a kendercom system and is on
442.350 kendercom will give the buter of this repeater the remainder
of the warranty system has the multifax board in it for voice id and
other opt. interested call me at 508-998-5315 email markbent@bento.org
2500.00 we can talk what might you have to swap with some money for
the unit.
Again my Phone is 508-998-5315 and email is markbent@bento.org

Kenwood Model TS-930S For Sale
Radio is in Great Condition ( still have original manual and boxes )
Picture is Attached
Asking $800+Shipping from Kalamazoo Michigan, USA
```

Specifications:

Transmitter Range:

160 m Band 1.8 ~ 2.0 Mhz
80 m Band 3.5 ~ 4.0 Mhz
40 m Band 7.0 ~ 7.3 Mhz
30 m Band 10.1 ~ 10.15 Mhz
20 m Band 14.0 ~ 14.35 Mhz
17 m Band 18.068 ~ 18.168 Mhz
15 m Band 21.0 ~ 21.45 Mhz
12 m Band 24.89 ~ 24.99 Mhz
10 m Band 28.0 ~ 29.7 Mhz

Receiver Range:

150Khz - 30Mhz

Mode: A3J (USB,LSB), A1 (CW), F1 (FSK), A3 (AM)

Antenna Impedance: 50 ohms
With AT-930 20- 150 ohms (80 - 10 meter)
antenna tuner 30 ~ 100 ohms for 19 Mhz and 24.5 Mhz

Dimensions: 374(14-3/4")W x 141(5-9/16")H x 350(13-13/16")D mm(inches)
Weight with Antenna tuner ~ 18.5 Kg (40.8 lbs)

The TS-930S is a highly sophisticated all-solid state transceiver operating on all Amateur bands between 1.8 and 29.7 Mhz, and a general coverage short wave receiver covering the 150Khz to 30Mhz range. The TS-930S includes many built-in features usually found as extras on other tranceivers. Included are VOX, 100kHz calibrator, RIT, RF attenuator, two VFO's and two effective noise blankers. The TS-930S also includes automatic gain control (AGC), automatic level control (ALC), full - and semi-break-in CW with slidetone, an RF speech processor, speaker, built in AC power supply and an optional built in automatic antenna tuner (which this unit has).
Designed for operation on SSB, AM, FSK or CW, the TS-930S delivers more than 250 watts PEP input. Any complicated electronic device may be damaged if operated incorrectly, and this transceiver is no exception. Please read all of the operating instructions before putting your TS-930S on the air.

Features

160-10 Meters, with 150 Khz - 30 Mhz General Coverage Receiver
Excellent Receiver Dynamic Range
Dual Mode Noise Blanker ("Pulse" pr "Woodpecker")
SSB IF Slope Tuning
CW VBT and Pitch Control
IF Notch Filter

Built-in Audio Filter
All Sold State, 28 Volt Operated Final Amplifier
Automatic Antenna Tuner , Built-In
CW Full Break-In
RF Speech Processor
Dual Digital VFO's
Automatic VFO Step change
Eight Memory Channels
Fluorescent Tube Digital Display
AC Power Supply Built-In

From: red@redpoll.mrfs.oh.us (Richard E. Depew)
Subject: Re: bincancel:8 large binaries:AR1284:@@NCM
Date: 1997/12/08
Message-ID: <ARMM-Report-1284.a@redpoll.mrfs.oh.us>#1/1
X-Deja-AN: 296221690
References: <ARMM-Report-1284@redpoll.mrfs.oh.us>
Followup-To: news.admin.net-abuse.usenet
Organization: ARMM Services, Bincancel Division
Keywords: ARMM - Automated Retroactive Minimal Moderation
Newsgroups: alt.retromod,alt.sys.mac.newuser-help,comp.sys.mac.misc,rec.collecting.coins,rec.collecting.sport.football,rec.music.classical.contemporary,rec.radio.amateur.swap,rec.radio.swap,rec.sport.boxing,sci.astro.amateur

Large binary posts do not belong in unmoderated discussion groups.

Please read this entire message, the Bincancel FAQ, and the complete report (see below) before following up to or responding to this article.

As a service to, and with the cooperation of, other news administrators, I run a program that searches for, and issues advisory cancels for, large binaries in the akr, biz, comp, humanities, misc, news, nz, rec, sci, soc, talk and uk hierarchies.

I have issued 8 cancels for large binary files (average size 269,653 characters - total size 2,157,226 characters) posted to 8 different unmoderated discussion groups in the comp, rec, and sci hierarchies (with cross-posts into alt groups) as follows:

```
      2  sci.astro.amateur
      1  rec.sport.boxing
      1  rec.radio.amateur.swap
     rec.radio.swap
      1  rec.music.classical.contemporary
      1  rec.collecting.sport.football
      1  rec.collecting.coins
      1  comp.sys.mac.misc
     alt.binaries.sounds
     alt.sys.mac.newuser-help
```

The unnumbered newsgroups in the list are not separate posts, but are cross-postings of the articles represented by the preceeding numbered items. Cross-posting may lead to cancels in non-targeted groups as a consequence of the way cross-posts work. A cross-posted article has only one Message-ID. When it is canceled from one group it is canceled from all groups.

This pointer is being posted to each affected group listed above, with the exception of alt.binaries groups. Follow-ups are directed to news.admin.net-abuse.usenet.

If you want to see exactly which file was deleted from a particular group, read the full report in news.admin.net-abuse.bulletins. The full report can also be found in news.lists.filters and alt.retromod. Look for AR1284 in the subject, or, if your reader supports it, use <URL:news:ARMM-Report-1284@redpoll.mrfs.oh.us>.

The criteria used to search for this batch of large binaries were:

```
   NEWSGROUPS: Unmoderated groups in the akr, biz, comp, humanities,
               misc, news, rec, nz, sci, soc, talk and uk hierarchies
               (except for comp.binaries.apple2, comp.bugs.2bsd, and
               rec.games.bolo)
   BINARY: base64, binhex, uuencode, and xbtoa encoded files, etc.
   SIZE: > 100,000 characters [(size * (# of parts - .5)), if multi-part]
```

For more information about binary cancels, see the Bincancel FAQ, <URL:http://www.southcom.com.au/~geniac/binfaq.html>.

Please direct public feedback to news.admin.net-abuse.usenet and private feedback to red@redpoll.mrfs.oh.us. In the interests of preventing cross-posted flame wars, please honor the followup-to header and do *not* cross-post your reply to multiple groups. Thank you for your cooperation.

Best wishes,

Dick

I have a Kenwood TH-79 in excellent condition with KSC-14 rapid charger and SMC-34 speaker mic. I have always used the protective softcase on the radio. I also have two 9.6v rechargeable battery packs. Have original boxes and manual. Will sell as package for $435 shipped CONUS.

I also have a Mirage/KLM B-1030G 2meter all mode amplifier. 10 watts in gets 300 out! Can be driven w/as little as 250 mW. Has preamp. HRO sells this unit for $649.95. Works great. With manual. Will sell for $480 shipped CONUS.

Please email me if you are seriously interested in either of these items.

Hello all... I am looking for an automated repeater controller. I want something that still has tech support and parts available to anyone and everyone. If you have something please let me know asap!!!!!!!
Here is the things i'd be willing to trade:

ic-727 hf + 6meters Hardly been used!!!!

ald 24t vhf and uhf mobile (actually a commercial radio) Works great on amateur bands!!

ic-02at vhf ht

as well as some other misc parts.

if you have something of this nature, let me know and even if your not interested in trading maybe we could work something out. If what you have is not of equal value, i either need $ compensation, or other equip compensation.

Thanks de Rod Ekholm Jr. kc7aad@kc7aad.#ewa.wa.usa.noam

Henry 2K-4 amplifier (2 x 3-500Z), console-style, in beautiful condition.
1200 watts out all day long. Looks like/performs like the day it was
built. Includes spare parts (meter movements, capacitors, etc.) and

instr. book. Local pick-up in NW Florida only; I have no means to ship this beast. Asking $900.00. E-mail to mahlon.r.haunschild @ ac.com for pictures and more complete descriptions.

I only have the following manuals left.........

ALL ARE ORIGINALS (no photocopys)

Kenwood TS-700S	operating manual	$ 8.00
Kantronics KPC-4	oper/tech 93pages	$ 5.00
Henry 2002A/2006A/2004A	oper/maint 23pages	$ 5.00
Ten-Tec # 238	Ant tuner manual	$ 4.00

Kenwood VFO-820	operating manual	$ 4.00
Dentron Clipperton L	operating manual	$ 5.00

Will need extra $1.00 postage on any of the above.

Manuals are clean/complete, most are in mint condx.

Wanted: Kenwood TS-530S Operating Manual,
will pay $15. for a clean original.

For Sale:

DAIWA NS-448 SWR & Power Meter

900 Mhz to 1300 Mhz.

Two Ranges: 0-5 watts & 0-20 Watts

Cross-Needle type complete with external

pick-up unit model NS-448U that has type N

female connectors. This external pick-up has

4 feet of cable, that plugs into the 5-pin DIN

connector on back of the meter unit.

Meter has a light and can be hooked to 12vdc,

if you want to have it illuminated.

** It's all like new in the box **, only used a couple

of times back when i was nuts about vhf/uhf contesting

and had a 903 Mhz station.

Originally cost about $175. ....need $100.00

plus $3.00 to ship USA/48

Email - Me   n8lmt@usa.net

Hi, I have a Kenwood 3-watt 2M HT for sale.

It has a Ni-Cad battery pack, "rubber duckie" antenna, manual, and a carry cord. The keypad is a little faulty, but otherwise is in good working order.

I will throw in a repeater directory from the ARRL as an add-in.

Name your price. Thanks. Tom.

```

For Sale:

Like new Cushcraft R-7000 vertical antenna. Used 9 months and then taken down, when I moved. No place to put up at the new QTH, so need to liquidate. I have done all of the hard work by tuning and marking the antenna so that all you need to do is put it on a pole and you're ready! It's in 3 sections now. Would prefer a local (Dallas, TX) sale, but will consider shipping.

Worked great on all HF bands 10-40. I have the manuals. Asking $300 plus shipping.

73,
Glen Kitto

I have a three tube (8874) model ETO Alpha amplifier for sale. It has the low drive option installed, so about 50 watts drive on any band gives a full 1500 watts out. The amp will deliver 2200 watts++ in to a dummy load. This amp is near mint inside and out. The tubes were replaced about 2 years ago at a cost of nearly $1500. They are Eimac ceramics, very heavy duty, and should last another 15 to 20 years in normal operation. The amp covers all bands 160m-10m including warc. A small mod would have to be done to the choke coil if you wanted to cover 12 meters. This amp will deliver 1500 watts out all day long and night with ease.

Please email me directly if you are interested or have any questions. I will split shipping costs on any sale that requires it, but I would prefer a pick up here in New hampshire.

The price is $1500 FIRM.

Hello...

Looking for a VHF Motorola Spectra. Must meet the following:

128 Modes, 136-168 split, A4 equipment (knobs for volume, mode), trunk-mount two-piece,
no less than 50 watts power (preferably 110 watts), dtmf mike, all accessories included
(speaker, control cable, etc.), excellent physical and working condition.

Please email specifications and prices.

Thanks in advance,

Sean Douglas

Hey moron - how many times are you going to post this ?
And if your going to keep on posting it a dozen times or so
How about telling us the fucking price ? Or better yet maybe the serial
number and I can run it thru NCIC

GEEZUS!

I have TWO Motorola GP300 UHF 438-470 2ch portables.
One is in good shape, other is a bit rough. Both work excellent.
Both have rapid chargers, and I will program to your freqs.
First $300 takes them both.

Email if interested.

Where I work we call it 10-99 (stolen). $400.00 for a brand new radio
with 32 channels? Yea right! The PORTABLES that we just bought were
1100.00/each and they only have 16 channels. Something isn't right.
Hey John what is the serial number?

Sounds like some goverment agency got ripped off
Ht1000 16channel radios retail much less how about $800 or less
You can buy a new Mobile Motorola 1225 20-25 channel alpha readout for $500 new
if anything his price is high
Get you numbers straight.
Doug

I agree that $400 is a little low for this radio, but $1100.00
for a conventional portable is very high. If the portable
has options, such as encryption, or if it is a trunked radio
that price sounds OK. The number of channels alone does not always
give an indication of worth.

It would be good manners if the guy would post a price.

John

We use Motorola Astro Digital Trunking. Each came with a car booster
kit, 3 batteries and a collar mic. Sound Better?

Are there any mods for the old Pro-42 scanner that Radio Shack used to sell? I'm giving away my old one to a friend's son for x-mas, and want to spiffy it up. I'm mostly looking for how to remove the gaps it currently has to allow it to cover everything between 30Mhz and 512Mhz, or at least add 66Mhz - 88Mhz to current freqs without loosing any. And, if it's possible to increace the scan speed without sacrificing quality.

If anyone has any info on this, please e-mail me.

Hi guys, I still have some great Ramsey kits I got from buying out a distributor at a hamfest this summer. They are all current late model kits, many HAM kits and some general electronics.
Great for that Christmas gift or to built with your son, just like the old days!

For all those with nothing better to do, but say that the radio is stolen let me inform you. The MaxTrac was purchased from a Motorola shop on a trade and the guy owed me a favor. The radio itself was built by that shop from NEW PARTS that were aquired when someone went out of business. $400 is not a bad price for a radio that has never been used except for programming. All of this considering that it is 32 Channels and you are getting a DTMF mic., a regular mic., an external speaker, mounting brackets, power cable, and programming cable. If you don't want the radio then fine don't buy it but don't hurt the reputation of an honest post. I posted the article once every few days just in case the server killed the message due to so many other posts in the news group. I f you got it 10 times then I appologise, but that means that you don't read the group offten. I am only trying to sell a radio that I am not using. I thought that this was the purpose of the group!!!

Hello...

I am looking for the following:

Crystals for Bearcat III Crystal Scanner in the following frequencies:

146.760 MHz
146.640 MHz
145.390 MHz
147.120 MHz
147.210 MHz
52.680 MHz
162.400 MHz

These must be in working condition with no broken leads.

Please email with prices.

Thanks in advance,

Sean Douglas

I've seen them used as low as 50.00 Canadian!   Lakeshore Electronics
In toronto converts any old maxtrac to be what ever model you want.
Including a 32ch LTR or Motorola type II.   Even at their price of
300.00 for the mod You can still do better.

Maybe even do it yourself!

them to any model you want. On Sun, 23 Nov 1997 13:20:11 -0500, Tom

Looking for any voice automated repeater controller. Can be of any sort of
model or make. Must have cwid as well as the voice automation, and must
have at least 2 ports.
Please reply to: kc7aad@boink.net

Would like to trade some equip for this item if you have it..
Have to trade items:
IC-727...................................HF +6M
IC-W2A.................................2/440 HT
ALD-24T................................150/450 Mobile commercial dualbander
(Does Amateur)
And other misc Motorola Radios of the 1970 and 1980 vintages (Mocom 70, VHF
Micor
(1 only)), as well as some other old G.E. radios. Some have controll heads
and some don't.

I doubt you will be able to add much frequency coverage to the '42.
And as for adding 66-88 Mhz(midband)-don't bother....you have to disable
30-54 coverage to get the 66-88-you can't get both at the same time.
Even if you did not mind using 30-54 coverage, the tuned circuts are not
tuned properly for 66-88-in fact not only is the tuning different, but
several parts have different values on a unit designed to operate at
66-88.
Also, in the USA, those freqs are mostly used for TV audio, wireless
mikes, and audio enhancement devices.
Almost all of the above use WFM.
Since the PRO-42 can not receive WFM, you would get a rather distorted
result.

I have come to own AF67 & AF68 transmitters and a PMR6 receiver from
Multi-Elmac and would like to restore them.
As I await their arrival, can anyone provide the list of tubes so I may
begin prospecting for a full set of replacements, please?
Also, copies of manuals for all three would be very helpful!
And ... a power supply!

_·_· _ _·_   _ _· ·   ·_ ·_ ·_ _ _ _ ··_· ·_

I need your collective "elmer" counsel as I am looking for a solid HF rig
in the process of rebuilding my shack.
The only semi-modern rig with which I am familiar with is the ICOM 735.
What other ICOM, Kenwood & Yaesu rigs are similar that are in the
same $500. and lower used price range?

Key issues:
1. 160-10
2. WARC Bands
3. Better than double conversion receive.
4. General coverage ok, but not necessary - I'll get a shortwave radio!
5. RIT, Notch, Passband helpful (Though I am getting a NIR-10 to 1help
kill QRM and QRN! I needed similar help with the 735.)
6. Quick tx/rx switching for digital modes, pactor, packet, etc.
7. External 12v power supply vs internal supply - preferred, but
    not absolutely necessary (I'm planning to use a deep cycle or gel
    with float charger - filtered to keep out noise)
8. SSB (usb & lsb), CW (AM or DSB for 75, and FM would be nice with a
    transverter for 6, 2, etc. some day)

9. A few memories, nice, but not necessary (not operator memories,
    frequency memories :-)   Come to think of it ... never mind!)
10. Decent shape, but need not be museum quality.

Thanks for guidance, offers, etc.!

Well the Yaesu FT747 is nice, so is the Kenwood ts440
The 440 is a better radio than the 747, but the 747 is a piece of cake
to use..

TS-690S in mint condition. No mods, factory filters, no tuner.
It does have the Tone encode board installed for 10 & 6m repeaters.

First $950 takes it, COD.

PRO-26 "hyperscan" scanner for sale!

For a detailed feature list see the following URL
http://support.tandy.com/support_electronics/doc17/17719.htm

For a GREAT picture go here
http://www.demon.co.uk/javiation/pro26.html

Great scanner in PERFECT condition. No scratches, no scuffs, no marks. No ink worn off the buttons, no logo's worn off the case. Comes with charger (not included at time of purchase) and 4 AA rechargeable batteries (these were not included at time of purchase) and a rubber duck antenna. Has a clip to go on your belt.
Scans 25MHZ to 1.3Gig ALMOST SOLID! It is missing the cell phone freq.'s but I can tell you how to modify it so they can be received. I have 5 pictures and specific instructions on how to do the mod.

It's called a "hyperscan" because when you hit the hyperscan button you can scan through a band... say 155 to 160 MHz at 10Khz steps in about 5 seconds... WOW, you don't miss anything.

Also when you do this kind of a scan, sometimes there are channels that have "garbage" that always catch your squelch, and stop you dead, well you can just hit a button and to "skip" up to 50 of these. Very handy when your scanning a range and there is garbage right in the middle. You can find more stuff faster this way.

up to 200 memory channels in 10 banks... so you can choose to scan 20 channels with the touch of a button. Great when you drive through different areas, and you need to switch over quickly to a different set of freq.'s.

keylock button, so you can stick it in your pocket and not change any settings.

The cool thing about this scanner is you can choose the "mode". Like AM, FM, WFM (wide band FM for listening to radio stations, and even some public service stuff).

It has a attenuation setting that can be set for individual channels, so you don't have to crank you squelch up just because one channel has a little noise. Just hit shift-attenuate on that channel, and the others don't have to suffer.

IT AUTO-PROGRAMS!!!! You give it a bank to work in, and give it a range to scan, and when you come back.... It has recorded all frequencies that have made any noise since you left. This is especially handy with a VOX (voice activated) small hand held recorder (which i will include for another $40 dollars with charger and a few micro-tapes).

I will include TONS OF PAGES of secret freq.'s that I have discovered (FBI, CIA, ATF... etc).

This is a scanner for "the big dogs". Nothing wimpy about it.

I bought it new for 450 + tax + charger + batteries.
Will sell for $375.00 shipped UPS ground at my expense ($40 bucks more with the micro-VOX recorder, charger and tapes, i'll even throw in the

batteries)
INCLUDES MANUAL!!!!!!
INCLUDES DOCUMENTATION FOR THE MOD
Or just look here =>http://w5gb.nmsu.edu/kc5kto/mods/pro26cell.html

I am reminiscing after receiving the latest Swan Net newsletter and would like to acquire a Swan rig again.

I am looking for a rig that doesn't have to be museum quality (I intend to use it!), needs to be at least marginally functional (I'll tinker with it over the winter), must not have been "hacked" (modified, rewired, drilled, etc. - don't care if 3-sided case cover has been poorly painted or is scratched, I can repaint that, the face needs to be reasonably intact)

I want only one of the following, and in this order of preference (from most to least wanted):
750
500CX
500C
350D
Others considered.

Price IS an object! This is to be my toy rig and I have very limited financial resources. Value will be assessed to include the condition of the finals, physical condition, operating condition, shipping cost (I'm in

So. NH), etc.

I Also Need A Power Supply (Preference in this order):
Swan 117XC
Swan 117C
Galaxy PSA-300
Galaxy AC-400
Hallicrafters PS-500
Galaxy AC-384

Other Accessories Sought:
WM3000 Wattmeter
FP-1 Phone Patch

Thanks for any offers, or suggestions of sources!

I recently received an HT1000 VHF that I no longer need.

MDL# H01KDC9AA3DN
SRL# 402AWYE803

16 channels
TPL/DPL
Scan
The radio is in great condition.
All the usual stuff. Comes with antenna, Ultra High Cap battery(ntn7144), and rapid charger.

I do not know the exact value of this radio. I have sold a few UHF HT1000
radios on this group in the $325 to $375 range. Is the VHF model similarly
priced?
I'll take the best offer over $300.
Email if interested.

Dan

Wrong! The Yaesu FT-50RD and the VX-1R support DPL. Even the Yaesu
FRS radio supports DPL. Yaesu calls it DCS, but it's the same thing.

Just so you know......DPL is only a "Digital Private Line" squelch control. It uses a continuous digital pulse instead of a sub-audible tone to control the audio squelch. It is NOT a audio encryption system. If you have the capability (i.e. a Motorola repeater with DPL) you can use it on the amateur band. You probably won't get any others using the machine unless they have a commercial type radio and have the proper digital code programmed for the repeater.

Cc: postmaster@mnsi.net, 5slpq5$1c9@news.avci.net

Jim,

There is no "pulling" here, just the chance for you to set things right. The rotor you sold me as "mint" was a sanatized junker. You knew that when the unit was opened and the motor was replaced.

Read your own words from August 26th. In response to my ad looking for a T2X and in plain English you tell me "...It is 5 years old and only used for contests about 6 times and outside about two days each time". On good faith I sent you $350 and received the rotor. When it failed to operate I opened up the cases and discovered what you had sent me. After failing to get a reply from you I did a bit of digging in the rec.radio.archives. I discovered three of the postings by you dated August 11 stating "...tower is about 11 years old and is in perfect condition, it is topped by a 20 foot heavy duty mast. items that go along with the tower.....Hy-gain/Telex "Tailtwister" rotor and control box".

How do you explain that? Telex confirmed that the unit with your serial number was manufactured in 1985. Where do you get five years? And how do you get "mint" from a unit that has been out in the weather for eleven years? I am sorry, but I don't buy the line that a ham tested this unit for you. If this were true, you would have had him contact me to verify the serial number and his testing.

I will afford you a copy of the bill when the rotor is returned from Telex. This will show you the condition, cost and resources required to repair the unit. The bill will includes the serial number of the rotor you sent me and you can compare it to your records. This will take about two weeks and buy you some time to get the money together. I will continue to persue recovering my money from you until this matter is settled. I am not going to let it slide, it is a matter of principle now. I hope you will take this opportunity to right what happened before it becomes embarrassing for each of us. It is simply not worth

$107.....

If you want to discuss this matter further, call me.

Thanks,

Bill

Hello Bill
Thanks for your interest in the tailtwister rotor. It is 5 years old and
only used for contests about 6 times and outside about two days each time.
Was mostly used on a 4 element 6 meter beam or three element tri bander.
The rotor is just like new.
My address is James Meyers   5883 E. Galbraith line rd.
Croswell Michigan 48422. Shipping shouldn't be more than about $15.00.
Drop me an email if you want me to hold it for you.
I live in canada but I work in the states and that is my work address.

For Sale:
66 foot Self Supporting Tilt-Over Tower, VERY HEAVY DUTY....
this tower is about 11 years old and is in perfect condition,
it is topped by a 20 foot heavy duty mast.
items that go along with the tower.....
Hy-gain/Telex "Tailtwister" rotor and control box
KLM KT-34 4element HF Beam, about 8 years old...
cushcraft 2m and 220mhz yagis, and 2m AEA isopoles...
hundreds of feet of belden 9913 coax, rotor control wire etc...
I am moving and can't take this with me, this is all being
offered at the sacrafice price of $800.00 Canadian...
however, you must take it down, and remove it by August 30th.
if your interested give me a call at 519-542-8529 evenings, or
leave a message at 810-679-3535 anytime.
The tower is located at 874 Rosedale Drive in Sarnia, Ont.

73,
Jim Meyers NM8X/VE3
e-Mail nm8x@mnsi.net

Jim,

Perhaps I wasn't clear enough for you.

You advertised the rotor to be five years old. It was manufactured and purchased eleven years ago.

You claimed in your e-mail to me that you used the rotor only occasion in a portable mode for contests. In three of your Newsgroup ads you state that it was used in the heavy duty tower for eleven years to turn a HF and VHF yagis.

You claimed in your e-mail to me that the rotor was in mint condition. The brake wedge was locked to the housing by corrosion. The lower ball bearing race was damaged by rust from water damage. The two upper ball races were severely worn. Telex has inspected the rotor and confirmed the age and serial number to be true. Telex also confirmed the serial number and date of replacement motor previously installed.
Telex described the condition as poor. To make the unit functional they will be replacing the brake solenoid, wedge-slide, lower housing and all ball bearings.

Now you tell me a friend checked it out for you, yet you don't say who. And, to top it off you try to make me feel foolish with your comment about freezing in shipment.

I am going to offer you an opportunity to correct what you have done to me. I have paid Telex $107 to rebuild the unit. I expect you to send me a money order for $107 within five working days. Or, you may send me a $479 money order for the original purchase price of $350, plus $22 for shipping and $107 for Telex, and I will return the rotor to you.

If you elect not to right this matter, I will seek damages, legal fees and costs to recover my original purchase and the repairs from Telex. According to your State Attorney General's Office your nine postings and e-mails place this matter within the statutes of interstate mail fraud. From my attorney's advise I am fully confident that your Small Claims Court will award on my behalf. I consider your actions to me to be a personal affront and I will devote whatever time and money it takes to pursue recourse. Please understand clearly, if I let you get away with this I will eventually become vulnerable to everyone I do business with. I hope you don't let this happen over $107.

Sincerely,

Bill Cotter

>
>

Jim,

I have sent you repeated requests to contact me regarding this purchase. I feel that you deceived me with the business of the rotor being 5-years old. I found your add suggesting that it was over 10yrs old as the serial number indicates. I expect you to contact me within 5-working days or I will pursue taking legal action against you.

Bill

Jim,

I am disappointed with the T2X purchase I made from you based on your description of: "It is 5 years old and only used for contests about 6 times and outside about two days each time. Was mostly used on a 4 element 6 meter beam or three element tri bander. The rotor is just like new."

I sent you an e-mail below expressing my concern of the age of the unit versus your statement above.
You did not reply and I am not surprised.

Since that time I was been unable to get the T2X to operate. With all connections properly made and a TELEX service technician on the line, the problem was traced to the rotor unit itself. I removed the six bolts and split the motor housing to discover the entire bottom half of the unit was corroded and the lower ball bearing race was rusted beyond repair. The brake wedge was frozen in place and would not allow the unit to turn. The upper races were worn sufficiently to lead me to believe this unit was worn well beyond the paint job. The fact that a new motor was installed tells me that the condition should be no sup rise to you, if in fact you are the original owner.

I have sent the unit to TELEX for a total rebuild at their suggestion. The cost will be $107 including shipping. I would appreciate a check for $107 to restore this unit to the mint condition that you originally described it to be in. If you wish to discuss this matter further, feel free to call me at home 606-887-5563 or at work 606-323-6474.

Thanks,

Bill N4ALG

Jim,

Received the rotor Friday afternoon when I got home. Appeared to make it OK, you packed it quite well. I haven't tried running it, but will do that today.

I was a bit disappointed in the age of the unit. From our e-mail correspondence, you led me to believe it was only five years old and in good condition. The serial number indicates that it is almost 12-years old (manufactured in 1985). I hope the mechanical condition is as stated. I suppose I'll find out when I open up the housing. The price to have a T2X rebuilt is very reasonable and I would expect this rotor to be in as good a condition as a rebuilt unit. If what you said about using it only a few times and never having it permanently mounted is true, then it should be in mint condition internally. Otherwise, I feel you and I will need to renegotiate the deal to reflect the true age and condition.

Thanks,

Bill

Yaesu has finally started to offer DPL tone on amateur equipment. I
think the only one so far though is the FT50 dual band radio.
Hopefully others will soon follow suit.

If you want a truely private repeater, DPL is, for now, the way to go.

"Dave Clausen" <dclausen@worldnet.att.net> wrote:

i agree with bill cotter. after reading all email messages
that the two of them had sent to each other, found that james had indeed lied about the rotor. a rotor doesn't
leave one house in mint shape and five years old and show up in another house,
12 years old and beat up..

james do the right thing!! cause if not im sure it wont be forgotten and no one will buy from you again..

Hi Cole and Kathy,

Yes there is a difference. If you are considering using ctcss on your machine, and it is for general amateur consumption, then the only item to use would be a conventional "PL" board. The use of a ''DPL" board would all but eliminate the use of your repeater by most individuals. There are 1000 positive and 1000 negative going "DPL" codes to choose from. Some of the newer ham rigs now are equiped with "DPL." If you don't have a real "lid" problem then your best bet is going to be the use of the former.

Cole and Kathy <kc5swi@flash.net> wrote in article

For Sale: I have two antenna tuners...

1) Dentron "Jr. Monitor" -- Compact size makes it excellent for QRP or power up to 300 watts. Covers 80 thru 10 meters. Size is about 2 x 6 x 6 inches. Looks like new with manual. Rugged design and built to last. $45 + Shipping on 3 pounds.

2) MFJ-969 Roller Inductor Tuner -- Has built-in 300 watt dummy load and antenna switch. Like new and still in the box. Excellent HF tuner! $110 + Shipping on 6 pounds.

Thanks,

Steve WA9FDZ (ex WB9KEV)

Newsgroups: rec.ham-radio,rec.radio.swap,rec.radio.amateur.swap,rec.radio.amateur.equipment,rec.radio.amateur.boatanchors,rec.radio.amateur.antenna

For Sale:

1) Hustler 6BTV all-band (60 thru 10 including 30M) vertical antenna. Used 1 month and then carefully disassembled and put back into original box. No damage, clean, works great. The wife just didn't like it sticking out of the ground in the back yard. $110 + Shipping.

2) Bencher BY-1 iambic CW paddle. Very good condition. $40 + Shipping.

3) MFJ-564 iambic CW paddle. Like new in original box. Chrome plated base, red paddles. $40 + Shipping.

4) MFJ-1272 MYV packet/microphone switch. This accessory allows you to have your TNC and mic hooked to the rig at the same time. A front pannel switch allows you to change between the TNC or Mic wit the push of a button. Also, the 1272 makes it easy to hook your KAM to a Yaesu without any soldering. Includes necessary cables. Like new in original box. $25 + Shipping.

5) B&W "Model 600" Grid Dip Meter. Excellent diagnostic and design tool. In very good condition. Includes coils covering broadcast to 240Mhz, wooden case, manual, spare tube. $45 + Shipping.

6) SURE 488T Noise Cancelling Microphone -- Transistorized hand mic that is FAA certified for Aircraft application (TSO-C58) Frequency response from 200 to 4 KHz. Low impedance dynamic (100 to 220 ohms) element. With Neoprene coiled cord and data sheet. Ready to be wired for your application. Used, but clean. $25 + Shipping.

7) TUBES -- Quantity of 96 tubes. 37 of them are in original tattered JAN boxes. Numbers like: 26C6, 6CZ5, 6DJ8, 6BL8, 6B8, 12K8-Y, 12SK7, 12A6, 12SQ7, 6J5, 12SR7, 6L7, 26V6, 26A6, 26FZ6, 26D6, 6AL5, 12AU7,

6AJ5, 12SA7, 12SJ7, 12SA7Y, and one (1) 4X150D transmitter tube. All tubes have been tested on a TV-7 military tube tester and found to be good. All 96 tubes for $40 + Shipping

Thanks,

Steve WA9FDZ (ex WB9KEV)

For Sale:

GE Mastr II repeater 100W continuous on 440MHz. With S-Com 7K controller which supports 3 rcvrs & 2 xmtrs. Has 7 sense inputs and 7 control outputs for remote base/site control, etc. Built in autopatch with autodialer, etc. External CTCSS control. Supports Doug Hall RB-1 interface for HF/2m/220/440/1296 remotes. Also included is a GE Phoenix-SX synthesized remote base/link xcvr on 440MHz and capable of 16 ch's. I will program the SX to buyers freq plan. In 30" Deskmate cabinet with doors/locks. Very clean and 100% functional. Located in midwest. Best offer or trade.

Hello

I'm looking for crystals to put in a Maxon CP-0510-P (I think that's the model) handheld radio.

This is for some radios used at a local business here, and I'm unsure what frequencies these are on now, but I'm sure they are in an unlicensed business band. The radios were purchased with three frequencies set, and have a fourth position open.

Getting to the point:

Where is a good source for these crystals?
(Well-known and on the net preferred, but whatever...)

Do these require "Maxon-type" crystals, or does one fit all?
(No, I wouldn't recognize a crystal if I sat on it...)

Anyone have an idea how to replace the crystals in these things? We took the battery pack off the back, and found a flat metal plate with several screws holding it in. Do we remove it to reach the crystals? Go in another way? Am I braindead, and this radio not use crystals?

Any help would be greatly appreciated!
Rich

Hello all,

I am looking for an _affordable_ 2M all-mode (SSB-CW-FM). I used to have an Icom IC290H that I would like to find again. Please, no dual band satellite radios, I can't afford one, yet!

Please email me at: k3tz@nauticom.net

Also, would you consider a trade for a mint condition Icom IC281H?

Thanks for reading & 73,
Tim

I inherited an antique Hallicrafters SX-28 "Super Skyrider" receiver. Not being a ham, I realize that I'll never use it for anything, so I've finally decided to try to find it a good home.

For the uninitiated, the SX-28 is an antique shortwave receiver with enough dials on the front to run a nuclear power plant singlehandedly, and its construction is sturdy enough to do a tank proud.

I don't know exactly how old it is, but the manual (which includes full schematics), is dated November 1, 1943. The front cover says "frequency range - .55 to 43 megacycles."

Part of the tuning knob is broken off, but the unit seems otherwise to be in excellent condition. All the dial/knob captions are like new, the glass in front of the dials is intact, and the whole case is in prime shape. My uncle must have really taken care of it; If you didn't know, you'd never guess how old it is just by looking.

I don't really know how to use an SX-28, but when I plugged it in, I heard shortwave stations, even without an antenna attached. So it looks like the electronics is all functioning.

It comes with the original manual, and the original separate speaker and speaker cord (the speaker cord is thicker than the power cord!).

This receiver is obviously obsolete by today's standards, but it may provide hours of fascination for the right hobbyist.

I've attached a .GIF image from my Quickcam, so you can take a fuzzy look at it for yourself. The speaker is visible sitting on top of the receiver.

I'm looking for $300 plus insurance and shipping from the Boston area, but I'll listen to any reasonable offer. And you have to promise to give it a good home :-).

Regards,
Mike Gilbert

I've never heard of this model... how old is it, and how highly rated?

Just curious, how many people have had cop trouble with that radio, since
```

it loks so much like a traditional scanner, that can pick up police frequencies. It can not, which can be verified on the back of the radio, the frequencies covered are listed there, but a cop could easily give one a hard time anyway.

I purchased this radio from Tom back at the first of the month, and returned it to him. Here's a copy of the email I sent him when I received the radio:

Tom,

I received the Pro 80, but Its not working properly. I have canceled payment on my check to you for $200, and will return the radio to you. When I opened the battery compartment to install batteries, a case scew fell out. At that point I noticed the two case screws on the back were missing completely. Upon powering up the radio, I found the display to be off frequency by 5 khz in the am narrow mode. I receive wwv at 4995, 9995, etc. It appears someone has been inside the radio, and has gotten the alignment off. Send me the address where you would like thew radio shipped, and I'll send it back to you.

Doug

Tom was _very_ reluctant to take the radio back, but I really didn't give him a choice since I did stop payment on my check. I would recommend to anyone considering this radio to check with him and confirm that the radio has been repaired and the case screws found.

I had an ICF PRO-80 for years and the AM/SSB AGC chip gave out; the radio starts squealing on any moderately strong signal.

I replaced it with a Sony 7600G, which, at ~$170, is a much better radio for SW AM and SSB reception. Much more sensitive, and about as selective when the selectable AM sideband feature is accounted for. Wont pick up VHF, but the converter thingy on the PRO-80 was a kludge anyway.

I saved the parts from the PRO-80 and plan to turn it into an RF signal generator someday.

A friend of mine is has a Drake MN2700 Matchbox that he loves, but it is missing a SWR Bridge Circuit Board. The meter is there but the board is gone.

If some one has a unit thats not working that wants to sell or a copy of the diagram for the board we may have a match!

Please email me and I will get any responce to him.

For Sale: Heathkit SB303/SB401 Pair. This has been my main rig for 8 years. The two radios work together as a transceiver.

The 303 is solid state and has the 400hz CW filter. The cabinet has some wear, but the front panel is unblemished. It is in great shape electrically.

The 401 is in good shape as well. Its cabinet has more wear than the
303, but like the 303, the front panel is unblemished. It works fine
on all bands. I have the original manuals for both radios.

My price for the pair is $250 plus shipping (or pick up. I am in the
Washington, DC area.) I would prefer not to sell them separately.

Now that the new Drake R8B super receiver is out and it has a five
star rating from Passbook to Worldband Radio, you will see a lot of
older Drake R8's for sale.   Price will only go Down.

Hi;
A fellow ham has sparked an interest in me when demonstrating an
Eddystone VLF receiver. I was amazed at the amount of activity below
600Khz!.
I would be interested in purchasing an older vlf receiver if anyone
has one in the Ontario, Canada area.
'73 de ve3slj. Gabe.
please email me at gabe@NOSPAMnortel.ca <-remove the NPSPAM please.

The phone number listed has been disconnected, and it appears that K4BOV now lives in Corning, NY.

Thanks to David for the information, just sorry is is now outdated.

What are fair prices to pay for the following?

2 Meter Kenwood TH-205AT Charger, antenna, extra microphone, 2 batteries.

2 Meter Realistic HTX-202  Charger, antenna, extra microphone, 2 batteries.

10 Meter Realistic "mobile" type radio. Has preamp.

Hi,

Thanks to a kind person I now have my Heathkit clock. The only problem is that it came configured for 24 hour format and I haven't been able to figure out the jumpers to change it to 12 hour format.

If you have a manuel for this unit or know what needs to be done please
email me:

deaconone@teleweb.net

Thanks for taking the time to read this..

Kerry

Hi there,

I am really in the need for either a original IF for programming a
Motorola GP300 or a substitute for it ....

Or is it something i can use to program channels and funktions ...very
easy??

Regards

Ola Larsson

radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.swap

I have for sale an Icom IC-281H 2M mobile radio. This radio has been mobile about 2 times. The rest of the time it has been my packet radio. I operate packet about 3-5 times a year whether I need to or not.

This radio has the extended receive modification (done by me) only. This opens up the RX capability to 118-135.995 MHz AM RX and 320-479MHz FM RX. Out of the box the radio covers 144-148MHz TX/RX and 440-450 MHz RX.

The radio is in mint, like-new condition and comes with the original box, manual, power cord, hand mike (HM-77) and mobile mounting bracket.

AES is currently closing out these radios for $379, I'd like to get $280 for it.

Please email me if you are interested.

Don't care how many channels. Just has to be the UHF SX model.
Email if you have one forsale and bottom-line-it.

Thanks,
Dan

I have a beautiful "like-new" 775DSP which was purchased new and
includes all extra CW and SSB filters, voice synth module (UT-66) and
high stability osc unit (CR-282). Will sell for $2,750 OBO. Also have
the SP-20 and SM-20 which I can sell separately or make a package deal.

I have some Johnson Fleetcom II 880, transceivers that operate in the 800 MHz range. I am looking for a service manual for these units.

The numbers on the units are:

0880A039A
serial numbers in the range of 83400

73,
Terry

I have the following for sale:

1) Kenwood TL-922a amplifier, w/10meter mod. Absolutely beautiful condition. Full output. Have original box, manual, service manual. This amplifier is very nice and
NO I DO NOT SMOKE!!!!!!!!
I got a new amp and do not need 2 or I would keep it.
Asking $1,100 or I will take offers.

2) Kenwood TS-120s. This radio is in excellent condition and works very well. Has the large mobile bracket, hand mic, and power cord. Asking $350 or offers.

3) Gap Titan DX antenna. I just put up another tower and wife says something has to go, so this antenna is it. It is an excellent 80-10 meter vertical that I have been very happy with. The antenna is 4 months old and is still on its ground mount. I will bring it down and disassemble it for shipping. Asking $250.

Thanks for reading my post and reply to me at the E-mail address below.

     qty 1    HT50 154.6 MHz
     qty 4    HT90 154.6 MHz
     qty 3    HT90 154.57 MHz
     qty 1    HT50 154.6 MHz (spkr & mic missing from faceplate)
     qty 1    HT50 154.6 MHz (top is cracked up, spkr but no mic)
     qty 1    HT90 154.6 MHz (spkr & mic missing from faceplate)
     qty 2    HT90 shells (body only, no faceplate) one new
          in plastic, one used

     qty 1    NTN4864B charger
     qty 6    NLN7646A charger
     qty 6    NTN4864A charger
```

qty 14	NLN7434A & similar batteries
qty 1	NTN5453A battery
qty 13	BNC whip antennas various lengths
qty 1	HT50 screw in antenna

I would like to sell all this together if possible. The chargers are in decent cosmetic shape, some have marker writing on the front. The radios are somewhat more beat up. All of the radios were used for data transmission, all have had the accessory jack removed. Some have a short coiled cord with a strange connector in place of the jack, some have nothing at all here. I have tried most of them, however, and they all seem to function anyway. The condition of most of the batteries is unknown; I charged up a few to test the radios, that's it. Because of the condition of this equipment, I offer no guarantees on it.

===

HP 1222A Oscilloscope $100 OBO + shippping

Not working, possible problem with sweep generator. When you press the beam find button, you can see the beam sitting there in the middle.

I have heard recently that 2 men have been attending NJ Hamfests
claiming to be State Tax Agents. Several aspects of this operation
indicate that this may be a hoax.

I would urge all hamfest sponsors to contact the State Police immeiately upon eeing these people arrive. If they are truely State employees they will have no trouble meeting the police.

More likely they will run and you will need to record a license plate number for the poice to trace.

Why do they seem suspicous ? Because they are asking to be paid your sales tax in advance on merchandise you have not yet sold and they are providing you with their own estimate of its value and tax. They tell sellers to apply for a refund of what they have not sold.

KB8EE's 10 Minute ID'er. A software id'er written for Windows 95/NT only.
This program will not work in Windows 3.1!

The id'er allows you to display text of your choice in a window that also displays the current time of day in am/pm, gmt, military(24 hr) or zulu. The window also displays the time remaining until ID time. If the form is minimized the time remaining is displayed on the task bar.

The current time, and ID times can be announced through your sound card if you so desire.

Try it for free.

A base 64 decoder such as SJHb64 will decode it.
Just save all the parts into one file and use the decoder.

Barry

Excuse me, but do you mean Ham Swap-Meets? A Ham-Fest would be more like a big yearly convention, which is not what you seem to be talking about. I don't mean to nit-pick. I'm just trying to understand what you meant since NJ used to be my home state and I still have ham friends there.

> claiming to be State Tax Agents. Several aspects of this operation

NJ State Troopers actually, but if you want to catch them in the act, the municipal PD would more likely have jurisdiction and be quicker to arrive, unless it is outside of the city limits. Event authorities should know who to call. Do they have security guards at NJ ham events?

> immeiately
> upon eeing these people arrive. If they are truely State employees they
> will have no trouble meeting the police.

Agreed... they also shouldn't have a big problem if security politely detains them until the authorities arrive. :)

> More likely they will run and you will need to record a license plate
> number for the poice to trace.

Unless security detains them.

> Why do they seem suspicous ? Because they are asking to be paid your
> sales tax in advance on merchandise you have not yet sold and they are
> providing you with their own estimate of its value and tax. They tell
> sellers to apply for a refund of what they have not sold.

NJ Sales Tax is always based on the price you charge for an item, NEVER on some arbitrary estimated market value. Also NJ Sales Tax is a fixed percentage.

If they are doing as you said, they are definately imposters and I'd detain them, by force if needed.

I've forwarded a copy of this to Bob Shelton, a friend of mine who is a retired Judge from New Jersey and an experienced extra class ham. He may be interested in this bit of news. I'm also sending a copy to Amateur Radio Newsline, in case they want to contact you and/or include an advisory to NJ hams about this in one of their upcoming weekly reports. Besides, these alledged crooks may be working more than one state.

```

No doubt the reader. Some readers believe that - if you wrote it -
you don't need to read it...

==

Motorola Radios & Accessories (see below for more info)

$400 shipped for the lot

qty 1	HT50 154.6 MHz
qty 4	HT90 154.6 MHz
qty 3	HT90 154.57 MHz

several partially assembled HT90s and HT50s

qty 1	NTN4864B charger
qty 6	NLN7646A charger
qty 6	NTN4864A charger
qty 14	NLN7434A & similar batteries
qty 1	NTN5453A battery
qty 13	BNC whip antennas various lengths
qty 1	HT50 screw in antenna

I would like to sell all this together if possible. The chargers are in decent cosmetic shape, some have marker writing on the front. The radios are somewhat more beat up. All of the radios were used for data transmission, all have had the accessory jack removed. Some have a short coiled cord with a strange connector in place of the jack, some have nothing at all here. I have tried most of them, however, and they all seem to function anyway. The condition of most of the batteries is unknown; I charged up a few to test the radios, that's it. Because of the condition of this equipment, I offer no guarantees on it.

==

HP 1222A Oscilloscope $100 OBO + shippping

Not working, possible problem with sweep generator. When you press the beam find button, you can see the beam sitting there in the middle.

Matt,

Welcome to the hobby!

I think that the only rig currently available that has HF, 6M, and 2M is the IC-706. There is an earlier version that is now discounted to around the kilobuck range if you can find it, or look on rec.radio.swap for a used one. I'd go for the latest one, though, and get all the fixes.

The other choice is a decent HF rig and transverters, but your budget doesn't leave much wiggle room for that route. I operate on HF with one rig, on 6M with a rig that is HF+6, and on 2 with a nice 2M rig. I've been accumulating this stuff for quite a while, though. I think the 706 is a very good choice for your needs.

Look at the weak signal portions of the VHF bands. They are a lot more fun than the repeaters.

Terms are as follows:

All items are for sale AS-IS, all sales FINAL. Please feel free to make an alternative offer. I reserve the right to decline any offer.
Payment is prepay (personal cheque OK) or COD by certified funds.

For more information, contact: Christopher Edmonds - edmondsc@fiu.edu

===

Motorola Radios & Accessories (see below for more info)

$400 shipped for the lot

qty 1   HT50 154.6 MHz
qty 4   HT90 154.6 MHz
qty 3   HT90 154.57 MHz
qty 1   HT50 154.6 MHz (spkr & mic missing from faceplate)

qty 1   HT50 154.6 MHz (top is cracked up, spkr but no mic)
qty 1   HT90 154.6 MHz (spkr & mic missing from faceplate)
qty 2   HT90 shells (body only, no faceplate) one new
in plastic, one used

qty 1   NTN4864B charger
qty 6   NLN7646A charger
qty 6   NTN4864A charger

qty 14   NLN7434A & similar batteries
qty 1   NTN5453A battery

qty 13   BNC whip antennas various lengths
qty 1   HT50 screw in antenna

I would like to sell all this together if possible. The chargers are in decent cosmetic shape, some have marker writing on the front. The radios are somewhat more beat up. All of the radios were used for data transmission, all have had the accessory jack removed. Some have a short coiled cord with a strange connector in place of the jack, some have nothing at all here. I have tried most of them, however, and they all seem to function anyway. The condition of most of the batteries is unknown; I charged up a few to test the radios, that's it. Because of the condition of this equipment, I offer no guarantees on it.

===
HP 1222A Oscilloscope $100 OBO + shippping

Not working, possible problem with sweep generator. When you press the beam find button, you can see the beam sitting there in the middle.

Hello:

I have the following items that I no longer need and are gathering dust around the house and offer them for sale:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH 3.5" and 5.25" HD disks and comes with the full documentation (a VERY big book!). While this will NOT compile NOS without some major changes to the source code, it can compile many other programs and be used by someone who wants to learn C or C++ programming. Has a very nice DOS developer's environment.

Your price: $25.00

2) Info Magic Linux CD Set: This a VERY complete Linux package and includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has XFree86, full HOWTO set, and much, much more. This is a >6< CD-ROM set! Not that the CD case itself is damaged, but the CDs themselves are just fine. There are many Ham packages (mostly packet) that run under Linux with many more being added all the time.

Your Price: $20.00

3) 386DX-25 Mother Board with 8 Megs of SIMM RAM installed: This was my old PBBS machine and was removed from service to be replaced with a newer, faster board. Works great, I just have no use for it any longer. Has qty 8 of 1 Meg 30 pin SIMMs installed.

Sells new for $96.00 (SIMMs only!!)

Your Price: $45.00

4) Kenwood TM-2550A 2m FM mobile transceiver. This radio was bought used and I have used it for packet (no mods done by me). I have the mobile mounting bracket and original Kenwood mic. No manuals. Radio works very well with ~48 watts on high (rated at 50 watts) and ~7 watts on low (adjustable). The only problem I know of is that the LCD display has one "flakey" digit (the right-most)... If you press down slightly on the top of the case, the digit works perfectly, but otherwise the top two horizontal segments do not show. I solved this on by clamping the radio in its mobile bracket which put enough pressure on the case to make the digit work!

Your Price: $145.00

5) MFJ-1270B packet TNC. This is a packet only TNC (no AMTOR and such) that supports 1200 bps for VHF/UHF and 300 bps for HF work. Works perfectly. I have done a few mods on this unit: True DCD for open squelch operation; Added by-passing to reduce RF noise from the TNC; Upgraded chips to allow 19,200 bps on the serial port. I have been using this TNC for a local node with no problems. The original MFJ EPROM will be put back in the TNC. I have the manual and wall plug power supply. New battery installed about a year ago.

Your Price: $85.00

6) Channel Master 9512A light duty rotor. This is a 3-wire TV antenna type light duty rotor. I have used it to turn a 4 element 2m quad with no problems. THIS ROTOR IS NOT SUITABLE FOR LARGE ANTENNAS! Complete with the rotor and control unit. No wire provided. Not that you will need to provide the bolts and straping for the rotor to mast connection as the clamps are missing. (the clamps for the rotor to the antenna are there).

Your Price: $35.00

PACKAGE DEALS!

1) Take all 6 items for $325.00... You save $30.00!

2) Take the Kenwood and MFJ-1270B for $220.00... You save $10.00!

TERMS

1) All prices include shipping by my choice of carriers to the US and Canada. Shipping to other places or by special means will be added at cost.

2) I prefer to sell as a package and package offers will take precidence.

3) All prices in USD. Payment by money order, certified check, or person check OK. Personal checks will be held until they clear the banks.

4) Your E-Mail or Packet note will hold the items for up to 1 week while I wait for payment to arrive.

If interested in any of the above items, please contact me via packet or E-Mail at the addresses below.

I can provide the E-Mail addresses of people to whom I have sold items in the past if you want to "check my references".

Thanks!

I have the following two telephone modems for sale:

1) Smart One 2400X modem. This is a 2400 bps external modem. Uses the Hayes command set. Complete with wall plug power supply and manual.

Asking $25.00 shipped to the US

2) Atari SX212 modem. This is a 1200 bps modem made by the old Atari Corp. It has both a standard RS232 25-pin connector _AND_ the Atari 8-bit SIO port. This modem, when used with the right software (Express or BobTerm) will direct connect to your Atari 8-bit computer! There is NO other 1200 bps modem that will do this!

Asking $25.00 shipped to the US

Will sell both modems for $40.00 shipped to the US.

Will consider offers.

Take Care & 73

Hep me clean out the shop.

A bunch of nice Heathkit items:

Special quantity deal:
Take 5% off the total for each item ordered after the first item.   Add
shipping from Minnesota:

AR-3   Shortwave receiver (case a bit scuffed)
$55

IO-4550   Dual-trace Solid state 15MHz scope, great condition: $75

CO-1015 Auto tuneup scope, great condition, (missing cable) $25

IG-1271 Function Generator, great condition $35

EO-30A   Decade resistance box, 4-digit accuracy! $20

Heath 50's AC millivoltmeter (unoriginal knob)
              $30

Heath 50's RF signal generator (unoriginal BNC connector)
$25

Other:

Tek 454A-4 scope (bad CRT) for parts, all PC boards present $75

```
R-390A chassis and wiring harness (no modules or front panel)        $35
```

Marty, you can buy brand new US Robotics 14.400 modems
for $17.00 each. I can't even give my 2400 baud
modems away. Want some 1 meg ram simms? I have
bags of them. Progress is great but....

Hello:

I have the following items that I no longer need and are gathering dust around the house and offer them for sale:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH 3.5" and 5.25" HD disks and comes with the full documentation (a VERY big book!). While this will NOT compile NOS without some major changes to the source code, it can compile many other programs and be used by someone who wants to learn C or C++ programming. Has a very nice DOS developer's environment.

Your price: $20.00

2) Info Magic Linux CD Set: This a VERY complete Linux package and includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has XFree86, full HOWTO set, and much, much more. This is a >6< CD-ROM set! Not that the CD case itself is damaged, but the CDs themselves are just fine. There are many Ham packages (mostly packet) that run under Linux with many more being added all the time.

Your Price: $15.00

3) 386DX-25 Mother Board with 8 Megs of SIMM RAM installed: This was my old PBBS machine and was removed from service to be replaced with a newer, faster board. Works great, I just have no use for it any longer. Has qty 8 of 1 Meg 30 pin SIMMs installed.

Sells new for $96.00 (SIMMs only!!)

Your Price: $40.00

4) Kenwood TM-2550A 2m FM mobile transceiver. This radio was bought used and I have used it for packet (no mods done by me). I have the mobile mounting bracket and original Kenwood mic. No manuals. Radio works very well with ~48 watts on high (rated at 50 watts) and ~7 watts on low (adjustable). The only problem I know of is that the LCD display has one "flakey" digit (the right-most)... If you press down slightly on the top of the case, the digit works perfectly, but otherwise the top two horizontal segments do not show. I solved this on by clamping the radio in its mobile bracket which put enough

pressure on the case to make the digit work!

Your Price: $135.00

5) MFJ-1270B packet TNC. This is a packet only TNC (no AMTOR and such) that supports 1200 bps for VHF/UHF and 300 bps for HF work. Works perfectly. I have done a few mods on this unit: True DCD for open squelch operation; Added by-passing to reduce RF noise from the TNC; Upgraded chips to allow 19,200 bps on the serial port. I have been using this TNC for a local node with no problems. The original MFJ EPROM will be put back in the TNC. I have the manual and wall plug power supply. New battery installed about a year ago.

Your Price: $70.00

6) Channel Master 9512A light duty rotor. This is a 3-wire TV antenna type light duty rotor. I have used it to turn a 4 element 2m quad with no problems. THIS ROTOR IS NOT SUITABLE FOR LARGE ANTENNAS! Complete with the rotor and control unit. No wire provided. Not that you will need to provide the bolts and straping for the rotor to mast connection as the clamps are missing. (the clamps for the rotor to the antenna are there).

Your Price: $30.00

PACKAGE DEALS!

1) Take all 6 items for $290.00... You save $20.00!

2) Take the Kenwood and MFJ-1270B for $195.00... You save $10.00!

TERMS

1) All prices include shipping by my choice of carriers to the US and Canada. Shipping to other places or by special means will be added at cost.

2) I prefer to sell as a package and package offers will take precidence.

3) All prices in USD. Payment by money order, certified check, or person check OK. Personal checks will be held until they clear the banks.

4) Your E-Mail or Packet note will hold the items for up to 1 week while I wait for payment to arrive.

If interested in any of the above items, please contact me via packet
or E-Mail at the addresses below.

I can provide the E-Mail addresses of people to whom I have sold items
in the past if you want to "check my references".

Thanks!

Take Care & 73

Now that the radio has been around for awhile, what do the owners of the
Kenwood 870 think of them...? Are they worth the $2300 price tag?

How does the quad conversion receiver do with the built-in filtering?

Opinions appreciated. Please reply here in the News Group...I've been
having some problems with my e-mail.

Thanks.

Reply:

Robert:

I am crazy about my TS-870S. It's a great rig. I've had many
Kenwoods, as far back as a TS-520S and TS-440SAT, and more recently
the TS-940SAT. In my opinion the receiver in the 870 is just as hot
or better than in the 940. It does take some getting used to and
I really wish there were more intermediate settings on the DSP, but
all in all, it is a great rig and good value for the money, IMO.

Thinking about getting one?

Regards,

Dan

The receiver is very poor for high speed cw under noisey band conditions
due to the
ringing filters, distorted audio and poor dsp response. I took mine
back. For those who are less demanding, They'll never know the
difference.

Steve

Hi Steve!

I believe the TS-870 has no provision for upstream (RF freq) xtal or mech filters but depends totally on DSP at a very low IF freq. That seems a bad approach, and was commented on in the QST review of the radio (Feb 1996 issue)

Curiously, the TS-570 does allow adding a narrow CW xtal filter, which is a big improvement over not having one. In this sense the 570 is better than the 870, even tho it has fewer features.

When they have the technology to do DSP at true RF IF freqs, then is my replace mech/xtal filters: Not yet!

Phil

I'm looking for a Heathkit SB-200 or a Yaesu FL-2100b or z HF Amplifier in repairable or good condition. My price range is about $300 for a good working amp. I also need it shipped to Roseville California (near Sacramento).

I see UPS is still on strike so...

US Mail Fourth class mail is $11.96 for 45 lbs. all the way across the USA. Insurance is $3.40 for $300.00.
So shipping & insurance should be about $15.36 or less. The max weight for US Mail fourth class is 70 lbs.

I can send you a postal money order.

Let me know what you have and how much you want.

mailto:rtwodtwo@cwnet.com

Drake R8A communications receiver for sale.
100 kHz-30 MHz, synchronous detection, noise blanker, passband tuning, preamp/attenuator, universal power supply, dual clocks/timers, five excellent bandwidths and six receiving modes (AM, FM, USB, LSB, CW, RTTY). 440 memory channels plus two VFOs make this a very flexible receiver. Rarely used, in brand new condition with box and all materials. Selling due to lack of use. This is a very fine radio. It needs to be put to use!

Also for sale is a Dymek DA100E outdoor active antenna. A fine unit with a stainless steel whip and 3-step attenuator and 3-step impedance matching unit.

Prices:
R8A: $900.00/OBO
DA100E: $100.00/OBO

Ham Radio/Test Equipment:
Palomar Engineers PFS-1 Field Strength Meter. Covers 1.8 to 150 MHz.

Tuned input circuit removed out-of-band signals.Has a 20 dB gain amp to further improve sensitivity. Gain measured with a panel meter to better than .2 dB. Has a 30 dB attenuator with 5 dB steps. With instructions. Never used. $130

Ham Radio: A&A Engineering 30 meter QRP CW rig. 5 Watt, single conversion receiver, AGC, VFO tuning, CW sidetone with built-in speaker and S-meter. Built, calibrated, and tested by owner of A&A for QST review. W/manual. Never used. $100

Test Equipment: Beckman CAPT-6: Wide range capacitor and component tester. Measures capacitance from the pico farad range to 20,000 microfarads. Measures resistance to 20 megohms, transistor hFE and leakage, plus tests batteries under load conditions, diodes, LEDs. Has leads and manual, never used. $50

Scanner/Test Equipment: Optoelectronics Scout. Measures and record up to 400 unique frequencies to memory along with up to 255 hits per frequency. Recorded frequencies can be viewed on LCD display or downloaded to a computer(has the needed software on a 3.5" disk). Display is backlit and has a bargraph S-meter. Beeps when aquiring a new frequency or hits. Also has silent pager-like vibrate mode. Can directly reaction-tune various scanners to its captured frequency. With belt-clip, ni-cad pack, charger, VHF & UHF antennas, and manual. Used a few times. $300 SEND E-MAIL - ka1dpw@erols.com

Hello I have the following for sale:

1) Kenwood TL-922a amplifier. Beautiful condition. Full output. I have
the original box, manual, service manual. Has the 10 meter mod.
Non smoker
Asking $1,100 or offers.

2) Kenwood TS-120s H.F. transceiver. excellent condition, works great.
Has the large mobile bracket, hand mic, and power cord.
Asking $350 or offers.

3) Gap Titan Dx antenna 80-10 meters vertical. Antenna is 4 months old
and is still on its ground mount. Put up another tower and wife says it
has to go to make some room. Excellent antenna, perfect condition. I hate
to get rid of it. I will take it down and box up to ship.
Asking $250

Thanks for reading my post

I have a Ten-Tec Argonaut 509 with both the matching power supply and the electronic keyer they sold for it for sale. Includes all manuals and original parts. This was my first radio that my father purchased for me new from a local electronics store when I got my ticket around 1976. Excellent condition, it is a very nice radio but I don't use it much anymore. The electronic keyer, while sold as a unit for the Argonaut, is all black unlike the radio and power supply which are off white with wood grain trim. Asking $375 which includes insured shipping in the lower 48 states. Buyer prepays with money order or we can use trade-direct (5% fee to buyer, see http://www.trade-direct.com for more information) Resonable offers considered.

I have a little used Kenwood TH-28 144 MHz handheld for sale. It has one standard battery, two extended time high capacity batteries, an alkaline "AA" cell holder, all other original parts and the original manual. This radio also has the expanded memory module for increased storage. I will also include a Master Charger I with the cup for this radio. Excellent condition, very little transmitting, mostly receiving. This radio is currently for sale at most amateur stores and the total price for the included parts would be over $500. Asking only $300 includes insured shipping in the lower 48 states. Buyer prepays with money order or we can use trade-direct (5% fee to buyer, see http://www.trade-direct.com for more information) Resonable offers considered.

Hello:

I have the following items that I no longer need and are gathering dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH 3.5" and 5.25" HD disks and comes with the full documentation (a VERY big book!). While this will NOT compile NOS without some major changes to the source code, it can compile many other programs and be used by someone who wants to learn C or C++ programming. Has a very nice DOS developer's environment.

Sells new for $90.00

Your price: $35.00 obo

2) Info Magic Linux CD Set: This a VERY complete Linux package and includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has XFree86, full HOWTO set, and much, much more. This is a >6< CD-ROM set! Not that the CD case itself is damaged, but the CDs themselves are just fine. There are many Ham packages (mostly packet) that run under Linux with many more being added all the time.

Sells new for $50.00

Your Price: $20.00 obo

3) 386DX-25 Mother Board with 8 Megs of SIMM RAM installed: This was my old PBBS machine and was removed from service to be replaced with a newer, faster board. Works great, I just have no use for it any longer. Has qty 8 of 1 Meg 30 pin SIMMs installed.

Sells new for $96.00 (SIMMs only!!)

Your Price: $65.00 obo

4) Azden PCS3000 2m mobile radio. This radio was bought used by me and has been used on packet. Original remote control mic is missing but it has a Yeasu mic that works for the PTT and mic. Needs new memory battery. Works very good. Has PL tone, 8 memories, scan functions, and more. I have the manual. No mobile bracket. This is a "remotable" rig... The control head can be removed from the radio body and the body placed somewhere else and just the small control head in the car cabin. I don't have the cable, but it looks like it would be easy to make one.

Your Price: $75.00 obo

```

Hello -

Looking for manual or copy for Motorola (manufactured by Measurements Corp) RF Signal Generator model S-1320. This generator is the transistorized version which resembles the older tube model T-1034. The sig gen would be usually used in the commercial two way radio trade.

Will pay any and all costs for copying, or will copy and return at your pleasure. Please check your file cabinets, and help me get my swap meet treasure back on the air!

Thanks for reading this.

::::: DENTRON AT-1K ANTENNA TUNER :::::

SPECIFICATIONS:

Power Handling: 1200 w PEP input, 1 KW CW input

Metering: Relative forward power + SWR

Antenna Switching: Coaxial cable (50 / 75 ohm)
Random wire
Balanced output (ext balun)
Bypass (tuner out of circuit)
Alt (coax to 2nd ant or dummy load)

Dimensions: 3.75" H X 10" W X 9.5" D

Weight: 7 pounds

Color: Black steel case with white lettering

This unit is in absolutely perfect condition. 100% original. No mods. No scratches. No stains. Absolutely NO arc-overs or flash-overs from excessive power input.

This unit was manufactured in the mid-70s, and is one of the last affordable REAL antenna tuners. In other words, it is ruggedly constructed and built to last.

E-mail if you need additional information.

PRICE: $110 (I pay UPS / RPS shipping)

I have a little used Kenwood TH-28 144 MHz handheld for sale. It has one standard battery, two extended time high capacity batteries, an alkaline "AA" cell holder, all other original parts and the original manual. This radio also has the expanded memory module for increased storage. I will also include a Master Charger I with the cup for this radio. Excellent condition, very little transmitting, mostly receiving. This radio is currently for sale at most amateur stores and the total price for the included parts would be over $500. Asking only $300 includes insured shipping in the lower 48 states. Buyer prepays with money order or we can use trade-direct (5% fee to buyer, see http://www.trade-direct.com for more information) Resonable offers considered.

I have a Ten-Tec Argonaut 509 with both the matching power supply and the electronic keyer they sold for it for sale. Includes all manuals and original parts. This was my first radio that my father purchased for me new from a local electronics store when I got my ticket around 1976. Excellent condition, it is a very nice radio but I don't use it much anymore. The electronic keyer, while sold as a unit for the Argonaut, is all black unlike the radio and power supply which are off white with wood grain trim. Asking $375 which includes insured shipping in the lower 48 states. Buyer prepays with money order or we can use trade-direct (5% fee to buyer, see http://www.trade-direct.com for more information) Resonable offers considered.

Hello:

I have the following items that I no longer need and are gathering dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH 3.5" and 5.25" HD disks and comes with the full documentation (a VERY big book!). While this will NOT compile NOS without some major changes to the source code, it can compile many other programs and be used by someone who wants to learn C or C++ programming. Has a very nice DOS developer's environment.

Sells new for $90.00

Your price: $30.00 obo

2) Info Magic Linux CD Set: This a VERY complete Linux package and includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has XFree86, full HOWTO set, and much, much more. This is a >6< CD-ROM set! Not that the CD case itself is damaged, but the CDs themselves are just fine. There are many Ham packages (mostly packet) that run under Linux with many more being added all the time.

Sells new for $50.00

Your Price: $20.00 obo

3) 386DX-25 Mother Board with 8 Megs of SIMM RAM installed: This was my old PBBS machine and was removed from service to be replaced with a newer, faster board. Works great, I just have no use for it any longer. Has qty 8 of 1 Meg 30 pin SIMMs installed.

Sells new for $96.00 (SIMMs only!!)

Your Price: $55.00 obo

```

If you have a JC Penney outlet store nearby, you can get a real bargain on these scanners. I've seen several in the store in Atlanta going for between $129 and $149.

FOR SALE:

YAESU FT-890AT in excellent condition. Has built-in antenna tuner (great for mobile use), built-in cw keyer, 100 Watts output, general coverage receiver, and all mode transmitter. Comes with hand-held mic. Still have original box and owner's manual. I always found this rig to have a really great receiver.

Also for sale:

YAESU YS-60 SWR + Power meter (matching color to 890)
ASTRON RS-50M (with meters) (barely used)
BENCHER BY-1 Keyer (barely used)
HUSTLER Mobile resonators for:
80, 75, 40, 30, 20, 17, 15, 12 and 10 meters (low power models)
AND two masts - one stainless steel and other is fiberglass covered.
Also have a mast mount for base use.
(all resonators in good condition and worked well for mobile and base!)

and I'll throw in a 75' length of 9913 coax (no connectors).

Prices dependent on who pays shipping, but figuring:

FT-890AT	$750
YS-60	$ 70
RS-50M	$175
BY-1	$ 60
Hustler	$150 for all including masts.

Would prefer to sell entire package. Am selling because work hours are
too long and I don't travel any more and the cash would be useful.

Please e-mail me for further details, or call in the afternoons at work:
(423) 974-0123.

Thank you!

Noticed that the 50R's batt. charger is simply a 14v 200mil. amp.
adaptor. I was wondering if I could simply plug the radio into my 12V
auto batt. and let it charge / operate on the power from my car ??

anyone have any experience w/ this.. or looked into the schematic
to determin if this is feasable... ??

The radio works fine when powered from 12-14 V, and charges the batteries too. To connect to a standalone 12 V battery, or a regulated power supply, you can use the Yaesu E-DC-6 external DC cord. But if you're going to use it in the car with the engine running, you're supposed to use the E-DC-5B cigarette lighter adapter instead - it has an internal filter circuit.

Dave

Hello:

I have the following items that I no longer need and are gathering dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH 3.5" and 5.25" HD disks and comes with the full documentation (a VERY big book!). While this will NOT compile NOS without some major changes to the source code, it can compile many other programs and be used by someone who wants to learn C or C++ programming. Has a very nice DOS developer's environment.

Sells new for $90.00

Your price: $25.00 obo

2) Info Magic Linux CD Set: This a VERY complete Linux package and includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has XFree86, full HOWTO set, and much, much more. This is a >6< CD-ROM set! Not that the CD case itself is damaged, but the CDs themselves are just fine. There are many Ham packages (mostly packet) that run under Linux with many more being added all the time.

Sells new for $50.00

Your Price: $20.00 obo

3) 386DX-25 Mother Board with 8 Megs of SIMM RAM installed: This was

my old PBBS machine and was removed from service to be replaced with a newer, faster board. Works great, I just have no use for it any longer. Has qty 8 of 1 Meg 30 pin SIMMs installed.

Sells new for $96.00 (SIMMs only!!)

Your Price: $45.00 obo

```
********************************************
*      SPECIAL ONE FOR ALL DEAL:           *
*------------------------------------------*
* Take all 4 items for only $75.00 USD!!! *
********************************************
```

```
*********************
*   SPECIAL NOTES   *
*********************
```

1) All prices include shipping by my choice of carriers to the US and Canada. Shipping to other places or by special means will be added at cost.
2) I prefer to sell as a package and package offers will take precidence.
3) All prices in USD. Payment by money order, certified check, or person check OK. Personal checks will be held until they clear the banks.
4) Your E-Mail or Packet note will hold the items for up to 1 week while I wait for payment to arrive.

If interested in any of the above items, please contact me via packet or E-Mail at the addresses below. Please include your name, packet and/or E-Mail adresses, phone number(s) and hours I can contact you.

Thanks!

Take Care & 73

When replying to this message, please send e-mail directly, BUT, you must first remove the *NOSPAN* from my e-mail address above. I'm tired of learning how to earn $50,000 in a month! :)

I need information on an Alliance HD-73. I bought one a couple weeks ago, but the previous owner was unablt to locate the paperwork. If you have a manual, I'd be glad to pay for a copy. But I really need to know a few things:

What is it worth? (Did I get ripped off?)

What are the specifications of the rotor?
Maximum weight, wind load, torque, etc.

I MAY be putting this thing under my HF antenna this weekend and would certainly appreciate it if I can avoid making a mistake.

Greg N8JMS

--
Replying to this message WILL NOT WORK. Remove "*NOSPAM*" from the address above if you wish to send e-mail.

Greg

I am looking for help selecting a new rig, I am just starting out in this hobby and am looking for a transeiver with 6M and 2M (any additional wouldn't hurt) or an HF w/ 6M and 2M. I am looking to spend about $1,000 for my entire setup, at the moment I am looking at the Icom IC-706MKII, it is a HF+6M+2M, a little more than I wanted to spend but will if it is all I can find.

If you can help me or give me some info (antenna info as well) please send me e-mail at: Matth@netacc.net, or at lease forward a copy to my e-mail, thanks in advance!!!

Matt

From the HD-73 Owner's Manual:

The HD-73-1 has the heaviest pitch gear teeth (steel hardened) of any rotator in its size and price range.

The HD-73-1 control unit features TWO-SPEED rotation with one five-position switch. This presents a one revolution per minute speed for rotating over an extended are and a slower speed for adjustment of, say, several degrees one way or the other for fine adjustments for the best signal on receiving and transmitting.

The rotator not only has a readily accessible externally located fuse for total unit protection, it also has an internally mounted automatic reset thermal protector for the motor and transformer against shorts or possible connection error or prolonged operation.

A large, back-illuminated 3 1/2" Jewell D'Arsonval, Taut Band, linear, full scale 100� swing, meter is calibrated in bold S-W-N-E-S as well as a degree-graduated scale.

The meter direction indicating voltage supply is solid state voltage regulated for meter indication accuracy regardless of wide line voltage or load variation; the regulating range is 105 to 129 volts.

The HD-73-1 rotor was designed to operate antennas with a maximum of 10.7 square feet of wind load area when properly installed.

Diameter of rotator unit -- 8".
Mast mounting size range -- 1-3/8" O.D. to 2-1/2" O.D.
Mounting option -- in tower (preferred), or on tower or mast.
Cable -- 6 conductor.
Voltage input -- 117 volts A.C., 60 hertz, + 12 volts.
Rotator weight (bare) -- 6-3/4 lbs.
Rotator with 1 pair antenna brackets -- 9-1/8 lbs.
Rotator with 2 pair brackets -- 11-1/2 lbs.
Shipping weight -- 17 lbs.
Rotator speed -- Dual -- 1 R.P.M. and a pinpoint slower speed.
Motor -- capacitor split phase, reversible. Motor voltage -- 20 volts A.C. No voltage on motor or leads exceeds U.L. safety limits.
Transformer, power -- Double protected -- fuse and thermal protectors.
Meter -- D.C. D'Arsonval, taut band. Meter scale -- S.W.N.E.S. and degree scale.

WIND LOAD INFORMATION

Severe installation and duty requirements are placed upon antenna rotors and supports by communication antenna arrays. The factors involved in such installations have been under investigation for many years to determine the effect of such requirements on antenna rotators, and how to design and manufacture rotators that will support and operate antennas under the very adverse conditions that exist in some localities. These locations are not only those of high wind velocity but also those of additional ice loading and severe conditions that exist during periods of blizzard and peak gusts of wind that occur in many areas.

The Unites States Weather Bureau furnished fastest mile per hour velocity figures from many recording stations around the United States. Measurements have been made of the relationship of gusts for fastest miles per hour data by the Bureau showing that gusts exceed fastest wind velocity data generally by 30%.

As a result of the above, the Electronic Industry Association (EIA) has recommended a wind loading standard of 30#/sq. ft. of projected surface for the purpose of design by United States manufacturers. This corresponds to a wind velocity of 110 mph. The use of this standard in design procedures will consistently yield products better able to withstand successfully most prevailing wind conditions in the U.S.A.

This brings us to the subject of Bending Moment, also called Side Thrust Overturning. Wind loading or wind pressure acting on an antenna, rotator and tower are essentially the same as those acting on buildings, water towers and other structures. Wind loading is by far the most critical and severe item to be considered for antennas, rotators and tower life. A typical 3 element vertical C.B. antenna creates a bending moment of 1700 lb. ft. and necessitates in-tower mounting. Other C.B. antennas are vertically polarized and can exceed these values.

I have 2 Kenwood TK-340 hand held radios. Looking for information on them. They currently on a repeater but I don't know who's. I just bought these at a pawn shop and have 2 weeks to decide if to keep them.

Info I am looking for:

What freq range are these: My guess is 440-470

Watts:

What is this booster-pac (cig lighter on one side - AC DC converter on the other)

What type of accessories are available and where.

THANKS VERY MUCH

I have a ham friend who purchased the following in March 1996 and now
wants to sell as a package. IE, no piece meal.

Tri-Band Yagi (10-15-20M) 3 el., 12'	Hygain TH3JRS	$289.95
Balun 80-10m	Hygain BN-86	$ 36.95
Mast 9' Steel	Glen Martin M-1049	$ 58.95
Thrust Bearing	Glen Martin TB-25	$ 89.95
Tower 8' Roof (good for 8 Sq. Ft of ant)	Glen Martin RT-832	$229.95
Rotator (10SF)	Yaesu G-450XL	$239.95
Coax 100' RG-8 foam	Belden 8214	$ 54.95
Rotator Cable 8 cond.	Belden 8448	$ 24.95

Cost when bought new = $1,025.60

Wants $700 for the lot. Will give $100 discount if the buyer will help take it down.

The gear is owned by Barry WB6VIX.

I have a ham friend who purchased the following in March 1996 and now wants to sell as a package. IE, no piece meal.

Tri-Band Yagi (10-15-20M) 3 el., 12'	Hygain TH3JRS	$289.95
Balun 80-10m	Hygain BN-86	$ 36.95
Mast 9' Steel	Glen Martin M-1049	$ 58.95
Thrust Bearing	Glen Martin TB-25	$ 89.95
Tower 8' Roof (good for 8 Sq. Ft of ant)	Glen Martin RT-832	$229.95
Rotator (10SF)	Yaesu G-450XL	$239.95
Coax 100' RG-8 foam	Belden 8214	$ 54.95
Rotator Cable 8 cond.	Belden 8448	$ 24.95

```
                                        -------
                         Cost when bought new =  $1,025.60
```

Wants $700 for the lot. Will give $100 discount if the buyer will help take it down.

Jerry

Hello:

I have the following items that I no longer need and are gathering dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH 3.5" and 5.25" HD disks and comes with the full documentation (a VERY big book!). While this will NOT compile NOS without some major changes to the source code, it can compile many other programs and be used by someone who wants to learn C or C++ programming. Has a very nice DOS developer's environment.

        Sells new for $90.00

        Your price: $25.00 obo

2) Info Magic Linux CD Set: This a VERY complete Linux package and includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has XFree86, full HOWTO set, and much, much more. This is a >6< CD-ROM set! Not that the CD case itself is damaged, but the CDs themselves are just fine. There are many Ham packages (mostly packet) that run under Linux with many more being added all the time.

Sells new for $50.00

Your Price: $20.00 obo

3) 386DX-25 Mother Board with 8 Megs of SIMM RAM installed: This was my old PBBS machine and was removed from service to be replaced with a newer, faster board. Works great, I just have no use for it any longer. Has qty 8 of 1 Meg 30 pin SIMMs installed.

Sells new for $96.00 (SIMMs only!!)

Your Price: $40.00 obo

```
********************************************
*      SPECIAL ONE FOR ALL DEAL:           *
*------------------------------------------*
* Take all 4 items for only $70.00 USD!!! *
********************************************
```

```
*********************
*   SPECIAL NOTES   *
*********************
```

1) All prices include shipping by my choice of carriers to the US and Canada. Shipping to other places or by special means will be added at cost.
2) I prefer to sell as a package and package offers will take precidence.
3) All prices in USD. Payment by money order, certified check, or person check OK. Personal checks will be held until they clear the banks.
4) Your E-Mail or Packet note will hold the items for up to 1 week while I wait for payment to arrive.

If interested in any of the above items, please contact me via packet or E-Mail at the addresses below. Please include your name, packet and/or E-Mail adresses, phone number(s) and hours I can contact you.

Thanks!

Take Care & 73

Have a nice AL811 Ameritron amp for sale. 600 watts out,new svetlanas at xmas. 500$ certified check or money order and I will ship and e-mail the tracking number. New house in tight subdivision and having rfi problems is the reason for sale. Request check up front so ups won't hold it forever on a cod. Price is firm. Thanks Jim

Hi,

Thanks for reading this. I bought an old Heath IB 102 digital multimeter at a fest and need a copy of the schematic and alignment instructions to get it going. Hate to junk this one, so appreciate your help.

Will be happy to pay for copying and mailing costs.

Thanks in advance,''

Bob

I need help finding a schematic for two old GE mobiles (currently used as local repeaters), especially the wiring for the control head as the controllers are about to be replaced, and the wiring of the old ones us a mess.

the numbers listed on the ID plaques are:

RG56TFS66, or N.P. 243349

and

YG56KJJ66, or N.P. 243349

They appear to be the same radios with different options.

Thanks to all,

Ron, N7TAW

The first unit sounds like an older GE Exec (not the Exec II). If I
recall, this radio may have tube finals. Not sure about the 2nd unit.

PRICES REDUCED 01 MAY 1997!!
****

Hello:

I have the following items that I no longer need and are gathering
dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH
3.5" and 5.25" HD disks
and comes with the full documentation (a VERY big book!).
While this will NOT compile
NOS without some major changes to the source code, it can
compile many other programs

and be used by someone who wants to learn C or C++ programming. Has a very nice DOS developer's environment.

Sells new for $90.00

WAS: $45.00 obo

NOW: $35.00 obo

2) Borland C++ For Windows, DOS, and Win32 v 4.51: This is a complete install on 28 (!) 3.5" HD disks. Fixes a very minor bug in v 4.50 (I never saw it come up!). Must be FULLY installed to the hard drive (needs almost 100 megs). Is otherwise identical to #2 above.

Sells new for $300.00

WAS: $65.00 obo

NOW: $50.00 obo

3) Info Magic Linux CD Set: This a VERY complete Linux package and includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has XFree86, full HOWTO set, and much, much more. This is a >6< CD-ROM set! Not that the CD case itself is damaged, but the CDs themselves are just fine. There are many Ham packages (mostly packet) that run under Linux with many more being added all the time.

Sells new for $50.00

WAS: $35.00 obo

NOW: $25.00 obo

```
********************************************
*      SPECIAL ONE FOR ALL DEAL:           *
*------------------------------------------*
* Take all 3 items for only $100.00 USD!!! *
********************************************
```

****
*   TRADERS TAKE NOTE   *
****

Those Hams wishing to trade, I am looking for the following Ham gear
(must be in good working order and complete.):

1) Any 6m FM or SSB xcvr. Tube or solid state OK.
2) Any 2m FM or SSB xcvr. Tube or solid state OK.
3) Just about any packet gear... TNCs, radios, what-ever. I am especially looking for an SCC type card.
4) Any Ham Band hand held with good battery and charger.
5) Let me know what you have! Please note that I have no interest in HF gear.

****
*   SPECIAL NOTES   *
****

1) Due to export restrictions, the above may be sold only to US citizens and shipped only to US addresses.
2) All prices include shipping by my choice of carriers.
3) I prefer to sell as a package and package offers will take precidence.
4) I prefer to trade the items and trade offers will take precidece.

If interested in any of the above items, please contact me via packet or E-Mail at the addresses below. Please include your name, packet and/or E-Mail adresses, phone number(s) and hours I can contact you.

Thanks!

Take Care & 73

Hello,
I have a ten meter band ham radio for sale.  It is a mobile (CAR) radio
which can be used at home also.  I have a power supply/converter
included in the deal.  This converter can be used to setup the radio at
home.  The manufacture of both the radio and the power supply/converter
is Radio Shack.  I am asking $225.00 for the whole thing.  If you are in
the Miami, Florida area and are interested or you wish to discuss the
shipping arrangements, please contact me at skyfire@bellsouth.net

If memory serves, what you have are GE MSTR EXEC II series...one
standard
and the other is the IMTS version....Best to use one radio as the rptr.
They are 60 watt models (the 5 in 56) and are in the 150-174 range (the
66 at the end) but they do tune to 2mtrs...
I'll see what I have in my docs on those models...

Wanted: Manual or copy of the manual for Heathkit DM-1
Distortion Meter. Will gladly pay all costs for manual or
copies. Please help me get this fine piece of equipment
back on the air - check those file cabinets!

Thanks for reading this.

Hi,

Thanks for reading this. I bought an old Heath IB1101 freq counter at
a Hamfest and need a manual for it. I would be happy to pay copying
and mailing costs if you can help me out.

Please respond via Email.

Hello -

Looking for a manual (or copy) for a Motorola (by Measurements Corporation) model S-1320 RF Signal Generator. 1970's vintage RF Sig Gen, solid state, used primarily in the commercial radio trade.

Will pay any and all costs to get the manual for my ham-fest treasure!

Thanks for reading this.

Wasn't the first unit listed an Exec I (not the Exec II) that used
tubes for the driver and final (rest of the radio is solid state)? I
used to have RG56TAS66 models on high band that were Exec I units
(from the mid to late 60s I think).

John,

These things definately have tube finals, but the club has lots of spares and they aren't interested in replacing the rigs at this time.

The stamps on one of the boards shows a "built" date of Dec, '72, so you're in the right ballpark.

If you happen to have any of that old literature laying around, it would be greatly appreciated.

Thanks again,

Ron, N7TAW

This did not make cq, qst, or 73....
It is on the ARRL Hamfest web site!

This did not make it into the June Florida Skip..It will be in July Skip.
Please help spread the word...

USFREC@eng.usf.edu

Subject: USF HAMFEST Sat 7/26/97 9am-3pm

well.... if you get this and still need more info let me know.

Don't forget the SIXTH ANNUAL USF "Last Minute" HAMFEST in FLORIDA
Sat July 26th 9am to 3pm
in the ice cold air conditioning...

Hosted by the University of South Florida Radio and Electronics Club.

Admission $3.75
1st swap table $10 including ticket.
Additional tables $10 each up to 4 tables.
The 5th table and above are $15 each.
If you need more than 5 tables you must contact us!!!
In order to ensure your table reservation please pay early.

----

for table or advanced ticket sales: (must be postmarked by 7/15/97)
PLEASE SEND US A SELF ADDRESSED STAMPED ENVELOPE (SASE).

USF HAMFEST
4202 E FOWLER AVE., CTR 2416
TAMPA, FL 33620

USF is easily located on Fletcher Ave between I-75 and I-275 in Tampa.
Enter campus on North Palm Dr. follow the signs to the
USF Special Events Center. (CTR)

Just close enough to Busch Gardens to let the family go there while you play!

TESTING WILL TAKE PLACE AT 11AM.

TALK IN 146.94-
Vendors may setup FRI NIGHT 6-9pm and SAT MORN 8-9am.

SEE YOU THERE!!!!

for more info, direct questions to: USFREC@eng.usf.edu

OR WATCH http://www.eng.usf.edu/studorgs/radio

or call the club at: 813-974-2253

We are committed to making sure that this hamfest is affordable to
the average ham... We have kept our admission and table prices the
same for several years.

Our only increase this year is for folks that buy 5 tables or more
(from $10 to $15). As I am sure you can understand our costs went up.
This will generally affect only larger vendors or folks that are

selling large quantities of stuff at the hamfest.

Thanks for many years of faithful support.

I currently have a Cushcraft Ringo Ranger II for 2 meters. I would like to TRADE this for a 440 MHz version of the same antenna.

OR ... I have a Hustler G-6 for 2 meters. I would be willing to trade the
G-^ and the Ringo for a dual-band Ringo.

Please e-mail.

Hello -

Looking for manual or copy for Motorola (actually made
by Measurement Corp) RF Signal Generator model S-1320
(transistor version of older T-1034). Will happily pay any
and all costs for manual or copy.

Thanks de John WB6GHA

I have a little used Kenwood TH-28 144 MHz handheld for sale. It has one standard battery, two extended time high capacity batteries, an alkaline "AA" cell holder, all other original parts and the original manual. This radio also has the expanded memory module for increased storage. I will also include a Master Charger I with the cup for this radio. Excellent condition, very little transmitting, mostly receiving. This radio is currently for sale at most amateur stores and the total price for the included parts would be over $500. Asking only $300 includes insured shipping in the lower 48 states. Buyer prepays with money order or we can use trade-direct (5% fee to buyer, see http://www.trade-direct.com for more information) Resonable offers considered.

I have a Ten-Tec Argonaut 509 with both the matching power supply and the electronic keyer they sold for it for sale. Includes all manuals and original parts. This was my first radio that my father purchased for me new from a local electronics store when I got my ticket around 1976. Excellent condition, it is a very nice radio but I don't use it much anymore. The electronic keyer, while sold as a unit for the Argonaut, is all black unlike the radio and power supply which are off white with wood grain trim. Asking $375 which includes insured shipping in the lower 48 states. Buyer prepays with money order or we can use trade-direct (5% fee to buyer, see http://www.trade-direct.com for more information) Resonable offers considered.

PLEASE SPREAD THE WORD ON THIS TO ANYBODY THAT YOU THINK MIGHT BE INTERESTED.

Ham gear, test equipment and electronic parts from the estate of John Gruss, W1ACR will be sold at a tag sale on Saturday and Sunday, April 26-27 from 10 am to 4 pm in Danbury, Connecticut (near the CT/NY border.)

The location is 20 Edgewood St., Danbury at I-84 exit 4. Turn left off of the exit ramp, and take an immediate left onto Shannon Ridge Rd. Go past the stop sign to the 2nd house on the right.

There is literally tons of equipment and parts, and EVERYTHING MUST GO! Come on out for some great deals. For additional information, contact Brian Gruss, N1IXI, (203) 743 0914.

I purchased a Yaesu FT-416 2M handi at a hamfest yesterday. This is either the A1 or B2 version, (I don't know how to find out), with a TX/RX of 144-148Mhz.

What I would like to do is mod the radio to RX from 130-174. (match the A2 version) I know this is possible, but don't know how.

One note: I DON'T want to TX out of band, just RX. However, I am sure that any mods will affect both.

If anyone can help me, please contact me.

I am VERY unfamiliar with the newsgroups and how they operate; so it might be better if any responses are directed to mstaff@enhcom.com

Thanks to all, and 73!

T. Stafford, KF4NCB
Shelby, NC

Hey, folks- Have any of you had problems with unreasonable, arbitrary behavior or "croneyism" (favoritism) on the part of NARCC, the Northern California repeater frequency coordinating body? If so I'd like to hear about them. Please e-mail me a brief description of your experiences in trying to work with this organization, including names, dates, places and events to the extent you remember them. Thanks in advance for your help- Tom WA6HAS <sharples@hooked.net>

PRICES REDUCED 01 MAY 1997!!
****

Hello:

I have the following items that I no longer need and are gathering dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH 3.5" and 5.25" HD disks and comes with the full documentation (a VERY big book!). While this will NOT compile NOS without some major changes to the source code, it can compile many other programs and be used by someone who wants to learn C or C++ programming. Has a very nice DOS developer's environment.

Sells new for $90.00

WAS: $45.00 obo

NOW: $35.00 obo

2) Borland C++ For Windows, DOS, and Win32 v 4.51: This is a complete install on 28 (!) 3.5" HD disks. Fixes a very minor bug in v 4.50 (I never saw it come up!). Must be FULLY installed to the hard drive (needs almost 100 megs). Is otherwise identical to #2 above.

Sells new for $300.00

WAS: $65.00 obo

NOW: $50.00 obo

3) Info Magic Linux CD Set: This a VERY complete Linux package and includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has

XFree86, full HOWTO set, and much, much more. This is a >6< CD-ROM set! Not that the CD case itself is damaged, but the CDs themselves are just fine. There are many Ham packages (mostly packet) that run under Linux with many more being added all the time.

Sells new for $50.00

WAS: $35.00 obo

NOW: $25.00 obo

```
********************************************
*      SPECIAL ONE FOR ALL DEAL:           *
*------------------------------------------*
* Take all 3 items for only $100.00 USD!!! *
********************************************
```

```
***********************************
*       TRADERS TAKE NOTE         *
***********************************
```

Those Hams wishing to trade, I am looking for the following Ham gear (must be in good working order and complete.):

1) Any 6m FM or SSB xcvr. Tube or solid state OK.
2) Any 2m FM or SSB xcvr. Tube or solid state OK.
3) Just about any packet gear... TNCs, radios, what-ever. I am especially looking for an SCC type card.
4) Any hand held with good battery.
5) Let me know what you have! Please note that I have no interest in HF gear.

```
*********************
*   SPECIAL NOTES   *
*********************
```

1) Due to export restrictions, the above may be sold only to US citizens and shipped only to US addresses.
2) All prices include shipping by my choice of carriers.
3) I prefer to sell as a package and package offers will take precidence.
4) I prefer to trade the items and trade offers will take precidece.

If interested in any of the above items, please contact me via packet or E-Mail at the addresses below. Please include your name, packet and/or E-Mail adresses, phone number(s) and hours I can contact you.

Thanks!

Take Care & 73

several months. For between $230 and $250, you can buy the Garmin 12xl
brand new and 12 X the machine that the 40 is. (12X because it is a 12
channel reciever as opposed to a single channel like the 40. Check out
News group sci.geo.satellite-nav for answers to most GPS questions.

This is external/power cord andis upgradable to 33.6 or 56K. It is in new condition only used for a couple of days. It is also plug and play. This is a voice modem so it also serves as an answering machine and has audio in/out ports. Price is $65+shipping.

Thanks
Sean

Hi-

Im looking for a AEA ISOLOOP 10-30 prefer with a tuner.
I also if interested have a Cushcraft R-7 bought about a month before
the R7000 came out and up less that a year. Still shiny and in exclnt
condition. would prefer a trade.

Reason: Had to move to an apartment.

Thank You

Let me know.

Hello!

Well, title says _almost_ all: unit doesn't need to be perfect; I want only a complete receiver, although not working (summer project :-) ?). Cosmetics can be from about a 6. Filters are of course a plus. Same for manuals. BTW I want the receiver for use it in my shack and also enjoying its restoration.

Please, e-mail offers directly with price, condition and filters supplied.

Any other further information welcomed!.

Thanks and best regards.

Due to purchase of a new home with covenants and supposedly rfi ridden neighbors the following gear is for sale:
1. Kenwood TS140S with recently purchased MC60 Mike. I am original owner,mars modified,excellent condition. 650$ together,will not break up.
2.Ameritron AL811, 3 tuber,original owner,new Svetlanas put in at xmas,600 watts all day. 450$
3.MFJ 989C 2KW tuner,bought new at xmas,MINT. 275$
Entire package,1300$
All manuals and power cables of course. All prices you pay shipping or pickup in Atlanta,Georgia.
Terms: Items must be prepaid with certified check or money order. No

cod's because UPS takes months to cut a moneyorder. I will ship immediately on receipt UPS and verify with a tracking number. Prices are firm,this a great station. Queries via e-mail Thanks KD4CDB Jim

```

I want to trade my Olympus Camera System for your
Ten-Tec Omni V/VI or Paragon Amateur Radio + PS or sell
entire system for $1750 (negotiable) plus shipping.

I have: 2 bodies: OM2n #685xxx, OM2S #1059xxx, Winder 2 + 3m
         remote release

4 nice lenses: Zuiko 35/2.8, Zuiko 100/2.8, Zuiko 135/2.8
               Zuiko 50-250/5 zoom (very nice lens)

1 Zuiko 28/2.8 lens with scratched coating on front element

1 Sigma 35-70/2.8-4 (quality unknown. I never used it.)

Flashes: 1 Olympus T32, 2 Olympus T20, 3 Shoe 4,
         1 Olympus AC adapter 2 for T32
         1 Multi-flash adapter shoe & .3m cable

All of this equipment has been used for nature photography and has small imperfections. I think it would all be 9 or better except for the 28/2.8 which is probably a 8 due to the scratch.

Trade now and I will include an additional Olympus OM2S + 50/1.4 paper weight (good for parts). The shutter & film transport is jammed from an ill fated meeting with a Heidelberg sidewalk, and the filter ring of the lens is dented pretty good, but I guarantee it will hold down a stack of papers through the stiffest AC breeze, and might

be good for a story or two about how you barely escaped with your life
while rock climbing in Utah...

If you want more specific details about any of it send email.

Jim, KE5GO

I have a Kenwood TS850SAT in excellent condx for sale. It has both 833
270khz (yk-88cn-1) & 500khz (yk-88-1)cw filters and both 455 250khz
(yg-455c-1) & 500khz (yg-455cn-1) CW filters. It also has the IF-232c
interface. I also (correctly) modified it to have an Rx ant. port.
This has been a wonderful rig! Please e-mail if interested.

Wanted: Manuals, or good copies of manuals for:

Heath AW-1 Audio Wattmeter

Heath DM-1 Distortion Meter

Original manuals, or copies of manuals covering the sections
on operation, circuit theory, specs, calibration, SCHEMATIC,
and the like. Don't necessarily need copies of the assembly
pages, but will be more than happy to cover ANY manual
reproduction costs, even for the assembly pages and, of
course, postage.

This station is once again for sale. Prices are FIRM;do not send e-mail concerning prices. Conditions:certified check or money order to me and then I'll ship. Do not want to wait two months for a money order from ups. You pay shipping or add 10%. When I ship I will e-mail you the ups tracking number.

1. Kenwood TS140S with mint MC60 mike. Original owner,mars modified. Not compact like a 50S but a lot better receiver. 700$ Together only.
2. Ameritron AL811A Amplifier. New Svetlanas at xmas,600 watts out all day. 500$
3. MFJ 989C Tuner. Bought new from Ham Station xmas. Two kilowatt,roller inductor,pep and average meter. 275$

Will sell all as a package for 1400$ Thanks Jim KD4CDB

I would prefer something like a Yaesu portable for ham use as well but am interested in just a scanner if that is all that is available.

I have a variety of computer parts like Network cards (10 and 100 speed), SCSI cards, memory, handheld color scanner, v/f/modem, even PCMCIA cards for portables (including a brand new Megahertz 28.8 combo network/modem cellular capable card!).

You might take a look at rec.radio.swap. There are probably some good receivers listed there.

Does this come with any options included ie interface cable etc?
Also, this unit has an external antenna connector?

Hello!

I recently picked up a used Kenwood TH-25AT that didn't come with a user oepration manual. I tried to get one from Kenwood, but they report that the manual has been discontinued and is out of stock.

Could anyone photocopy their manual for me and send it to me? I'll be happy to cover copying and postage costs. Please respond to me at paul@conterra.com.

Thanks!!

Looking for anything that can give me a bit of help on two old Recency two-way radios. One is a HR-312 12-channel 2m transciever, and the other is a BTL-301 "comercial" rig on VHF-LO. Both of these work, I just need some more info. Please reply privately to r_brown@getonthe.net. Thanks!

I have a FRG-100 for sale. Like new. 100% in working order.

Included in this unit there is:
- FM module. ($100 value)
- Home made CAT unit to enable a PC to control radio. (Store bought would cost over $100)
- Manual
- Radio alone in Canada is selling for $950 before taxes.

I'm asking $700 Canadian, or the best offer. Need to sell because I've moved to a transceiver(Ham).

Please contact me via e-mail.
saturn@interlog.com

Below you will find more detail about this unit.

FRG-100 COMMUNICATIONS RECEIVER

Winning the prestigious 1992 World Radio TV handbook award for "Best Communications Receiver" when introduced is reason enough to make the FRG-100 your receiver. And if that's not enough, consider its industry-exclusive features like adjustable SSB carrier offset and user selectable 10 Hz, 100 Hz or 1 KHz tuning steps. Or the exciting broadcast band mode with 16 pre-programmed international broadcast bands. Even 50 memory channels and twin 12/24 hour clocks to keep you tuned in where and when you are - day or night. Additional standard features such as selectable AGC, noise blanker, all mode squelch, and RF attenuation provide the operator with the controls required for noisy and crowded band conditions. Join the experts and make the FRG-100 your "best communications receiver", too.

FRG-100 FEATURES

- Frequency coverage 50 KHz through 30 MHz.
- 50 Memory channels store frequency, mode and filter selection, (all memories are freely tunable).
- Two special memories store user programmable band edges for scanning.
- Multi-function scanning, (memory, band, selectable group, priority) with carrier or time-delay resume modes.
- Adjustable BFO, reverse BFO offset, and selectable CW sideband.
- Adjustable SSB carrier offset permits tailoring the receiver's audio response to your own taste.
- Front panel selactable AGC rate.
- Front panel selectable attenuator.
- Front panel selectable noise blanker.
- Front panel selectable backlighting.
- Twin 12/24 hour clocks.
- Alarm and timer functions.
- User selectable bandwidths.
- CAT port for PC control.
- Dual antenna jacks (Coax and Open Wire).
- 12 VDC power allows operating flexibility.

I have an Icom R71a communications reciever with Pass-band tuning that is in MINT condition for sale. The radio has the FL44A crystal SSB filter installed and also comes with an inline coaxial static arrestor, a Datong indoor-outdoor active dipole antennae(never seen outdoor use), and an Alpha-Delta DX-SWL outdoor sloper antennae. I see that Atlantic Ham still wants $1000 for this rig without the SSB filter. I'll sell mine, with the filter and antennaes for $750.00 firm. If interested you can e-mail me at zoom@sympatico.ca
Thankyou

Howdy Matt -- you can find the info you want at the ARRL
Hamfest/Convention Page at URL:
http://p1k.arrl.org/hamfests.html

Saw several there for the Wisconsin area.

I am trying to find out if two TNCs could be used to transmit data between two computers and a normal phone line to access the net from a remote local such as wireless modemsthat are coming out on 900mhz.

If you go to ARRL's home page on the internet there is a list of all
hamfests in the USA for the entire year.

Motorola Radios & Accessories (see below for more info)

$400 shipped for the lot

qty 1	HT50 154.6 MHz
qty 4	HT90 154.6 MHz
qty 3	HT90 154.57 MHz

several partially assembled HT90s and HT50s

qty 1	NTN4864B charger
qty 6	NLN7646A charger
qty 6	NTN4864A charger

qty 14	NLN7434A & similar batteries
qty 1	NTN5453A battery

qty 13	BNC whip antennas various lengths
qty 1	HT50 screw in antenna

I would like to sell all this together if possible. The chargers are in decent cosmetic shape, some have marker writing on the front. The radios are somewhat more beat up. All of the radios were used for data transmission, all have had the accessory jack removed. Some have a short coiled cord with a strange connector in place of the jack, some have nothing at all here. I have tried most of them, however, and they all seem to function anyway. The condition of most of the batteries is unknown; I charged up a few to test the radios, that's it. Because of the condition of this equipment, I offer no guarantees on it.

HP 1222A Oscilloscope $100 shipped

Not working, possible problem with sweep generator. When you press the beam find button, you can see the beam sitting there in the middle.

Tandy Model 102 $60 shipped

Seems to be working, comes up when I put batteries in it.

Commodore 128 $70 shipped

128 KB RAM. Includes original box, power supply. Unknown condition.

SCSI Hard Drives - Swap Space Bonanza $30 shipped for the lot

2 Quantum 105S 105 MB - dead
1 Miniscribe 8225S 20 MB - was working in a Mac Plus
1 Seagate ST-138N 30 MB - was working in a Mac SE
1 Bracket to mount HH 3-1/2" HD inside Mac SE with 2 floppies

---

IBM 5153 EGA? Colour Monitor $50 shipped

```
     No EGA card to test this, but on power up you get a nice sharp white
     screen. :-) Cable terminates in a DB9.
===========================================================================
Packard Bell PB2400PLUS     $25 shipped

     External 2400 baud modem. Include manual and power supply.
     Full status LEDs on front.
===========================================================================
Apple Scribe  $30 shipped

     Thermal-transfer dot-matrix printer. Used with an Apple IIc.
     Includes manual, cable (Apple IIC to DB25), power cord.
     Unknown condition.
===========================================================================
Kensington System Saver Mac Plus $30 shipped

     Fan/power switch combination for Mac Plus. Help save that
     power supply! May fit other compact Macs as well.
===========================================================================
Rolodex Hand Held Organizer Model K32/EL3132   $30 shipped

     Personal hand held organizer, store phone numbers, schedule,
     calender, calculator. Infra-red link for dumping to PC. 32K
     memory. Original box, manual, unknown condition.
===========================================================================
Beyond Zork   $10 shipped

     A cool Infocom game for Macintosh. Includes original box,
     manuals and floppy.
===========================================================================
Red Hat Software Linux Library CD 1995    $15 shipped
===========================================================================
Misc SIMMs    $25 shipped for the lot

     30-pin 256K 120ns SIMM (8 chip) qty 4
     Original Apple brand SIMMS from a Mac Plus
     30-pin 256K 80ns SIMM (2 chip) qty 8 work in Macs, not PCs
     Macmemory Max-Plus SIMM converter
     Converts 4 30-pin 256K SIMMs into 1 30-pin 1MB SIMM. Worked in
     a Mac Plus (a tight fit though), probably work in most older macs.

I have a T1900 Toshiba laptop for sale or trade. 486/20, 4 meg ram, 200MB hd (doublespaced to 385MB), monochrome VGA, quickport trackball pointing device, 14.4 PCMCIA fax/modem, briefcase style carrying case.

Charging circuit is going out -- will boot from charged batteries, but not from AC/DC adapter. After booting, AC/DC adapter can be used. Won't charge batteries.

All for $300 plus shipping, as is, or would prefer trade for Oscilloscope, >40MHz dual trace, with 1x/10x probe. Multi-band QRP equipment also considered.

E-mail interest only, please. Snail address is no good in Callbook, and I have no phone in my name.

If trade, we'll each ship our own stuff.

Is the YAESU 1000MP a gud radio? I have opportunity to a buy mint used
one. What is it worth? What is a fair price to pay?
Is it inferior to the 1000d, or better?
I know it has less power, but otherwise, please comment.......?

Thanks,
Rick

I'm unloading all my microphone-laden equipment ...

Telex Contester Headset with boom mic, very little use. Model
62400-155. $65

Heil BM-10 Boomset, double-ears, needs new coverings on ears. HC-4
DX element. With adapter for Kenwood radios. $50

Shure 444 mic (Swan label!), wired for Kenwood currently. $30.

Shipping additional -- your method (USPS, FedEx, UPS).

The Heil and the Shure/Swan are spoken for ...

Telex is only thing left! They are moving quickly! The Telex is like-new condition (with connectors attached, 1/4" mono for mic and 1/8" stereo for phones). Even has the ear covers, not even dirty!

Hello:

I have the following items that I no longer need and are gathering dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH 3.5" and 5.25" HD disks and comes with the full documentation (a VERY big book!). While this will NOT compile

NOS without some major changes to the source code, it can compile many other programs and be used by someone who wants to learn C or C++ programming. Has a very nice DOS developer's environment.

Sells new for $90.00

Your price: $45.00 obo

2) Borland C++ For Windows, DOS, and Win32 v 4.51: This is a complete install on 28 (!) 3.5" HD disks. Fixes a very minor bug in v 4.50 (I never saw it come up!). Must be FULLY installed to the hard drive (needs almost 100 megs). Is otherwise identical to #2 above.

Sells new for $300.00

Your Price: $65.00 obo

3) Info Magic Linux CD Set: This a VERY complete Linux package and includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has XFree86, full HOWTO set, and much, much more. This is a >6< CD-ROM set! Not that the CD case itself is damaged, but the CDs themselves are just fine. There are many Ham packages (mostly packet) that run under Linux with many more being added all the time.

Sells new for $50.00

Your Price: $35.00 obo

```
********************************************
*      SPECIAL ONE FOR ALL DEAL:           *
*------------------------------------------*
* Take all 3 items for only $125.00 USD!!! *
********************************************
```

```
***********************************
*        TRADERS TAKE NOTE        *
***********************************
```

Those Hams wishing to trade, I am looking for the following Ham gear (must be in good working order and complete.):

1) Any 6m FM or SSB xcvr. Tube or solid state OK.
2) Any 2m FM or SSB xcvr. Tube or solid state OK.
3) Just about any packet gear... TNCs, radios, what-ever. I am
especially looking for an SCC
        type card.
4) Any 2m hand held with good battery.
5) Let me know what you have! Please note that I have no interest in
HF gear.

****
*   SPECIAL NOTES   *
****

1) Due to export restrictions, the above may be sold only to US
citizens and shipped only to US
      addresses.
2) All prices include shipping by my choice of carriers.
3) I prefer to sell as a package and package offers will take
precidence.
4) I prefer to trade the items and trade offers will take precidece.

If interested in any of the above items, please contact me via packet
or E-Mail at the addresses below. Please include your name, packet
and/or E-Mail adresses, phone number(s) and hours I can contact you.

Thanks!

Take Care & 73

Don't forget to check back often with the Northwest Saturday Morning Swap Net Page. This is the website for an "on the air" net that takes place every Saturday morning, and (conditions permitting) covers most of the Northwest U.S. The new listings are usually posted by 1PM Pacific time on Saturday afternoon. We also take listing from around the country (no commercial types) from the internet, and read them on the air durring the net.

You can check it out at: http://www.chatlink.com/~rickt/swap.htm

Thanks,

Ron

The value of anything is subjective. I would let my 2006 go for $400
since I cant replace it. They dont make them like that anymore.

Might want to try radio shack... the last sales paper I received had the
HTX-202 and 404 at $189.00 each... I haven't seen but 1 used one cheaper
than that.

Later,
Dave

sale.

FT 77 is a fully solid state rig
100 watts on CW, USB, LSB
Has a narrow band CW filter
Has all amateur bands including the WARC bands
Comes with the original manual
Hand mic, mobile bracket
Power supply cable (banana plug)
Mint condition, no scratches or dinks

The knwd PS 30 power supply that I use supplies 13.8vdc, 20 amps. The pwr
supply in also in mint condition, still in original package. Asking $475
plus shipping, for both.

I will pitch in the following free: 20m and 40m dipole precut wires (avg 12), connectors, RG 58 coaxial cable, dog bone insulators. Reply to sjayasha@nmsu.edu. Tnx.

Hello:

I'm posting this for a friend whose brother was a Ham before loosing interest and moving away... He has all the following gear and wishes to sell it.

PLEASE DO NOT CONTACT ME! I have no information or knowledge of the gear. To be honest, I doubt that Steve knows much more about the gear than what he has sent to me!

Also, PLEASE SEND E-MAIL to the owner... He does not have Usenet access.

The owner can be contacted at:

Steve Yemm
yemmhart@juno.com

Steve wishes to sell this gear as a "package deal" to one person if possible.

Steve's brother told that the last time he used the gear, it all worked, but that was several years back. Therefore, all gear is offered on an "As Is" basis.

Gear is located in Southeast Missouri but can be shipped.

Please make an offer DIRECTLY to yemmhart@juno.com

GEAR LIST STARTS

LIST:
1 - Heathkit Model #SB-600
1 - Heathkit Model #SB-101
1 - Heathkit Model #HM-15 Reflected Power Meter
1 - Heathkit Model #HD-15 Hybrid Phone Patch
1 - Antenna Rotor motor & CDE control
1 - 6 arm antenna
1 - Microphone w/ button
1 - Microphone bulb w/o stand
1 - Gal RF load resistor
1 - Code Key
1 - 6 position coaxial switch
1 - Antenna rotor control model #T10 Alliance Mfg Co
1 - pair headphones by Sensiphone/Superex
1 -1 Home made cigarbox RF something w/transformer
3-4 loose vacuum tubes some are 4" & 5" tall
25+' RG59/U Coaxial cable
25+' RG58/U Coaxial cable
35+' RG8/U Coaxial cable
35+' RG8/U Coaxial cable
Misc short coaxial cables w/connectors
Other misc coils, switches & misc tube #6LQ6 USA.

1 - 1000 watt amplifier 22w x 15d x 28.5h, w/plate converter meter, load & plate adj. knobs, w/blower meter & switches. This unit is very heavy & has 6 large vacuum tubes: The top section contains 4 tubes labeled RCA Electron Tubes #60-04. These are all connected at their tops as well as plugged in at their bottoms. There is 1 unused replacement for these labeled CETRON 5725/T160L, it is 2" dia x 6" high. The lower section contains 2 tubes, 2-1/4" dia x 8" high. One is marked JAN-CQN-872A, VT 42A, Made in USA, SLATER. The other is marked 872A, USA 2-43, RCA Radiotron Electron Tube. Both have mercury spatters on the inside of the glass.

GEAR LIST ENDS

Thanks!

Take Care & 73

(G4BXD,106312,1035@compuserv.com) posted a message to
rec.radio.swap (8 dec 1996 16:57:51 GMT) looking for Command set bits
and

pieces. I tried to respond but cannot reach your email.
I tried using the Ham Callsign search servers but couldn't find
you listed there either..

This is what I have. All responses welcome.
I have a command set - R-27/ARC-5. It's got the following six tubes:

Tube Nr.   Condition
12SK7   - good
12SF7   - good
12V6   - good
12SQ7   - good
12SK8   - Unknown*
12SK7   - Bad**

*TV-7D/U nor the Simpson Model 1000 tube tester has setting to test the
12SK8.
** One of the 12SK7 Tubes is bad.

The cabinet is still intact, but it's missing the lid(?) that goes on
top over the tube compartment, and there is no dynamotor. The inside is
clean - no burned parts, etc. Don't know if it works or not.

The whole thing weighs 7 pounds.I'm asking $45.00 plus shipping and
handling.

I also have two of the large three-ganged variables from a couple
of Command sets that were parted out. I am asking
$5.00 ea + shipping and handling.

I've another R-27 chassis with caps, a few Coils,
and the varible condenser tuning unit and dial.
$8.00 + Shipping and handling.

Greg

Greg,
You would have better luck if you looked at the tube tester's entry for a 12K8 (the 12 volt equivalent of the 6K8 converter/oscillator tube). That's probably why you didn't find it in the list. The tube has a grid cap on top; ergo, no 'S' in the name. The 'S' denoted 'single-ended' tubes that had no grid or plate caps.

Hope this helps.

Hello all, Tnx for reading.
Looking to buy a good used triplexer for 144/220/440 mhz... between
100-250 W max power would be more than enough as right now I'm at 6W on
2m, my 440 rig is 70, the 220 rig will be 100 and I'll be getting a 2m
Mocom at 35W in the next couple of days.
Thanks,
DAve

I have two command receivers that are complete except for dynamotor
and are in good working order. If one in unknown condition with a known
faulty tube is worth $45 does that make mine worth $60 each?

One covers 190 to 550 Khz and the other covers 3 to 6 Mhz.

I have several 12- and 50-pf, 30-Kv vacuum capacitors by Dolinko &
Wilkens and Jennings available for trade or sale. Any interest?
I am interested in old radio and hi-fi stuff.

Norman

Drake equipment for sale, AS IS ..... local pickup only.
(Fenwick Island DE .... near Ocean City, Maryland)

R4C Receiver
R4B Receiver
T4XC Transmitter
MS-4 Speaker w/pwr supply
MN-4

All of the above for $ 200.00 as is.

This equipment is in much better shape than the price indicates.
Repair yourself, cannibalize or whatever.
No further questions answered about condition ('cuz I don't know!).
At this price, you take a chance, right ?

Local Pickup ONLY   ---------- DelMarVa Peninsula

E-mail for address.

OK, here's the deal.  I have an IBM ThinkPad 720 mono that is collecting dust.

The package I have includes:  laptop (486/50, 12/240, all ext. ports, 1.44
floppy, 2 PCMCIA slots), AC adaptor/charger, 3 extra batteries, 2 extra 160mb
hard drives, 2 docking stations (both with full set of ports, SCSI-2, 2
expansion slots, 5 1/4" drive bay.  One has 2x IBM SCSI CD-ROM.), external
battery charger, and hardshell carry case with handles and wheels.  Everything

is in excellent condition.  Current value on today's used market is about
$1200 for everything.  Would prefer to keep package together, buyer pays
shipping.

What I would be willing to trade for:  cash, BC 9000xlt, 2m/70cm handheld, AOR

AR8000, PRO26, PRO2006, BC 3000XLT, digital general coverage receiver, and
possibly other items.  Will accept combination of above or other arrangement
to equal value of laptop and accessories.

Please email offers and questions.  Thanks.

The whole setup includes the manuals.

IC-Z1A Dual band handheld w/ 4.8V battery, face detachment kit,
and fixed length antenna (FA-1443B)
IC-CP12 Cigarette lighter adapter
IC-BP173 9.6V NiCad battery
IC-BC79A Desktop rapid charger w/ AC adapter
IC-AD51 Desktop rapid charge adapter for the IC-BP173 9.6V NiCad
battery
MFJ-1712 dual band extending antenna for the Z1A
Earphone for listening to the Z1A quietly

Books:

ARRL General Class License Manual for the Radio Amateur
Now You're Talking: All You Need To Get Your First Ham Radio License

Everything is in perfect condition and was only used for 3 hours
total.
I'm selling it because I don't have time to study and get my license.
Instead, I'm going to take up photography.

I'll guarantee against DOA for 10 days. Warranty card included.

All of the above for $500.00 + shipping, obo. Terms are COD
cash/money order.

Thanks,

Curtis

A while back there was someone selling replacement caps for the
MLA-2500 Power Supply. 100-150 uF @ 450 Volts.

Does anyone remember who was selling them or know of a source? I do
know that caps in this size/voltage are difficult to buy.

These are for a good friend of mine.

Any help appreciated!

I have the folling to sell as a package:
1- ICOM ICW21A (Dual Band Handheld)
  Will recieve from 50mhz-999mhz
  5watt,Dual Band, Battery Pack
1- ICOM SpeakerMike - W/DTMF Pad
1- ICOM Spare Battery Pack (W/Microphone in Battery)
1- ICOM/KENDOO Rapid Charger (1 Hour)
1- ICOM Case for Radio
1- 35Watt Amp/PreAMP

I have the original boxes and all the manuals. This unit is in perfect shape.
Would make a great mobile rig (giving you 35 watts of output).

$250.00 takes it all including shipping.

My mla2500 roadmap says these 5 caps have a rating of 500v. I don't know of any source of 500v electrolytics. From my own experience, 500v is really pushing the envelope for an aluminum electrolytic cap.---i.e., they don't seem to last as long as lower v rated electrolytics. I would be tempted to go to 7 400v units or to 6 450v units, using more C per unit. One source of Panasonic/Matsushita filter caps is DigiKey 1 800 344 4539. 150uF is not really enough C. I would use the largest amount of C that will fit comfortably. The Panasonic/Matsushita filter caps are of a new compact design that packs in more C per cubic inch, so you should be able to get more C and have room for the extra one or two capacitors. The new cap. arrangement can be mounted on a 1/8"-t acrylic sheet rectangle---covering the original cap. mtg. arrangement. Electrolytic caps can be easily mounted on the acrylic, sheet upside down with silicone rubber adhesive/sealant. Allow a mm or two between caps for air circulation. The equalizer resistors can go directly across the capacitor terminals. Since heat rises, that way the caps. don't get roasted by the equalizer resistors.   Also, the carbon-comp. equalizer resistors Dentron (Dennis Haad) used are not stable. They should be replaced with Matsushita 100k ohm 3w mof resistors, which are also sold by DigiKey.

:>of any source of 500v electrolytics.

The MLA-2500 has had several values of filter capacitors over time.

My original schematic shows the six (6) power supply filter capacitors as 150 uF at 450 Volts. At some time there was a note in the parts list changing the capacitor values to 100 uF at 500 volts. My spare parts stock contains a couple of Mallory FP-155, 125 uF at 450 volt capacitors, that were left over from a "minimum quantity" purchase when I had to replace the caps several years ago.

In any case, since the MLA-2500 uses a voltage doubler power supply, any redesigned filter band will require an EVEN number of capacitors ... six or eight, not five or seven.

I have a Sony SW-55 Shortwave Radio for sale.

-Excellent Condition
-Complete with all original boxes, cases, accessories, and papers.
-Great portable radio for beginners or more advanced listeners.
-Receives upper and lower sideband, AM and FM. (USB,LSB, AM, FM)
-Tunes from 150 to 29999kHz.
-"the best performance available in a small package" says Universal Radio.

For a description on the Sony SW-55 look here:
http://www.universal-radio.com/catalog/portable/0972.html

Any questions? Want to buy?

I found something similar from an installation electrician locally...
We have them over here in some of our switching stations for the 3
phase supply to the factory, maybe try someone whos with the local
power co.?

Hello:

I have the following items that I no longer need and are gathering
dust around the house:

1) Borland Turbo C++ For DOS v 3.0: This is a complete install on BOTH
3.5" and 5.25" HD disks
and comes with the full documentation (a VERY big book!).
While this will NOT compile
NOS without some major changes to the source code, it can
compile many other programs
and be used by someone who wants to learn C or C++
programming. Has a very nice DOS

developer's environment.

Sells new for $90.00

Your price: $45.00 obo

2) Borland C++ For Windows, DOS, and Win32 v 4.50: This is a complete install on CD-ROM. All documentation is on the CD-ROM. This WILL compile all NOS variants!! Comes with full debugging and optimizing functions. Also supports ANSI C. May be only partially installed to the hard drive to save space if needed. This is a VERY nice package and is intended for professional programmers.

Sells new for $300.00

Your price: $65.00 obo

3) Borland C++ For Windows, DOS, and Win32 v 4.51: This is a complete install on 28 (!) 3.5" HD disks. Fixes a very minor bug in v 4.50 (I never saw it come up!). Must be FULLY installed to the hard drive (needs almost 100 megs). Is otherwise identical to #2 above.

Sells new for $300.00

Your Price: $65.00 obo

4) Info Magic Linux CD Set: This a VERY complete Linux package and includes full installs for: Red Hat 3.0.3, Slackware 3.1, Debian 1.1.4 and more. Has XFree86, full HOWTO set, and much, much more. This is a >6< CD-ROM set! Not that the CD case itself is damaged, but the CDs themselves are just fine. There are many Ham packages (mostly packet) that run under Linux with many more being added all the time.

Sells new for $50.00

Your Price: $35.00 obo

```
********************************************
*      SPECIAL ONE FOR ALL DEAL:           *
*------------------------------------------*
```

* Take all 4 items for only $175.00 USD!!! *
****

****
*   TRADERS TAKE NOTE   *
****

Those Hams wishing to trade, I am looking for the following Ham gear (must be in good working order and complete.):

1) Any 6m FM or SSB xcvr. Tube or solid state OK.
2) Any 2m FM or SSB xcvr. Tube or solid state OK.
3) Just about any packet gear... TNCs, radios, what-ever. I am especially looking for an SCC type card.
4) Any 2m hand held with good battery.
5) Let me know what you have! Please note that I have no interest in HF gear.

****
*   SPECIAL NOTES   *
****

1) Due to export restrictions, the above may be sold only to US citizens and shipped only to US addresses.
2) All prices include shipping by my choice of carriers.
3) I prefer to sell as a package and package offers will take precidence.
4) I prefer to trade the items and trade offers will take precidece.

If interested in any of the above items, please contact me via packet or E-Mail at the addresses below. Please include your name, packet and/or E-Mail adresses, phone number(s) and hours I can contact you.

Thanks!

Take Care & 73

When did they put export restrictions on developement tools? I can buy
such products from the US by mail, and have. Did I miss something?

Actually, I think the labels I've seen allow shipment to Canadian, as well as US, addresses. OTOH, shipment to Mexico would not be allowed.

I'm not sure why this policy exists, but I've seen a label to that effect on both Borland and Microsoft products. I've also bought at least one piece of software that had both US and Canadian registration cards, with the appropriate prepaid postage.

Both of these vendors sell multi-lingual versions of their products, as can be seen during the setup procedure.

Could it be as simple as insuring that the appropriate printed materials are included, for shipment to other countries?

There is/was a ban on exporting *technology* to certain countries such as the former Soviet Union, which included both computers and software. But I *think* exports are even allowed to Taiwan, even with the problem of open software piracy there.

Actually, you are probably right, Jim. All of the above products
(excepting the Linux set) are labled "For US Sale Only".

I would rather stick to the sure bets. No sense in getting Janet any
more upset than she already is!! :)

That may well be. Microsoft created quite a stir here in Canada when
they held back the french release of Windows95 in Quebec so they could
make packaging differences from that sold in France so that it
couldn't be grey marketed. That could very well be the reason here. I
hadn[t thought of that :)

>There is/was a ban on exporting *technology* to certain countries such as the

Yep. Especially "crypto" tech. As if other countries don't already
have as good a system (or the same one). :))

I have a Yeasu FRG-100 in mint condition. Less than 10 hours operation. Included is a Radio Shack DSP and a Personal Code Explorer hardware/software device for decoding WEFAX, RTTY, AMTOR, SITOR and Morse Code.

I want to trade this for an (IBM) Laptop 486 color computer of equal value.

e-mail. . .

Glad to hear your shack isn't smoking. I guess we can all stopy worrying
about your house burning down. If the radio has 'never been mobile',
how do you know it is an 'excellent mobile rig' ?

>Currently set at 25 w. output, capable of 40w.

>Original Box and Manual. Mobile bracket is still in original plastic.
>I just bought a Kenwood 711-All mode, and must sacrifice.
>$500.00 Firm, Shipping included. Money Order Only.

Original PLASTIC. Now that is original. Will the plastic make it work
better in the car ?

>Mike Cobb, KB0QMF   ph.# 316-421-6139 or e-mail reply.

It's 3 am here, and I can't get to 7-11 to get a money order.
Would it be OK if I just mailed you $500 in cash ?

73, Jim KH2D   phone 011 671 477-0518 or email reply.

Sale,rec.radio.amateur.swap,rec.radio.shortwave

I have a FRG-100 for sale. Like new. 100% in working order.

Included in this unit there is:
- FM module. ($100 value)
- Home made CAT unit to enable a PC to control radio. (Store bought would cost over $100)
- Manual
- Radio alone in Canada is selling for $950 before taxes.

I'm asking $700 Canadian, or the best offer. Need to sell because I'm moving to a transceiver(Ham).

Please contact me via e-mail.
saturn@interlog.com

Below you will find more detail about this unit.

FRG-100 COMMUNICATIONS RECEIVER

Winning the prestigious 1992 World Radio TV handbook award for "Best Communications Receiver" when introduced is reason enough to make the FRG-100 your receiver. And if that's not enough, consider its industry-exclusive features like adjustable SSB carrier offset and user selectable 10 Hz, 100 Hz or 1 KHz tuning steps. Or the exciting broadcast band mode with 16 pre-programmed international broadcast bands. Even 50 memory channels and twin 12/24 hour clocks to keep you tuned in where and when you are - day or night. Additional standard features such as selectable AGC, noise blanker, all mode squelch, and RF attenuation provide the operator with the controls required for noisy and crowded band conditions. Join the experts and make the FRG-100 your "best communications receiver", too.

FRG-100 FEATURES

- Frequency coverage 50 KHz through 30 MHz.
- 50 Memory channels store frequency, mode and filter selection, (all memories are freely tunable).
- Two special memories store user programmable band edges for scanning.
- Multi-function scanning, (memory, band, selectable group, priority) with carrier or time-delay resume modes.
- Adjustable BFO, reverse BFO offset, and selectable CW sideband.
- Adjustable SSB carrier offset permits tailoring the receiver's audio response to your own taste.
- Front panel selactable AGC rate.
- Front panel selectable attenuator.
- Front panel selectable noise blanker.
- Front panel selectable backlighting.
- Twin 12/24 hour clocks.
- Alarm and timer functions.
- User selectable bandwidths.
- CAT port for PC control.
- Dual antenna jacks (Coax and Open Wire).

```
   - 12 VDC power allows operating flexibility.

In regards to your 830 would you b interested in a trade for a dx2-66
multimedia computer?
let me know if you want to haggle, ;)
Henry

I have an A.W.Haydon elapsed time indicator
that needs a home. This is a 115 vac digital
(mechanical) meter, 1" across the face.
Manufacturers number is K23209. It measures
hours, up to 4 digits plus tenths of hours.
This is BRAND NEW, still in the original box.
Will some kind person please make me a
reasonable offer? New price is in the $50 area.

Help!

I was intrested in the navy MARS program, but I can't find anywhere to get information on it. If anyone could help me out in anyway, I'd REALLY apreciate it. Thanks!

The Arizona Audiophile Society, a not for profit organization dedicated to promoting the best in home audio and video reproduction, presents its 7th annual Audio Equipment Swap meet.

This years meet will be held in the parking lot of Arizona Tube Audio, 688 W. 1st Street, Tempe, Az., on Saturday March 1st, 1997, from 9 Am to 3 Pm.

This is a great opportunity to buy, sell or trade high quality High End Audio equipment, often at a fraction of its original retail price.

For information on reserving a space or table to sell at the event, or for more information about the meet, or joining the Arizona Audiophile Society, please call our new automated answering service at (602) 417-0223, or Fax your request to (602) 251-2382. A society representative will get back to you with event registration and membership information.

For an informative brochure, and directions to the swap meet , please log on to http://www.netzone.com/~vander/swap

Ben, A few months ago I was looking into the MARS and the only way that I found out about it was by jumping on the internet and typing in "MARS" and that took me right there. It would even tell you who the regional person was for where you lived. I will see if I can find the address for you.

Good luck 73's,

I've had fun with the thread that's come since posting this rig, but I'm
starting to get a little tired of Nutless Idiots such as yourself,
littering up the newsgroups and destroying other people's ads. It's okay
though, because I have a growing list of boneheads I'm going to be
watching very closely for. I'm actually quite anxious to see YOUR next
attempt to sell an item. I assure you that there will be more attention
drawn to the outlandish prices instead of the equipment you've posted.

Have a fine evening,

Mike

Mike,

As you can see from your replies, most hams like to drink.

Regards....hic

Still looking for a clean unit in great condition.

Thanks

Radio Shack is getting real expensive, if you know if a mail order parts
company, please pass their phone number along. Thank,

Ryan,
I've listed some of the better sites in the Rochester, NY area on my
site. There are some real good VHF info on some of them.

Howdy Ryan, On Mike's Pages, he lists over 2700 Ham Sites. Go To URL:
http://www.coredcs.com/~mtw/

Also The DX Reference Page below has over 600 Links.

Ron Klimas lists over a thousand links at URL:
http://uhavax.hartford.edu/~newsvhf/ham-www.html

I am looking for a GE MASTR Exec II VHF (132-174 MHz). Or at least I think that's the one. I have several of what I believe to be Exec I's with the tube multipliers and final. I want to use the transmitter from one of these but cannot use the one with tubes. I believe the Exec II is all solid state.

Actually, all I need is the multiplier and final stages (I am presuming it uses the same FM generator board (4EG21F10 or similar) as the ones I have. If someone has yanked just these from a unit, that would be fine.

Please Email me if you have these parts.

Paul, N1BUG

FOR SALE:
2 - Heathkit ID-5001 Weather Stations !

The first unit is an UNBUILT kit - The kit does have a few minor parts missing, nothing too expensive that couldnt be purchased from a local electronic shop.

The second unit is a complete working unit with out external sensors.

Combine the two units to have one complete system, or obtain the missing sensors and have 2 COMPLETE units!

A single ID-5001 unit is presently being sold for $1495 U.S. plus tax..fr Questech. in OHIO.

These 2 RARE units will only be sold as a package, complete with manuals.(one set)

Reason for selling? Insanity? To be honest, Im moving and need the bucks, otherwise they would never be leaving my shack.

Im open for serious offers...

Thks

I have two UHF repeaters for sale. One is built from a Motorola Micor and runs 25 watts out. It is crystaled for 449.850 Tx and 444.85 Rx. It has a microcomputer controller with 14 DTMF commands, voice ID and other voice messages. You can see some pictures of this repeater at URL: http://www.xpressweb.com/~jarjwr/ The power supply is heavy duty and all the system works very well.

The other repeater is an RCA unit comverted for 449.80 Tx and 444.80 Rx. It runs about 15 watts out and also has a microprocessor controller. It has a DTMF decoder and Wav-Com duplexers. The Radio is a class act as it is a regular blue RCA case with locking doors. I will sell either or both repeaters for $450 each. These units were converted by myself and my background is an electronic eng with many years of UHF and microwave design experience. If you don't beleve me just ck my spelling. Hi. These units must be for pickup only in Kanab, UT. 3miles North of the AZ boarder. Thanks for reading and eMail me if I can answer any questions.

Hey folks, get over this spamming the newsgroup thing. Your even sending them to the commercial group. the send to line that follows this article is longer than the winter day. GET OVER IT and watch were you send your replies to. I am a ham too, but this is getting rediculus sending replies where they have no purpose.

Getting off my soap box now ... thank you

Okay, for those idiots among you who don't read the From: or To: headers
I say this: STOP SPAMMING OTHER ITEMS WITH THIS CRAP.

There's NO reason Rec.radio.commercial-lmr should be seeing this thread.

I long for the net of 5 years ago. The jackass percentage was so much
lower then!

Try Mouser Electronics; I think their URL is www.mouser.com (duh!)
Also Newark Electronics has everything ever made (well, in the last 5
years)...kinda like a big brother of Mouser. Hope this helps.

I have a Generic Brand Laptop for sale. It's a 386SX/25 w/1meg ram, 80meg h/d, VGA monochrome monitor and a case to carry it in.
The plug in the back broke, so I rewired another plug which works fine with the power supply I have for it. I also have the same plug connector attached to the car cord I made for running it in your vehicle. Great for portable packet, DX loggings, tracking satellites like I do and any other thing you can think of to use this hand tool.

Asking price is $300 obo and I'll pay the shipping.

You can e-mail me if you need any further info, or leave your number and I'll be more than happy to call you back. If you want to call me, you can anyday but Sunday between the hours of 4pm and 8pm pacific time. 702-453-0821

Thanks all, awaiting reply.

Mel,

I dont have one, but you might pass a note along to Jim Moore WU3V
(jim@usl.edu) and see if he's heard of anything.  Jim runs the Packet
Cluster down in Abbeville, La. and there's usually messages like that
floating along there.  Tell him I sent ya, and maybe he'll pass along
access to the Net side of his gateway and letcha read the messages on
his cluster.

Organization: None
Newsgroups: rec.ham-radio.swap,rec.radio.swap,rec.radio.amateur.swap,rec.radio.amateur.equipment

All of the below for $450.00 + shipping, obo. Terms are COD
cash/money order.

The whole setup includes the manuals.

IC-Z1A Dual band handheld w/ 4.8V battery, face detachment kit,
        and fixed length antenna (FA-1443B)
IC-CP12 Cigarette lighter adapter
IC-BP173 9.6V NiCad battery
IC-BC79A Desktop rapid charger w/ AC adapter
IC-AD51 Desktop rapid charge adapter for the IC-BP173 9.6V NiCad battery
MFJ-1712 dual band extending antenna for the Z1A

Earphone for listening to the Z1A quietly

Books:

ARRL General Class License Manual for the Radio Amateur
Now You're Talking: All You Need To Get Your First Ham Radio License

Everything is in perfect condition and was only used for 3 hours total.
I'm selling it because I don't have time to study and get my license.
Instead, I'm going to take up photography.

I'll guarantee against DOA for 10 days. Warranty card included.

E-mail if interested.

Thanks,

Curtis

Sounds like she's got to go!:-)))

Actually try using my line " At least I'm home and you know what(and
whom)I'm doing! and always remember the alternative is that I could be
OUT " and leave out to her imagination !

John

I had a couple of these radio's and chargers. I don't have them anymore, but wanted to tell you the 2 pocket charger only charges 1 radio and 1 spare battery at a time. In my opinion, the charger was way overpriced, it was something over $100 and it just used the AC adapter that came with the radio. It just took the - and + 12V and placed the power at the base of the radio rather than at the AC adapter hole on the radio. You might want to think about designing a homemade version to save yourself the $$$$.

Yep, these are not the newsgroups (especially the new rec.radio.amateur.boatanchors) to get sympathy for that kind of comment. You gotta keep your priorities in order. :-)

I lucked out. I did it the easy way, just got the wife to become a
ham also! :>

I am selling a National HRO-M. This classic receiver comes with 8 coil
sets (48-96KC, 100-200KC, 180-430KC, .9-2.05MC, 1.7-4.0MC, 3.5-7.3MC,
7.0-14.4MC, and 14.0-30MC). It has a wood rack that holds seven of the
coil sets. The receiver appears to be complete but does not have
an external power supply or speaker with it. It is untested. There is
one control on the front panel that I believe has been added.

You can see a picture of this set, and some other Nationals I am
selling, at my website:
http://www.geocities.com/SiliconValley/3839/radio_fs.html

I am taking offers on this receiver until Sunday, October 27, 1996. So far, the highest offer is only $150.

I am taking offers on a rare National AGS-X receiver until Sunday, October 27, 1996. It has a complete set of 9 coil sets (1.7-2.0MC, 3.5-4.0MC, 7.0-7.3MC, 14.0-14.4MC, A, B, C, D, E). It also has a SPU697? rack mounted power supply, a National rack mount, 2 National rack mount panels for the extra coils, and an original instruction book. It is in very nice original condition and is untested. Paint and lettering are very nice, no rust, and the chassis is in excellent unrestored condition with all original tube shields, capacitors, a Bliley crystal, and the dust cover. There is not a speaker included.

You can see a picture of this set, and some other Nationals I am selling, at my website:
http://www.geocities.com/SiliconValley/3839/radio_fs.html

Howard,

I'm sorry. Did you say getting your wife to be a ham was the easy way out???? I'm still trying to get mine to open the book.

I'm glad you guys just reminded me, I have one of those that stays in
the other room! I forgot about her a couple of years ago. I wonder if
she's still there? ;->

Hello
       I have a Radio Shack 202 HT for sale.It comes with 3 battery packs,a
mic,a case,a charger,and has 4 years left on the warranty.This radio looks
like new and works great.Asking $150.00 plus $15.00 for shipping.Please
contact me at my e-mail address if you are looking for a great radio...

                                gepley@tfs.net

It doesn't have to be an either/or thing. . .
Put the ham gear in storage until you decide to leave.

Henry KK6JR, G4NOC
Been there, done that, really.

My small Kenwood TouchTone microphone (model MC-48B)
has lost it's ability to make tones when the center horizontal
row (numbers 4,5,6) are pressed. And my fingers are too fat
to get inside the thing to fake a repair. So...

Anybody got a small Kenwood mic such as the MC-48 that
they would like to exchange for cash?

Thanks in advance

de A Redshirt in Rocklin

I am sorry, but at this time I must use an alternative E-mail identity and cannot tell you who I am. I am, however, very close with with a lot of the key players involved with this deal. Bound by contract, certain people where to export these radios never to be returned into the states or they would be considered stolen units. At least a third of the units are damaged or not working and ALL do not have serial numbers. The only reason why I'm going public with all this is because these individual misrepresented themselves to the supplier and will misrepresent themselves to you (who will pay twice as must as what they bought them for). The people trying to sell them out here are not even part of the group that legally bought them. If you know what's good for you, don't get involved. It's bad news all the way around.

re: Alinco deal: the FACTS
reply-to: kc6ttr@ix.netcom.com
newsgroups:
rec.radio.swap,rec.radio.amateur,rec.radio.amateur.swap,rec.radio.amateur.equipment

Greetings,

I felt compelled to make the truth known about this Alinco radio "deal" that has been causing some controversy on the newsgroups. This is ALL off the record and I will not respond to any E-mail regarding this matter. The purpose of making the following information public is to serve my fellow amateurs and to put this issue to rest once and for all.

Some radios were sold to a group of individuals who were to export these units to Europe or Mexico. Some of the radios are new in the box, some are not. All the radios were discontinued models from the early 90's. After hearing rumors of the radios possibly making their way back into the country (even after being reasured by the buyers that this would not happen) it was decided to remove the serial numbers and make a list of the the radios incase any did in fact make it back into the States and where in need of service. These units would not be serviced. Well, as you can see, there has been numerous offers to sell these radios on these newsgroups and other forums. Personally, it's very upsetting to see an opportunity to promote amateur radio to some less fortunate countries turn into a money making oportunity for some "sad" individuals who can't even keep their word. The facts are these radios were not to be sold in the US...it's sounds like they are. These individuals lied to Alinco and who knows what they will say or do to sell these units. It is my hope as a true amateur radio operator that anysolicitation to sell these radios on these newsgroups or any other forum in the United States be boycoted by ALL amateurs and non-amateurs alike. These individuals cannot be trusted and they should not be rewarded for their misdeeds to the amateur community. I hope this has giving enough of you the information you need and I truely hope this matter will be put to rest. Thank you for your time to read this.

Respectively submitted,
Scott Booth, KC6TTR / Alinco USA

All of the below for $700.00 + shipping, obo. Terms are COD cash/money order.

The whole setup includes the manuals.

IC-Z1A Dual band handheld w/ 4.8V battery, face detachment kit,
        and fixed length antenna (FA-1443B)
IC-CP12 Cigarette lighter adapter
IC-BP173 9.6V NiCad battery
IC-BC79A Desktop rapid charger w/ AC adapter
IC-AD51 Desktop rapid charge adapter for the IC-BP173 9.6V NiCad battery
MFJ-1712 dual band extending antenna for the Z1A

Earphone for listening to the Z1A quietly

Books:

ARRL General Class License Manual for the Radio Amateur
Now You're Talking: All You Need To Get Your First Ham Radio License

Everything is in perfect condition and was only used for 3 hours total. I'm selling it because I don't have time to study and get my license. Instead, I'm going to take up photography.

I'll guarantee against DOA for 10 days. Warranty card has not been filled out or sent in and so mfr's warranty will be in full-effect when you turn in the card.

E-mail if interested.

Thanks,

Curtis

I have the Heathkit "twins" for sale. I purchased them last summer
with the intent of restoring, but find I don't have the time   to
perform the needed tune-ups or room in the shack. Both are complete,
work but need TLC. Cosmetics are quite good, I'd give an 8 on a 10
scale. No dents or scratches, though a small crack in the 401 meter.
There's an original manual for the 401 and a photocopy manual for the
300. I will not split, price is firm.
If interested call days 360-750-5099
                           eves 360-892-9199

Hello to all and thanks for reading this message

I recently acquired some surplus cable TV trunk line. I suspect the cable is 75 ohm but
not sure. The cable is 11/16 inch in diameter with black plastic coating over an
aluminum jacket there is a white dialectric and a thick center condutor. the numbers
written on the wire are T10 J. On the reel there is a Type No T10625JBFV1 and below
that the number GN7GN. I would appreciate any help at identifying this wire what it's

approxmatly worth and were I would be able to fine connector that would fit it.

Thanks Again
73's Doug VA3DMB

HELP!! I need to sell ALL my HF equipment. Here's a list;

Kenwood TS-690 w/internal tuner (tuner inop)	$1000
Kenwood IF232 Computer interface	$75
Kenwood SP-23 Speaker	$50
JPS NRF-7	$150
Kenwood MC-60 Desk Mic	$75
MFJ 962 Versa Tuner III 1.5KW	$100
Astron VS-35M Power Supply	$150
MFJ 1270C TNC	$75
Motorola Mocom 30 VHF (for packet)	$25
Motorola Micor 70cm (needs converting)	$25
GE Master II (?) 6m (commercial, needs conv)	$40

I need to sell ALL of this equipment... I don't really want to but i
have legal fees to take care of....

My e-mail address is;

jaykq4ms@ipass.net
or
kq4ms@juno.com

Might be some other things that I've forgotten.

Also, I can be reached at (919) 664-9384. Thats a digital pager. Page
me and I'll get back to you ASAP.

Thanks
Jay

Hi Doug VA3DMB

Bill N5WO on this end

I'm fairly sure what you have is 75 ohm cable TV coax. It is used to make the main cable runs fo a CATV system and works very nicely on the VHF and lower ham bands. In fact the stuff you have with the plastic jacket is the best.

We have used the stuff for years on VHF repeaters both rec. and trans. If you want to get technical there is a mis-match 50 ohm as compaired to 75 ohm but, it generaly won't cause any great problems below UHF. And, I might even use it at UHF freq. if the run was fairly short, say less than 150 ft., and the other choice was one of the RG-8's out there. If you were choosing between say Belden 9913 or LMR-400 I would choose the last.

As for the connectors there are commercial ones out there but, they are not for the faint at heart. The will cost you big bucks. Likely over 25.00 per connector. We have used, with good luck, a standard PL-259 connector on this cable with pretty good luck. Just remove enough of the jacket to expose the center cunductor to a length that will go out the end of the PL-259, you can solder the center conductor it should be copper or atlest copper clad. Now the shield is a little tricky. You need to remove the dielectric between the alum. shield and the center conductor. Clean it out for about 1/2 inch or 5/8's at most. Now remove the black plastic cover, about 1 inch should be fine. Take a hack saw and make several cuts in the alum. shield so it can be clamped down on the end of the PL-259. The cuts are to be made with the parallel to the cable longwise. Now come the tough part. You need to install the PL-259 (complete) on the cable so the center conductor extends out the end of the connector and so the shield comes up on the shoulder of the other end of the connector. However, be carfull not to bind up the workings of the threaded sleeve on the connector. Take a hose clamp, on of the screw clamp types, and cause the alum. shield to compress down on the sholder of the connector. Anyway it all works and it's a cheap way to make a connector for this stuff. This type of connector workes beter on the 1/2 inch verson of the same cable.

Well, this is possibly much more than you wanted to know if so throw the un-used part in the bit-bucket.....hi hi.

Check with you CATV venndor in the area, best to find the guys that take care of the lines they should be able to help you with this cable. As for what it's worth, sorry to say possibly not much if it has found its way to the surpluse market. However, if you need to put up a VHF repeater and need some hard line you may have a small gold mine.

Hope this helps

Bill Wyatt N5WO
Woodward, Oklahoma   USA

BTW be nice to the cable guys they might just give you a couple of ends
for your cable.....never hurts to ask.

The ratio between the inner and outer counductors will yield you the Zo =
of the line.

Check the ARRL or RSGB handbooks (or other engineering texts) to find =
the formulae.

I am looking for a 451X Tower- (I think that's the right p/n)
It is a 40' crankup tower that when nested is only 10' high

Does anyone have one they want to unload?

Please forward any info to

t�s

Hello and 73,
For Sale, a KLM Echo 70 432 mhz and 435 mhz USB, LSB &CW
transceiver. 10-watts. needs work. I bought it and paid $125.00
for it. Then bought a Kenwood TM-455A and lost interest in
fixing this radio. Well sell for $100.00 or best offer.

For Sale, 40 foot tall self supporting tower. Heavy Duty will
support 18sqft of antenna wind load. There is 5 sections each
is 8' tall. This sells new for 475.00 + shipping and or Tax.
Will sell this one for 250.00. Its located 75-miles north of
San Diego, CA This is a pick-up only. It can be picked up in a
Toyota or Nissan type truck or larger. Would also consider
trades such as a 175-watt UHF amplifier or ???? 73, Alan

I need an assembly/operating manual for the Dick Smith 80 Meter xcvr kit. This was sold in the US during the late 80's/early 90's in kit form only. I have 3 of them assembled from a ham fest but only one receives, none transmit. Would appreciate help in locating a manual. I will be glad to pay for copies, postage and a service fee for your trouble.

I have a limited number of EF Johnson Fleetcom II UHF rigs for sale.

These are easily converted to repeaters. I can provide the unit 2 ways.

As-Is - $50.00 + $10.00 s&h You do all of the conversion, alignment, recrystaling, etc. I will provide instructions for the conversion & a copy of service manual.

Ready-To-Go Repeater $300.00 Fleetcom II converted to repeater use, crystaled to your freqs, tuned and aligned, simple carrier operated relay. You still need to provide a duplexer, antenna, & ID'er
w/manual

These units are all pulled from service and tested & aligned on 468mhz.

I also have a limited number of service manuals for older commercial equipment. E-Mial your needs and I'll see what I can do.

Other Services available: (All prices + s&h)

Reprogramming of commercial equipment to Amatuer freqs - $35.00
Equipment Repair - $60.00/hr (1/2 hr min, estimate if repair will take more than 2 hr.)
Custom Cables
'Most anything else your rig might need.

E-mail your needs to:
kproctor@ix.netcom.com

I have an amplifier module that does about 300Watts output class AB from 20 to 80 MHz. The amplifier is designed for 48 Volts, but will work at reduced levels if powered with a lower voltage. It also requires a low current 12 volt supply for the biasing. It has 2 transistors and very nice input and output broadband transformers. Send me some e-mail if you need more info. This is a great amp module for a homebrew project.

Does anybody have the remote accessory for the Kenwood TM631 radio.
The Model number I believe is RS-10. If so I am interested in
purchasing one at a reasonable price. This would be a big help to
install the radio in my car.

x-mailer: Mozilla 2.01E-SYMPA (Win16; I)

Hi. I've got a few QST magazines looking for a good new home.

In total, 445 issues, which include 7 from the 1930's, 37 from the 1940's,
77 from the 1950's, 38 from the 1960's, 87 from the 1970's, 118 from the 1980's,
and
81 from the 1990's.

I'm asking $$ as follows:
for single issues, $5 each for 1930's,
$3 each for 1940's,
$2 each for 1950's,

$1 each for 1960's and 1970's,
$2 each for 1980's and 1990's.

Prices in Canadian dollars, postage extra if required.
Considerably cheaper for purchases of more than one issue.
$200 for the set.
Extremely flexible on prices.

Thanks.

MAKE YOUR OWN CABLE DESCRAMBLER - CHEAP!

Making your own Cable Test Box is simple!
Convert any cable box to a Cable Test Box, in no time!

If you've seen ads for converters that sell for up to
four hundred dollars, you know that this is a great deal.
(It does the same thing.) All modules are priced from
about ten to forty dollars!

Once you know how to get the the correct module, it's
simple to install, and they descramble all channels
on all systems. Don't be ripped off any more!

For more information, and a complete list of companies
that sell Test Modules, send Cash or Money order for
$5.00 to:

Ward Cable Enterprises

reply-to: basil@turn.com
newsgroups:
rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.swap

I need a manual for an old Heathkit SB-110 6 Meter Rig. This is an old
tube rig, and is currently in non-working, but otherwise good, condition.
I am willing to pay copy and postal charges. The more info I get on this
radio, the better, so if you have articles or other writings about the
Heathkit SB-110, I would be interested in those also.

Thank you in advance for your help.

Subject: Needed/Wanted: Vacuum tubes
Date: 1996/09/18
Message-ID: <MPG.ca9dbf15340ddfb989681@news.gte.net>#1/1
X-Deja-AN: 181393861
summary: Wanted: Vacuum tubes
organization: Turnaround Computing, Inc.
keywords: want,need,vacuum,tubes
reply-to: basil@turn.com
newsgroups:
rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.swap

I need a bunch of vacuum tubes for a couple of radios that I am working
on: a Collins KWM-2A and a Heathkit SB-110 6 Meter Rig. Some of the tubes
that I need are as follows:

```
6U8A (Qty: 3)\
6EB8          \
6EA8           ---- These are "must haves"
```

```
6DC6          /
6AZ8 (Qty: 2)/

12AT7 (Qty: 2)
12AX7
6BN8 (Qty: 2)
6AZ8 (Qty: 2)
6146B (Qty: 5)
6CL6
```

If you have any of these tubes, let me know. I would prefer to purchase them all from one person, if possible, but I will purchase them from different places, if needed. If I could pick them up (local to Dallas/Ft. Worth, Texas, area), that would be a _HUGE_ plus. I will pay shipping costs.

Thank you in advance for your help.

basil@turn.com (Basil Arrick, KB5KHR) whistled a happy tune like:

|>I need a bunch of vacuum tubes for a couple of radios that I am working
|>on: a Collins KWM-2A and a Heathkit SB-110 6 Meter Rig. Some of the tubes
|>that I need are as follows:

```
|>6U8A (Qty: 3)\
|>6EB8          \
|>6EA8           ---- These are "must haves"
|>6DC6          /
|>6AZ8 (Qty: 2)/

|>12AT7 (Qty: 2)
|>12AX7
|>6BN8 (Qty: 2)
|>6AZ8 (Qty: 2)
|>6146B (Qty: 5)
|>6CL6

|>If you have any of these tubes, let me know. I would prefer to purchase
|>them all from one person, if possible, but I will purchase them from
|>different places, if needed. If I could pick them up (local to Dallas/Ft.
|>Worth, Texas, area), that would be a _HUGE_ plus. I will pay shipping
|>costs.

Hi again - get    tubes.txt     too while you are there!

ASOLUTLY MINT - HAS NEVER TRANSMITTED!

purchased new, all original manuals, box etc.

KENWOOD TS-850S / AT (internal automatic antenna-tuner!), 160-10 meter, MARS modifiable (no mods have been done to this radio), 150kHz - 30MHz receive, SSB IF slope tuning with independant High & Low Cut control, IF notch and audio filters, full and semi-break-in CW, fine tuning on CW, 100 mem channels, keyboard freq entry, RIT/XIT, dual mode noise blanker, RF attenuator, switchable AGC, more spec's on request.

I'm also including with the transeiver a KENWOOD MC-85 desk mic, a Mosley MP-33 3-ele tri-band (10-15-20 meter) beam antenna, an Antron-99 10 meter vert antenna, and a CDE AR-22R antenna rotator and controller, and what ever other goodies I can find that go with this stuff.

Price is $1,400! OR $1,?00 cash and a nice 2m/70cm hand-held (prefer Yaesu FT-530 with acc's) but will listen to any offers.   Wives, Christmas is right around the corner!

call evenings (503)390-0942 or email me at:
rb@cyberhighway.net

I have the following Ham Gear FOR SALE....

Kenwood TS-450AT w/ narrow SB Filter and Heil Desk Mic. It's in Mint Condition and works fine. Price: $ 750.00 + shipping

Nye Viking Roller Inductor Tuner Model MB-V-A . Great Shape & Works Fine. Price: $ 400.00 + shipping

Henry 2k-4 Console Amp. Has new transformer. Works Great and Looks just as good. Because of size this is pickup only.... Price: $ 750.00

Reason for selling is that I just got married a few months ago and either the Ham Gear or me go.

Make all replys to:

farmboy@rollanet.org

Thanks for reading....

Jim

Hey, fair is fair, make her give up all her hobbies too, and see what she says then. It goes both ways.

Bill

I recently purchased two used Uniden GMR100's and did not get an owners
manual with them. Does anyone know where I can get one or does anyone
have one they would be willing to sell?

Please e-mail me with your responses!

Thanks in advance!

Andrew

Does anyone have a Uniden Speaker/Mic they would like to sell? Has
anyone had any experience with one or have an more information about it
(PTT or voice-activated?)?

Thanks in advance!

newsgroups: rec.radio.amateur.swap,rec.radio.swap,rec.ham-radio.swap

Excellent short wave receiver for SWL or Ham radio.

Many think this R-390A/URR is the best SWL receiver ever made. This one is a late model (one of the last production runs), made by EAC. It is big, heavy, uses tubes. Quality look, feel, and performance. 110 or 220 VAC. Even has ovens for oscillator stability.

Has 6 IF selectivity filters (0.1, 1, 2, 4, 8 and 16 KHz).

Also 2 audio filter positions (Wide and Narrow).

2 meters (Line Level, Carrier Level).

Total of 17 knobs (Line Meter sw, Line Gain ctl, Ant Trim ctl, AGC sw, Limiter ctl, Audio Response sw, Break-In sw, Bandwidth sw, BFO Pitch ctl, Function sw, BFO sw, Dial Lock ctl, Zero Adj ctl, Local Gain ctl, RF Gain ctl, Megacycle Change ctl, Kilocycle Change ctl)

Rack mount style (no cabinet, but has all covers). 19 in wide, 10.5 high, about 15 deep.

No speaker. No manual (Fair radio sales has manual).

It is unusually clean, near-new appearance. I can furnish photos with SASE - ask.

$300 plus UPS if shipped.

I want to buy a CW filter for my ICOM Ham Radio.

This can be the 9 MHz series, like the

FL32 (500 Hz BW), or the
FL63 (250 Hz BW),

Or, the FL52A (500Hz BW) for the 455KHz IF.

These fit several of the ICOM radios. Mine is the 751.

How much?

I want a Heath HW-9 with the WARC band pack installed. Any condition considered, but must have WARC bands and full manual. Accessories OK, but not required. Please quote exact condition, appearance, accessories and price.

Thanks

Jerry Flanders   W4UKU   South Carolina   flanders@groupz.net

I want to buy a CW filter for my ICOM Ham Radio.

I need the FL52A (500Hz BW) for the 455KHz IF.

These fit several of the ICOM radios.

How much?

I have a Yaesu FT-840 HF tranceiver which has spent most of the 1+ year I've owned it in its factory carton. I bought it planning to learn CW, and that hasn't happened as quickly as I had planned. The unit is in mint condition, with original carton and manual.

The rig is a general coveral receiver 100kHz - 30MHz, and transmits 160M - 10M. It has full 10M repeater support. It is a current Yaesu model, and still sells at AES for approx. $800.

I am interested in either selling (best reasonable offer) or trading for satellite TV gear.

I would like to give away a couple years of old QST magazines. Covers
1979 to 1981 aprox. Free if you are local, otherwise pay shipping by UPS
or US Mail book rate.

While I'm here I'd like to mention that I'm looking for a low end HF
trancsceiver with receive capability from .5 MHz to 30 MHz so it can
double as my short wave receiver.

We need QST 1-6/77; 1,8,9 and 12/1979; 1,2,12/1980; 1/1981 to complete our
archive. Can you help?
BTW: we also need: 6/1986; 1/1992; 11 and 12/1994; 1-8/1995 - just in case
anybody else can help.

QSL COLLECTION is a voluntary project, and the largest collection of its kind worldwide. We need magazines, books etc. for reference and research and would be particularly grateful for *old* issues (from the early years up to the seventies).

I want to buy a CW filter for my ICOM Ham Radio.

I need the FL52A (500Hz BW) for the 455KHz IF.

These fit several of the ICOM radios.

How much?

Jerry W4UKU flanders@groupz.net

I have a Kenwood TM-741A with UT-28s 10 meter band unit added.   All faqs I have seen state that cutting the green wire and removing R54 & R55 will enable Tx from 26MHz to 45 MHz, and Rx from 18 MHz to 54 MHz. I bought this radio with this mod and have checked and verified it.   However, when I try to Tx in the 33MHz range my output is only about 1.5 watts. It will not receive at all here. I am a vol. firefighter and my dept. as well as almost all other VFD's around this area use the 33 MHz range.   My Rx & Tx in the 2 meter and 440 mods check out fine. (I'm using 155MHz & 450 MHz ranges.).   Can anyone offer any help? Thanks.

I have the AEA CP-1 computer patch (radio modem), a complete VIC-20 and the MBA-TOR cartridge that plugs into the VIC (or C-64). You add the monitor and you have everything needed to send and/or receive Morse, ASCII, Baudot (RTTY) and Amtor. I will also include the Kantronics Hamsoft cartidge that will allow you to operate Morse and RTTY.

This package will include all books, manuals, papers, power supply and RF modulator for the VIC.

I do have the monitor for the VIC/C-64 but I do not want to pay the shipping on that fella. You can have it for $10 and you ship.

Trades: I would like a dedicated CW keyboard. The MFJ 451 or 451X would be a good example.

reply-to: mwatt@tfs.net
newsgroups: rec.radio.amateur.equipment,rec.radio.amateur.swap

I have a Toshiba T-1900 laptop, grayscale b/w screen, brand new
battery, 486, 4 meg RAM, 200 meg HD (uncompressed -- 360 compressed),
14.4 fax/data PCMCIA modem, charger and carrying case (Targa). I'm
looking to swap for a clean TS-50 or similar mobile HF rig. Also have

an external monitor/keyboard/Microsoft mouse, and Epson Stylus 400 ESC/P2 Inkjet printer that I can throw in for an HF/VHF all-mode mobile ICOM IC-706. Manuals for the computer, and the card manager software, are included.

Being an apartment dweller, would really like to go compact HF. Personal delivery can be arranged throughout the midwest and southeast (I'm in Kansas City, and for the next month or so will still be travelling through Missouri to Western Tennessee. Iowa, Southern Nebraska, Western Kansas, Eastern Oklahoma -- including OKC -- East and Northwest Arkansas, Western Kentucky, Middle Tennessee, North Mississippi, Northern Alabama are all potential areas for delivery, on my schedule!)

This computer is in excellent condition, and was used both on the road and as a primary home computer with the accessories. Reason for trade: got a new pentium at home, and have little need for mobile computing anymore.

Address/Phone number will be given out by private e-mail only, for serious inquiries. Cash price would be $950 for the laptop, $1,250 with the external accessories.

Thanks,

Marty KN4BH/0

I am looking for a 451X Tower- (I think that's the
right p/n)
It is a 40' crankup tower that when nested is only
10' high

Does anyone have one they want to unload?

Please forward any info to

I have a ranger 2970,   100 watt,10-11 meter , for sale.
This radio was $539.00 new. I still is new, but I will sacrifice
for $250.00 OBO.
ALSO have a new 20 Watt external power supply for $75.00 OBO

Will consider $300.00 for Entire setup with
panasonic external speaker unit.

All Offers considered. Also consider swap for good Handheld's

Contact Art via;

Bill,

For your info, I paid $190 at a flea market for a 3sat in excellent condition. I suspect you'll pay between that and $250.

Good luck.

Harold

I bought a box of junk that used to be a "Lafayette Comstat 25A" 23 channels citizens band radio. There isnt much left, and all the tubes are gone from inside it (it's got an inspection date of early 1969 on it), plus (i assume) it was before circuit cabinets/pcb's so its all wire to wire so God knows what else is wrong with it. Just wanted to let anyone who might be rebuilding one / looking for one know that I have it and they're happy to any pieces of it before I rip it apart.

Oh yeah, I can also send you the tube sockets (7 and 9 hole) if you need them for another project. Advance apologies as I couldnt read the charters for the groups I posted to (thats quite a few) since I'm not even a Ham. I tried stripping it down as much as possible, replies to email unless relevant to group (in which case, gimme a Cc because I might be interested).

TIA,
   -llama

I have an Icom 38-A 220 MHz mobile radio for sale. The radio is very clean, and has the orignal mobile mounting bracket, and microphone.
Asking $225.00 shipped.
e-mail to dwc@crl.com

I am looking for a 451X Tower- (I think that's the right p/n)
It is a 40' crankup tower that when nested is only 10' high

Does anyone have one they want to unload?

Please forward any info to

t�s
tim@address.net

Hello Hams and AmRadio Buffs!

I'm a license plate collector, and as always, I'm looking to add some plates to my collection. If you have a plate (or plates) that are just lying around, drop me a line! I'll probably buy it!

I have a pretty good collection going, and some can be seen on my license plate collectors site -
http://users.aol.com/PL8Seditor/queen-b.htm

Hope I hear from you!

(by the way, all butt-kissing aside, many thanks to all the ham operators who have helped me out with my hobby in the past - you guys (and girls) have been really decent and helpful, and it IS appreciated.
- Drewski)

just found out that the place i was going to get it from
ran out of stock.

I need the FL 63-A, 250 Hz narrow CW filter for my IC 735.

If you have one to spare, please let me know.

Message-ID: <2115@arrl.org>
Date: 25 Aug 93 16:50:16 EDT
Lines: 21

Someone should have grabbed this when the price
was LOW! I had thought that RF Parts was
selling new EIMACs for under $400 so I cut my
price. SURPRISE! They have surplus EIMACs for
$439.95, or new Chinese Pentas for about the
same price.

Sooo: The price for this new, sealed EIMAC
4CX1000A tube is $400, which will cover UPS
shipping and insurance in the US.

If you have an amp that uses this tube or
you're thinking of building one that does,
you can't afford to pass this up. You'll kick
yourself....

I am in need of a power plug for my Kenwood TS-820S. Actually is is a
jack that fits on the back of the unit and allows for either 120/200V
AC or 12V DC, depending on how it is wired. The jack's holes look like
this:

```
     | |  - -

     - -  - -

     | |  - -
```

It is about 1 1/4 inch wide by 1 inch tall. This item fits on the back
of the TS-820 and is connected to a 2-wire wall plug.

If anyone can direct me to a source for this type of jack, THANKS!

Tom
KJ5LT

Greetings!

I have a nice IC-751 for sale. It comes with an ICOM external
power supply, a hand mike with u/d keys and a computer interface
(level converter).

Price: A firm $700 plus shipping.

If you're interested, reply via e-mail and let's hook up on
the phone.

Thanks,

I'm looking for a pocket organizer, preferably something that has an
operating system, DOS-ish, like the Atari Portfolio. But inexpensive.
It needs to have a PC interface (serial or parallel).

I have a Radio Shack HTX-100 10 meter amateur transceiver. It's in
good condition with manuals; I'd consider trading it for a well
equipped prganizer package.

I'm looking for an old rotor (model HAM-M) made by Cornell-Dubilier Electronics (rotor division) once of Fuquay Springs, North Carolina. The original was from ~1968 and the company has moved or ceased to exist. I'd appreciate any information about where they are now (if they are) or about a mechanically compatible replacement. Electrical compatibility is not particularly important. (The reason mechanical compatibility is important is that the rotor was mounted using their custom bottom plated rather than a pole. The plate is well attached to the tower, and the whole thing is well weathered. Using a different style of mounting looks like major work. :)

Thanks,
Dan Lanciani

Keywords: Rotor, Rotator, Az, El
Xref: nntp.gmd.de rec.radio.amateur.space:1590 rec.radio.amateur.antenna:3732

Hello,

I have a like new Az/El rotator for sale. It is designed for light duty vhf/uhf antennas, such as an Oscar setup. Comes ready to mount on a 1.5 inch (max) vertical mast and will accept up to a 1.5 inch horizontal mast such as the fiberglass unit from KLM. Comes with a control head for each rotor, and can be easily connected to a computer for automatic control (with minor modifications).

These units are capable of carrying a fair load. I have had no problems turning a pair of KLM's (2M-14C/435-18C), even without balancing them. Rotation time is about 60 seconds AZ, 30 seconds EL (180 degrees). These units have never been outdoors either...only used inside.

I am offering two 75 foot lengths of new 5 conductor wire FREE with the package. Also, the unit can be controlled using a single 8 conductor rotor wire if desired.

I am asking $175 + shipping.

Please email to debaker@bnr.ca
or call, 214-684-7351 (day)
73,

A GREAT hamfest with commercial exhibitors, and hams from many
different states! It's a biggie! Don't miss The Tuthill Hamfest.
73,
```

Subject: ROHN-45 SELF-SUPPORTING TOWER FOR SALE
Date: 1 Jul 1994 20:05:27 GMT
Organization: Bolt Beranek and Newman (BBN)

Lines: 21
Distribution: ne
Message-ID: <2v1su7$hcv@info-server.bbn.com>
NNTP-Posting-Host: caer-grawnt.bbn.com
Keywords: Self-supporting, tower, Rohn-45

Hello,
This is posted for a friend.

FOR SALE: SELF-SUPPORTING ROHN-45-BX TOWER
Thrust bearing installed at the top section.
7 years old, fair condition.
$325 - call (617) 484-9153, ALEX, WK1O.

The tower will easely handle a tribander like TA33 plus
some UHF and VHF antennas. It is not suitable for TH7
antenna size. The tower is disassembled and ready to
pick up in Belmont, MA (15 min from the center of Boston).

P.S.The original model of the tower is ROHN-HAX-48, designation BX is probably
not 100% correct. The tower was designed to handle a tribander like TA-33
which is Mosley tribander with the length of the boom 12f (I have one for sale
if you are interested). That tribander + 6m 10-element yagi + 2m 10-elem yagi
+ .7m 15-element yagi have been on the top of this tower for 7 years.

If interested or you have any question, please call
(617) 484-9153 ALEX, WK1O.

I figured it's time to upgrade to a more modern rig so ....anyone have
an ICOM IC-211 (the 2m base station) for sale?

(Hey, don't laugh, my main rig is a TS700, the mobiles are a Kenwood
TR7600 and an ICOM IC-280........)

Forward into the late 70's!

Lee

Im rebuilding the phaseing delay lines for my KLM amateur satellite yagis and need to located a source to acquire about ten feet of RG-302 75 ohms and ten feet of RG-303 50 ohms, teflon coax cable.

RG-302 & RG-303 both have teflon dielectric and a silvered copper shield, both have inner conductors of silver-plated copper-plated steel. They are designed for high-temperature operation. I suspect they were selected by the antenna manufacturer because of low temperature coefficients. I don't want to use Radio Shack 75 ohm TV cable.

Different velocity factors between teflon and polyethylene.

polyethylene = 66.5%   teflon = 69%

KLM sells the complete phaseing kit replacements for $49 each, however I feel I should be able to replace just the coax for at least half that price.

If anyone knows of a source for RG-302 & RG-303, please post here or reply via eMAIL direct.

Thanks and 73s,
Tom - WB7ASR...   (not speaking for Intel)

I have the following items forsale. All items are in good working order. Will consider offers or trades. Most items have some sort of manuals a few have boxes. Will consider trades, below the sale list is a list of wanted items.

RF: 2 11 elem 900mhz DownEast loop yagi. (up < 3 months)
$ 35 each
1 45 elements MODE S Down East loop yagi's(never up)
$ 50

Uniden CP 1500 cell bag phone $ 60

AMPIRE preamp for 432 (oscar) $100
AMPIRE preamp for 144 (oscar) $100
Down East mode S preamp Kit, unassembled. $ 50
ARR P28VD 10meter preamp. $ 50
Yeasu SC-1 Station console. $ 40
mount a 144 and 440 multi mode mobiles onto unit for
intergrated oscar station. Includes clock, tone pad
and B/J microphone switch.

MAXON XK wireless radar detector. $ 50
1 sender mount behind grill, receiver can be mounted
anywhere out of view

TVC-2G ATV receiver board, NEW unused $ 30
PA5 ATV 10watt amp, NEW unused $ 75
FMA5-E add audio to your ATV video signal, NEW unused
$ 20
TXA5-70 video transmiter board. $ 50
Panasonic WV 1500 B/W camera with lens (condition fair)
$ 50
RCA TC2112 B/W camera with ALC lens (condition fair $ 75
Video 100 B/W video monitor. $ 40

PACKET: Hapn 4800 kit, unassembled $ 50
k9ng modem, assembled $ 50

CPU: AMI fullsize 386/25 $ 60
IBM lugable, 640K, 360 floppy, PS, keyboard, monitor
$ 50

CASE: PC case with 200watt PS, 360k floppy $ 30
PC mini tower 200watt PS, no face plate $ 30

Disk:	2 ESDI 383mb 1/2ht	$200 each
	AT ESDI controller (free with ESDI drives)	$ 75
	CDC 669mb SCSI hard disk FH	$300
	207MB SCSI disk. 3.5	$125 each
I/O:	AT&T IPC802 8 serial, 2 parallel (dos/unix drivers)	$ 60
	3B2 512kb memory cards	$ 25
	3b2 ports card	$ 30
	500watt internal PC UPS. Takes 1 8bit slot	$ 75
	Atlantic Research Rs232 Patch Panel 16 bays, 10 populated with monitor port	$ 60
MODEM:	Telebit T3000	$325
	Telebit WorldBlazer	$375
MISC:	Sony SVU-S1VSL Voice unit, new, unused	$ 75
	Sony SVU-S1VSL Voice unit, used	$ 50
	2 Obrien Life vest, under 1 season	$ 30 each
TERM:	VT1200 DEC Xterminal	$500

ASIS: All items removed from service work but current conditon unknow.

386-16 motherboard, OK. Removed from service working	$ 25
XT-10mhz, 512K	$ 10

TRADES: I am looking for the following items.

Laser printer with parallel port, HP or Postscript
Ham radio equipment
Wireless lan or microwave equipment.
Sun Sparc workstations
Sbus video capture board.
SunTuner
8mm tape drive.
Interesting computer items.
110v gas generator
whatever..

Correction: Hope that the full text follows this time.

The Western Connecticut Hamfest, sponsored by the Candlewood Amateur Radio Association will be held this coming weekend. Plan to attend!

When: Sunday, 18 SEP 94, 0800-1300 EDT, rain or shine (but hope for shine :-)

Where: Edmond Town Hall, Newtown, CT. (near the Flagpole)
Directions: I-84 to exit 10, take US Route 6 South to the Flagpole (State Route 25), and you should see us on the right.

Talk-in: Danbury repeater 147.12 +600, PL 141.3

Admission: $4.00, kids under 12 free.

ARRL sanctioned. Handicapped access. Door prizes. Refreshments. Ample parking.

Hope to see you there.
73 DE N1QNK
Jim

I fixed the Sten. I got it with a 10" barrel and a 10" barrel. I heard about a gun expert. He's done quite a few autoconversions already.

Bonjour et merci de lire cette petite annonce.

Je vends (cause double emploi) le TNC (Terminal Node Controller) suivant :

```
                      *****************************
                      *                           *
                      *    KANTRONICS KAM PLUS    *
                      *                           *
                      *****************************
```

dont les principales caracteristiques sont :

- tous modes : packet, CW, FAX, NAVTEX/AMTEX, RTTY/ACSII, AMTOR
  PACTOR, G-TOR ...
- mode KISS (pour NOS : TCP/IP par radio)
- PBBS de 128 Ko (Personnal Mail System + BBS)
- 2 ports separes (HF + VHF/UHF simultanes)
- Gateway HF <-> VHF/UHF
- KA-NODE (digirepeater 'intelligent' dans le style de TheNet)
- Remote Access (acces distant par le SYSOP)
- ... etc

Note : Ce TNC a ete essaye dans la magazine MEGAHERTZ de Juillet il me semble, du moins dans un tres recent numero de ce magazine. Vous pouvez donc vous reporter a cet essai ...

Bien entendu, il est vendu dans son emballage d'origine et avec toutes les documentations et soft originaux.

Le prix n'est pas fixe car je desirerais echange ceci contre un TX/RX UHF de preference (ou VHF) portable de preference (ou mobile) dans le style TH 28/48 E KENWOOD.

Repondre par E-mail ou me contacter directement aux heures de bureau au numero mentionne dans la signature.

Souhaitant votre interet,
73 a tous,

Several members of our local RACES group are working on a project to provide improved local communications in times of emergency.

Known as the "repeater in an ice chest" project, we are assembling a small, low powered 440 MHz repeater for portable deployment in an emergency.

We are currently looking for 440 MHz duplexers, preferably the six-cavity flat type previously used for IMTS mobile phone type applications. I think that these were manufactured by Phelps-Dodge.

Any assistance would be appreciated. Thanks!

I have several Motorola HT220s (and a GE and a Maxon) that I
need to get crystals for.  Can anyone suggest a place that sells
crystals for a reasonable price? I also need a line on low cost
batteries for the same radios.

Thanks in advance.

I'm looking for information on the Stoddard Electronics line of field intensity meters (NM-##). They also produced militarized units with mil-nomenclature (usually PRM- or ME-).

In particular, each model's frequency range, accessory antennas required, etc., would be greatly appreciated.

Even better would be a copy of an old company catalog.

Please reply directly,
Scott

All,

I am selling my PK232 MBX Multilmode Controler from AEA for $75.00
plus shipping. It is in good condition, but missing some of the screws
to the top cover do to replacing the lithium battery. It works great. I
used it only for SWL reception a few years ago. I thought I may need it
and hung on to it for all these years, but as you can see I no longer
need it based on this post.

Thanks,

Gary G. Herbst

I would like to get in touch with anyone who purchased a Trimble magmount,
GPS active patch antenna at Dayton last week. Please contact me at
eparish@netcom.com. I know I spoke with a couple of people near the booth
(under that outdoor tent) of the vendor who was selling them.

Thanks!
Ed Parish WA2SCA

For Sale: Realistic DX-390 Portable Shortwave Receiver. This radio covers 1.711 to 29.999 mHz shortwave in 1 or 5 kHz steps, 88-108 FM, 530-1710 AM, and 150-519 longwave. It includes BFO, direct access keypad, digital readout, clock/time display, external antenna jack, and alarm functions. Originally cost about $279.95 at Radio Shack and is in good working condition. Just $100 shipped via UPS to anywhere in the continental U.S. Contact future@eskimo.com if interested, or call (206) 277-5287. If you live in the Seattle area and can pick up, I will knock $15 off the price.

Note: My apologies to anyone who saw this ad originally at a much lower price. I cannot afford to sell that low.

summary: Need info on Analogic/Data Precision 6000 scope

I am looking into the purchase of a surplus Analogic/Data Precision Model 6000 oscilloscope with a model 650 vertical plug-in unit. I have a few questions about this unit:

1) Is this unit basically a 4-channel scope with some data analysis capability built-in?

2) What is the bandwidth of this scope/plug-in combo?
3) Is it useful, or should I look into a more conventional HP/Tek/Fluke unit?
4) Is it reliable, and are accessories/manuals available?

Thanks in advance for your help.

Stan

I am looking for a service manual for a high pwr UHF Motorola Mitrek. The unit is
presently on 463.300 MHz, if this helps.

Yes I already know I can get anything for this radio from Motorola, so please
don't
send me their 800 number--I have it. A used book from someone out here would be
sufficient.

Also can someone direct me to where I can find the mods for full duplex operation
for the Mitrek? Nothing seems to be on the Oakland FTP site or a few other sites.

Any help finding these two items is greatly appreciated.

Aloha,

Does anyone out there have any information on a shareware program that teaches CW on a sound blaster ? Most of the ones I have tried, and it's been ALOT of them, work only with the P.C. Speaker. Even Super Morse sounds REALLY poor using a Sound blaster...

Any thoughts ?

      Hello, my name is Mike and I am in search of a Motorola
Saber 3 radio. As much as I would love to have a "secure" Saber
my HAM lic can live with only a "clear" version. 440-470 stock
pkg is fine.
      Sounds easy enough, save for this one small caviot, it
must, must, have it's Serial Number tag visible and in good
```

condition on the back of the radio. Here in Brooklyn North the
police often "detain you for varification of ownership" of
your radio if the SN# tag is not in place. I have a wonderfull
Saber 3 that I bought at a HAM fest but it lacks the desired SN#.

So if for some reason money sounds better to you then
owning a Saber 3 clear uhf 5 watt radio then e-mail me fast

Okay, before you flame me I know this isn't rec.music.makers.marketplace but a place for radio swapping.

However the item I am looking for is a Roland TB-303 Bassline (it looks like a little drum machine). Several people I know have managed to obtain them from Hamfests, so I figure I would ask if anybody has seen one or happens to have one.

It can be in any condition, working or not.

Since i have been looking for quite some time, if anyone can help me out I would certainly appreciate it.

Thanks.

Adam.

newsgroups: rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.swap
beer: Budweiser

For Sale:

Ranger RCI 2950, peaked & tuned by reputable radio technician at local ham radio store.. on low power, this unit deadkeys 2w and swings to 16w at full modulation. high power deadkeys at 9w and swings to 25w. Sideband PEP is 35w.

Wilson 1000 is the white magmount model.

Palomar 200 deadkeys 150w and swings to 220w on high power.. (3 power settings, with preamp)

People tell me that this setup sounds crystal clear and viciously LOUD, even with the stock microphone. I bought everything about 2 months ago, played with it for about a month, and it's been sitting in my closet since. I finally have a HAM liscense now and I have no need or desire to own CB equipment.. I've got my eyes on a nice VHF/UHF all-mode radio and I must liquidate this stuff in order to afford it.

$425 takes everything... I do not want to part it out. this price is FIRM.

They are WAY up on the north side of OKC (maybe even Edmond) and I'm way down
on the south side. But I've bought several things from them, no problem.
They have a small display area, but are basically geared to mail order.
They've been in business for a few years now. They try to stay competitive
even when Hams want the wholesale price. I've seen em sell a radio for
five bucks over wholesale. I guess there's money in volume...

I've dealt with OCC on 3 occaisions, beginning about Sept. 1994.  I have no
complaints with them.  I can't speak about return policies or anything, since
I've had no need to return, but I'd encourage you to buy from there.

I have purchased two radios form Oklahoma Comm and have been very happy with the service, price and the way that I was treated. I don't believe you can go wrong with them.

I LIVE in OKC, and I buy from them regularly.  For the most part
they're nice guys, and they seem to work hard to take care of their
customers.  I've made the same discovery, i.e., they're cheaper than
most of the other mail order places.  Give them a try, I don't think
you'll be disappointed.  Tell them KC5KBC/John gave them a thumb's up!

Add me to the list of satisfied customers - I called to order a used radio
last tuesday, and it was in my hands on Friday (in Denver). The shipment
included MORE accessories than they originally claimed, they didn't charge
for shipment, everything was in excellent shape and well packaged. Definately
pleased at this end.

Hi Greg,

I live a few miles from Oklahoma Comm Center and drop by often for a chat with Mike and Tony. They are the two guys you will most often deal with when calling on the phone. They are both knowledgeable active hams and are glad to share their experiences to help you pick out the rig that is right for you. I have never seen a better price on equipment or support for the buyer. I will admit that they are more geared for mail order than counter sales and if you walk into the showroom, you might wait awhile before they get around to helping you. If you are looking for reassurance, you have it. They are on the up and up and serious about selling you ham gear now and in the future.

P.S. - If you talk to Mike, tell him Glenn said he is a bottomfeeder. If you talk to Tony, have him pass the message to mike.   o<:-)%

I meed some parts for busted radios.

Display for Yaesu FRG9600. It's a big vacuum fluorescent on the front panel board.
Consider the whole board to reduce chance of damage to display.

Recieve Crystal for Kenwood TH-21AT.  It's X2 on the schematic.  Unfortunately,
Kenwood sought not to put the frequency on the schematic.  The frequency of
oscillation is not what's marked on the xtal, and neither are the frequency it
needs
to be to make the radio work.  I bought it used, so don't know if it's the stock
xtal.  Receive freq is about 10KHz off.  If someone has a service manual, I'd
appreciate knowing the correct frequency and part number for the crystal.

Has anyone found a way to repair the "lip" that holds the bottom of the battery
on.
 Every TH-XXAT I've ever seen has a cracked lip.  I'm considering making a small
brass part that either stuffs down between the metal radio enclosure and the
plastic
outer case or solders to the top shield.  Any ideas?

As I recall, the replacement case comes with a touchtone pad.  So there ought to
be
a bunch of old touchtone pads out there in junk boxes.  I'd like to try to modify
one to make an encoder for a Standard C508A.  Anybody willing to part with one?

thanks,
miker

Hi!

I've got a Kenwood TK-801S UHF 6 channel mobile radio that needs to be reprogrammed. I have no programming info. Can anyone burn the PROMs (M54730AP x2) and send them to me via the mail?

If you can help me out, please email me the costs and I'll send the freq info.

THANKS!

De Greg Carey, KN4EL

CQ:
I am looking for a heavy duty, 35-40 continuous amp. 13.8V power supply. If anyone has one in mint condition for sale, or can direct me towards one, please let me know.

Thanks in advance.

73, Greg, KN4EL

Is there a source for information on at least the most popular equipment.
I see postings for this and that but most don't list features.
Is there a place to look them up. The Yeasu web page only lists current
models.

Should we start a Web site or FAQ where people who are selling
add descriptions to the existing list and augment existing descriptions?

Ed

Wanted 1MB and 4MB 30-pin SIMMS with parity, not working. With or without chips.

I have the chips, just not the boards to put them on.

Thanks, miker

I am looking for some lafayette radio, allied electronics, and heathkit catalogs from 1957 thru 1965.
would appreciate any help and/or any leads you can give me.

thanks
bobby wb5wur
